Editorial

This edition of Eurostatistics comes at a time of profound disruption to economies worldwide from the Coronavirus (COVID-19) pandemic. The majority of the data in this edition relate to periods before the majority of public measures to address COVID-19 were introduced, and therefore future editions of this publication will show the evolving picture.

Looking forward, the pandemic is having a direct impact on the production of European statistics (and official statistics in general worldwide). This impact will be progressive. The health and public safety measures introduced by national governments have put face-to-face interviews on hold and generated disruptions to primary data coming from administrative registers in all EU Member States. Under these severe conditions, Eurostat and the National Statistical Institutes (NSIs) are doing their best to continue publishing relevant statistics of the highest quality, as planned in the national and Eurostat release calendars.

International context: annual GDP growth accelerating in the United States and stable in China in Q4 2019

In the **United States** the annual GDP growth rate (⁽¹⁾) was 2.3 % in Q4 2019, up from 2.1 % in Q3 2019, according to the third estimate (⁽²⁾) released by the BEA. The annual consumer price index decreased to 2.1 % in February 2020 from 2.2 % in January 2020. The volume of retail trade month-on-month increased by 0.5% in January, following a drop of 0.3 % in December 2019. The unemployment rate slightly declined to 3.5 % in February 2020 from 3.6 % in January 2020.

Concerning the BRICS countries (Brazil, Russia, India, China and South Africa), in **China**, the annual GDP growth rate was 6.0 % in Q4 2019, stable compared with Q3 2019. The annual consumer price index decelerated to 5.2 % in February 2020 from 5.4 % in January 2020.

(¹) The annual GDP growth rate is expressed as the percentage change from the same quarter of the previous year in non-annualised terms. Non-annualised data are comparable with headline European figures.

(²) The third estimate is based on more complete source data than were available for the 'second' estimate.

In **India**, the annual GDP growth rate was 4.8 % in Q4 2019, down from 5.0 % in Q3 2019. The annual consumer price index dropped to 6.8 % in February 2020 from 7.5 % in January 2020.

Brazil recorded an annual GDP growth rate of 1.7 % in Q4 2019, up from 1.2 % in Q3 2019. The annual consumer price index decelerated to 4.0 % in February 2020 from 4.2 % in January 2020. The volume of retail trade month-on-month decreased by 1.0 % in January 2020, following a drop of 0.5 % in December 2019.

In **South Africa**, the annual GDP growth rate decelerated to –0.6 % in Q4 2019 from 0.1 % in Q3 2019. The annual consumer price index slightly grew to 4.5% in February 2020 from 4.4 % in January 2020. The volume of retail trade month-on-month increased by 1.0 % in January 2020, following a drop of 3.6 % in December 2019.

Russia reported an annual GDP growth rate of 1.6 % in Q4 2019, slightly up from 1.5 % in Q3 2019. The annual consumer price index slightly decreased to 2.3 % in February 2020 from 2.4 % in January 2020.

European Union and euro area: annual GDP growth rate decelerated in the euro area and the EU in Q4 2019

In the **euro area**, the annual GDP growth rate decelerated to 1.0 % in Q4 2019 from 1.3 % in Q3 2019, according to an estimate published by Eurostat. The annual inflation rate (HICP) was 0.7 % in March 2020, down from 1.2 % in February 2020. Energy inflation dropped to –4.3 % in March 2020, from –0.3 % in February 2020, and 1.9 % in January 2020. 'Food, alcohol and tobacco' remained the component with the highest inflation annual rate of 2.4 % in March 2020, following 2.1 % in February 2020.

In February 2020 – the month before COVID-19 containment measures began to be widely introduced by EU Member States – the volume of retail trade grew month-on-month by 0.9 % in the euro area, after an increase of 0.7 % in January 2020.

The Economic Sentiment Indicator (ESI) for the euro area decreased very significantly month-on-month by 8.9 points to 94.5 in March 2020. This was the strongest monthly decline in the ESI on record (since 1985). It resulted from slumping confidence among consumers and in all the business sectors. The collapse was particularly strong in services and retail trade.

The **euro area** unemployment rate slightly decreased to 7.3 % in February 2020 from 7.4 % in January 2020. The sharp decrease of the Employment Expectations Indicator (-10.9) in March 2020 reflected significantly worsened employment plans across all four business sectors, led by services and retail trade.

In the **European Union** (EU-27), the annual GDP growth rate decelerated to 1.2 % in Q4 2019 from 1.6 % in Q3 2019. The Economic Sentiment Indicator decreased very significantly month-on-month by 8.2 points to 94.8 in March 2020.

