Foreword

The Statistical Requirements Compendium (SRC) serves as an established **reference guide for the EU acquis in statistics**. The Compendium gives an overview of the key reference information for European statistical production. It provides a short description for each statistical domain and lists current legal acts and other relevant documents for the compilation of statistics, including methodological information and data requirements.

The Compendium is updated every year by Eurostat, the statistical office of the European Union, with new legislation and other developments relevant for European statistics.

The Compendium presents the themes according to their statistical activities and domains in the Classification of Statistical Activities (CSA) REV 1 2009 and where necessary, are adapted to fit Eurostat's organisation of statistical production. The main purpose of introducing the CSA was to provide a stable classification of statistical domains and their data requirements, which could easily be transferred to similar processes and purposes and be used for compliance monitoring. The presentation according to the CSA was introduced in the 2017 edition of the SRC, when Eurostat decided to abolish the modules in the statistical work programme. Prior to 2017 the order followed the structure of the European Statistical Programme and the corresponding Annual Work Programmes of Eurostat.

For reference purposes, the former module codes are listed in the table of orientation (annex 1) at the end of the publication.

The various statistical themes are presented in the SRC from the perspective of a statistical data provider in a given country. It implies that in general, one has included only those subject areas for which there exists a legal or methodological basis that influences the way European statistics are produced. The focus is on countries which are part of the European Statistical System (ESS) or countries for which there are obligations to provide data to Eurostat. For the EU enlargement area, i.e. candidate countries and potential candidates, the SRC is used to assess the compliance level with the EU acquis in statistics.

This publication was produced by the enlargement team of Unit B3: "Enlargement, neighbourhood and development cooperation" of Eurostat in close cooperation with relevant units of Eurostat and with the assistance of Unit B4: "Dissemination and user support". The help and support of all involved persons were indispensable for the compilation of this publication, especially in the extraordinary year of 2020.

Introduction

The Statistical Requirements Compendium (SRC) is a reference tool for producers of official statistics. The presentations of the statistical subject areas in the compendium are made from the perspective of a statistics producer in a country. Only those subject areas are included where there are legal or methodological bases that influence the way statistics are produced in countries implementing the European Statistical System (ESS) or where there are obligations to provide data to Eurostat.

The subject matter areas are grouped according to their statistical activities and domains in the Classification of Statistical Activities (CSA), and where required, adapted to fit Eurostat's organisation of statistical production. For reference purpose the former modules codes are listed in the correspondence table in the table of orientation at the end of the SRC.

Each subject area is presented as follows:

Subject area number (N.N.NN.) – Subject area name

Responsible unit

Contact person in Eurostat

SUBJECT AREA DESCRIPTION

This section describes the content of the subject area.

LEGAL BASIS

This section includes the legal acts, formal agreements and other basic reference documents relevant for the statistical work coming under a given subject area.

Legal acts:

This sub-section contains all legislation published in the Official Journal that is relevant for the production of the statistics. These are Directives, Regulations, Decisions, Resolutions or Recommendations approved by the European Council and Parliament or by the European Commission.

Agreements:

This sub-section contains all kinds of agreements, i.e. agreements with Member States reached within Eurostat Working Groups, Gentlemen's agreements etc.

Other basis:

This sub-section contains other documents that are considered as relevant for the production of the statistics in the particular area. The sub-section also includes legislation under preparation such as draft Council Regulations or proposals for a Regulation / Directive. It can also be Communications from the European Commission to the European Parliament and Council, EU Action plans, Programmes, Strategies and Memoranda. This sub-section may also include other relevant documents such as documents and minutes of Eurostat Working Groups, Manuals, Reference Guides, Handbooks or Web pages.

DATA REQUIREMENTS

This section lists all datasets that are to be provided from National Statistical Institutes to Eurostat via eDAMIS, the Eurostat single entry point for data delivery. Registered users can access eDAMIS at <https://webgate.ec.europa.eu/edamis>

Each data set description includes the code and the name of the data set. 'Timeliness' usually means the number of days, or months, quarters or years if specified as such in each subject area, between

the end of the reference period and the deadline for the transmission of the data to Eurostat (e.g. T+30 days). 'Periodicity' expresses the length of the period for which the data is collected (e.g. A5 for every fifth year, A4 for every fourth year, A3 for every third year, A – annually, B – biannually, S – semi-annually, Q – quarterly, M – monthly).

METHODOLOGY

This section presents documents or links to interest groups that are useful for the production of the statistics for the particular subject area. Documents can be minutes of Working Groups, White Papers, statistical methodological manuals, etc. In general, this section contains material that is mainly for information whereas material presented under 'other basis' in the section 2.'Legal Basis' implies a degree of obligation. However, there is not always a clear borderline so that e.g. methodological manuals may be found in either this section or in section 2.

INTERNATIONAL COOPERATION

This section lists international organisations that in cooperation with Eurostat produce statistics for the particular subject area.

SUBJECT AREA DESCRIPTION

The objective of this subject area is the development and production of high quality and policy-relevant annual demographic statistics at national and regional level with a view to monitoring the demographic challenges faced by the European countries.

LEGAL BASIS

Legal acts:

Regulation (EC) No 862/2007 of the European Parliament and of the Council of 11 July 2007 on Community statistics on migration and international protection and repealing Council Regulation (EEC) No 311/76 on the compilation of statistics on foreign workers.

Commission Regulation (EU) No 351/2010 of 23 April 2010 implementing Regulation (EC) No 862/2007 of the European Parliament and of the Council on Community statistics on migration and international protection as regards the definitions of the categories of the groups of country of birth, groups of country of previous usual residence, groups of country of next usual residence and groups of citizenship.

Regulation (EU) No 1260/2013 of the European Parliament and of the Council of 20 November 2013 on European demographic statistics.

Commission Implementing Regulation (EU) No 205/2014 of 4 March 2014 laying down uniformed conditions for the implementation of Regulation (EU) No 1260/2013 of the European Parliament and the Council on European demographic statistics, as regards breakdowns of data, deadlines and data revisions.

Comments:

The annual demographic questionnaires contain mandatory datasets as well as voluntary datasets. The mandatory datasets are in the regulations listed above.

Eurostat cooperates with United Nations Statistics Division (UNSD) for the main demographic data collection – 'Eurostat-UNSD Joint Demographic Data Collection'.

Since 2014, the data collections ("Eurostat-UNSD Joint Demographic Data collection", "Regional demographic data collection" and "International migration data collection") have been merged in one single annual data collection (UNIDEMO).

Therefore Eurostat currently carries out four demographic data collections per year:

- The Demographic Balance data collection (DEMOBAL) supplies to Eurostat by end of June of year t the demographic balance referring to the year t-1, i.e.: the population on 1 January of the year t-1, plus the total number of births, minus the total number of deaths during the year t-1 plus the net migration in year t-1 resulting in the total population on 1 January of year t.
- The total usually resident population (URESPOP) is collected by the end of August from EU Member States only to fulfil specific purposes linked to EU legislation, in particular for the purposes of the Qualified Majority Voting (QMV) in the Council of the European Union. The definition of population is thus uniform in this case for all countries.
- Countries are providing the latest available monthly births, deaths (mandatory), immigration and emigration (voluntary) figures of the current year within the NOWCAST data collection, by the end of November each year.
- The main data collection of the year (UNIDEMO) takes place in the last quarter of the year. Detailed data on population, live births, deaths on the national as well as regional level and detailed data on immigration and emigration flows on the national level are collected. The data provided by the end of each year refers to the previous year. Demographic indicators are calculated and published by Eurostat based on these data each year.

Countries may send updates of the data they previously provided throughout the year.

The DEMOBAL, URESPOP and UNIDEMO data collections also require the submission of the relevant metadata.

Periodicity: annual.

Participant countries:

DEMOBAL and UNIDEMO: 49 countries and territories participate in these data collections: EU Member States, EFTA countries, EU Candidate Countries, Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Georgia, Moldova, Monaco, Kosovo*, Russia, San Marino and Ukraine.

URESPOP: the EU Member States are required to participate.

NOWCAST: EU Member States, EFTA countries and EU Candidate Countries participate in this data collection.

Official data providers: National Statistical Institutes.

Publication: statistics are published on the free dissemination database in Eurostat website.

SUBJECT AREA DESCRIPTION

Due to a structural change of the Eurostat unit F.2 Population, the previous subject area 1.01.02 of the Statistical Requirement Compendium - Migration and asylum, has been restructured and now forms a new subject area that covers: Population Census and Asylum and Managed Migration statistics.

The objective of this subject area is the development and production of high quality and policy-relevant statistics on migration and international protection in the light of an increased policy focus on the socio-economic impacts of migration, the development of a common immigration policy and the Common European Asylum System. Regulation 862/2007 and its associated implementing measures defines a range of annual statistics on migration flows and migrant stocks, acquisition of citizenship, residence permits and measures against illegal entry and stay; annual, quarterly and monthly statistics on asylum. The annual statistics on migration flows, migrant stocks and acquisition of citizenship are now covered under Subject area 7.01.21.

Additionally, this subject area covers the preparation and realisation of the Community Programmes for population and housing censuses every 10 years, based on Regulation 763/2008.

LEGAL BASIS

Time of obligation: continuous starting from reference year 2008.

Periodicity: annually.

Publication: statistics are published on the free dissemination database in Eurostat website.

Participant countries: EU Member States, Iceland, Liechtenstein, Norway, Switzerland.

Official data providers: Ministries of Justice and Home Affairs, Police Authorities.

Supplementary disaggregation to the statistics on return: first reference year of the voluntary data transmission by the Member States is 2014.

Use of the statistics: support the policy development in this area, and monitoring of major changes in migration pressure and illegal immigration.

Collection of statistics on residence permits (Article 6 of the Regulation). Annual collection of data on residence permits granted to third country nationals – first permits granted during the reference year, permits granted during the reference year on the occasion of persons changing immigration status or reason to stay, number of permits valid and number of long term residents at the end of the reference year.

Time of obligation: continuous starting from reference year 2008.

Periodicity: annually.

Publication: statistics are published on the free dissemination database in Eurostat website.

Participant countries: EU Member States, Iceland, Liechtenstein, Norway, Switzerland.

Official data providers: Ministries of Justice and Home Affairs and related agencies.

Use of the statistics: support to policy development.

Data collection of age and sex categories related to residence permits statistics were introduced as a separate table for all the templates with the exception of RP5 table - "changing immigration status or reason to stay" starting with the 2010 reference period on voluntary basis.

EU Blue Cards Statistics: starting with the 2011 reference period under the framework of a pilot data collection, Eurostat is collecting data on EU Blue Cards related to residence permits statistics. The first reference year of the compulsory data transmission by the Member States is 2012.

Single Permit data collection: first reference year of the compulsory data transmission by the Member States is 2013.

Seasonal Workers data collection: first reference year of the compulsory data transmission by the Member States is 2017.

Intra-corporate transfers' data collection: first reference year of the compulsory data transmission by the Member States is 2017.

New long-term residence permits data collection: first reference year of the voluntary data transmission by the Member States is 2016.

Residence permits issued for family reunification with beneficiaries of protection status data collection: first reference year of the voluntary data transmission by the Member States is 2016.

SUBJECT AREA DESCRIPTION

The subject area covers the EU Labour Force Survey (LFS) and job vacancy statistics (JVS).

The EU-LFS provides quarterly and annual information on a wide range of labour market characteristics and socio-demographic variables of individuals and households. Based on quarterly/annual micro-datasets detailed tables, aggregate information, targeted indicators and time series are produced, analysed and disseminated. Tailor-made extractions using the micro-datasets are available and can be provided to users. Anonymised micro-data are available for researchers under specific conditions. Data related to the annual ad hoc subject areas are implemented and results are published. Based on the quarterly LFS results, monthly unemployment rates are estimated and released as headline indicators. Conceptual work and quality-related projects are undertaken across the entire domain.

Job vacancy statistics (JVS) provide information on the level and structure of labour demand. Eurostat publishes quarterly data on the number of job vacancies and the number of occupied posts which are collected under Regulation 453/2008 and implementing Regulations 1062/2008 and 19/2009. Eurostat also disseminates the job vacancy rate which is calculated on the basis of data provided by the countries.

