

## CORRIGENDUM

Due to an error in the data published for the euro area, some euro area figures in the October release of Production in construction have slightly changed, including in the title.

- **The monthly change of production in construction in the euro area in October** (down by 0.9% instead of 1.0% as previously indicated in the main title and in the first paragraph of the first page)
- **The monthly change of production in construction in the euro area in September** (up by 0.8% instead of 0.9% - first paragraph on page 1 and under Revisions on page 2)
- **The monthly change for building construction in the euro area in October** (down by 0.8% instead of 0.9% - first paragraph on page 2)
- **The annual change of building construction in the euro area in October** (down by 0.7% instead of 0.8% – second paragraph on page 2)

The corrections are marked with an asterisk (\*) in the text. The data of the euro area were also updated in the tables; the changes are not marked in the tables.

## **Methods and definitions**

The **index of production in construction** approximates the evolution of the volume of production within the sector, broken down into building construction and civil engineering.

**Seasonally adjusted** euro area and EU series are calculated by aggregating the seasonally adjusted national data. Eurostat carries out the seasonal adjustment of the data for those countries that do not adjust their data for seasonal effects.

The monthly index as presented in this News Release is calculated only on the basis of the data of those countries reporting monthly data. Missing observations from Member States for recent months are estimated for the calculation of the euro area and the EU aggregates.

## **Revisions and timetable**

Data of previous months have been revised compared with those issued in News Release [131/2023](#) of 20 November 2023. The monthly percentage change for September 2023 was revised from +0.4% to +0.8%\* in the euro area and from +0.5% to +0.7% in the EU.
