# Introduction

This publication presents statistics on labour market policy (LMP) interventions implemented by EU Member States and Norway in 2010, together with time-series for key variables covering the period 1998-2010. Data are presented in three chapters. Chapters 2 and 3 deal respectively with data on expenditure and participants in LMP interventions and include tables of indicators used for monitoring the EU Employment Guidelines. Chapter 4 includes tables of external and reference data that help to put the LMP data into context.

## 1.1 Scope of LMP statistics and key concepts

LMP statistics covers labour market interventions which are public interventions in the labour market aimed at reaching its efficient functioning and correcting disequilibria. LMP interventions are distinguished from other general employment policy interventions in that they act selectively to favour particular groups in the labour market. The primary target groups in most countries are those people who are registered as unemployed by national Public Employment Services (PES) or who are currently employed but at risk of involuntary job loss due to difficult economic circumstances for their employer – a situation that is particularly relevant in the current recovery from the economic crisis. However, policy objectives at European and national levels are increasingly focused not only on these groups but on a wider range of people facing disadvantages and barriers that may prevent them from joining or re-joining the labour force – for example, women re-entering work after a family break, young people looking for their first job, older workers and disabled workers. Therefore, people currently considered as inactive but who would like to enter the labour market are also treated as an important LMP target group.

National interventions are classified according to a single scheme in order to ensure that the information on LMP interventions undertaken across Europe is presented in a way that is as consistent and comparable as possible. LMP interventions are classified by type of action, which refers to the way in which an intervention acts to achieve its objectives. The classification identifies three broad types of intervention – services, measures and supports – and 9 categories.

LMP services cover all services and activities of the Public

Employment Services (PES) together with any other publicly funded services for jobseekers. Services include the provision of information and guidance about jobs, training and other opportunities that are available and advice on how to get a job (e.g. assistance with preparing CVs, interview techniques, etc.). The classification scheme includes one category of LMP services:

- Labour market services (category 1)

LMP measures cover interventions that aim to provide people with new skills or experience of work in order to improve their employability or that encourage employers to create new jobs and take on unemployed people and other target groups. Measures include various forms of intervention that "activate" the unemployed and other groups by obliging them to participate in some form of activity in addition to basic job search, with the aim of improving their chances of finding regular employment afterwards. They are mostly short-term and temporary actions but on-going support for jobs that would otherwise not be sustained in the regular labour market is also covered. The classification scheme identifies six categories of LMP measures:

- Training (category 2)
- Job rotation and job sharing (category 3)
- Employment incentives (category 4)
- Supported employment and rehabilitation (category 5)
- Direct job creation (category 6)
- Start-up incentives (category 7)

LMP supports cover financial assistance that aims to compensate individuals for loss of wage or salary and to support them during job-search (i.e. mostly unemployment benefits) or which facilitates early retirement for labour market reasons. The classification scheme includes two categories of LMP supports:

- Out-of-work income maintenance and support (category 8)
- Early retirement (category 9)

For each intervention, data on expenditure and participants are collected. Expenditure is broken down according to a two tier scheme, which distinguishes firstly the direct recipient of the transfers and then the type of expenditure involved. The numbers of participants in LMP interventions are recorded using three observations: stock, entrants and exits. Stock data (annual average) refer to the average number of persons participating in an intervention at a given moment during the year and are usually

calculated from the administrative data as an average of the stock at the end of each month. The annual average stock can also be interpreted as the number of person-years of participation in an intervention. Flow data describe the number of people joining (entrants) or leaving an intervention (exits) during the year.

## 1.2 EU employment policy and LMP indicators

LMP statistics are one of the data sources for monitoring the EU Employment Guidelines through the Europe 2020 Joint Assessment Framework (JAF)<sup>1</sup>. The JAF is an indicator-based assessment system developed and used by the European Commission (Directorate General for Employment, Social Affairs and Inclusion) and the Employment Committee (EMCO). Organised in 12 Policy areas (PA), the JAF includes a series of indicators used to monitor the progress towards EU headline targets and related national targets in relation to the implementation of the Employment Guidelines. In each policy area, indicators are categorised as overall indicators, sub-indicators, and context indicators. The logic of the JAF is that, in principle, under each policy area the sub- and context indicators should reflect factors that explain and drive the outcome of the overall indicator.

Six indicators related to LMP fall within policy area 3: Active labour market policies (PA3):

- PA3.S1 (sub-indicator) Expenditure on ALMP per person wanting to work (see Table 2.1.4): Expenditure on LMP category 1.1.2 (Individual case management)<sup>2</sup> and LMP categories 2-7 divided by the number of persons wanting to work (ILO unemployed plus labour reserve).