SUBJECT AREA DESCRIPTION

The subject area includes multiannual, annual and short term statistics on earnings and labour costs and indicators on labour taxation. Structural statistics consist of the four-yearly Labour Cost Surveys (LCS) and the Structure of Earnings Surveys (SES), which both are based on legal acts. Annual statistics on minimum wages, gender pay gap, net earnings and tax rates data are provided by Member States or OECD (for net earnings and tax rates) under gentlemen's agreements. At the centre of the (monetary) short term statistics is the Labour Cost Index (LCI). The LCI-related work covers the production of quarterly releases, detailed quality assurance and, every two years, the preparation of a Report on implementation to the Council and the European Parliament.

1.3.1. Education

Responsible unit: **F.5:** Education, health and social protection

Contact person: Małgorzata STADNIK, Tel: +352 4301 37722

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide comparable and harmonised data on formal education in EU, the candidate countries and EEA countries.

The main data source is the set of joint UOE (UNESCO Institute of Statistics, OECD and Eurostat) tables on education systems including some Eurostat-specific tables. The statistics refer to public and private, full-time and part-time education in school and university systems as defined in the UOE manuals.

The UOE data collection provides annual data on participation and completion of education programmes by pupils and students, personnel in education and the cost and type of resources dedicated to education. The reference period for non-monetary education data (e.g. students enrolled, entrants) is the school/academic year, where "2018" stands for school/academic year 2017-2018. For expenditure data the reference period is the financial year. The statistics cover pupils and students enrolled, entrants, graduates, personnel, learning mobility, language learning and expenditure. Regional data are also available. The international standard classification of education (ISCED) is used for defining education levels and fields. Data are produced annually and covered by the Regulation (EC) No 452/2008 of the European Parliament and of the Council of 23 April 2008 concerning the production and development of statistics on education and lifelong learning (domain 1). Data to be transmitted in relation to the joint UOE data collection instruments (see section 3 below) are also defined in a Commission Regulation (last one adopted in 2013 – see Legal basis).

1.3.2. Vocational training and lifelong learning statistics

Responsible unit: **F.3: Labour market and lifelong learning**

Contact person: Sabine GAGEL, Tel: +352 4301 36734

SUBJECT AREA DESCRIPTION

This subject area covers participation in lifelong learning, vocational training and outcomes of education statistics.

The Adult Education Survey (AES) provides data on the structure of participation of adults in lifelong learning activities (up to 2016 age group 25-64 years old, from 2022 age group 18-69 years old). In particular, it covers the patterns of participation in formal and non-formal education and training, reasons for participation, obstacles to participation, costs of participation as well as types and intensity of participation. The 2007 Adult Education Survey was a pilot exercise at EU level. The results are available for most EU countries (EU27 except Ireland and Luxembourg) as well as the United Kingdom, Norway, Switzerland and Turkey. The second survey (AES 2011) was implemented under Regulation (EC) No 452/2008 of the European Parliament and of the Council of 23 April 2008 concerning the production and development of statistics on education and lifelong learning (domain 2). Commission Regulation (EU) No 823/2010 of 17 September 2010 defined the observation period and the deadline for the transmission of the results and provides information on the description of the variables as well as on the sampling, precision and quality requirements. The results of AES 2011 are available for EU27 except Croatia, and for the United Kingdom, Norway, Switzerland, Serbia and Turkey. The 2016 AES was carried out between 1 July 2016 and 31 March 2017, following the requirements set in Commission Regulation (EU) No 1175/2014 of 30 October 2014. Data transmission to Eurostat was due 6 months after the end of the national data collection period. The results for the AES 2016 are available for EU27 and for the United Kingdom, Norway, Switzerland, North Macedonia, Bosnia and Herzegovina, Albania, Serbia and Turkey. With the adoption of Regulation (EU) 2019/1700 of the European Parliament and of the Council of 10 October 2019 establishing a common framework for European statistics relating to persons and households, based on data at individual level collected from samples, the next AES is due in 2022. The implementing measures for 2022 AES are expected to be adopted by June 2021.

The objective of the continuing vocational training survey (CVTS) is to provide comparable statistical results enterprises' investment in the continuing vocational training of their staff. It covers topics such as provision of CVT courses and other forms of CVT (training/non-training enterprises), CVT strategies, participants in CVT courses, costs of and time spent in CVT courses, characteristics of CVT courses and assessment of CVT. Since 2005, the CVTS also collects some information on initial vocational training (IVT).activities The survey covers enterprises with 10 and more persons employed in sections B to N, R and S in NACE Rev. 2 (sections C to K and O of NACE Rev. 1.1.). Five rounds of surveys have been carried out with reference years 1993, 1999, 2005, 2010 and 2015. Since 2005 the production of CVTS data is covered by the Regulation (EC) No 1552/2005 of the European Parliament and of the Council on statistics relating to vocational training in enterprises. The 2005 wave was implemented based on Commission Regulation (EC) No 198/2006 of 3 February 2006 on statistics relating to vocational training in enterprises. For the 2010 wave Commission Regulation (EU) No 822/2010 of 17 September 2010 amended Commission Regulation (EC) No 198/2006 as regards the list of variables as well as the precision requirements (NACE Rev. 2 and additional requirements for the representativeness of the results in large countries). The 2015 CVTS was carried in 2016 out for reference year 2015 following the requirements set in Commission Regulation (EU) No 1153/2014 of 29 October 2014. Data transmission to Eurostat was due by 30 June 2017. The results of the 2015 CVTS are available for EU27 as well as for the United Kingdom, Norway and North Macedonia. The next CVTS is due for the reference year 2020. The requirements remain unchanged compared to 2015.

The EU Labour Force Survey (EU-LFS) provides results on the levels of participation in education and training (i.e. in lifelong learning activities) as well as on educational outcomes (i.e. educational

attainment level) for the age group 15+. This also allows for the provision of related indicators such as early leavers from education and training, young people neither in employment nor in education and training (NEET) or employment rates of recent graduates. Up to 2020, the production of education variables in the EU-LFS is covered by Commission Regulation (EC) No 377/2008 of 25 April 2008 implementing Council Regulation (EC) No 577/98 on the organisation of a labour force sample survey in the Community as regards the codification to be used for data transmission from 2009 onwards, the use of a sub-sample for the collection of data on structural variables and the definition of the reference quarters. As from 2021, the requirements are set in Commission Implementing Regulation (EU) 2019/2240 of 16 December 2019 specifying the technical items of the data set, establishing the technical formats for transmission of information and specifying the detailed arrangements and content of the quality reports on the organisation of a sample survey in the labour force domain in accordance with Regulation (EU) 2019/1700 of the European Parliament and of the Council, as well as in related acts (for details see 1.2.1. Employment and unemployment).

To complement regular statistics, special modules are attached to the EU-LFS on a yearly basis since 1999. Four subject areas concern education matters: Transition from school to working life (2000), Lifelong learning (2003) and Entry of young people into the labour market (2009) and Young people on the labour market (2016). The next modules with some links to education matters are the modules on the labour market situation of migrants and their immediate descendants (2021), job skills (2022) and young people on the labour market (2024).

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide harmonised and comparable data sets in the field of public health that cover major elements related to health, namely health status, morbidity, disability, health and social integration, health determinants, access to health care and mode of provision, financial, human and technical resources within the healthcare sector, the allocation of these resources between healthcare activities, and the causes of death. Data are used for different sets of indicators, such as sustainable development, the European Core Health Indicators (ECHI), the Open Method of Coordination on social inclusion and social protection (OMC), Social scoreboard supporting the European Pillar of Social Rights, Active and Healthy Ageing (flagship project in EU2020) and Health Inequalities.

Further improvement of the methodology and quality is on-going or planned via the development of measures implementing the framework regulation 1338/2008 on Community statistics on public health and health and safety at work.

1.4.2. Health and safety at work

Responsible unit: **F.5:** Education, health and social protection

Contact person: Silvia CRINTEA ROTARU (ESAW, EODS), Tel: +352 4301 35067

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide harmonised and common data sets in the field of health and safety at work, covering several elements related to the prevention and protection of the health and safety of workers at work, in particular accidents at work, occupational diseases, other work-related health problems and exposure to risk factors for physical health and mental well-being.

Three data collections are available or under development: there are two administrative data collections ESAW (European Statistics on Accidents at Work) and EODS (European Occupational Diseases Statistics) and in addition survey data coming from the EU Labour Force Survey ad-hoc module are available for this subject area. While ESAW data collection is a regular one and well established, the EODS data collection is still in the pilot phase that is on-going 2017 – 25 in view of a possible revision and further dissemination as experimental statistics. The regular EU Labour Force Survey module "on accidents at work and other work-related health problems" was carried out in 1999, 2007 and 2013, and the last LFS ad-hoc module is on-going in 2020.

1.5 Income and consumption

1.5.1. Household budget surveys and harmonised European time use surveys

Responsible unit: **F.4:** Income and living conditions; Quality of Life

Contact person: Teodora TCHIPEVA, Tel: +352 4301 33763

SUBJECT AREA DESCRIPTION

Household budget survey

The objective is to provide harmonised data on consumption expenditure at EU level. The data are based on national Household Budget Surveys, which are sample surveys covering around 270,000 households. Data are collected on the basis of a gentlemen's agreement approximately every five years. Data are available in Eurobase. The most recent information is relating to the 2015 wave. The reference year for the latest data collection is 2015.

Harmonised European time use surveys

The aim of the harmonised European time use surveys (HETUS) is to provide detailed information on how individuals spend their time. It sheds light on (paid) working time, unpaid work, activities outside the work place and issues related to the reconciliation of work and family life. There have been two waves by now: HETUS 2000 and HETUS 2010. The next HETUS wave 2020 is ongoing. The subject area covers the development and drafting of methodological guidelines for the countries that conduct a time use survey (HETUS is conducted every 10 years on a voluntary basis), general guidance as well as analysis and support to publications. The 2018 HETUS Guidelines for the new wave (2020) are finalised since 2019 (see reference document below) and an updated version of the guidelines was published in November 2020.

Contact persons: Emilio DI MEGLIO, Tel: +352 4301-38378

Sigita GRUNDIZA, Tel: +352 4301-31542

SUBJECT AREA DESCRIPTION

The objective of this subject area is to produce harmonised data on income, social inclusion and living conditions at EU level. The data is the main source for the compilation of comparable indicators on social cohesion used for policy monitoring at EU level in the context of the Europe 2020 strategy.

The data is based on EU-SILC, an annual survey covering more than 200,000 households and collecting cross-sectional and longitudinal data on income, level of education, labour market, family situation and other living conditions. SILC was launched in 2003 by a group of voluntary countries and then gradually extended. As from 2007 onwards the EU-SILC data collection has taken place in 31 countries (EU Member States, Iceland, Norway, Switzerland and Turkey). Since 2010 the EU-SILC data collection is also taking place in North Macedonia. Montenegro and Serbia conducted a first SILC in 2013, Albania in 2016 and Kosovo¹ in 2018. It is based on Regulation No. 1177/2003 of the Council and European Parliament and on implementing Commission regulations. An additional Commission regulation on an annual ad-hoc subject area is developed each year. Currently, the EU-SILC survey is under a process of modernisation in the framework of the Regulation (EU) 2019/1700¹ (IESS regulation). The revised EU-SILC will enter into force from the 2021 operation.

Aggregated tables and indicators are available on the Eurostat website

1.5.3. Quality of life

Responsible unit: **F.4: Income and living conditions; Quality of Life**

Contact person: Georgiana IVAN, Tel: +352 4301 36924

SUBJECT AREA DESCRIPTION

Measuring the well-being of populations has been a concern of statisticians for some time, but has gained particular attention from politicians, the media and the public over recent years. In the EU, discussions about shifting the focus away from Gross Domestic Product (GDP) as the single measure for societal progress were kick-started in 2007 with the "Beyond GDP" conference and followed by the European Commission "GDP and beyond – Measuring progress in a changing world" communication (August 2009) and a study commissioned by Eurostat to explore the feasibility of a policy-relevant set of well-being indicators. Another influential document published in the same period (September 2009) is the [report of the Commission on the Measurement of Economic Performance and Social Progress, coordinated by J. Stiglitz, A. Sen and J.P. Fitoussi](#). It includes 12 recommendations on how to better measure economic performance, societal well-being and sustainability.

