Eurostat is the Statistical Office of the European Communities. Its mission is to provide the European Union with high-quality statistical information. For that purpose, it gathers and analyses figures from the national statistical offices across Europe and provides comparable and harmonised data for the European Union to use in the definition, implementation and analysis of Community policies. Its statistical products and services are also of great value to Europe's business community, professional organisations, academics, librarians, NGOs, the media and citizens.

Eurostat's publications programme consists of several collections:

- **News releases** provide recent information on the Euro-Indicators and on social, economic, regional, agricultural or environmental topics.
- **Statistical books** are larger A4 publications with statistical data and analysis.
- **Pocketbooks** are free of charge publications aiming to give users a set of basic figures on a specific topic.
- **Statistics in focus** provides updated summaries of the main results of surveys, studies and statistical analysis.
- **Data in focus** present the most recent statistics with methodological notes.
- **Methodologies and working papers** are technical publications for statistical experts working in a particular field.

Eurostat publications can be ordered via the EU Bookshop at <http://bookshop.europa.eu>.

All publications are also downloadable free of charge in PDF format from the Eurostat website <http://ec.europa.eu/eurostat>. Furthermore, Eurostat's databases are freely available there, as are tables with the most frequently used and demanded short- and long-term indicators.

Eurostat has set up with the members of the 'European statistical system' (ESS) a network of user support centres which exist in nearly all Member States as well as in some EFTA countries. Their mission is to provide help and guidance to Internet users of European statistical data. Contact details for this support network can be found on Eurostat Internet site.

## **A INTRODUCTION**

Labour market policy (LMP) statistics provide information on *labour market interventions*<sup>1</sup>, which are government actions to help and support the unemployed and other disadvantaged groups in the transition from unemployment or inactivity to work. Except where otherwise specified, all data shown in this publication are derived from Eurostat's LMP database<sup>2</sup>.

The scope of LMP statistics is limited to interventions that are explicitly targeted at groups of persons with difficulties in the labour market. The primary target groups in most countries are those people who are registered as unemployed by national Public Employment Services (PES) or who are currently employed but at risk of involuntary job loss due to difficult economic circumstances for their employer – a situation that is particularly relevant in the current crisis. However, policy objectives at European and national levels are increasingly focused not only on these groups but on a wider range of people that face disadvantages and barriers that may prevent them from joining or rejoining the labour force – for example, women re-entering work after a family break, young people looking for their first job, older workers and disabled workers. Therefore, people currently considered as inactive but who would like to enter the labour market are also treated as an important LMP target group.

Each country has a different approach to LMP and implements interventions that are customised to the situation of the national labour market and the different groups of people that are struggling to find work. Information on national interventions is collected annually from administrative sources in each country and is then categorised according to the Eurostat LMP methodology<sup>3</sup> in order to ensure that the information on LMP interventions undertaken across Europe is presented in a way that is as consistent and comparable as possible between types of interventions and countries and through time.

LMP interventions are classified by type of action into three broad types – services, measures and supports – and into 9 detailed categories.

*LMP services* cover all services and activities of the Public Employment Services (PES) together with any other publicly funded services for jobseekers. Services include the provision of information and guidance about jobs, training and other opportunities that are available and advice on how to get a job (e.g. assistance with preparing CVs, interview techniques, etc.).

#### 1. Labour market services

*LMP measures* cover interventions that aim to provide people with new skills or experience of work in order

to improve their employability or that encourage employers to create new jobs and take on unemployed people and other target groups. Measures include various forms of intervention that "activate" the unemployed and other groups by obliging them to participate in some form of activity in addition to basic job search, with the aim of improving their chances of finding regular employment afterwards. They are mostly short-term and temporary actions but ongoing support for jobs that would otherwise not be sustained in the regular labour market is also covered.

2. Training
3. Job rotation and job sharing
4. Employment incentives
5. Supported employment and rehabilitation
6. Direct job creation
7. Start-up incentives

*LMP supports* cover financial assistance that aims to compensate individuals for loss of wage or salary and to support them during job-search (i.e. mostly unemployment benefits) or which facilitates early retirement.