Situation in EU Member States: The Economic Sentiment Indicator plummeting in Italy and Germany, and falling significantly in France, the Netherlands and Spain in March 2020

The annual GDP growth rate decelerated in the five largest EU economies, namely, Germany, Spain, the Netherlands, Italy and France in Q4 2019. The Economic Sentiment Indicator plummeted in Italy and Germany, and fell significantly in France, the Netherlands and Spain in March 2020.

In **Germany**, the annual GDP growth rate was 0.5 % in Q4 2019, down from 0.6 % in Q3 2019. The annual inflation rate (HICP) decreased to 1.3 % in March 2020 from 1.7 % in February 2020. The Economic Sentiment Indicator plummeted to 92.0 in March 2020 from 101.8 in February 2020. The unemployment rate remained stable at 3.2 % in February 2020 compared with January 2020.

In **Spain** the annual GDP growth rate was 1.8 % in Q4 2019, down from 1.9 % in Q3 2019. The annual inflation rate (HICP) decreased to 0.2 % in March 2020 from 0.9 % in February 2020. The Economic Sentiment Indicator fell significantly to 99.3 in March 2020 from 102.7 in February 2020. The unemployment rate slightly decreased to 13.6 % in February 2020 from 13.7 % in January 2020.

The **Netherlands**, recorded an annual GDP growth rate of 1.6 % in Q4 2019, down from 1.8 % in Q3 2019. The annual inflation rate (HICP) declined to 1.1 % in March 2020, from 1.3 % in February 2020. The Economic Sentiment Indicator fell significantly to 98.2 in March 2020, from 102.2 in February 2020. The unemployment rate was 2.9 % in February 2020, down from 3.0 % in January 2020.

In **Italy**, the annual GDP growth rate was 0.1 % in Q4 2019, after 0.5 % in Q3 2019. The annual inflation rate (HICP) decreased to 0.1 % in March 2020 from 0.2 % in February 2020. The Economic Sentiment Indicator plummeted to 83.7 in March 2020 from 101.3 in February 2020. The unemployment rate slightly declined to 9.7 % in February 2020, following 9.8 % in January 2020.

France recorded an annual GDP growth rate of 0.9 % in Q4 2019, down from 1.5 % in Q3 2019. The annual inflation rate (HICP) decreased to 0.7 % in March 2020, down from 1.6 % in February 2020. The Economic Sentiment Indicator fell significantly to 100.6 in March 2020 from 105.5 in February 2020. The unemployment rate decreased slightly to 8.1 % in February 2020, following 8.2 % in January 2020.

1

Summary analysis

Latest macroeconomic developments

Mixed economic indicators in the euro area

EVOLUTION OF GDP

Seasonally adjusted GDP rose by 0.1 % in the euro area (EA-19) and by 0.2 % in the EU-27 during the fourth quarter of 2019, compared with the previous quarter, according to an estimate published by Eurostat, the statistical office of the European Union. In the third quarter of 2019, GDP had grown by 0.4 % in EU-27 and by 0.3 % in EA. Compared with the same quarter of the previous year, seasonally adjusted GDP rose by 1.0 % in the euro area and by 1.2 % in the EU-27 in the fourth quarter of 2019, after also +1.3 % and +1.6 % respectively in the previous quarter.

INDUSTRIAL PRODUCTION

In January 2020 compared with December 2019, seasonally adjusted industrial production increased by 2.3 % in the euro area (EA-19) and by 2.0 % in the EU-27, according to estimates from Eurostat, the statistical office of the European Union. In December 2019, industrial production decreased by 1.6 % in EU-27 and by 1.8 % in euro area as compared to November 2019. In January 2020 compared with January 2019, industrial production decreased by 1.9 % in the euro area and by 1.5 % in the EU-27.

PRODUCTION IN CONSTRUCTION

In January 2020 compared with December 2019, seasonally adjusted production in the construction sector increased by 3.6 % in the euro area (EA-19) and by 3.9 % in the EU-27, according to an estimate from Eurostat, the statistical office of the European Union. In December 2019, production in construction decreased by 1.8 % in the euro area and by 1.7 % in the EU-27. In January 2020 compared with January 2019,

production in construction increased by 6.0 % in the euro area and by 6.2 % in the EU-27.