Since then, several initiatives have been set up, which have culminated in the decision of the European Statistical System Committee (ESSC) in November 2011 to work towards developing a set of Quality of Life (QoL) indicators for the EU. The Quality of Life Expert Group mandated by the Directors of Social Statistics finalized the list of indicators on Quality of Life and identified the data gaps and formulate recommendations on the possible future data collections to complete the information. (Please see the final report of the Expert Group:

<http://ec.europa.eu/eurostat/web/products-statistical-reports/-/KS-FT-17-004?inheritRedirect=true&redirect=%2F%2Fec.europa.eu/eurostat/web/publications%2Fstatistical-reports>)

A comprehensive framework alongside a set of Quality of Life indicators (including headline indicators) has been disseminated in a form of Dedicated Section on Eurostat webpage:

<https://ec.europa.eu/eurostat/web/quality-of-life/data>

The indicators are grouped in the following domains:

- Material living conditions
- Productive or other main activity
- Health
- Education
- Leisure and social interactions
- Economic security and physical safety
- Governance and basic rights
- Natural and living environment
- Overall experience of life

Each domain contains a number of topics and subtopics, for which one or more indicators have been identified. Moreover, for each domain/topic a headline indicator has been selected.

The data presented here come from several sources from within the European Statistical System (ESS), in particular SILC (Statistics on Income and Living Conditions), LFS (Labour Force Survey), EHIS (European Health Interview Survey), and administrative sources. In case no data are available from within the ESS, external links to non-ESS sources, such as the EQLS (European Quality of Life Survey), are used as *placeholders*.

The SILC ad-hoc module on subjective wellbeing was conducted in 2013 and has provided many indicators to be used within the framework, especially when it comes to the overall experience of life. It will be partly repeated in 2018.

Regulation (EU) 2019/1700 of the European Parliament and of the Council of 10 October 2019 establishing a common framework for European statistics relating to persons and households, based on data at individual level collected from samples, amending Regulations (EC) No 808/2004, (EC) No 452/2008 and (EC) No 1338/2008 of the European Parliament and of the Council, and repealing Regulation (EC) No 1177/2003 of the European Parliament and of the Council and Council Regulation (EC) No 577/98 (1) OJ L 261I, 14.10.2019, p. 1–32

Other legal basis:

In August 2009, the European Commission published a communication with the title 'GDP and beyond — Measuring progress in a changing world (COM(2009)0433) which proposes five priority actions to further develop environmental and social indicators and to report more accurately on distribution and inequalities.

In taking up the challenges presented by this initiative and other similar ones, the European Statistical System's Sponsorship Group on Measuring Progress, Wellbeing and Sustainable Development (SpG) was created jointly by INSEE (France) and Eurostat and started its work in spring 2010. The Sponsorship Group focused on translating the actions and recommendations from this report into concrete actions for the European Statistical System (ESS).

In September 2010 The DGINS Conference in Sofia reconfirmed the commitment of the members of the ESS to the Group and in November 2011, the European Statistical System Committee (ESSC) endorsed the final report of the SpG.

DATA REQUIREMENTS

None

METHODOLOGY

The key recommendations of the Sponsorship Group in the quality of life area were the following:

- strengthening the household perspective and distributional aspects of income, consumption and wealth,
- improving multi-dimensional measures of quality of life,
- develop a scoreboard of indicators on the basis of existing data, covering as much as possible all the dimensions
- as part of the scoreboard, to investigate possibility of development and relevance of synthetic indicators (no composite indicators)
- further develop the statistical coverage of quality of life, developing SILC as a core instrument complemented by other data sources, to use ESS data sources whenever available

1.6 Social protection

1.6.1. Social protection (ESSPROS)

Responsible unit: **F.5:** Education, health and social protection

Contact person: Gilberto GAMBINI, Tel: +352 4301 35806

SUBJECT AREA DESCRIPTION

The conventional definition used for the scope of social protection definition is the following:

"Social Protection encompasses all interventions from public or private bodies intended to relieve households and individuals of the burden of a defined set of risks or needs, provided that there is neither a simultaneous reciprocal nor an individual arrangement involved. The list of risks or needs that may give rise to social protection is, by convention, as follows: Sickness/Health care, Disability, Old age, Survivors, Family/children, Unemployment, Housing and Social exclusion not elsewhere classified".

The statistical unit in the ESSPROS is called social protection scheme, defined as a distinct body of rules, supported by one or more institutional units, governing the provision of social protection benefits and their financing.

The objective of the social protection core system is to produce data on social protection expenditure, receipts and social benefits classified by the eight social protection functions listed above. The core system is composed by quantitative data - annual data on social protection receipts and expenditures by scheme/groups of schemes and for the total of schemes- and qualitative information- metadata by social protection scheme and detailed benefit.

Data from the subject area on the number of pension beneficiaries are also annually. This subject area was introduced in 2008 and figures from 2006 are currently published. The data include the number of recipients of one or more periodic cash benefits under a social protection scheme falling within seven pension categories grouped into four basic functions (disability, old age, survivors and unemployment). The seven categories of pensions in this subject area are:

- Disability pension;
- Early retirement benefit due to reduced capacity to work;
- Old-age pension;
- Anticipated old-age pension;
- Partial pension;
- Survivor's pension;
- Early retirement benefit due to labour market reasons.

Net social protection benefits are defined as the value of social protection benefits excluding taxes and social contributions paid by the benefits recipients. They are complemented by the value of "Fiscal benefits" provided in the form of tax breaks that would be defined as social protection benefits, if they were provided in cash. Tax breaks promoting the provision of social protection or promoting private insurance plans are excluded. The objective of the ESSPROS net social protection benefits subject area is to show the real impact of social transfers on the income of beneficiaries. According to Commission Regulations (EC) n. 263/2011 and n. 110/2011 on ESSPROS net social benefits, the collection of data on net social benefits, based on the so-called "restricted approach", became compulsory in 2012, when data for the reference year 2010 were collected and transmitted to Eurostat.

Agreements:

1. Voluntary anticipated deadline

The Working Group of June 2010 agreed (Gentlemen's agreement) a deadline of end March N+2 for QUANTI (from 2018 datasets QUANTI and SCHEMES), QUALI and BENEF.

2. Collection of classification of pensions schemes data

The Working Group of June 2010 agreed (Gentlemen's agreement) the methodology for the classification of ESSPROS pension schemes. Data has been collected from Member States.

3. Re-transmission of Core system data (QUANTI) together with NET questionnaire (in December) IF Gross data have been revised

The Working Group of April 2014 agreed (Gentlemen's agreement) that countries transmit revised gross data with net data.

5. Transmission of quality reports of Core System (QUALREP) and Pension Beneficiaries (QRPENB) together with (or shortly after) the corresponding data

The Working Group of April 2014 agreed (Gentlemen's agreement) that countries (continue) send(ing) QUALREP and QRPENB together with (or shortly after) the corresponding data.

6. Voluntary anticipated deadline for Net benefit datasets (NET, QRNET)

The Working Group of March 2015 agreed (Gentlemen's agreement) a deadline for the transmission of Net social benefit datasets (data + quality report) to 31st October N+2 starting from the 2013 reference period.

7. SMDX implementation for ESSPROS

The Working Group of March 2014 agreed (Gentlemen's agreement) to implement the SDMX strategy as soon as possible.

8. Net social benefits data transmissions before Regulations entered into force

The Working Group of June 2010 agreed (Gentlemen's agreement) about the transition period for net social benefits. On the basis of this agreement, data on net social benefits should be collected for years 2007, 2008 and 2009 on a voluntary basis. The collection of data referring to years 2007 and 2008 was launched in 2011 while the collection of 2009 data has been launched in 2012

The ESSPROS Manual is the reference document in the four Commission Regulations implementing the EP and Council ESSPROS Regulation. It contains all detailed definitions and classifications.

The 2011 edition of the ESSPROS manual is equivalent to the previous version (2008 edition) but complemented by the methodology on the subject area on net social protection benefits (restricted approach) finalised during the work on the pilot data collection.

Concurrently, an extended manual, "ESSPROS Manual and user guidelines" was produced. Its nature is serving as a User's Guide for compiling and using ESSPROS. The "ESSPROS Manual and user guidelines" contains in addition examples, further explanations and a complete list of schemes for each country.

1.8.1. Culture and sport

Responsible unit: **F.1. Social indicators - methodology and development; relations with users**

Contact person: Marta BECK-DOMZALSKA, Tel: +352 4301 33123

SUBJECT AREA DESCRIPTION

There are no harmonised data collections or surveys at EU level dedicated only to culture or sport. Both culture and sport statistics are derived from data collections in different statistical domains (not only social statistics): employment (EU-LFS), business (SBS, Business Demography and Prodcum), international trade (Comext), private expenditure (HBS), government expenditure (by COFOG) and participation (EU-SILC and EHIS).

With the adoption of the Europe 2020 strategy and the consequent growing interest of the policy makers in the role of culture in the social development, cultural statistics support the implementation of evidence-based policies.

A plan to develop and disseminate a set of regular European statistics on culture has been formulated at Eurostat in collaboration with DG EAC. This exercise is based on the conceptual framework and the recommendations proposed by the final report of the ESSnet-Culture (European Statistics System Network on Culture) which was published in 2012 and took into account the 2009 UNESCO Framework for culture statistics. Last years, this framework was slightly modified with the agreement of the Working Group 'Culture statistics'.

Cultural statistics are disseminated on Eurostat website - please see:

<http://ec.europa.eu/eurostat/web/culture/overview>.

In recent years, sport has acquired a significant profile in a number of European strategies and programmes; it is part of the wider EU policy agenda. Knowledge of the field therefore needs to be improved on the basis of solid evidence.

Since 2011, the Commission and EU countries have worked together on the basis of multiannual work programmes agreed by the Council which set priorities and define the principles underpinning cooperation.

Sport statistics are available on Eurostat website – please see:

Agreements:

For cultural statistics:

1) Eurostat LEG-culture

In 1999 the Eurostat Leadership Group (LEG) on cultural statistics came to a successful end. Main outcomes were:

- common core of cultural domains, unanimously considered as such, was identified and adopted;
- national and international classifications were analysed in detail and specific proposals were developed with respect to the use of NACE and ISCO;
- identification and selection of key variables were carried out, together with the development of a set of indicators relating to cultural employment, financing and participation.

2) Working Group on cultural statistics

As a follow-up of the LEG, the Working Group (WG) on Cultural Statistics consisting of representatives of all EU Member States was set up within Eurostat in 2000. The WG supported and monitored developments in cultural statistics and encouraged Member States to get involved in the production of comparable data at European level. Task Forces on cultural employment, cultural participation and expenditure and finance were created and prepared their reports in 2004.

During the meeting of the WG in June 2008, a proposal to launch the ESSnet-culture (European Statistical System Network on Culture) was approved. The ESSnet-culture, based on the multi-beneficiary grant awarded for two years, began its work in September 2009. The ESSnet-culture was composed of four thematic Task Forces: framework for cultural statistics, cultural industries, expenditure on culture and cultural participation. The results of the ESSnet work were presented at the final conference in autumn 2011 and the Final report was published in 2012.

The Working Group normally meets once a year and discusses all questions related to the production of culture statistics at EU level, as well as different methodological development.

During the meeting of the Culture statistics WG in April 2015, Eurostat and the Member States found an agreement on how to identify the statistical scope for culture. In 2016 and in 2018, the WG approved slight adjustments to this scope.

2.1.2. Macroeconomic Imbalance Procedure (MIP)

Responsible unit: C.1: National accounts methodology; Standards and indicators

Contact person: Rosa RUGGERI CANNATA, Tel: +352 4301 34397.

SUBJECT AREA DESCRIPTION

The Macroeconomic Imbalance Procedure (MIP) is a surveillance mechanism that aims to identify potential macroeconomic risks early on, prevent the emergence of harmful macroeconomic imbalances, and correct the imbalances that are already in place. It is therefore a system for monitoring economic policies and detecting potential harm to the proper functioning of the economy of a Member State, of the Economic and Monetary Union, and of the European Union as a whole.

The MIP is part of the European Semester, an annual cycle of coordination and surveillance of the EU's economic policies enabling the EU member countries to coordinate their economic policies throughout the year and addressing the economic challenges facing the EU.