8. Out-of-work income maintenance and support
9. Early retirement

LMP statistics include information on the expenditure and participants of each intervention:

- *Expenditure*: Data on expenditure cover the direct costs of each LMP intervention – public expenditure that may include cash payments transferred either directly (benefits for individuals or subsidies to employers) or as reimbursements for costs incurred; the value of directly provided goods and services (e.g. the cost of training courses); or the value of revenue foregone through reductions in obligatory levies (e.g. temporary exemption to social security contributions for employers taking on an unemployed person). Any other indirect costs are considered as part of the administration costs of an intervention and are covered only in sub-category 1.2 Other activities of the PES (Public Employment Services).

- *Participants*: Various observations of participants in LMP interventions are collected. Stock data (annual average) refer to the average number of persons participating in an intervention at a given moment during the year and are usually calculated from the administrative data as an average of the stock at the end of each month. The annual average stock can also be interpreted as the number of person-years of participation in an intervention. Flow data describe the number of people joining (entrants) or leaving an intervention (exits) during the year. Each new start or ending spell of participation is counted so that the same individual may be counted more than once.

## **LMP indicators and the European Employment Strategy (EES)**

LMP statistics are an important source of data for monitoring of Guideline 19 of the European Employment Strategy (EES) which advocates active and preventive labour market measures as part of an integrated policy approach towards full employment and inclusive labour markets for job-seekers and disadvantaged people.

Six EES indicators<sup>4</sup> are based on LMP data and are included in this publication:

**19.M2 Activation/Support (see Tables C.3.1 - C.3.3):** Number of participants in regular activation measures (LMP categories 2-7) /in assisted activation programmes (LMP sub-category 1.1.2) /number of recipients of supports (LMP categories 8-9) divided by the number of persons wanting to work (ILO unemployed plus labour reserve).

**19.A3 Activation of registered unemployed (see Tables C.3.4 - C.3.6):** Stock of participants in regular activation measures (LMP categories 2-7) that were previously registered unemployed divided by the stock of registered unemployed plus the stock of participants in regular activation measures that were previously registered unemployed and whose unemployment spell is broken by participation in a regular activation measure.

**19.M4 Activation of long-term registered unemployed (see Tables C.3.7 - C.3.9):** Stock of participants in regular activation measures (LMP categories 2-7) that were previously long-term registered unemployed divided by the stock of long-term registered unemployed plus the stock of participants in regular activation measures that were previously long-term registered unemployed and whose unemployment spell is broken by participation in a regular activation measure. Long-term unemployed = 12+ months for adults (25+) and 6+ months for youth (<25).

**19.A2 Timely activation (see Tables C.3.10 - C.3.12):** The proportion of entrants in regular activation measures (LMP categories 2-7) or assisted activation programmes (LMP sub-category 1.1.2) taken up by persons not yet long-term unemployed (Target value 100% = full compliance)  
Method:  $(A-B)/A \%$   
A = Total entrants  
B = Long-term unemployed entrants (12+ months for adults 25+ and 6+ months for youth <25)

**19.A5 LMP expenditure (see Table B.1.3):** LMP expenditure as % of GDP

**19.A6 LMP expenditure per person wanting to work (see Table B.1.4):** Expenditure on LMP divided by the number of persons wanting to work (ILO unemployed plus labour reserve)

## **Coherence with the OECD LMP database**

In 2004, the OECD adopted Eurostat's methodology (classifications and guidelines) by means of an official communication addressed to all OECD member countries. Since then, data on LMP expenditure and participants published by the OECD in "Employment Outlook" for the EU countries and Norway have been collected and carefully validated annually by Eurostat before being sent, together with all related metadata, to the OECD.