- PA3.S2 (sub-indicator) Expenditure on ALMP as a % GDP (see Table 2.1.3): Expenditure on LMP category 1.1.2 (Individual case management)<sup>2</sup> and LMP categories 2-7 as a percentage of GDP.

- PA3.S3 (sub-indicator) Activation (see Tables 3.3.1 – 3.3.3): Stock of participants in regular activation measures (LMP categories 2-7) divided by the number of persons wanting to work (ILO unemployed plus labour reserve).

- PA3.C1 (context indicator) Activation of registered unemployed (see Tables 3.3.4 - 3.3.6): Stock of participants

in regular activation measures (LMP categories 2-7) that were previously registered unemployed divided by the stock of registered unemployed plus the stock of participants in regular activation measures that were previously registered unemployed and whose unemployment spell is broken by participation in a regular activation measure.

- PA3.C4 (context indicator) Activation of long-term (registered) unemployed (see Tables 3.3.7 - 3.3.9): Stock of participants in regular activation measures (LMP categories 2-7) that were previously long-term registered unemployed divided by the stock of long-term registered unemployed plus the stock of participants in regular activation measures that were previously long-term registered unemployed and whose unemployment spell is broken by participation in a regular activation measure (long-term unemployed = 12+ months for adults (25+) and 6+ months for youth (<25)).

- PA3.C6 (context indicator) Timely activation (see Tables 3.3.10 - 3.3.12): The proportion of entrants in regular activation measures (LMP categories 2-7) or assisted activation programmes (LMP sub-category 1.1.2) taken up by persons not yet long-term unemployed (Target value 100% = full compliance):  $(A-B)/A \%$  where A = Total entrants, B = Long-term unemployed entrants (12+ months for adults 25+ and 6+ months for youth <25).

Two further indicators related to LMP fall within policy area 4: Adequate and employment oriented social security systems:

- PA4.1.S1 (sub-indicator) Expenditure on LMP supports per person wanting to work (see Table 2.1.4): Expenditure on LMP category 8 (Out of work income maintenance and support) divided by the number of persons wanting to work (ILO unemployed plus labour reserve).

- PA4.1.S2 (sub-indicator) Expenditure on LMP supports as % of GDP (see Table 2.1.3): Expenditure on LMP category 8 (Out of work income maintenance and support) as a percentage of GDP.

## 1.3 Guiding remarks on data

### Source of data and timeliness

Unless otherwise specified, all data presented in this publication were extracted from the Eurostat LMP

database<sup>3</sup> on the 15th August 2012. Data are collected annually from administrative sources in each country. The publication includes tables showing the original source of data on expenditure and participants for each intervention (see Tables 5.5 and 5.6).

Source codes in the form of internet hyperlinks are included after each table and figure in this publication to help readers access easily the most recent data available from the Eurostat website.

## LMP Methodology

The LMP data collection is underpinned by a comprehensive methodology developed by Eurostat. It defines the scope of the data collection, the statistical unit and coverage, describes the classification system, and gives precise guidelines on the data to be provided. Users of LMP data are recommended to refer to this methodology in order to facilitate interpretation of the data provided in this publication. The methodology is available from the Eurostat website<sup>4</sup>. This publication includes the questionnaire used in the LMP data collections (see Table 5.1), the classification scheme by type of action (see Table 5.2) and breakdown by type of expenditure (see Table 5.3).

Eurostat's LMP methodology is also used by the OECD. Data on LMP expenditure and participants published by the OECD in "Employment Outlook" for the EU countries and Norway are collected and carefully validated annually by Eurostat before being sent, together with all related metadata, to the OECD. The only divergence between the two databases is in category 1 (Labour market services), where OECD prefers to maintain a different coverage and has, for some countries, either supplemented or excluded parts of the Eurostat data.

## Qualitative data

In addition to the quantitative data on expenditure and participants presented here, the LMP database includes valuable qualitative information describing each intervention, how it works, the main target groups, etc. These descriptions help to put the quantitative data into context and can be extremely useful for researchers. These qualitative data are compiled into a series of "Labour market policy statistics: Qualitative Reports" and produced as separate volumes for each country/year<sup>4</sup>. This

publication includes a table expanding on any abbreviations used in intervention names and explanatory notes to the quantitative data reported by each country (see Table 5.4).

## Coverage

In accordance with the LMP methodology, the data presented in this publication should cover all LMP interventions in each country including those of autonomous regions, which may be significant. There are, however, some known exceptions:

**Germany:** The Länder (regional authorities) carry out some important LMP activities independently of the federal actions but insufficient data are available to report on these in any detail. However, many of the activities of the Länder are supported by the ESF (European Social Fund) and the LMP data for 2000-2006 include a single entry (DE-84) covering this expenditure and the related participants. Unfortunately changes to reporting procedures for the 2007-2013 ESF funding period mean that the data on ESF expenditure relevant to LMP in Germany are no longer available. The data for Germany for 2007-2010 are therefore missing the expenditure and participants related to LMP activities of the Länder. In 2006 the ESF support for these actions accounted for 7.4% of the expenditure on LMP measures (categories 2-7) in Germany and 29.6% of the participants.