In order to detect potentially harmful imbalances and competitiveness losses at an early stage of their emergence, a scoreboard has been implemented. It consists of a combination of stock and flow indicators which can capture both short-term rapid deteriorations as well as the long-term gradual accumulation of imbalances. The MIP Scoreboard consists of fourteen scoreboard indicators measuring internal and external imbalances as well as social and labour market developments. Each Scoreboard indicator has indicative thresholds serving as alert levels without any mechanic interpretation. The economic reading is complemented by the analysis of a wider set of auxiliary indicators without thresholds.

Contact person: Nicola MASSARELLI, Tel: +352 4301 34525

(C.3) Ralf HEIN (enlargement countries), Tel: +352 4301 38396

SUBJECT AREA DESCRIPTION

The objective of this subject area is to manage the implementation of the European System of Accounts ESA 2010 (European Parliament and Council Regulation (EC) No 549/2013), while continuing to participate actively in the discussions on the research agenda of the international System of National Accounts (SNA 2008). The ESA is the appropriate methodological reference for the production of high quality national accounts data required for major EU policies (e.g. excessive deficit procedure, structural funds, etc.) and for economic analysis. ESA 2010 comprises a methodology with common standards, definitions, classifications and accounting rules intended to be used for compiling accounts and tables on a comparable basis as well as a programme for transmitting, for Community purposes and on precise dates, these accounts and tables.

In order to help countries to implement ESA 2010, methodological manuals comprising detailed explanations, methods and numerical examples have been produced, in particular on the changes between ESA 95 and ESA 2010, on measuring research and development, on goods sent abroad for processing and on price and volume measures. Eurostat examines problems encountered by Member States in the implementation of ESA 2010, with the objective to find with them reliable and comparable solutions. In the course of 2020, Eurostat has produced [specific guidance notes on methodological and practical issues related to COVID-19](#), to support countries in their national compilation and to ensure a harmonised treatment across the ESS countries.

2.1.4. Annual sector accounts

Responsible unit: **C.2: National accounts production**

Contact person: Orestis TSIGKAS, Tel: +352 4301 36910

SUBJECT AREA DESCRIPTION

Annual sector accounts are collected on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 715/2010. The new collection based on the Regulation (EU) No 549/2013 of 21 May 2013, complemented by Commission Implementing Decision 2014/403/EU and Commission Implementing Regulation (EU) No 724/2014 of 26 June 2014 is applicable as of 1 September 2014. They provide a complete view of the non-financial transactions of each economic sector, mainly households, government, corporations and the rest of the world and interrelations between them. Annual sector accounts are presented according to the European System of Accounts (ESA) sequence, from production account to net lending/borrowing. They are used for structural analysis and as a benchmark for quarterly sector accounts.

Responsible unit: **C.2: National accounts production**

Contact person: Orestis TSIGKAS, Tel: +352 4301 36910

SUBJECT AREA DESCRIPTION

Quarterly sector accounts are collected on the basis of Regulation (EC) No 1161/2005. The new collection based on the Regulation (EU) No 549/2013 of 21 May 2013, complemented by Commission Implementing Decision 2014/403/EU and Commission Implementing Regulation (EU) No 724/2014 of 26 June 2014, is applicable as of 1 September 2014. They provide a simplified but complete picture of the non-financial transactions of the economic sectors. This quarterly information is particularly useful to analyse the short-term behaviour of households and non-financial corporations. In particular, the quarterly sector accounts of the euro area are used by European Central Bank for monetary policy purposes.

¹ The deadline of 85 days is applicable to Member States whose currency is the euro. For Member States whose currency is not the euro, the data transmission deadline is 3 months. If flagged as 'not published' at national level, the provisional figures that have been transmitted before expiry of the deadline of 85 days by the individual Member States should not be published at European level. The corresponding finalised figures shall be transmitted by the Member States concerned before expiry of the deadline of 3 months. Transmission within a period of 85 days of seasonally adjusted figures and figures in chain-linked volumes is voluntary. For Member States entering the economic and monetary union after the entry into force of this Regulation the applicable data transmission deadline is 85 days from the date of the Member State's entry. Transmission deadline of Quarterly data with seasonal adjustment and chain linked volumes after seasonal adjustment is three working days after deadline for non-seasonally adjusted data.

2.1.6. Quarterly and annual National accounts: main aggregates

Responsible unit: **C.2:** National accounts production

Contact person: Christine GERSTBERGER, Tel: +352 4301 30175

SUBJECT AREA DESCRIPTION

Annual national accounts

Main annual aggregates of non-financial national accounts including data on value added, capital formation and labour input by industry, household final consumption by purpose and income distribution. Data are collected, validated and published on the basis of Regulation (EU) No 549/2013.

This new legal basis for the collection of national and regional accounts, Regulation (EU) No 549/2013 (ESA 2010), was published in the Official Journal on 26 June 2013 and is being implemented since September 2014. From that date onwards the data transmission from Member States to Eurostat follows ESA 2010 methodology and the associated transmission programme.

Annual national accounts data are used for structural indicators, sustainable development indicators, structural and productivity analyses. Main users are the Commission, the European Central Bank, national governments, financial markets, analysts, media and general public.

Quarterly national accounts

Quarterly national accounts, encompassing main aggregates and labour input are also collected, validated and published on the basis of Regulation (EU) No 549/2013 (ESA 2010).

Quarterly national accounts play a fundamental role for economic analysis, definition of economic and monetary policies. Quarterly national accounts provide a coherent overall picture of the economy on a quarterly basis. Main users are the European Commission, the European Central Bank, national governments, financial markets, analysts, media and general public.

2.1.7. Supply, use and input-output tables

Responsible unit: **C.5:** Integrated global accounts and Balance of Payments

Contact person: Isabelle REMOND-TIEDREZ, Tel: +352 4301 36905

SUBJECT AREA DESCRIPTION

The objective is to collect, validate and publish supply, use and symmetric input-output tables on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 400/2009 and Regulation (EU) N° 549 2013. The input-output system includes detailed information for products and industries on production activities, supply and demand of goods and services, intermediate consumption, primary inputs and foreign trade. Data is reported annually for both current prices and prices of the previous year. The compilation and publication of aggregated EU and euro area tables at current prices is now available in NACE Rev 2 and CPA 2008 and in the new ESA2010 for the year 2005 onwards.

2.1.8. Regional accounts

Responsible unit: **C.2: National accounts production**

Contact person: Luis BIEDMA, Tel: +352 4301 34728

SUBJECT AREA DESCRIPTION

Regional accounts are collected on the basis of Council Regulation (EU) No 549/2013. This legal basis for the collection of national and regional accounts, Regulation (EU) No 549/2013 (ESA 2010), was published in the Official Journal on 26 June 2013 and is being implemented since September 2014. From that date onwards the data transmission from Member States to Eurostat follows ESA 2010 methodology and the associated transmission programme. Regional accounts provide information by industry on production activities, and on the primary and disposable income of private households. Data are reported annually in current prices only and, depending on the indicator, at NUTS levels 2 or 3. In this context Eurostat is responsible for producing the official data set of regional GDP for all EU Member States to be used in the structural fund allocation. Regional Accounts data are mainly used for structural analysis.

2.1.9. Monitoring own resources GNI

Responsible unit: **C.3: Statistics for administrative purposes**

Contact person: Ralf HEIN, Tel: +352 4301 38396

SUBJECT AREA DESCRIPTION

The objective of this subject area is to analyse the comparability, reliability and exhaustiveness of Member States' Gross National Income (GNI) data used for EU own resources purposes, as provided for in Regulation 2019/516. This mainly implies that the national accounts data used for budgetary purposes will be examined and further improved according to the provisions of this Regulation, based on the inventories of their statistical sources and methods for compiling GNI and processing tables transmitted by the Member States. Eurostat also carries out direct verification of the national accounts data in the Member States.

LEGAL BASIS

Legal acts:

Regulation (EU) 2019/516 of the European Parliament and of the Council of 19 March 2019 on the harmonisation of gross national income at market prices and repealing Council Directive 89/130/EEC, Euratom and Council Regulation (EC, Euratom) No 1287/2003 (GNI Regulation) (OJ L 91, 29.3.2019).

2.1.10. Monitoring own resources value added tax (VAT)

Responsible unit: **C.3:** Statistics for administrative purposes

Contact person: Ralf HEIN, Tel: +352 4301 38396

SUBJECT AREA DESCRIPTION

For the VAT-based 'third' own resource, Member States' VAT receipts are adjusted using detailed national accounts data to correct for the fact that countries do not all apply the harmonized EU VAT rules, having different rates and coverage of products. Member States provide every year a detailed VAT declaration including the calculation of several adjustment factors based on national accounts. In conjunction with DG BUDG and DG TAXUD, Eurostat makes a detailed verification of the figures and the calculations.

LEGAL BASIS

Legal acts:

2.1.11. Remuneration and pensions of EU Staff

Responsible unit: **C.3: Statistics for administrative purposes**

Contact person: Ian DENNIS, Tel: +352 4301 35129

SUBJECT AREA DESCRIPTION

To provide the Commission with the information required under the Staff Regulations of Officials of the European Communities and Conditions of employment of other servants of the European Communities for the annual adjustment for salaries, correction coefficients and the annual contribution rate for pension, applicable to Staff of all EU Institutions and Agencies. This includes two annual Eurostat reports and the assistance to the Commission at the Council. To provide the Commission with information related to pension schemes and the Joint Sickness Insurance Scheme liabilities to be detailed in the EU accounts. Additional non-statutory information is also provided to the Commission (e.g. actuarial analysis and forecast, salary benchmarking, mission expenses, indemnities of exchange schemes).

LEGAL BASIS

Regulation No 31 (EEC), 11 (EAEC), laying down the Staff Regulations of Officials and the Conditions of Employment of Other Servants of the European Economic Community and the European Atomic Energy Community, and subsequent amendments - in particular Articles 64-65 and Annex XI for salaries and correction coefficients; and Article 83 and Annex XII for pensions.

2.2.5. Government finance statistics — Methodology

Responsible unit: **D.1: Excessive deficit procedure, methodology and GFS**

Contact person: Simona FRANK, Tel: +352 4301 37498

SUBJECT AREA DESCRIPTION

The objective of this subject area is to develop and implement the methodological framework for Excessive Deficit Procedure (EDP) Statistics and Government Finance Statistics (GFS) Statistics. Eurostat publishes the Manual on Government Deficit and Debt (MGDD) to provide the government sector with additional guidelines on the appropriate treatment of statistical issues on EDP/GFS. This manual is updated on regular intervals. In addition, Eurostat provides methodological guidance documentation on the accounting rules, complementing or interpreting the general rules of ESA 2010. Guidance notes are released, after the consultations with EU Member States while clarifications explain the accounting rules for some specific issues. Eurostat occasionally takes decisions which provide general guidance documentation to countries on the recording of certain types of transactions, or which deal with specific cases which are particularly complex. Furthermore, Eurostat provides bilateral advice to EU Member States when requested on specific cases, which are published on the GFS (Government finance statistics and EDP statistics) website.

2.2.6. Government finance statistics — Data production

Responsible unit: **D.1: Excessive deficit procedure, methodology and GFS**

Contact person: Laura WAHRIG, Tel: +352 4301 37687

SUBJECT AREA DESCRIPTION

Reception, processing and dissemination of non-financial and financial government finance statistics including detailed split of taxes and social contributions and total expenditure breakdown by COFOG functions.

These statistics are annual and quarterly.

Annual government finance statistics integrated tables are produced twice per year based on transmitted data. Quarterly data are disseminated each quarter.

2.2.7. Government finance statistics – Methodology II

Responsible unit: **D.1: Excessive deficit procedure, methodology and GFS**

Contact person: Laura WAHRIG, Tel: +352 4301 37687

SUBJECT AREA DESCRIPTION

The objective of this subject area is to ensure the cross-country comparability of national accounts methodology applied to the general government sector, i.e. government finance statistics (GFS), consistently with data provided in the context of the Excessive Deficit Procedure.

Under control of the Excessive Deficit Procedure Working Group, Eurostat organises two task-forces (GFS and COFOG) charged with ensuring the harmonisation of GFS recording across reporting countries.

Regional statistics:

SBS data for Annex 1-4 at NUTS level 2

Regional business demography (RBD) data on active, employer and high-growth enterprises are compiled on a voluntary basis with a complete NUTS breakdown. The data represent the regional breakdown of the national business demography figures, thus based on statistical unit enterprise. RBD is foreseen to become part of the regular annual data collection when the future business legal act (FRIBS) is in force.