RETAIL TRADE

In February 2020 compared with January 2020, the seasonally adjusted volume of retail trade increased by 0.9 % in the euro area (EA-19) and by 0.8 % in the EU-27, according to estimates from Eurostat, the statistical office of the European Union. In January 2020, the retail trade volume increased by 0.7 % in the euro area and by 0.8 % in the EU-27. In February 2020 compared with February 2019, the calendar adjusted retail sales index increased by 3.0 % in the euro area and by 3.2 % in the EU-27.

INFLATION

Euro area annual inflation is expected to be 0.7 % in March 2020, down from 1.2 % in February 2020 according to a flash estimate from Eurostat, the statistical office of the European Union. In March 2019, the annual inflation rate was 1.4 % in the euro area.

UNEMPLOYMENT

The euro area (EA-19) seasonally-adjusted unemployment rate decreased to 7.3 % in February 2020 down from 7.6 % in April 2019. The unemployment rate in February 2020 slightly decreasing by 0.1 percentage points as compared to January 2020. This is the lowest rate recorded in the euro area since July 2008. The EU-27 unemployment rate has remained stable at 6.5 % in February 2020 since December 2019 and down from 6.8 % in April 2019. This remains the lowest rate recorded in the EU-27 since the start of the EU monthly unemployment series in January 2000. These figures are published by Eurostat,

the statistical office of the European Union. Eurostat estimates that 13.984 million men and women in the EU-27, of whom 12.047 million in the euro area, were unemployed in February 2020. Compared with January 2020, the number of persons unemployed decreased by 62 000 in the EU-27 and decreased by 88 000 in the euro area. Compared with February 2019, unemployment fell by 784 000 in the EU-27 and by 663 000 in the euro area.

INTEREST RATES

On 12 March 2020, the Governing Council of the European Central Bank maintained its benchmark refinancing rate at 0.0 % since 15 March 2016. On 15 March 2020, in light of the COVID-19 pandemic, the Federal Reserve announced a cut in the target range for the federal funds rate, bringing that range of 0 to $\frac{1}{4}$ percent from a previous target range of 1 to $1\frac{1}{4}$ percent. The Bank of Japan left the key interest rate unchanged at –0.1 % at its March 2020 meeting, after a decrease from 0.0 % in December 2015. On 20 March the

Bank of England Monetary Policy Committee reduced its benchmark bank rate for a second time in a single month by 15 basis points to 0.1 %. The euro area's 3-month rate, Euribor, slightly decreased from –0.41 % in February to –0.42 % in March 2020. Long-term interest rates (monthly average weighted 10-year government bond yield) of the euro area decreased to 0.01 % in February 2020, from 0.19 % in January 2020. The EU-27 long-term interest rates increased to 0.31 % in February 2020, from 0.49 % in January 2020.

EXCHANGE RATES

The euro/US dollar exchange rate (monthly average) increased to USD 1.1063 in March 2020, from USD 1.0905 in February 2020. The euro/Japanese yen exchange rate decreased to JPY 118.90 in March 2020, from JPY 120.03 in February 2020. The euro decreased against the Swiss franc to CHF 1.0591 in March 2020, from CHF 1.0648 in February 2020. The euro/UK pound sterling exchange rate increased to GBP 0.8946 in March 2020, from GBP 0.8410 in February 2020.

Growth forecasts for the euro area ⁽¹⁾

Growth assessment

According to the **Euro Growth Indicator**, published by the Euroframe group on 3 March ⁽²⁾ 2020, euro area GDP is forecast to accelerate to a quarterly rate of 0.6 per cent in the first and second quarter of 2020 which is slightly higher as compared to the 0.2 per cent growth expected by the indicator for the last quarter of 2019 and the 0.1 per cent estimate released by Eurostat. The euro area's year-over-year GDP growth rate is forecast to stabilize at 1.0 per cent in the first quarter of 2020 and to accelerate to 1.5 per cent in the second quarter of 2020. The Indicator, however, is based on February sentiment indicators that do not capture yet the negative economic effects induced by the spread of the Coronavirus (COVID-19) pandemic that are currently unfolding.

The **€-coin** declined from 0.28 in February to 0.13 in March 2020. The indicator does not yet capture the full scale of the impact on economic activity of the ongoing COVID-19 pandemic, as only a small subset of the data available for March that were used for its construction refers to the latest developments. The reduction in €-coin observed so far only reflects the initial effects of the fall in share prices and the widespread deterioration in business and consumer confidence that occurred in the second half of March in connection with the spread of the pandemic across euro-area countries.

For a description of the sources and methods on the indicators of growth and turning points, see the [Methodological notes](#) at the end of this section.

⁽¹⁾ Euro area growth assessment is based on the indicators' news releases and do not necessarily reflect Eurostat's views.

