Index	408

Table of Contents

Foreword.	i
Acknowledgements	iii
Summary	v
List of abbreviations and acronyms	xvi

PART I

CHAPTER 1

INTRODUCTION AND OVERVIEW	4
A brief history	7
Why do countries compile quarterly national accounts?	8
The use of quarterly national accounts	10
The need for harmonisation and the steps towards it	11
Principles for the compilation of quarterly accounts	12
Towards a programme for compiling quarterly accounts: recommended steps	13
Aims of the handbook	13
The structure of the handbook	14

PART II

CHAPTER 2

THE COVERAGE OF QUARTERLY ACCOUNTS	20
System of quarterly accounts	21

Institutional sectors	26
Industry groupings	27
The sequence of accounts	30
Price concepts	34
The transaction categories.	35

CHAPTER 3

THE QUARTERLY ACCOUNTING RULES	40
Section 1 - Introduction	40
Section 2 - Some general issues	42
Section 3 - Exhaustiveness and the non-recorded economy	45
Section 4 - Problems for specific variables	47
Section 5 - Population and employment	78
Section 6 - Constant price estimates	81
Section 7 - Summary of main points	88

CHAPTER 4

BASIC DATA FOR COMPILING QUARTERLY ACCOUNTS	92
Theoretical aspects of basic statistics	93
Quantitative and qualitative statistics	96
How to measure basic statistics	96
Extrapolation and projection methods	98
Theoretical requirements	98
Current and constant prices	100
The use of basic statistics in the compilation of quarterly accounts	100
GDP: the production approach	101
GDP: the expenditure approach	105
GDP: the income approach	111
Ideal data requirements for quarterly accounts.	114
Community legislation in the field of short-term statistics	116

The system of industrial and services short-term indicators	118
Consumption statistics	121
Employment	121
Import and export data	122
Balance of payments	123

PART III

CHAPTER 5

THE USE OF INFORMATION IN THE COMPILATION OF QUARTERLY ACCOUNTS	130
Description of the system.	132
The properties of quarterly estimates.	134
Improving existing data sources and finding new ones	136
Reducing the burden of collecting quarterly data.	136
Examples of Member States	139

CHAPTER 6

CONTRIBUTION OF MATHEMATICAL AND STATISTICAL METHODS	146
Introduction	146
Recommendation	151
The simple extrapolation method.	151
Temporal disaggregation methods	154
Smoothing methods	155
Two-steps adjustment	156
Time series methods	157
Optimal methods	157
Dynamic models	158
Multivariate methods	161

CHAPTER 6 - Annex

A FORMAL PRESENTATION OF MATHEMATICAL AND STATISTICAL MODELS	164
Introduction	164
Basic principles	164
Smoothing methods	166
Two-steps adjustment methods	167
Time series methods	169
Optimal methods	170
Dynamic models	172
Multivariate methods (forwarding)	175

CHAPTER 7

SOME NUMERICAL EXAMPLES	178
Estimation of an aggregate: different approaches according to the available information and the philosophy of compilation.	179
Existence of data sources for the target quarterly accounts aggregate	179
Stage 5: trend extrapolation or use of univariate models without indicator variables	180
Stage 4: quarterly data unsuitable to be used to produce an estimate of the aggregate	183
Stage 3: quarterly data not closed to ESA 1995 concepts but suitable to be used as indicators	184
Stage 2: quarterly data closed to ESA 1995 concepts	185
Stage 1: data fully coherent with ESA 1995 concepts	188

CHAPTER 7 - Annex

ECOTRIM: SOFTWARE FOR MATHEMATICAL AND STATISTICAL METHODS	192
Introduction	192
Interactive mode	193
Univariate methods	193

Multivariate methods	194
Graphs and display	195
Batch mode	195
Future improvements and developing lines	195