SUBJECT AREA DESCRIPTION

The objective is to collect process and publish data on manufactured goods in accordance with the Council Regulation 3924/91 and implementation regulations. PRODCOM contains data on the value and volume of production of about 3900 products. Eurostat publishes the national data and also calculates and publishes EU totals, together with the related Foreign Trade data. Data is reported annually for all products. Monthly reporting for steel products took place between 2003 and 2005 only.

2.3.3. Short-term business statistics

Responsible unit: **G.3: Business cycle; Short-term statistics**

Contact person: Simo PASI, Tel: +352 4301 32035

SUBJECT AREA DESCRIPTION

Short-term business statistics (STS) comprise monthly and quarterly economic indicators concerning the Member States, the EU and the euro area, such as the indices of industrial production (volume), producer (output) prices, production (volume) in construction, volume of sales in retail trade etc. The STS indicators cover many of Eurostat's Principal European Economic Indicators and a large number of Eurostat's regular news releases. These data are closely followed by economic analysts in the Commission and the European Central Bank, as well as in national governments and in the private sector and financial markets.

STS are from 2021 part of the European business statistics (EBS) regulation. The most important changes compared with the short-term business statistics concern the two new quarterly indicators of business demography, the monthly index of services production and the monthly index of wholesale trade volume.

Many of the previous STS regulation's requirements remain in force under the EBS regulation. The old STS regulation's requirements can be found the 2019 edition of the requirements compendium.

Short-term statistics use NACE Rev. 2 as the unique classification of economic activities since 2009. Products are classified according to CPA 2.1.

The most recent documents on STS' legal basis and methodology can be found on Eurostat's web site in STS dedicated section:

2.4.2. Foreign affiliates statistics (FATS)

Responsible unit: **G.6:** Trade in services; Globalisation

Contact person: Karin ISAKSSON Tel: +352 4301-33960

SUBJECT AREA DESCRIPTION

The objective is to collect, process and publish data on the structure and activities of foreign affiliates in accordance with Regulation No 716/2007. FATS contain data broken down up to the 3-digit level of the NACE Rev.2 activity classification combined with geographical breakdown. Eleven variables are provided for inward FATS, whereas 3 variables for outward FATS with 3 other variables provided on a voluntary basis. Eurostat publishes the national data as well as calculates and publishes the EU totals. Data are reported annually. As of reference year 2021, new data requirements will apply for FATS (for more details, see EBS Regulation 2019/2152 and its Implementing Regulation 2020/1197).

SUBJECT AREA DESCRIPTION

As international trade forms a major part of the world economy, statistics on trade in goods are an instrument of primary importance for numerous public and private sector decision makers. European statistics on international trade in goods (ITGS) published by Eurostat measure the value and quantity of goods traded between EU Member States (intra-EU trade) and goods traded by EU Member States with non-EU countries (extra-EU trade). The term 'goods' in this context means all movable property including electricity. The term 'European' means that the statistics are compiled on the basis of the concepts and definitions set out in EU legislation.

2.4.6. Classifications for trade in goods statistics

Responsible unit: **G.3:** business cycle; Short-term statistics

Contact person: Jussi ALA-KIHNIA, Tel: +352 4301 38180

SUBJECT AREA DESCRIPTION

Two classifications are used in trade in goods statistics: the detailed (~9500 codes) product classification Combined Nomenclature (CN) and the country classification Geonomenclature (GEONOM). The CN is updated and published annually in accordance with Council Regulation (EEC) No 2658/87. Eurostat manages the statistical aspects of CN, aided by the Customs Code Committee, and publishes unofficial database versions of CN as well as self-explanatory texts, transposition tables etc. for statistical use. GEONOM is based on Regulation No 471/2009 and is revised when necessary, typically every few years.

Responsible unit: **C.4:** Price statistics; Purchasing power parities; Housing statistics

Contact person: Håkan LINDÉN, Tel: +352 4301 35080

SUBJECT AREA DESCRIPTION

The objective of this subject area is to produce, in accordance with Regulation 1445/2007, the Purchasing Power Parities (PPPs) that are used in particular for the allocation of structural funds by the Commission. For that purpose, it is necessary to carry out consumer goods price surveys and capital goods price surveys as well as surveys of expenditure weights and of data on non-market services and dwelling services. Eurostat aims at further improving the data handling and production processes of PPPs and to further develop the methodology. At the same time, the documentation (in particular the PPP Manual and Member States' Inventories of sources and methods) are continuously updated.

2.5.3. Housing statistics

Responsible unit: **C.4: Price statistics; Purchasing power parities; Housing statistics**

Contact person: Vincent TRONET, Tel: +352 4301 32906

SUBJECT AREA DESCRIPTION

The objective of this subject area is to produce, in accordance with Regulation 2016/792, indices on house prices and on owner occupier's housing expenditures as well as statistics on housing transactions. These data are used for deriving Principal European Economic Indicators and for the Scoreboard of the Macroeconomic Imbalances Procedure. To produce these data it is necessary to use available sources on dwellings transactions. Development of appropriate surveys on aspects of the housing market and of the housing stocks may be required to improve the quality of the results. Eurostat aims at further improving the data handling and production processes of Housing statistics and to further develop the methodology. At the same time, the documentation is continuously updated. Inventories for House price index (HPI) have been delivered for the first time in 2014 and last updated in 2018. Inventories for Owner-Occupied House price index (OOH) were received in 2016 for the first time and updated in 2017.

LEGAL BASIS

Legal acts:

The basic act providing for the compilation of the HPI and OOHPI is the European Parliament and Council Regulation (EU) 2016/792, of 11 May 2016. The basic act is implemented by Commission Regulation (EU) 2020/1148 of 31 July 2020.

METHODOLOGY

The Handbook on Residential Property Prices Indices (RPPIs):

<http://ec.europa.eu/eurostat/documents/3859598/5925925/KS-RA-12-022-EN.PDF>

coordinated by Eurostat and officially released in 2013 provides, for the first time, an overall methodological framework at international level with comprehensive guidelines for the compilation of RPPIs. The Handbook also examines the underlying economic and statistical concepts and defines the principles guiding the methodological and practical choices for the compilation of the indices. The Handbook primarily addresses official statisticians in charge of producing residential property price indices; at the same time, it addresses the international overall requirement on RPPIs by providing a harmonised methodological and practical framework to all parties interested in the compilation of such indices.

Technical manual on Owner-Occupied Housing and House Price Indices – 2017:

<http://ec.europa.eu/eurostat/documents/7590317/0/Technical-Manual-OOH-HPI-2017/>

This technical manual provides guidelines for the development of a price index on Owner-Occupied Housing (OOH) under the net acquisition approach, as well as practical advice for the compilation of the house price index (HPI).

The Housing price statistics - house price index:

http://ec.europa.eu/eurostat/statistics-explained/index.php/Housing_price_statistics_-_house_price_index

article in Statistics Explained presents HPI data at European and Member State level and examples of possible use of this indicator in relation to other statistics, such as consumer price indices and rent price indices. In addition, the article provides a summary description of the HPI methodology and contains a rich collection of links to national statistical institutes' websites dealing with housing statistics.

Responsible unit: **E.2:** Environmental statistics and accounts; Sustainable development

Contact person: Veronika VYSNA Tel: +352 4301 33624 (European Forest Accounts, Joint Forest Sector Questionnaire)

SUBJECT AREA DESCRIPTION

The Joint Forest Sector Questionnaire (JFSQ) provides annual data for the EU and EFTA countries on production and trade in wood and wood products by means of a single worldwide questionnaire jointly managed with UNECE, FAO and ITTO. Economic accounts for forestry and physical and monetary data on forests are collected by means of a second questionnaire, European Forest Accounts (EFA).

Agreements:

For the JFSQ: Agreement of the Inter-Secretariat Working Group (IWG) of 1990 on Forestry statistics. The group is composed of representatives of Eurostat, UNECE, FAO and ITTO.

The purpose of the IWG agreement is to optimise the use of scarce resources by maximising co-operation between organisations and thereby minimising the duplication of work. The IWG is a purely informal body and has no decision-taking powers or authority. Its members are answerable to their own authorities and statutory bodies, who must take decisions in the normal way.

At its first meeting, the IWG adopted two basic objectives:

- no piece of information should be requested twice from the same country by different international organisations
- there should be the same value for the same transaction in all the international data sets

This approach is in accordance with the wider arrangements for coordination of statistical activities between OECD, EUROSTAT and the Conference of European Statisticians (UN/CES).

a) Crop statistics

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Oscar GOMEZ-PRIETO, Tel: +352 4301 37487

SUBJECT AREA DESCRIPTION

The objective is to collect process and disseminate regional, national and EU data on crop production and agricultural land use. Crop product statistics cover the area, production and yield data for cereals, other field crops, vegetables, permanent crops and crop balances for main cereals and oilseeds. Crop statistics are collected annually with several data transmissions.

The crop statistics subject area also includes two specialised surveys, one on vineyards every five years and another one on fruit tree plantations every five years.

Special attention is given to the collection, validation and dissemination of the data, to the analysis of the quality of the data, to the used methods and to the update of the metadata information.

b) Livestock, meat and egg statistics

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Pol MARQUER, Tel: +352 4301 34702

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide harmonised regional, national and EU data related to livestock, meat and poultry production, including, bovine, pig, sheep and goat, populations, meat production through slaughtering in and out of slaughterhouses, gross indigenous production forecasts, activity, trade and structure of hatcheries. Apart from the monthly data on slaughtering and production of chicks, the remaining data is reported twice a year or annually. Special attention is devoted to the collection, validation and dissemination of the data, analysis of the used methods and update of the metadata. Quality is reported every third year (first exercise for reference year 2010) on livestock and meat and every fifth year (first exercise for reference year 2018) on eggs for consumption.

LEGAL BASIS

Legal acts:

c) Milk and milk products statistics

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Pol MARQUER, Tel: +352 4301 34702

SUBJECT AREA DESCRIPTION

This subject area covers statistics at regional, national and EU level related to production of milk and milk products from cows, ewes, goats and buffaloes. It covers monthly and annual data on milk and milk products, produced in agricultural holdings (farms) or in dairy enterprises, including data on the fat and protein content. Triennial statistics provide data on the structure of dairies. All of the data are covered by Community legal acts. Current activities are: improving the data collection system, data validation, data analysis and dissemination as well as the elaboration and update of the annual metadata.

LEGAL BASIS

METHODOLOGY

Exhaustive surveys, accounting for at least 95% of cow's milk collected, the remaining 5% may be obtained from sample surveys. The sampling error must not exceed 1% of the total national collection exhaustive surveys.

The milk products statistics are marked by confidentiality due to the structure of the dairy enterprises.

Regional statistics:

The quantity of cows' milk produced by agricultural holdings is due under Council Directive 96/16/EC for NUTS 2 territorial units.

d) Integrated farm statistics

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Helena RAMOS, Tel: + 352 4301 32366

SUBJECT AREA DESCRIPTION

Collection and validation of statistics on the structure of farms. These data play a key role in the design, implementation, monitoring and evaluation of the Common Agricultural Policy (CAP). The EU agricultural censuses every ten years (1990, 2000; 2010) and intermediate sample surveys in between – have been the backbone of the agricultural statistical system. The system has been renewed in 2018 by the legislation on Integrated Farm Statistics (IFS). In the decade starting with 2020, data on a list of core variables will be collected as a census in 2020, and as samples in 2023 and 2026. In addition, data on various modules will be collected on the same years. Together they provide micro-data on general aspects such as land cover, livestock, agricultural labour force and other gainful activities, rural development measures, machinery and equipment, irrigation, animal housing and manure management, soil management, vineyards and orchards. They are the statistical basis for other statistics on land cover and use, livestock and agricultural income.

The EU farm typology (linked to both integrated farm statistics and the farm accountancy data network) is being revised in accordance with the CAP reform.

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Colin STEWART, Tel: +352 4301 38121

SUBJECT AREA DESCRIPTION

Economic accounts for agriculture (EAA) and Agricultural Price Statistics (APS) play a key role in the design, implementation and monitoring of the common agricultural policy (CAP) as well as in the evaluation of the impact of the CAP on the economic and financial situation of the agricultural community. The national EAA data are covered by legal acts while regional EAA, Unit values and all APS data are collected through gentlemen's agreements. EAA and APS data are collected through gentlemen's agreements, with agricultural land prices and rents data covered by a European Statistical System (ESS) agreement. EAA and agricultural labour input (ALI) data are collected and disseminated annually; price indices are reported quarterly and annually; absolute prices annually. Agricultural land prices and rents statistics are collected and disseminated annually. Collection, validation and dissemination of agricultural accounts and prices will continue and be further modernised.

