

Contents

1	Introduction	7
1.1	Motivation.....	7
1.2	Additional information.....	8
1.3	Scope.....	8
2	Terms and basic definitions	9
3	Specification and evaluation of needs and resources	11
3.1	Definition of target areas.....	11
3.2	Definition of target parameter.....	12
3.3	Distinction of sampling designs.....	12
3.4	Definition of data availability.....	13
4	Implementation of small area estimation	15
4.1	Choice of small area estimation approach.....	15
4.2	Unit- versus area-level empirical best prediction.....	17
4.3	Auxiliary variables measured with (out) errors.....	18
4.4	Testing for area-specific random effects.....	19
4.5	Assurance of coherence.....	19
5	Model diagnostics and evaluation	21
5.1	Model diagnostics.....	21
5.2	Evaluation of approaches.....	22
6	Exemplary application	24
7	References	34
8	Appendix	38
A.1	Design-based estimation.....	38
A.2	Model-assisted estimation.....	39
A.3	Model-based estimation.....	39
A.3.1	Fay-Herriot estimator.....	39
A.3.2	Battese-Harter-Fuller estimator.....	42
A.3.3	You-Rao estimator.....	44
A.3.4	Measurement error model.....	46