PART IV

CHAPTER 8

THE SEASONAL COMPONENT IN THE AGGREGATES	200
Causes of seasonality	200
The definition of the seasonality: the time series point of view	202
Seasonality and quarterly accounts	203
Working/trading-day and calendar effect	206
Choice between a fully or partially seasonally adjusted quarterly system of accounts	207
Relationships between quarterly seasonally adjusted data and annual data.	208
Seasonal adjustment and revisions	208
Seasonal adjustment methods	209

CHAPTER 9

TOWARDS A CONVERGENCE OF SEASONAL ADJUSTMENT METHODS	214
Choice of seasonal adjustment method	215
Change of seasonal adjustment method	216
Transparency of Procedures	217
Consistency in aggregation.	218
Time consistency	219
Publication of seasonally adjusted or trend-cycle data	220
Revisions	222
Methodical application of seasonal adjustment programs	223
Working/trading-day corrections	226

Uncertainties and confidence intervals	228
Summary of main Eurostat suggestions	228

PART V

CHAPTER 10

TIME CONSISTENCY BETWEEN QUARTERLY AND ANNUAL ACCOUNTS	234
Introduction	234
Main principles of time consistency.	235

CHAPTER 11

THE BALANCING OF QUARTERLY ACCOUNTS	240
Introduction	240
Key principles of balancing	242
Other main features of balancing	245
Issues and procedures for quarterly balancing	247
The quarterly balancing process	250
Retrospective balancing	254
Alternatives to supply and use tables.	254
Balancing techniques	256
Balancing by using mathematical and statistical methods	257
Some organisational issues of the balancing process	258

CHAPTER 11 - Annex A

BALANCING BY USING MATHEMATICAL AND STATISTICAL MODELS.	266
---	-----

CHAPTER 11 - Annex B

A FRAMEWORK FOR QUARTERLY BALANCING.	272
--	-----

CHAPTER 12

THE TREATMENT OF THE CURRENT OBSERVATIONS	278
Introduction	278
The estimation of the current quarters	278
The estimate of the preliminary annual figures	280

CHAPTER 13

THE VALIDATION OF QUARTERLY ACCOUNTS	284
Introduction	284
Why validation matters	284
Statistical validation.	286
Accounting validation	287
Economic validation	288
Compilation principles	291

CHAPTER 13 - Annex

Statistical validation: tests	294
Testing for auto-correlation	294
Testing for parameter constancy (model without lagged dependent variables)	295

PART VI

CHAPTER 14

THE PROCESS OF REVISION	300
Introduction	300
Current, occasional and mixed revisions	302

CHAPTER 15

A COMMON SCHEME OF REVISIONS	308
The analysis of revisions	308
The policy of revision: the EU Member States policies	310
A common scheme of policy of revision: a suggestion	313

CHAPTER 15 - Annex A

A COMMON SCHEME OF ANALYSIS OF REVISIONS	318
--	-----

CHAPTER 15 - Annex B

METHODOLOGICAL APPENDIX	328
-----------------------------------	-----

PART VII

CHAPTER 16

FLASH ESTIMATES: METHODOLOGICAL ASPECTS	334
Introduction, definition and overview	334
Methodology of flash estimates.	335
Work done in Eurostat	338
Revisions and other problems	339

CHAPTER 17

TOWARDS MONTHLY ESTIMATION OF THE MAIN AGGREGATES OF NATIONAL ACCOUNTS	342
Introduction	342
How to proceed	342

The borderline between prediction and flash estimate	343
Publication	343

PART VIII

CHAPTER 18

QUARTERLY FINANCIAL ACCOUNTS	348
Need for quarterly financial accounts	348
Voluntary basis	349
Main features of quarterly financial accounts	349
Sources and methods	351
Other issues	353
Operational conclusions	354

ANNEX

QUARTERLY NATIONAL ACCOUNTS QUESTIONNAIRE E.	358
Summary	358
Eurostat's Proposed Quarterly National Accounts Questionnaire Tables	359
List of abbreviations	363

BIBLIOGRAPHY