⁽²⁾ The planned publication in the beginning of April 2020 of the Euro Growth indicator has been cancelled due to the Coronavirus (COVID-19) pandemic.

Cyclical indicators for the euro area (1)

Growth assessment

The **Business Climate Indicator (BCI)** (2) for the euro area decreased by –0.28 points in March 2020 following a decrease of –0.06 points in February 2020.

The **Composite leading indicators (CLIs)**, published on 8 April 2020 recorded the largest drop since the start of the time series in line with the considerable economic shock caused by the COVID-19 pandemic. Over the next few months, in particular, care will be needed in interpreting the CLI.

- Firstly, with considerable uncertainty around the duration of lockdown measures, the ability of leading indicators to predict future movements in the business cycle has been severely curtailed: current estimates of the CLI are able to provide meaningful signals on current movements in activity, and should therefore be viewed as coincident rather than leading.

- Secondly, as always, the magnitude of the CLI decline should not be regarded as a measure of the degree of contraction in economic activity; rather it should be viewed as an indication of the strength of the signal that economies have entered a phase of contraction. For comparison, the signal is stronger now than it was at the time of the Financial Crisis.
- Thirdly, the CLIs are not yet able to anticipate the end of the slowdown, especially as it is not yet clear how long, nor indeed severe, lockdown measures are likely to be. However, as the situation settles, even with a more prolonged lockdown, the CLI will begin to recover its ability to predict as firms and consumers begin to adapt to new (even if only short-term) realities, especially as governments begin to formulate and provide signals around longer term strategies, beyond the initial immediate measures they have had to impose.

(1) Euro area growth assessment is based on the indicators' releases and do not necessarily reflect Eurostat's views; IFO Economic Climate Indicator has been discontinued. On 9 April IFO Institute published a new special issue on Eurozone Economic Outlook:
https://www.ifo.de/sites/default/files/secure/prognosen/EZEO_20Q1_en.pdf.

(2) The BCI press release has been discontinued.

The **DZ BANK's Euro-Indicator**, published on 2 April 2020, declined by 1.9 % in March 2020 as compared to February 2020. The indicator now stands at 97.05 points in March 2020 decreasing from 98.88 points in February 2020. The sharp monthly decline of the indicator is uncommon even during the period of the financial crisis in 2008/2009. The sentiment indicators from companies and private households primarily contributed to the sharp decline in the Indicator last month. The outlook for the labour market and

employment prospects are viewed much more negatively than four weeks ago. The severity of the slump is probably not yet fully reflected in the purchasing managers' index either. At the same time the real economic indicators, i.e. the 'hard' economic data used to calculate the Euro-Indicator, do not yet give a proper impression of the current economic slump, as most of them contain data from the months of January and February. Further significant declines in the Euro-Indicator are to be expected in the coming months.

Table 1: Comparison of indicators of turning points in the business cycle for the euro area

		2019M11	2019M12	2020M01	2020M02	2020M03

(¹) For employment, the implementation of the HP filter has been revised to use the same parameter values for both the EU and the EA. This updates previous estimates that used slightly different parameter values.

For monthly IPI, the implementation of the HP and the CF filters has been revised to use parameter values that are more typical for monthly data. This updates previous estimates that used parameter values more typical for quarterly data.

Methodological notes (¹)

Indicators of growth and turning points — sources and methods

The **EUROFRAME Euro Growth Indicator**: calculated by the OFCE (Paris) in cooperation with the EUROFRAME group, which consists of: CPB (Den Haag), DIW (Berlin), ESRI (Dublin), ETLA (Helsinki), IFW (Kiel), NIESR (London), PROMETEIA (Bologna), WIFO (Vienna), and CASE (Poland). The purpose of this leading indicator is to anticipate the development of the GDP in the euro area two quarters ahead of official statistics. The indicator considers surveys from industry, construction, and households, ISM survey of US industry, real euro/dollar exchange rate, and European stock index. The indicator is based on ordinary least squares (OLS) estimation of the GDP growth rate, and released on a monthly basis.

€-COIN: a monthly 'smoothed' estimate of quarter-on-quarter GDP growth in the euro area, calculated by the Banca d'Italia. It is obtained by collecting a large set of statistics and extracting from it information relevant to forecast future GDP. It tracks GDP growth anticipating official GDP releases by several months, by giving each month an early estimate of euro area growth in terms of quarter-on-quarter changes in GDP. Moreover, it sheds light on the underlying trend by removing short-run fluctuations and measurement errors from the growth rate; in this respect it is not only a forecast, but also an indicator of the true growth momentum in the euro area.

