

61/2019 - 11 April 2019

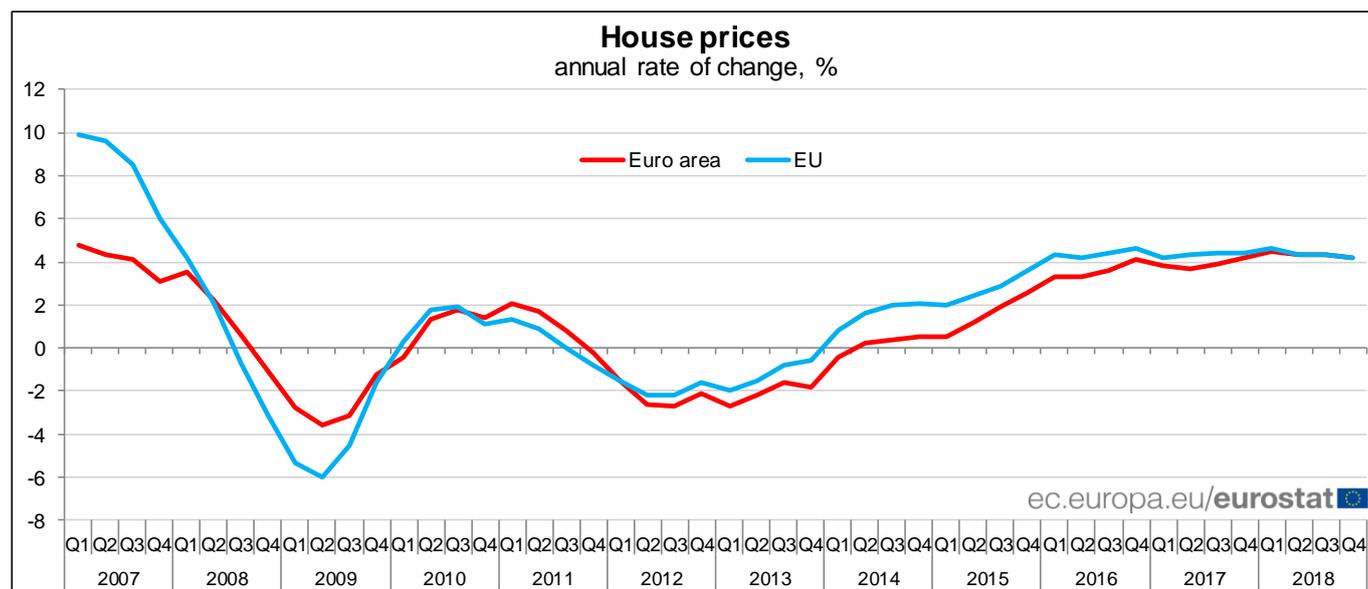

Following a revision of data on 20 May 2019, the Slovenian Statistical Office has withdrawn the data originally supplied. Revised data will be available in July.  
We apologise for any inconvenience this may have caused.

## Fourth quarter of 2018 compared with fourth quarter of 2017

# House prices up by 4.2% in both the euro area and the EU

House prices, as measured by the House Price Index, rose by 4.2% in both the **euro area** and the **EU** in the fourth quarter of 2018 compared with the same quarter of the previous year. These figures come from **Eurostat, the statistical office of the European Union**.

Compared with the third quarter of 2018, house prices rose by 0.7% in the **euro area** and by 0.6% in the **EU** in the fourth quarter of 2018.

### House price developments in the EU Member States

Among the Member States for which data are available, the highest annual increases in house prices in the fourth quarter of 2018 were recorded in **Latvia** (+11.8%) and **Czechia** (+9.9%), while prices fell in **Italy** (-0.6%).

Compared with the previous quarter, the highest increases were recorded in **Latvia** (+4.3%) and **Malta** (+3.8%), while decreases were observed in **Denmark** (-1.7%), **Belgium** (-0.5%), **United Kingdom** (-0.4%), **Sweden** (-0.2%), **Italy** (-0.2%) and **France** (-0.2%).

## Geographical information

The **euro area** consists of Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The **European Union** includes Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom.

The data refers to the euro area and EU country compositions at a specific point in time. New Member States are integrated into the aggregates using a chain index formula.

## Methods and definitions

The House Price Index (HPI) measures the price changes of all residential properties purchased by households (flats, detached houses, terraced houses, etc.), both newly built and existing, independently of their final use and independently of their previous owners. The Member States' HPIs are compiled by the National Statistical Institutes. The euro area and the EU aggregate HPIs are compiled by Eurostat. HPIs are computed as annually chained indices with weights being updated each year. The European HPI aggregates are currently calculated as weighted averages of the national HPIs using as weights the GDP at market prices (expressed in millions Purchasing Power Standards - PPS) of the countries concerned.

The figures are not seasonally adjusted.

Missing country data is estimated by Eurostat using data from non-harmonised sources. These estimates are not published but are used to calculate euro area and EU aggregates.

## Revisions and time table

Compared with News Release [14/2019](#) of 18 January 2019, the annual growth rate for the third quarter of 2018 remains unchanged for both the euro area and the EU. The quarterly growth rate for the third quarter of 2018 has been revised from +1.6% to +1.5% for the euro area and remains unchanged for the EU.