3.1.3. Fisheries statistics

Responsible unit: **E.1: Agriculture and fisheries**

Contact person: Oscar GOMEZ PRIETO, Tel: +352 4301 37487

SUBJECT AREA DESCRIPTION

The work programme in fisheries statistics concentrates on data requirements of the recent Common Fisheries Policy (CFP, revised in 2014). The regulations on fisheries statistics from 2006, 2008 and 2009 cover annual data for catch, landings and aquaculture statistics. The further integration of the various aspects of the revised CFP (for example the new landing obligation and a need for data from unregulated fishing areas) could extend the range of data required, placing greater emphasis on data which have until recently received relatively little attention. A project aiming at streamlining and simplifying European fisheries statistics has been launched by Eurostat. In this context, an evaluation was carried out to address synergies, gaps, inefficiencies and administrative burdens under the current regulations, and ensure that in the future European fisheries statistics are fit for purpose and bring in significant added value for users. The Commission staff working documents for Evaluation of the European Fishery Statistics was adopted on 28.11.2019 (SWD(2019 425 final)).

LEGAL BASIS

METHODOLOGY

Member States provide methodological reports on the way they collect data. These reports are updated yearly for aquaculture statistics and three annually for catch/landings statistics.

The Coordinating Working Party on Fishery Statistics (CWP) is setting statistical standards for fisheries data. Eurostat is a member of the CWP and adheres to its standards, definitions and concepts laid down in the CWP Handbook of Fishery Statistical Standards:

<http://www.fao.org/fishery/cwp/search/en>

It is noteworthy that several sections of this Handbook are currently being revised and its

presentation form is being modernized

Statistics on fishing fleet:

Eurostat updates its Fishing Fleet data using extracts from the DG MARE's Community Fishing Fleet Register (compiled from national submissions under EU legislation).

Data are received from Iceland and Norway by gentleman's agreement.

3.2 Energy

3.2.1. Energy statistics – production – NOT UPDATED

Responsible unit: **E.5: Energy**

Contact person: Madeleine MAHOVSKY, Tel: +352 4301 32207

SUBJECT AREA DESCRIPTION

The objective of this subject area is to collect, process and publish annual, monthly and short-term monthly energy statistics on quantities of numerous energy commodities both primary [e.g. crude oil, natural gas, hard coal, etc.] as well as secondary [e.g. motor gasoline, gas/diesel oil, coke, patent fuels, etc.]; this subject area also covers energy statistics on end-user prices of electricity and natural gas. The fundamental legal act governing the statistics of energy quantities is the Energy Statistics Regulation (Regulation (EC) No 1099/2008 of the European Parliament and of the Council of 22 October 2008 on energy statistics (Text with EEA relevance), OJ L 304, 14.11.2008, p. 1-62). Several other legal acts govern in a complementary manner the produced statistics on biofuels, renewables, cogeneration, energy efficiency and oil stocks. As concerns the energy prices, the household and the non-household customer prices of electricity and natural gas are collected under the Regulation (EU) 2016/1952.

Annual statistics of energy

Collected statistics cover essentially the production, transformation and consumption of numerous energy commodities; details on external trade of energy commodities and structural characteristics of the energy industry are also included. The annual Energy Balance Sheets of the Member States and the EU is the key output of this data collection. This subject area provides valuable information on the structure of the energy systems across the EU; it allows monitoring of major EU and national energy policies and targets (energy dependency, penetration of renewable energy sources, energy efficiency) while it contributes significantly in assessing the carbon dioxide annual emission inventories.

Monthly and short-term monthly statistics of energy

Opposite to the annual energy data collections which cover the full spectrum of the overall energy flows in society [from supply, through transformation to final energy and non-energy consumption by sector and by fuel type], the monthly data collections are limited only to the supply and partially the transformation side. Renewables are covered to a limited extent. Nonetheless, monthly energy statistics, although not as complete or directly comparable to annual statistics, provide quickly energy related tendencies long before annual data can be made available. Monthly energy data are used for the early estimates of CO₂ emissions. Also, valuable information on oil and petroleum products emergency stocks is covered, in response to security of supply considerations.

Energy prices

Twice a year data are collected, processed and published on the prices of electricity and natural gas. The data are broken down per consumer bands and cover three levels of taxation. Once a year, together with the reporting for the second semester of the year, disaggregated price data [energy and supply, network cost, taxes and levies] are collected. Starting from 2017 onwards, not only the data collections on the non-households prices of electricity and natural gas, but also on the households end-user prices are regulated [households prices were collected on a gentlemen's agreement basis in the past]. Further, once a year competition indicators for electricity and natural gas are collected [on a voluntary basis] and published for all reporting countries.

ENERGY_DHDC_A: District Heating and District Cooling statistics

Timeliness: T+16 months; Periodicity: A

Monthly and short-term monthly statistics of energy:

Covered by Annex C of the Energy Statistics Regulation [ESR]

Monthly energy statistics [the so-called M-2/M-3 data collections]:

ENERGY_SOLID_M: Solid Fuels Statistics

Timeliness: T+3 months; Periodicity: M

ENERGY_ELEC3_M: Electricity Statistics

Timeliness: T+3 months; Periodicity: M

ENERGY_MOSOIL_M: MOS (Monthly Oil & Natural Gas Statistics) – OIL part

Timeliness: T+55 days; Periodicity: M

ENERGY_MOSGAS_M: MOS (Monthly Oil & Natural Gas Statistics) – GAS part

Timeliness: T+55 days; Periodicity: M

Covered by Annex D of the Energy Statistics Regulation [ESR]

Short-term monthly energy statistics [the so-called M-1 data collections]:

ENERGY_SEGGAS_M: Short-term monthly Natural Gas Statistics (SEG_gas)

Timeliness: T+1 month; Periodicity: M

ENERGY_SEGELE_M: Short-term monthly Electricity statistics (SEG_ele)

Timeliness: T+1 month; Periodicity: M

ENERGY_JODIOIL_M: Short-term monthly Oil statistics (Joint Organisations Data Initiative – JODI OIL)

Timeliness: T+25 days; Periodicity: M

Crude oil imports price and quantities / Crude oil supply price and quantity [collected on a voluntary basis]

ENERGY_COIR_M: Crude Oil Import Register [COIR] Timeliness: T+1 month; Periodicity: M

Energy prices:

Covered by the Regulation on European statistics on natural gas and electricity prices

ENERGY_PRELI_S: Energy Prices: Electricity non-households, semester

Timeliness: T+3 months; Periodicity: B (while disaggregated price data only on an annual basis)

ENERGY_PRELH_S: Energy Prices: Electricity households, semester

Timeliness: T+3 months; Periodicity: B (while disaggregated price data only on an annual basis)

ENERGY_PRGAI_S: Energy Prices: Gas non-households, semester

Timeliness: T+3 months; Periodicity: B (while disaggregated price data only on an annual basis)

ENERGY_PRGAH_S: Energy Prices: Gas households, semester

Timeliness: T+3 months; Periodicity: B (while disaggregated price data only on an annual basis)

Competition indicators [collected on a voluntary basis]:

ENERGY_CIELE_A: Competition Indicators: electricity annual

Timeliness: T+12 months; Periodicity: A

ENERGY_CIGAS_A: Competition Indicators: gas annual

Timeliness: T+12 months; Periodicity: A

Annual energy statistics collected on a voluntary basis within the framework of the project “Early estimates of energy balances”:

ENERGY_MINIELE_A: Electricity and Heat Statistics

Timeliness: T+5 months; Periodicity: A

ENERGY_MINIGAS_A: Natural Gas Statistics

Timeliness: T+5 months; Periodicity: A

ENERGY_MINIOIL_A: Oil Statistics

Timeliness: T+5 months; Periodicity: A

METHODOLOGY

Quality reporting

Regulation (EC) No 1099/2008 on energy statistics provides for Quality Reports according to Article 6 Paragraph 4: Every five years, Member States provide the Commission (Eurostat) with a report on the quality of the data transmitted as well as on methodological changes that have been made.

The results of the latest quality reporting cycle are presented in the document Quality report of EU energy statistics – 2017 edition. This report was finalised by the Energy Statistics Working Group in November 2017 and uses, in general, data available at 2 November 2016. This report was compiled using the quality reporting template for the 2015 cycle. This Quality reporting cycle in energy statistics was officially launched at the end of 2015.

The first quality reporting exercise in the field of European energy statistics was conducted between 2010 and 2013 with the objective of obtaining general information and having a first overview on how

statistics are collected and compiled by Member States. Eurostat prepared a template to gather this information. The results of the first Quality reporting cycle are shown in the document Quality report of EU energy statistics – 2014 edition.

Revision policy

The revision policy for energy statistics represents an important step towards the harmonisation of revision practices within the European Statistical System. A common revision policy for energy statistics will improve the quality and comparability of national data as well as enhance the overall quality of European Union aggregates. The Revision Policy and the pre-announcement form were approved during the meeting of the Energy Statistics Working Group in October 2015.

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide harmonised statistics on the transport of goods by road. Data are collected under Council Regulation 70/2012 (recast of Council Regulation (EC) No 1172/98 of 25 May 1998 on statistical returns in respect of the carriage of goods by road), which specifies a wide range of variables and provides for the transmission to Eurostat of individual survey data records for vehicles, journeys and goods transport operations. It also covers cabotage operations. Eurostat validates and processes these data in order to generate the tables required by the legal acts. Participating countries receive from Eurostat the contributions of foreign hauliers on their national territory.

Contact persons: Boryana MILUSHEVA, Tel: +352 4301 35081

Georges XENELLIS, Tel: +352 4301 35384

SUBJECT AREA DESCRIPTION

Maritime transport is the carriage of goods and passengers in sea-going vessels. European maritime transport statistics describe these movements in terms of type of cargo and passengers, the routes over which they are transported, and types, sizes and nationality of ships used to carry out that transport. The objective of this subject area is to provide harmonised statistics under Directive 2009/42/EC of the European Parliament and of the Council of 6 May 2009 on statistical returns in respect of carriage of goods and passenger by sea and later amendments.

LEGAL BASIS

Legal acts:

Commission Decision No 2001/423/EC of 22 May 2001, on arrangements for publication or dissemination of the statistical data collected pursuant to Council Directive 95/64/EC on statistical returns in respect of carriage of goods and passengers by sea, OJ L 151, 7.6.2001

3.3.2. Development activities to support new transport policies

a) Passenger mobility, road traffic – NOT UPDATED

Responsible unit: **E.3: Transport**

Contact persons: Emilia Maria ISCRU, Tel: +352 4301 36082

Gabriela MARIN, Tel: +352 4301 36485

SUBJECT AREA DESCRIPTION

The objectives of this subject area are to provide statistics on passenger mobility and road traffic. For the former, the inventory of the existing non-harmonised national surveys have been complemented with more recent data collected with financial and technical support of Eurostat. For the latter, a voluntary regular data collection on vehicle-kilometres (Vkm) performed on the national territories is in development.

LEGAL BASIS

Passenger Mobility Statistics and Road Traffic are not part of the regulated European Statistical System at this time. In order to develop harmonised methodology to assess passenger mobility in EU, since 2015 Eurostat have offered financial and technical support to countries interested in running surveys or harmonizing existing data.

Eurostat have offered financial support for countries interested to develop also their road traffic statistics. Currently, data on road traffic comes from a Pilot Questionnaire attached to the Common Questionnaire, which is a voluntary data collection. In addition, road traffic data (Vkm) was collected via an odometer-reading questionnaire first in 2015 and 2018. The adoption of the Commission's package on roadworthiness test of road vehicles introduced an obligation for the Member States to centralise Vkm data obtained during the technical control of vehicles.

DATA REQUIREMENTS

In consultation with the statistical authorities of the Member States and experts in the field, Eurostat developed guidelines for harmonised passenger mobility surveys. These guidelines contain the indicators and variables needed for monitoring urban and non-urban mobility as well as mobility by distance class. The guidelines contain also definitions for the required variables and propose a statistical approach for the data collection.