**Spain:** Data for some interventions do not cover all of the autonomous regions. Additionally, data do not include the activities of municipalities, which are included in the OECD data. It is intended that this information will be included in Eurostat data in future.

**United Kingdom:** Data by intervention refer to Great Britain (England, Scotland and Wales) with data for Northern Ireland included in separate interventions where the coverage is clearly identified in the intervention name. Any exceptions to this rule are made clear in footnotes. Data for 2010 are incomplete due to a combination of difficulties to provide the breakdowns required in the LMP database and uncertainty in the figures due to major changes in key LMP programmes. All data for the UK cover the financial year, which runs from April to March. The 2010 data therefore cover the period April 2010 – March 2011.

## Aggregates of expenditure and participants

Aggregates of expenditure data are only provided when values are available (or known to be not significant) for all constituent items.

However, participant data are generally less complete and in order to increase the number of participant aggregates that can be disseminated, the value of a participant aggregate is shown provided that constituent data are complete for at least 80% of the associated expenditure (completion indicator  $>=80\%$ ). All aggregates of participants based on incomplete data are flagged as "u" to alert users that the data are not fully reliable (i.e. may be understated by up to 20%) and this flag always takes precedence over any other flag that might be applicable.

## EU totals

EU-27 totals are completed only when data are available for all countries or when Cyprus, Luxembourg and Malta are the only countries with incomplete data. If data for a country is missing for one year then EU totals may be completed using data from the previous year for that country.

The following aggregations should not be made for methodological reasons:

- Participants in category 8 should never be added to those in categories 2-7.
- Participants in category 1 should never be added with any other category.

Double counting may occur legitimately when a person participates in more than one intervention at the same time or is counted in two components of a mixed intervention – for example when training allowances are paid independently from the provision of training services. All known cases of double counting are taken into account by appropriate adjustments, which are shown in the detailed tables of participant data (section 3.4).

## Flags

LMP data are flagged at the intervention level. The

When data are aggregated (e.g. to category totals or to EU aggregates), the various constituents of the aggregate may have different flags but only one can be applied to the final value. The following rules are applied to determine the flag (if any) to be applied to aggregates. Firstly, the flag most applicable to an aggregate is considered to be the one that applies (at detailed level) to the highest share of the aggregate value. Secondly, a flag is only applied to an aggregate if it affects more than 10% of the total value.

## Intervention names

The names of all LMP interventions are shown here in English only. However, for research purposes it may also be helpful to know the name of the intervention in the national language. An inventory of intervention names in both English and national language is included in the LMP Qualitative Reports which are published separately for each country.

## LMP expenditure at constant price levels - deflator

The price index for household and NPISH (non-profit institutions serving households) final consumption (2000=100) was used as deflator (see table 4.1.2, source: National Accounts).

## Persons wanting to work – definition

Persons wanting to work are defined as the unemployed plus the labour reserve. The unemployed according to the ILO definition are persons without work, currently available for work and actively seeking work. The labour reserve covers inactive persons who want to work but are either not actively seeking work or are not immediately available for work, i.e. it is a subset of all inactive persons (persons neither employed nor unemployed). Data are taken from the EU Labour Force Survey (EU LFS)<sup>5</sup>.

Footnotes:

1 Excludes the budget of the actual PES centres which are under the control of the Danish local authorities.

2 The financing is (partly) covered by the State/Central government accounts

3 The breakdown of expenditure by type of benefit (full-time, part-time or partial) is not known so all expenditure is shown as full-time benefits, which are the most important.

Footnotes:

- 1 Data refer to 2008.
- 2 Includes ESF contribution.
- 3 Expenditure is already counted under FR-94 to FR-96.
- 4 Expenditure increased significantly in 2010 as it was applied in more local areas (32 instead of 25) in the context of the Economic Recovery Plan.
- 5 Pôle Emploi was created in December 2008. It's the result of the merging of ANPE and the UNEDIC network.
- 6 Since the creation of Pôle Emploi, UNEDIC is no longer in charge of the implementation of the unemployment insurance operational tasks (collection of contributions, registration and compensation).
- 7 Training allowances paid to participants in other training programmes (FR-10, FR-11, FR-70, FR-71 and FR-85).
- 8 Part of the programme (on illiteracy) is coming to an end and has been replaced since 2009 by the "Key competences" programme (FR-104).
- 9 This intervention regroups training courses organised by the Regions. Some trainees receive the AREF (FR-63).
- 10 Intervention started in September 2009.
- 11 Intervention coming to an end (replaced by FR-81).
- 12 Intervention coming to an end.
- 13 It is replaced by FR-112 (CUI-CIE).
- 14 New intervention in 2010.
- 15 Replaces FR-80 and FR-81 since January 2010 in mainland France.
- 16 It is replaced by FR-113 (CUI-CAE).
- 17 Replaces FR-82 and FR-83 since January 2010 in mainland France.
- 18 A small share (1.7%) of expenditure reported in FR-3 is in fact paid to unemployed people creating their own business (FR-38).
- 19 Intervention applied from April 2009 until March 2010.
- 20 Data also include the APLD allowance (partial activity of long duration).