The only divergence between the two databases is in category 1 (Labour market services), where OECD prefers to maintain a different coverage and has, for some countries, either supplemented or excluded parts of the Eurostat data. Eurostat's definition of category 1 "Labour market services" is designed to collect the total expenditure of the Public Employment Services (PES) and to then disaggregate this figure to identify "client services" and particularly "individual case-management" services, which are highly relevant to the activation/prevention approach of the European Employment Strategy. Eurostat's approach means that the costs of benefit administration are not included when this function is undertaken by organisations other than the PES. OECD, on the other hand, attempts to include benefit administration for all countries, irrespective of the organisation responsible. Moreover, for some countries, it also excludes PES expenditure on functions considered to be outside the scope of LMP.

## **A.1 Important remarks**

### **1. Source of data**

Unless otherwise specified, all data presented in this publication were extracted from the Eurostat LMP database<sup>2</sup> in the period 10-20 July 2010.

### **2. LMP Methodology**

The LMP data collection has a comprehensive methodology which defines the scope of the data collection, the statistical unit and coverage, describes the classification system and gives precise guidelines on the data to be provided. Users of LMP data are recommended to refer to this methodology in order to facilitate interpretation of the data included in this publication. The methodology is available at the Eurostat website<sup>3</sup>.

### 3. Labour market policy statistics – qualitative reports

In addition to the quantitative data on expenditure and participants presented here, the LMP database includes valuable qualitative information describing each intervention, how it works, the main target groups, etc. These descriptions help to put the quantitative data into context and can be extremely useful for researchers. These qualitative data are compiled into a series of "Labour market policy statistics: Qualitative Reports" and produced as separate volumes for each country/year<sup>3</sup>.

### 4. Coverage

It is intended that data in this publication cover all LMP interventions in each country including those of autonomous regions, which may be significant.

**Germany:** In Germany, the Länder carry out some important LMP activities independently of the federal actions but data are not available to report on these in any detail. However, many of the activities of the Länder are supported by the ESF (European Social Fund) and the LMP data for 2000-2006 include a single entry (DE-84) covering this expenditure and the related participants. Unfortunately changes to reporting procedures for the 2007-2013 ESF funding period mean that the data on ESF expenditure relevant to LMP in Germany is no longer available. The data for Germany for 2007 and 2008 are therefore missing the expenditure and participants related to LMP activities of the Länder. In 2006 the ESF support for these actions accounted for 7.4% of the expenditure on LMP measures (categories 2-7) in Germany and 29.6% of the participants.

**Spain:** Data for some interventions do not cover all autonomous regions. Additionally, data do not include the activities of the municipalities, which are included in the OECD data. It is intended that this information will be included in Eurostat data in future.

**United Kingdom:** In the United Kingdom, expenditure on the main New Deal programmes (UK-1 and UK-2) is recorded together under generalised categories and a breakdown of expenditure between the different components is not available. The LMP data require a breakdown by type of action so estimates have been made by Eurostat based on information available from previous years and numbers of participants. Similar estimates have been applied to the Northern Ireland employment programmes (UK-53). So whilst the total expenditure on LMP is correct, the breakdown between LMP services (category 1) and LMP measures (categories 2-7) and also the breakdown within categories 2-7 may not be reliable.

### 6. Aggregates of participants

Data on participants are not available for some interventions. In such cases, aggregates by category or by groups of categories are still completed, providing that data are complete for 80% or more of the relevant expenditure (completion indicator  $\geq 80\%$ ). All totals presented on the basis of incomplete data are flagged as 'u' to alert users that the data are not fully reliable (i.e. may be understated by up to 20%).

### 5. EU totals

EU-27 totals are completed only when data are available for all countries or when Cyprus, Luxembourg and Malta are the only countries with incomplete data. The same applies to EU-15 totals (missing data for Luxembourg may be ignored).

The following aggregations should not be made for methodological reasons:

- Participants in category 8 should never be added to those in categories 2-7.
- Participants in category 1 should never be added with any other category.

Double counting may occur legitimately when a person participates in more than one intervention at the same time or is counted in two components of a mixed intervention – for example when training allowances are paid independently from the provision of training services. All known cases of double counting are taken into account by appropriate adjustments, which are shown in the detailed tables of participant data (section C.4).

