

# First results of the demographic data collection for 2001 in Europe

---

## Joint Council of Europe/Eurostat demographic data collection

---

The objective of this publication is to provide some basic demographic information for 2001. However, given the timetable (rapid questionnaire sent out in April 2002 with a return date of May), not all countries could provide all the information while some figures are provisional or estimates. Additional and/or more definitive information will be published in the annual reports of the Council of Europe (« Recent demographic developments in Europe 2002 ») and Eurostat (« Demographic Statistics 2002 »).

---

### Main demographic trends for 2001

---

The population of the European Union increased by 0.4 % in 2001, the same increase as in 2000. The 2000 figure has been revised upward from 0.3 %, mainly because of relatively large corrections to the population estimates for Spain (revised international migration estimates) and Portugal (new Census base). About three-quarters of the total population increase in the EU in 2001 was due to net inward migration and only one-quarter to natural increase. Net migration has exceeded natural increase in each year since 1989. Only in France, and to a lesser extent in the Netherlands and Finland, did natural increase contribute more to population growth in 2001 than international migration. Indeed, in Germany, Sweden and Greece, there continued to be a natural decrease (more deaths than births). In contrast virtually all countries in Central and Eastern Europe saw declines or very small increases in population size, for many from combinations of natural decreases and/or net outward migration (see Tables 1 and 2 for more details). Of the Council of Europe Member States outside the EU, the Russian Federation experienced a natural decrease of nearly 1 million (0.65 %), while the population of Turkey grew by over 1 million (1.5 %) through an excess of births over deaths.

Table 3 shows that the total fertility rate (TFR) for the European Union remained almost unchanged in 2001 at 1.47, and still slightly higher than in the mid to late 1990s when it fluctuated around 1.42 to 1.45. This constancy between 2000 and 2001 was observed in most EU countries with the exception of Ireland where it increased appreciably and Luxembourg, Germany and Portugal where it decreased appreciably. The lowest TFRs were seen in Armenia (1.00), the Czech Republic (1.14) and Ukraine (1.10 in 2000). There were further small increases in the proportion of births outside marriage in virtually all European countries, the highest figure still being seen in Iceland (63 %).

Infant mortality was below 6 deaths of children under one per 1000 live births in all EU countries, and compares with 6.8 in the USA (see Table 4). Within the European Union, the lowest rates in 2001 were observed in Finland and Sweden at 3.2 and the highest in Luxembourg (small numbers) and Greece at 5.9. Turkey had the highest rate in 2001 for Council of Europe Member States at 38.7 but this compares with a figure of 95.4 in 1980. The EU expectation of life at birth based on 2001 mortality rates is now over 75 years for men and 81.5 years for women. These figures compare with 70.5 years for men and just over 77 years for women based on 1980 mortality rates. The lowest expectation of life at birth for men is still found in the Russian Federation (59 years).

Table 5 shows that over the last twenty years or so, the annual number of marriages and popularity of marriage has declined nearly everywhere, the only exception in the European Union being Denmark.

In contrast the incidence of divorce has increased as different forms of family type, such as consensual unions and lone parent families have become more prevalent. The highest crude marriage rate in 2001 was observed in Cyprus and the highest crude divorce rates (over 4 per 1000 population) in the Russian Federation, Ukraine (both 2000 statistics) and Belarus.

## GLOSSARY

**Natural increase:** the difference between the number of live births and the number of deaths.

**Net migration:** the difference between the number of immigrants and the number of emigrants. In this publication, it is calculated by taking the difference between total population increase and natural increase.

**Crude rate:** the ratio of the number of events to the mean population in a given year.

**Total fertility rate:** the average number of children that would be born alive to a woman during her lifetime if current age specific fertility rates were to continue.

**Infant mortality rate:** the ratio of deaths of children under one year of age to the live births in a given year.

**Life expectancy at birth:** the average number of years a person would live if current age specific mortality rates were to continue.

**Council of Europe Member States:** all the European Union countries, Andorra (AND), Albania (ALB), Armenia (ARM), Azerbaijan (AZE), Bosnia and Herzegovina (BIH), Bulgaria (BGR), Croatia (HRV), Cyprus (CYP), Czech Republic (CZE), Estonia (EST), Georgia (GEO), Hungary (HUN), Iceland (ISL), Latvia (LVA), Liechtenstein (LIE), Lithuania (LTU), Malta (MLT), Moldova (MDA), Norway (NOR), Poland (POL), Romania (ROM), Russian Federation (RUS), San Marino (SMR), Slovak Republic (SVK), Slovenia (SVN), Switzerland (CHE), the former Yugoslav Republic of Macedonia (MKD), Turkey (TUR), Ukraine (UKR).

**Council of Europe non-Member States with observer status:** Belarus (BLR), the Federal Republic of Yugoslavia (YUG).

**More developed countries:** all countries in Europe (including European members of the CIS-Commonwealth Independent States), Australia, Canada, Japan, New Zealand, Turkey, the United States of America.

**Less developed countries:** all countries excluding more developed countries

## Order form

I would like to subscribe to Statistics in focus (from 1.1.2002 to 31.12.2002):

(for the Data Shop and sales office addresses see above)

**Formula 1:** All 9 themes (approximately 180 issues)

Paper: EUR 360

Language required:  DE  EN  FR

**Formula 2:** One or more of the following nine themes:

Theme 1 'General statistics'

Theme 6 'External trade'

Theme 7 'Transport'

Theme 9 'Science and technology'

Paper: EUR 42

Theme 2 'Economy and finance'

Theme 3 'Population and social conditions'

Theme 4 'Industry, trade and services'

Theme 5 'Agriculture and fisheries'

Theme 8 'Environment and energy'

Paper: EUR 84

Language required:  DE  EN  FR

Statistics in focus can be downloaded (pdf file) free of charge from the Eurostat web site. You only need to register. For other solutions, contact your Data Shop.

Please send me a free copy of 'Eurostat mini-guide' (catalogue containing a selection of Eurostat products and services)

Language required:  DE  EN  FR

I would like a free subscription to 'Statistical References', the information letter on Eurostat products and services

Language required:  DE  EN  FR