Footnotes:

- 1 Expenditure includes reimbursement of travel and moving costs incurred by participants plus a share of the PES operational costs based on monitoring of staff time-use.
- 2 Share of operational costs of the PES based on monitoring of staff time-use.
- 3 Expenditure includes the costs paid to service providers for different rehabilitation activities plus a share of the PES operational costs based on monitoring of staff time-use.
- 4 Expenditure includes a share of the PES operational costs based on monitoring of staff time-use plus real transfers to service providers.
- 5 Includes ESF contribution.
- 6 Extension of the target group resulted in a significant change in both expenditure and participants.
- 7 The significant change both in expenditure and participants is due to the fact that the "coaching for working life" component of FI-15 is now included in FI-12.
- 8 Expenditure includes only subsidies paid by the Ministry of Employment and the Economy to facilitate the recruitment of unemployed persons as apprentices.
- 9 Expenditure refers to persons on leave and includes both income support (80/70% of unemployment benefit entitlement) and training supplements where appropriate.
- 10 Data represent an estimate of public funding for sheltered workshops. Income from business activity, which accounts for more than half of revenue, is excluded.
- 11 Expenditure includes rehabilitation allowances and the costs of different rehabilitation activities.
- 12 The increase of expenditure and participants is due to the widening of the sanctions to all age groups (not only those aged <25).
- 13 Passive (income support) payments only. Labour market support payments made to persons in active measures are shown under the appropriate measure. However, LMS paid to persons participating to cat.1 services are included here and not in cat.1.
- 14 Net public expenditure (disbursements minus repayments to the state).

Footnotes:

1 The breakdown of recipients by type of benefit (full-time, part-time, partial) is not known so all recipients are shown as receiving full-time benefits, which are the most important.

2 Data cover only recipients of early retirement pay coming directly from unemployment, which corresponds to around 40% of all recipients.

## Footnotes:

- 1 Stock data is only from IEFP.
- 2 Stock data and information on unemployment by duration only covers data from the IEFP which is probably less than 50% of the total.
- 3 Data not available. Components 2.1 and 7 were not applied.
- 4 Entrants: total beneficiaries (new starts plus end-year stock).
- 5 Components of theoretical-practical training (cat. 2.3) and socio-professional integration (cat. 4.1.1) not applied.
- 6 Intervention not applied in 2010.
- 7 Mixed intervention (categories 4 and 7). A breakdown of participants by component is not possible so all are allocated to category 4, which is the most important.
- 8 A small number of participants cannot be accurately allocated between interventions PT-29, 31 and 37. Participants by intervention may therefore be slightly under or over-stated but the total for the three is correct.
- 9 Data does not include 5356 beneficiaries (total participants: new starts plus end-year stock) for which a breakdown is not available.
- 10 Not applicable in Madeira in 2010
- 11 Intervention coming to an end.
- 12 Data on exits are provisional for 3 years because participation can be suspended for 3 years.
- 13 Stock: Total beneficiaries in the year

Footnotes:

- 1 Entrants: total beneficiaries (new starts plus end-year stock).
- 2 Entrants: total number of activities financed by the Employment and Economy Administration. A person in rehabilitation usually benefits from various activities during rehabilitation (examinations, ability testing, job trials, etc).
- 3 Data on participants are reported separately in FI-57 (R.2).
- 4 Data on participants are reported separately in FI-58 (R.2).
- 5 Extension of the target group resulted in a significant change in both expenditure and participants.
- 6 The significant change both in expenditure and participants is due to the fact that the "coaching for working life" component of FI-15 is now included in FI-12.
- 7 Stock: end-year figure.
- 8 The increase of expenditure and participants is due to the widening of the sanctions to all age groups (not only those aged <25).

## Labour market policy – expenditure and participants

### Data 20#"

Labour market policy (LMP) statistics provide information on labour market interventions implemented by the EU Member States and Norway. This publication presents data on public expenditure and participants (or beneficiaries) of LMP interventions in 2010. In addition, tables with time series for the year 1998-2010 are included, showing LMP expenditure at constant price levels as well as participant data by age and sex.