In collaboration with the Member States, Eurostat defined a set of indicators based on odometer-reading data. Road traffic statistics aim to cover information regarding location of traffic and type of roads, which is important for EU policy making.

A complete list of indicators could be consulted in the documents listed under Methodology.

Contact persons: Joanna RACZKOWSKA, Tel: +352 4301 34574

Klaus VOLMICH, Tel: +352 4301 33070

SUBJECT AREA DESCRIPTION

The objective of this subject area is to provide statistics on safety for four modes of transport. For road transport, it covers a selection of data from the 'Community database on road accidents (CARE)'. The Directorate-General for Mobility and Transport (DG MOVE) manages the production of the CARE database which is based on Council Decision No 93/704/EC. Eurostat produces safety statistics also for other modes of transport based on the data collection carried out by the different European Agencies, namely ERA (European Union Agency for Railways) for rail, EASA (European Union Aviation Safety Agency) for air and EMSA (European Maritime Safety Agency) for maritime transport.

LEGAL BASIS

Council Decision No 93/704/EC of 30 November 1993 on the creation of a Community database on road accidents (OJ L 329, 30.12.1993, p. 63).

3.4 Tourism

3.4.1. Tourism statistics

Responsible unit: **G.2:** European businesses

Contact person: Christophe DEMUNTER, Tel: +352 4301 36565

SUBJECT AREA DESCRIPTION

The objective is to establish a common framework for the systematic development, production and dissemination of high-quality statistical information on tourism in Europe.

Regulation 692/2011 concerning European statistics on tourism and repealing Council Directive 95/57/EC was adopted on 6th July 2011 with 2012 as first reference year.

The current system of tourism statistics consists of two main elements: on the one hand statistics on internal tourism giving information on capacity and occupancy of tourist accommodation establishments. On the other hand the national tourism, giving information on tourism participation and tourism trips made by residents of the European Union. Information on tourism trips made by residents of the EU is transmitted to Eurostat as micro-data.

While the internal tourism is closer to the concept of business statistics, the national tourism has more affinity with social statistics, in particular from the methodological point of view. Both components together depict the state of affairs of tourism in Europe as well as tourism by Europeans.

Besides the data compiled on the basis of the Regulation, Eurostat also publishes economic data on the tourism industries by re-using data from other areas of business statistics (e.g. structural business statistics, short-term business statistics) and data on employment in the accommodation sector by using labour market data (namely the Labour Force Survey). In 2020, Eurostat concluded non-disclosure agreements with four international digital platforms intermediating short-term accommodation rentals. First data is expected to be released in 2021.

Furthermore, work on assessing the macro-economic dimension of tourism is ongoing, using the internationally acknowledged framework of Tourism Accounts, in close cooperation with the Member States and with other international organisations (OECD, UN World Tourism Organisation, UNSD).

Contact person: Alvaro DIEZ SOTO, Tel: +352 4301 30199

SUBJECT AREA DESCRIPTION

Statistics on science and technology cover the R&D data collection as well as the work on Statistics on Human Resources in science and technology, statistics on high-tech industries and knowledge-based services, based on the EP/Council Decision No 1608/2003/EC and the subsequent Commission Regulation.

This legislative framework puts in place several data collections or compilations: the collection on R&D and GBARD statistics, the data compilation of Statistics on Human Resources in Science and Technology and the compilation of data on High Tech industries and knowledge based services. All these activities are accompanied by methodological manuals such as the Frascati Manual.

3.5.3. Statistics on information and communication technologies

Responsible unit: **G.4:** Innovation and digitalisation

Contact person: Michaela GRELL, Tel: +352 4301 34001

SUBJECT AREA DESCRIPTION

The aim is to inform EU policy makers and citizens about how individuals and enterprises use Information and Communication Technologies. This subject area provides timely and internationally comparable statistics and analyses that help understand the impact of ICTs on Europe's economy, society and environment. It covers a wide range of subjects (internet usage, e-commerce, security, trust, ubiquitous connectivity, internet of things, etc.). Until reference year 2020 it was governed by the 808/2004 (EC) Regulation of the EP and Council and it is implemented by annual Commission Regulations. As of survey year 2021, there will be two legal frameworks for the ICT usage surveys: Regulation (EU) 2019/2152 of the European Parliament and of the Council of 17 December 2019 on European business statistics¹ for the enterprises survey, implemented by an annual implementing legal act, and Regulation (EU) 2019/1700 of the European Parliament and Council of 14 October 2019 establishing a common framework for European statistics relating to persons and households, based on data at individual level collected from samples² for the survey in households and by individuals, implemented by an annual implementing and delegated act.

The background policy framework is the Digital Single Market strategy which was adopted on 6 May 2015 and is one of the European Commission's 10 political priorities. It is made up of three political pillars: Improving access to digital goods and services, an environment where digital networks and services can prosper and digital as a driver for growth. In the [European Commission's work programme for 2017 Delivering a Europe that protects, empowers and defends](#) (COM(2016) 710), the European Commission proposed to advance swiftly on proposals that had already been put forward and to undertake a review of the progress made towards completing the digital single market. In May 2017, the European Commission published a [mid-term review of its digital single market strategy](#) (COM(2017) 228 final), which took stock of the situation, while outlining actions in relation to online platforms, the data economy and cybersecurity.

- *European Green Deal*

The European Green Deal, outlined in the [Communication from the Commission of 11 December 2019 COM/2019/640 \(final\)](#), provides an action plan to boost the efficient use of resources by moving to a clean, circular economy and to restore biodiversity and cut pollution.

The EU aims to be climate neutral in 2050. Reaching this target will require action by all sectors of the economy, including investing in environmentally-friendly technologies, supporting industry to innovate, rolling out cleaner, cheaper and healthier forms of private and public transport,

decarbonising the energy sector, ensuring buildings are more energy efficient.

For more information, see: https://ec.europa.eu/info/strategy/priorities-2019-2024/european-green-deal_en

One of the ambitions of the European Green Deal is a transition towards 'circular economy', i.e., an economy that more sustainably uses resources. To this end, sustainable products, services and business models should become the norm and transform consumption patterns so that no waste is produced in the first place. A set of interrelated initiatives providing a policy framework for such a transition is presented in the Communication from the Commission of 11 March 2020 COM/2020/98 (final) 'A new Circular Economy Action Plan. For a cleaner and more competitive Europe'

- *Sustainable development strategy*

Sustainable development means meeting our current needs without jeopardising future generations' ability to meet their own needs. The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs), adopted by the United Nations (UN) in September 2015, have given a new impetus to global efforts to achieve sustainable development.

The EU and its Member States are committed to supporting the implementation of the 2030 Agenda and to striving towards a sustainable future for all. The EU's answer to the 2030 Agenda is outlined in the Commission's Communication of 22 November 2016, 'Next steps for a sustainable European future'. On 30 January 2019, the Commission published a reflection paper entitled 'Towards a Sustainable Europe by 2030'.

https://ec.europa.eu/environment/sustainable-development/index_en.htm

For more information on EU SDG indicators, see: <https://ec.europa.eu/eurostat/web/sdi>

- Integration of environmental sustainability issues and the UN Sustainable Goals into the European Semester

The 2020 Annual Sustainable Growth Strategy was the first step in refocusing the European Semester, the mechanism for coordination of economic and fiscal policies of the EU Member States, on competitive sustainability, with the aim to build an economy that works for people and the planet in line with the European Green Deal.

The Commission has also started to integrate the United Nations Sustainable Development Goals (SDGs) into the European Semester as part of its strategy to put sustainable development at the heart of economic policy. In this context, 2020 European Semester country reports feature a new dedicated section on environmental sustainability. This provides a more comprehensive analysis of Member States' environmental challenges, with a focus on those areas that interlink with economic and employment policies.

- *Seventh EU Environmental Action Programme:*

Decision of the European Parliament and of the Council on a General Union Environment Action Programme to 2020 "Living well, within the limits of our planet"¹

¹ On 14 October 2020, the Commission published a proposal for an 8th Environment Action Programme (EAP), which supports the environment and climate action objectives of the European Green Deal and should guide European environmental policy until 2030; the programme is expected to be adopted in 2021.

4.1.5. Biodiversity

Responsible unit: **E.2:** Environmental statistics and accounts; Sustainable development

Contact person: Veronika VYSNA, Tel: +352 4301 33624

SUBJECT AREA DESCRIPTION

Eurostat does not collect biodiversity data from countries but republishes data collected by the European Environment Agency (EEA), OECD and an international consortium of NGOs. Eurostat should therefore NOT be quoted as the source; it analyses the data and prepares them for use as indicators of sustainable development and the quality of the environment.

The data on Eurostat's database cover:

- Areas protected under the Habitats and Birds Directives and forming the basis for Natura 2000, the largest network of protected terrestrial and marine areas in the world (Source: EEA)
- Composite EU indices of common farmland birds, common forest birds and all common birds, as computed by the European Bird Census Council (Source: Pan-European Common Bird Monitoring Scheme), Royal Society for the Protection of Birds and the Czech Ornithological Society; and national indices of common farmland birds (Source: OECD)

LEGAL BASIS

Legal acts:

Nil

Agreements:

Annual data on biodiversity are published under agreement with the data providers - partners that are also responsible for the data quality.

Other basis

Birds Directive: [Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds \(codified version\)](#)

Habitats Directive: [Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora](#)

The EU Biodiversity Strategy to 2020 (published 2011)

DATA REQUIREMENTS

Data on protected areas come from the reporting obligations of Member States and are provided by the EEA.

Common bird indicators are a result of data collection and modelling done under the Pan-European Common Bird Monitoring Scheme by the European Bird Census Council.

METHODOLOGY

Eurostat's role is to check data quality, give feedback to the data providers and publish the data it deems to be reliable.

Yearly cycle for the re-publication of biodiversity data by Eurostat:

Protected areas Natura 2020: Q1 or early Q2 of year n for data of reference year n-1 (the cut-off date is adjusted to feed into the annual SDG Monitoring Report).

Bird indicators: Q3 of year n for data of reference year n-2.

INTERNATIONAL COOPERATION

Common bird indicators: EBCC (European Bird Census Council), RSPB (Royal Society for the Protection of Birds), and the Czech Ornithological Society (CSO), OECD.

4.2 Regional and geospatial statistical information

4.2.1. Regional statistics and their coordination

Responsible unit: **E.4:** Regional statistics and geographical information

Contact person: Teodora BRANDMUELLER (Development of regional indicators), Tel: +352 4301 32927

SUBJECT AREA DESCRIPTION

Coordination of the production and dissemination of European regional statistics across all relevant statistical themes. Regional data is published according to the NUTS classification, mostly at NUTS level 1 and 2. Moreover, Eurostat publishes sub-national data by typologies (for urban-rural, metropolitan and coastal regions), degree of urbanisation and at city level. An exhaustive overview of regional data collections is available on the Regions and Cities dedicated section of the Eurostat website:

<http://ec.europa.eu/eurostat/web/regions/overview>

LEGAL BASIS

Legal acts:

Specific legal acts are related to each domain (see overview table referred above for details).

Other basis:

In certain domains the data collection is based on gentlemen agreements (see overview table referred above for details).

DATA REQUIREMENTS

Related to the specific domain.

The data collection of regional labour market data at NUTS 3 level is under the responsibility of unit E.4, please see Regional labour market statistics for details.

METHODOLOGY

Working Group documents and minutes concerning planned and discussed new regional indicators can be downloaded from the CIRCABC site on Regional and Urban Statistics.

INTERNATIONAL COOPERATION

OECD, SCORUS (a subgroup of the IAOS).

a) Regional labour market statistics

Responsible unit: **E.4:** Regional statistics and geographical information

Contact person: Daniela SCIRANKOVA, Tel: +352 4301 37326

SUBJECT AREA DESCRIPTION

LEGAL BASIS

See thematic subject area

Agreements:

Member States Agreement of 1983, Delivery of registered unemployment persons

Other basis:

Voluntary transmission of NUTS 3 level labour market data for the purpose of publishing regional data by typology, i.e. urban-rural typology, coastal regions, island regions, mountain regions, border regions and metropolitan regions. These typologies are based on NUTS 3 data.

DATA REQUIREMENTS

Regional data at NUTS level 2 coming directly from LFS unit F3.