The **OECD Composite Leading Indicator**: designed to predict cyclical turning points (peaks and troughs) in GDP as a proxy of the business growth cycle of the overall economy. It comprises a set of component series from a wide range of economic indicators.

DG ECFIN: Business Climate Indicator (monthly), designed to deliver a clear and early assessment of the cyclical situation of the euro area. The indicator uses, as input, five balances of opinions from DG ECFIN's Business and Consumer Surveys. The resulting 'common factor' may be read as a survey result: the higher the level, the healthier the cyclical situation, and a rise in the indicator points to an upswing in activity and an improvement in business climate

DZ-Euroland-Indicator: calculated by DZ Bank (monthly), aims at predicting recessions and has also proved to reflect movements in GDP growth rate. It is built on concepts implemented by the US Conference Board for monitoring cyclical indicators. Nine series for euro area or for the

main countries are selected for their leading properties, and aggregated to give a composite index which can be compared with the level of GDP in order to anticipate recessions.

Trend-cycle decomposition

The trend and cycle are two components of a time series that represent variations of low frequency and 'business cycle' frequency, respectively, the high frequency fluctuations having been filtered out. Identifying and estimating trend and cyclical components of key economic indicators is invaluable when making decisions and informing policy-makers. The distinction between the two components helps the analyst ascertain whether any change to the indicator is temporary or permanent. However, there exist many alternative methods to identify and estimate trends and (business or deviation) cycles. The estimates for three indicators — GDP, industrial production, and employment — are produced using three different filters:

Hodrick-Prescott (HP): a filter widely used in macroeconomics to fit a smooth curve through a set of points.

Christiano-Fitzgerald (CF): a well-known approximation to an ideal band pass filter, estimated non-parametrically.

Unobserved Components (UC): a parametric approach which involves estimating a statistical model and decomposing the series into components, including the trend and cycle.

Date Period Comparisons

Q/Q-1: the value of the indicator (quarterly) is divided by the value of this indicator for the previous quarter (as a percentage).

Q/Q-4: the value of the indicator (quarterly) is divided by the value of the same indicator for the previous year (as a percentage).

M/M-1: the value of the indicator (monthly) is divided by the value of this indicator for the previous month (as a percentage).

M/M-12: the value of the indicator (monthly) is divided by the value of the same indicator for the previous year (as a percentage).

(¹) IFO Economic Climate Indicator has been discontinued. On 9 April IFO Institute published a new special issue on Eurozone Economic Outlook:
https://www.ifo.de/sites/default/files/secure/prognosen/EZEO_20Q1_en.pdf.

(¹) sca: Seasonally and calendar adjusted data

(²) sa: Seasonally adjusted data

(³) ca: Calendar adjusted data, not seasonally adjusted data

(**) Due to the fact that the Luxembourg Government does not have outstanding long-term debt securities with a residual maturity of close to ten years, the indicator is based on a basket of long-term bonds. This basket has an average residual maturity of close to ten years. The bonds are issued by a private credit institution and the indicator is thus not fully harmonised" (source ECB).

Getting in touch with the EU

In person

All over the European Union there are hundreds of Europe Direct Information Centres. You can find the address of the centre nearest you at: <https://europa.eu/contact>

On the phone or by e-mail

Europe Direct is a service that answers your questions about the European Union. You can contact this service

- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696 or
- by electronic mail via: <https://europa.eu/contact>

Finding information about the EU

Online

Information about the European Union in all the official languages of the EU is available on the Europa website at: <https://europa.eu>

EU publications

You can download or order free and priced EU publications from EU Bookshop at: <http://bookshop.europa.eu>. Multiple copies of free publications may be obtained by contacting Europe Direct or your local information centre (see <https://europa.eu/contact>).

EU law and related documents

For access to legal information from the EU, including all EU law since 1951 in all the official language versions, go to EUR-Lex at: <https://eur-lex.europa.eu>

Open data from the EU

The EU Open Data Portal (<https://data.europa.eu/euodp/en/data>) provides access to datasets from the EU. Data can be downloaded and reused for free, both for commercial and non-commercial purposes.

Eurostatistics

DATA FOR SHORT-TERM ECONOMIC ANALYSIS

Eurostatistics — Data for short-term economic analysis - shows the evolution of the economic activity in the European Union, euro area and Member States. This monthly review gives a synthetic picture of the macroeconomic situation in the recent past. It is based on Principal European Economic Indicators (PEEIs), complemented by some business cycle indicators.
