## Eurostat regional yearbook 2011

Statistical information is an important tool for understanding and quantifying the impact of political decisions on the citizens in a specific territory or region. *The Eurostat regional yearbook 2011* gives a detailed picture of a large number of statistical fields in the 27 Member States of the European Union, as well as in EFTA and candidate countries. The text of each chapter has been written by specialists in statistics and is accompanied by maps, figures and tables. A broad set of regional indicators are presented for the following 16 subjects: population, labour market, labour cost, education, health, European cities, gross domestic product, household accounts, structural business statistics, information society, tourism, land cover and land use, coastal regions, transport, science, technology and innovation, and last but not least, a study on trends in densely and thinly populated areas.