Regional data at NUTS level 3 coming directly from LFS unit F3 or are sent by MS in the following datasets:

REGLM_EAP_A: Economically active population (labour force) down to NUTS 3 by sex and age (15-74, 15+, 15-24, 25+, 20-64), annual average data, Periodicity: A

REGLM_UNEMP_A: Unemployed persons down to NUTS 3 by sex and age (15-74, 15+, 15-24, 25+, 20-64), annual average data, Periodicity: A

REGLM_EMP_A: Employed persons down to NUTS 3 by sex and age (15-64, 20-64), annual average data, Periodicity: A

REGLM_WPOP_A: Population down to NUTS 3 by sex and age (15-64, 20-64), annual average data, Periodicity: A

REGLM_POPEJU_A: Population aged 25-64 by educational attainment level down to NUTS 3 by sex, annual average data, Periodicity: A

METHODOLOGY

NUTS level 2 data under the responsibility of unit F3, see the thematic subject area for general LFS methodology.

NUTS level 3 data follows the LFS methodology for most MS. Some countries submit data based on registered employment/unemployment or a combination of administrative and LFS data. If the LFS is not the source of the data, the relative weight of the NUTS 3 data submitted is used to split the NUTS2 data to obtain the corresponding results at NUTS 3 level.

b) Regional statistics by typologies

Responsible unit: **E.4: Regional statistics and geographical information**

Contact person: Aleksandra GALIC Tel: +352 4301 30116

SUBJECT AREA DESCRIPTION

The regional statistics by typologies provide the European Union with statistical information in the field of regional, urban, rural development and other sectoral policies such as the integrated maritime policy that seeks to maximise the sustainable use of the oceans and seas and to ensure development and sustainable growth in coastal regions and areas. Appropriate statistics (social, demographic, economic, transport, tourism etc.) are needed to assess the impact of different programmes on rural and coastal areas (defined at LAU level) and rural, urban, metropolitan coastal mountain, border and island regions (defined at NUTS 3). The different types of territories are facing different challenges.

LEGAL BASIS

Legal acts:

<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32017R2391>

DATA REQUIREMENTS

The list of indicators/variables for policies with spatial dimension is divided in 3 parts. The information is managed at NUTS level 3:

- Part 1 deals with demographic issues

Population change: migration, natural population change, density, age structure (by 5 years age group and sex), live births by five-year age group of the mothers, deaths by 5 year age group and sex.

- Part 2 represents socio-economic issues

Forms of employment

Employment by main sectors (ESA 2010)

Capacity and occupancy of tourist accommodation (by Degree of Urbanisation – LAU based aggregates of rural areas and by coastal areas)

GDP by main sectors

Weight of manufacturing in terms of gross value added

Weight of tertiary sector in terms of gross value added

Weight of agriculture in terms of value added

Employment, Unemployment, Activity rate (in particular, employment in the food industry, maritime industries, long-term unemployment rate), Educational attainment

Human capital

Agriculture holdings: structure, productivity

Utilized agricultural area (UAA)

Arable land (area)

Livestock unit

Business demography

Annual road freight transport

- Part 3 deals mainly with the infrastructure of NUTS3 areas which will allow Eurostat to calculate accessibility of certain services (geographic data)

Transport network: availability of roads/railways, proximity to next motorway exit, proximity to next railway station

Maritime transport port (code and location)

School: Proximity and supply with primary and secondary schools

Proximity to the next university

Hospital: Proximity and supply with hospitals

Health and care: nursing home, home for the elderly

Post offices and social meeting points

METHODOLOGY

Commission's internal work is carried out on the request of Commission DGs such as AGRI, MOVE, ENER, GROW, CLIMA, MARE, SANCO, REGIO; high priority.

GISCO deals with the creation, acquisition and maintenance of geospatial data. Data are made available in the geographical reference database of the Commission. In addition, GISCO develops corporate spatial services and GIS tools and conducts spatial analyses.

The coordination with the other Commission DGs is based on regular meetings of the formal Interservice Group on Geographic Information (COGI), of the GISCO User and Technical Committee (UTC) as well as on bilateral meetings. EU and Executive Agencies (such as the EEA – European Environment Agency, and the INEA - Innovation and Networks Executive Agency) are also involved.

In cooperation with Member States, GISCO aims at improving the integration of statistical and geospatial information, under the umbrella of the ESS and UN Global Geospatial Information Management UN-GGIM.

4.2.4. INSPIRE

Responsible unit: **E.4:** Regional statistics and geographical information

Contact person: Hannes REUTER, Tel: +352 4301 33687

SUBJECT AREA DESCRIPTION

Implementation of Directive 2007/2/EC establishing an Infrastructure for Spatial Information in the European Community (INSPIRE). This includes financial support to the implementation of the directive. The focus is on the implementation of INSPIRE within the Commission and on the operation of the Commission internal Geoportal.

As part of the Commission programme on Data, Information and Knowledge Management¹ and more specifically as part of the 2018-2019 work programme under Action 5.4 – Strengthen spatial data management in the European Commission and the EU agencies, the Commission and Member States intend to work together under INSPIRE to increase the offer for the Commission of EU wide geospatial datasets using official data from Member States.

4.2.5. Management of the NUTS classification

Responsible unit: **E.4:** Regional statistics and geographical information

Contact person: Teodora BRANDMUELLER, Tel: +352 4301 32927

SUBJECT AREA DESCRIPTION

Management of the regular reviews of the NUTS classification according to the provisions of Regulation (EC) 1059/2003. Follow up of formal procedures linked to accession countries. A Commission Regulation specifies the domains and time series for which the Member States concerned by a NUTS revision need to provide back-data.

LAU (Local Administrative Units)

Collection, validation and publication of national lists of Local Administrative Units (LAU), in line with Art. 4 of the NUTS Regulation. These lists are collected from EU Member States, and on a voluntary basis from EFTA countries, candidate countries and potential candidates by 30 June of each year with 31 December of the previous year as reference date.

4.2.6. Land use and land cover statistics

Responsible unit: **E.4:** Regional statistics and Geographical information

Contact person: Alessandra PALMIERI, Tel: +352 4301 31776

SUBJECT AREA DESCRIPTION

Collecting and harmonising European data on land cover/use and landscape by three main approaches: by setting up and carrying out area frame surveys (LUCAS) in the Member States, by assessing and collecting available data in Member States, taking into account the need for harmonisation of these data and by co-operating with Member States, EEA and other EU and international bodies. The work consists mainly of periodically carrying out LUCAS surveys, according to the user needs, analysing and disseminating the existing LUCAS data and co-ordination of cooperation with the Member States on land cover/use, data availability and harmonisation for future data collection.

LUCAS survey consists of an area frame sampling survey to collect harmonized data on land cover/use and agro-environmental parameter; the survey covers all Member States. The latest LUCAS survey took place in spring / summer 2018; it included an in-situ component (on 250.000 points) and a Photo Interpretation sample (87.000 points) to be assessed in the Office. A developed top-soil module and a pilot test on grassland species are also part of the field survey. Until 2018, LUCAS survey was carried out every 3 years; next LUCAS survey will take place in 2022 and will include:

an extended soil module,

a consolidated and simplified grassland module (compared to the test module in 2018),

an observation of the landscape for the Copernicus program,

a new module on landscape features.

4.3 Sustainable development indicators

4.3.1. Europe 2020 indicators: production and dissemination

Responsible unit: **E.2:** Environmental statistics and accounts; Sustainable development

Contact person: Anna SABADASH, Tel: +352. 4301 31463

SUBJECT AREA DESCRIPTION

The Europe 2020 strategy adopted by the European Council on 17 June 2010 is the EU's common agenda for the current decade. It emphasises smart, sustainable and inclusive growth as a way to overcome the structural weaknesses in Europe's economy, improve its competitiveness and productivity and underpin a sustainable social market economy.

The key objectives of the strategy are expressed in the form of headline targets at the EU level: These are:

- 75 % of the population aged 20-64 to be employed
- 3 % of the EU's GDP to be invested in research and development (R&D)
- Climate change and energy target:
 - To reduce greenhouse gas emissions by 20 % compared with 1990
 - To increase the share of renewable energy sources in final energy consumption to 20%
 - To improve energy efficiency by 20 %
- The share of early school leavers to be under 10 % and at least 40 % of those aged 30-34 to have completed tertiary or equivalent education
- Reduction of poverty by lifting at least 20 million people out of the risk of poverty or social exclusion.

Progress towards the five targets is monitored by means of nine headline indicators and three sub-indicators. In order to achieve the EU targets, Member States have committed to reach national targets, as defined in the National Reform Programmes. The European Council assesses every year in the context of the European Semester the overall progress achieved both at EU and at national level in implementing the strategy. To monitor the progress towards Europe 2020 Strategy targets, Eurostat maintains a set of indicators:

1. Employment rate by gender, age group 20-64
2. Gross domestic expenditure on R&D (GERD)

3. Greenhouse gas emissions, base year 1990
4. Share of renewables in gross final energy consumption
5. Primary energy consumption
6. Final energy consumption
7. Early leavers from education and training by gender
8. Tertiary educational attainment by gender, age group 30-34
9. Population at risk of poverty or exclusion, a union of three sub-indicators:
 - Persons living in households with very low work intensity
 - Persons at risk of poverty after social transfers
 - Severely materially deprived persons

4.3.2. EU SDG indicators: production and dissemination

Responsible unit: **E.2:** Environmental statistics and accounts; Sustainable development

Contact person: Simon BLEY, Tel: +352 4301 35420

SUBJECT AREA DESCRIPTION

Sustainable development objectives have been at the heart of European policy for a long time, firmly anchored in the European Treaties and mainstreamed in key projects, sectoral policies and initiatives. The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs), adopted by the United Nations (UN) in September 2015, have given a new impetus to global efforts for achieving sustainable development. The EU is committed to playing an active role to maximise progress towards the SDGs, as outlined in its Communication (COM (2016) 739) 'Next steps for a sustainable European future: European action for sustainability'.

The objectives of this subject area are the provision of high quality indicators and statistical information necessary to monitor progress towards the SDGs in an EU context. Eurostat developed an EU SDG indicator set for that purpose, building on the experience of the EU sustainable development indicator set used until 2015 to monitor the EU Sustainable Development Strategy. The EU SDG indicator set is regularly reviewed to incorporate indicators from new data sources that become available over time and to take into account new political guidelines, such as the Green Deal.

This EU SDG indicator set includes 100 different 'ready to use' indicators, evenly distributed along the 17 SDGs. 35 indicators are 'multi-purpose' indicators, i.e. are used to monitor more than one goal. The EU SDG indicator set is aligned as much as appropriate with the UN indicator set for global monitoring, agreed in March 2017 by the UN Statistical Commission. The EU-SDG indicator set is available online on Eurostat's website at:

<http://ec.europa.eu/eurostat/web/sdi/main-tables>.

It is the basis of the annual publication 'Sustainable development in the European Union. Monitoring report on progress towards the SDGs in an EU context'. The current, fourth edition was released in June 2020. The monitoring report is complemented by a dedicated section, providing a digital publication, various visualisation tools and a summary brochure.

5.2.1. Coordination for statistical confidentiality and micro data access

Responsible unit: **B.1:** Methodology, Innovation in official statistics

Contact person: Aleksandra BUJNOWSKA, Tel: +352 4301 30037

SUBJECT AREA DESCRIPTION

This subject area aims at ensuring the coordination of statistical confidentiality activities in the European Statistical System (ESS). The main activities aim at improving the access to confidential data for scientific purposes. Other actions are related to the development and harmonisation of methods for the statistical disclosure control (SDC) in micro- and tabular data and the development and maintenance of software tools for SDC. Coordination of confidentiality related activities at the ESS level is achieved through the ESS Committee assisted by the Working Group on Methodology and Expert Group on SDC.

Statistical Requirements Compendium

The The Statistical Requirements Compendium (SRC), published by Eurostat, serves as a reference document for the EU acquis in statistics. It summarises the key reference information for European statistical production, taking into account new legislation and other developments relevant for European statistics.

The SRC also serves as the framework for conducting compliance monitoring of the enlargement countries in the area of statistics. The 2021 edition of the Compendium follows the structure introduced in the 2017 edition, in line with the adapted version of the Classification of Statistical Activities (CSA) Rev.1 2009. For reference purpose the former modules codes are listed in the correspondence table in the table of orientation at the end of the Compendium.
