Pig population continues its gradual decline..... 1

Pig production stable ..... 1

The pig populations in the EU-25 show a distinct difference between the new Member States, where the population is falling significantly, and the EU-15, where the herd size is quite stable. Prices have been fairly steady over the past 3 years, since the peaks achieved in 2001

### Pig population continues its gradual decline

The pig population of the EU-25 was 151.7 million in December 2004, according to the latest estimates from Member States. This is down by 0.7% on the previous year. The largest decreases were in 4 of the new Member States – Slovakia (-20.4%), Hungary (-17.4%), Slovenia (-13.9%) and the Czech Republic (-11.9%). The EU-15 population increased by 1.3%, with the largest rises in Spain (+5.4%), Portugal (+4.4%), the Netherlands (+3.5%), and Denmark (+3.4%).

### Pig production stable

Pig production in the EU-25 is expected to show a slight decrease (-0.6%) during 2005. The expected changes range from -9.4% in Hungary and -8.2% in Slovakia, to +12.8% in Estonia and +6.1% in the Netherlands.

### **European Statistical Data Support:**

Eurostat set up with the members of the 'European statistical system' a network of support centres, which will exist in nearly all Member States as well as in some EFTA countries.

Their mission is to provide help and guidance to Internet users of European statistical data.

Contact details for this support network can be found on our Internet site: [www.europa.eu.int/comm/eurostat/](http://www.europa.eu.int/comm/eurostat/)
