Methods and definitions

European quarterly national accounts are compiled in accordance with the European System of Accounts 2010 (ESA 2010).

The preliminary flash estimate of the third quarter of 2018 GDP growth presented in this release is based on the data of 16 Member States, covering 92% of EA19 GDP (89% of EU28 GDP).

Two statistical working papers present the preliminary GDP flash methodology for the European estimates and Member States estimates.

Revisions and timetable

With this preliminary flash estimate, euro area and EU GDP figures for earlier quarters are not revised.

All figures presented in this release may be revised with the GDP t+45 flash estimate scheduled for 14 November 2018 and subsequently by the estimate of GDP and main aggregates scheduled for 7 December 2018.

Data on revisions for test estimations, showing that the preliminary flash estimation procedure is sufficiently reliable, are available in chapter 5 of the statistical working paper Euro area and EU GDP flash estimates at 30 days.
