Poursuite de la réduction du cheptel bovin en 2004..... 1

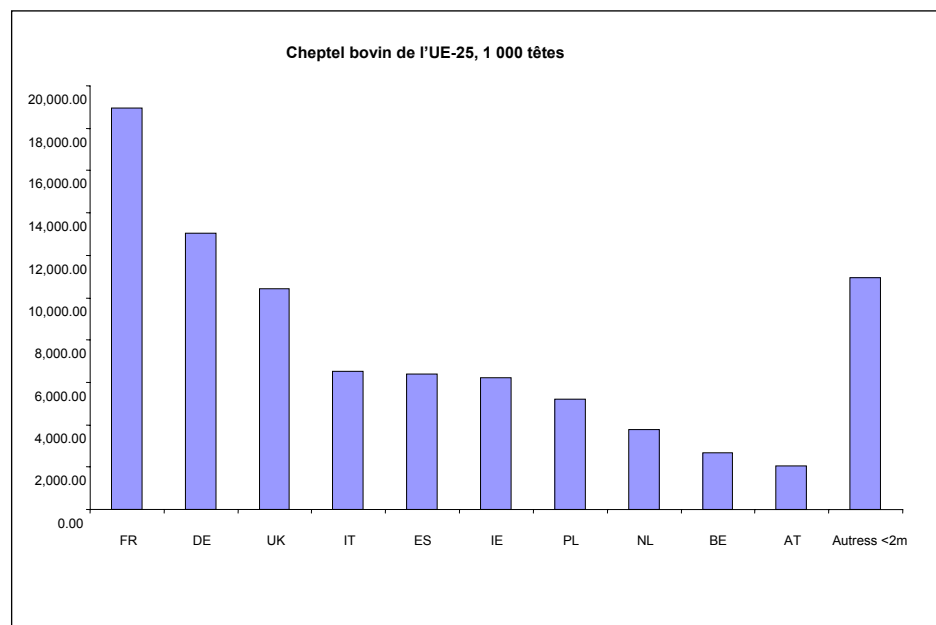

Baisse de la production bovine.....1

# Enquête sur le cheptel bovin en décembre 2004 et prévisions de production pour 2005

Les enquêtes de cheptel de bétail de décembre 2004 pour l'UE-25 montrent que le cheptel bovin continue à diminuer lentement. Le nombre total de bétail est de 1,5 % plus faible qu'en décembre 2003. Le prix du boeuf reste élevé, malgré les changements dus à l'élargissement et à la réforme de la PAC.

### Poursuite de la réduction du cheptel bovin en 2004

L'enquête de décembre estime le nombre total de bétail pour l'UE-25 à 86,2 millions. Cela représente presque 6,5 % du cheptel bovin mondial, selon la FAO (FAOSTAT) qui a totalisé 1,33 milliards d'animaux en 2004. Au niveau national, des changements se sont étendus de -8,9% en Slovaquie à + 8,2% pour Malte. Pour la France et l'Allemagne, les deux plus grands producteurs de bétail, on note une diminution de -1,2 % et - 2,6 % respectivement.

### Baisse de la production bovine

La production indigène brute de bétail a également poursuivi sa tendance à la baisse. La production est estimée être presque à 30 millions pour 2005, représentant une diminution de 1,9%. Néanmoins, cela est basé sur le nombre d'animaux abattus, lequel a été influencé par la réforme de la PAC.

### **European Statistical Data Support:**

Eurostat a mis en place, conjointement avec les membres du "Système statistique européen", un réseau de centres d'appui, qui couvrira presque tous les États membres et certains pays de l'AELE.

La mission de ces centres sera d'aider et d'orienter les utilisateurs qui se procureront des données statistiques européennes sur l'internet.

Vous trouverez sur notre site internet des informations sur ce réseau de centres d'appui:

[www.europa.eu.int/comm/eurostat/](http://www.europa.eu.int/comm/eurostat/)

---

Une liste des bureaux de vente dans le monde est disponible à :

**l'Office des publications officielles des Communautés européennes.**

2, rue Mercier – L-2985 Luxembourg