### 7. Intervention names

The names of all LMP interventions are shown here in English only. However, for research purposes it may also be helpful to know the name of the intervention in the national language. An inventory of intervention names in both English and national language is included in the LMP Qualitative Reports which are published separately for each country (see point 3 above).

### 8. Persons wanting to work

Persons wanting to work are defined as the unemployed plus the labour reserve. The unemployed according to the ILO definition are persons without work, currently available for work and actively seeking work. The labour reserve covers inactive persons who want to work but are either not actively seeking work or are not immediately available for work, i.e. it is a subset of all inactive persons (persons neither employed nor unemployed). Data are taken from the

EU Labour Force Survey (EU LFS)<sup>5</sup>.

## 9. LMP expenditure at constant price levels

The price index for household and NPISH (non-profit institutions serving households) final consumption (2000=100) was used as deflator (see table D.1.2, source: National Accounts).

---

<sup>1</sup> Labour market interventions are defined as: *Public interventions in the labour market aimed at reaching its efficient functioning and correcting disequilibria and which can be distinguished from other general employment policy interventions in that they act selectively to favour particular groups in the labour market. Public interventions refer to actions taken by general government in this respect which involve expenditure, either in the form of actual disbursements or of foregone revenue (reductions in taxes, social contributions or other charges normally payable).*

- 1 Includes ESF contribution.
- 2 Expenditure is already counted under FR-93 to FR-96.
- 3 New intervention which started in October 2008.
- 4 Expenditure currently only covers out-of-work income support/maintenance (cat 8) and early-retirement (cat 9).
- 5 Training allowances paid to persons participating to different training programmes (FR-64, 70, 71, as well as FR-10, 11 and FR-85).
- 6 This intervention regroups training courses organised by the Regions (previously presented in FR-9 and FR-13). Some trainees receive the AREF (FR-63).
- 7 Intervention coming to an end (replaced by FR-81).
- 8 Some beneficiaries continue to receive the Specific solidarity allowance (FR-3, which is reported under category 8).
- 9 Intervention coming to an end.
- 10 Replaced by FR-82 and FR-83 since May 2005.
- 11 A small share (1.8%) of expenditure reported in FR-3 is in fact paid to unemployed people creating their own business (FR-38).

1 Includes participants of the integrated program for social and vocational integration (old BE-12).

2 All participants are double-counted with measures BE-40 to BE-42 and BE-44 (see BE-83).

3 Data refer to 2007.

4 Intervention not applied in 2008.

5 Stock: end-year figure.

6 Scheme abolished since July 2004, but unemployment benefits are paid to employees who started to work before that date (and until the end of their employment contract).

7 Intervention coming to an end.

8 This intervention is being replaced by the Service vouchers (BE-126).

1 Data exclude Azores and Madeira (participant data not available) but note that expenditure for these regions is included in the relevant table.

2 Stock does not include data from IGSE.

3 Entrants data combines different observations: IGSE = total beneficiaries in the year; IEFP = new starts in the year.

4 Intervention ended. Stock data do not include data from IGSE, which account for around 40% of entrants.

5 Figures exclude data from Madeira (not available). Stock does not include data from IGSE.

6 Stock and exits: only public employment figures - IEFP.

7 Entrants: total beneficiaries (new starts plus end-year stock).

8 Components of theoretical-practical training (cat. 2.3) and socio-professional integration (cat. 4.1) not applied in 2008.

9 Intervention not applied in 2008.

10 Mixed intervention (categories 4 and 7). A breakdown of participants by component is not possible so all are allocated to category 4, which is the most important.

11 A small number of participants cannot be accurately allocated between interventions PT-29, 31 and 37. Participants by intervention may therefore be slightly under or over-stated but the total for the three is correct.

12 Stock: end-year figure.

13 Stock: total beneficiaries in the year.

## Labour market policy – expenditure and participants

### Data 2008

Labour market policy (LMP) statistics provide information on labour market interventions implemented by the EU Member States and Norway. This publication presents data on public expenditure and participants (or beneficiaries) of LMP interventions in 2008. In addition, tables with time series for the years 1998-2008 are included, showing LMP expenditure at constant price levels as well as participant data by age and sex.
