INTRODUCTION

The nomenclature of countries and territories for the external trade statistics of the Community and statistics of trade between Member States - known as the "geonomenclature", abbreviated to GEONOM - is an essential element in compiling these statistics. In particular, it makes it possible to identify those involved in trade, i.e. the reporting country and the partner country.

The creation, maintenance and use of this nomenclature are laid down by Article 9 of Council Regulation (EC) No 1172/95 of 22.5.1995 (OJ L 118 of 25.5.1995) on the statistics relating to the trading of goods by the Community and its Member States with non-member countries. As for the statistics on intra-Community trade, Article 7 of Regulation (EC) No 1982/2004 of 18.11.2004 also refers to this nomenclature.

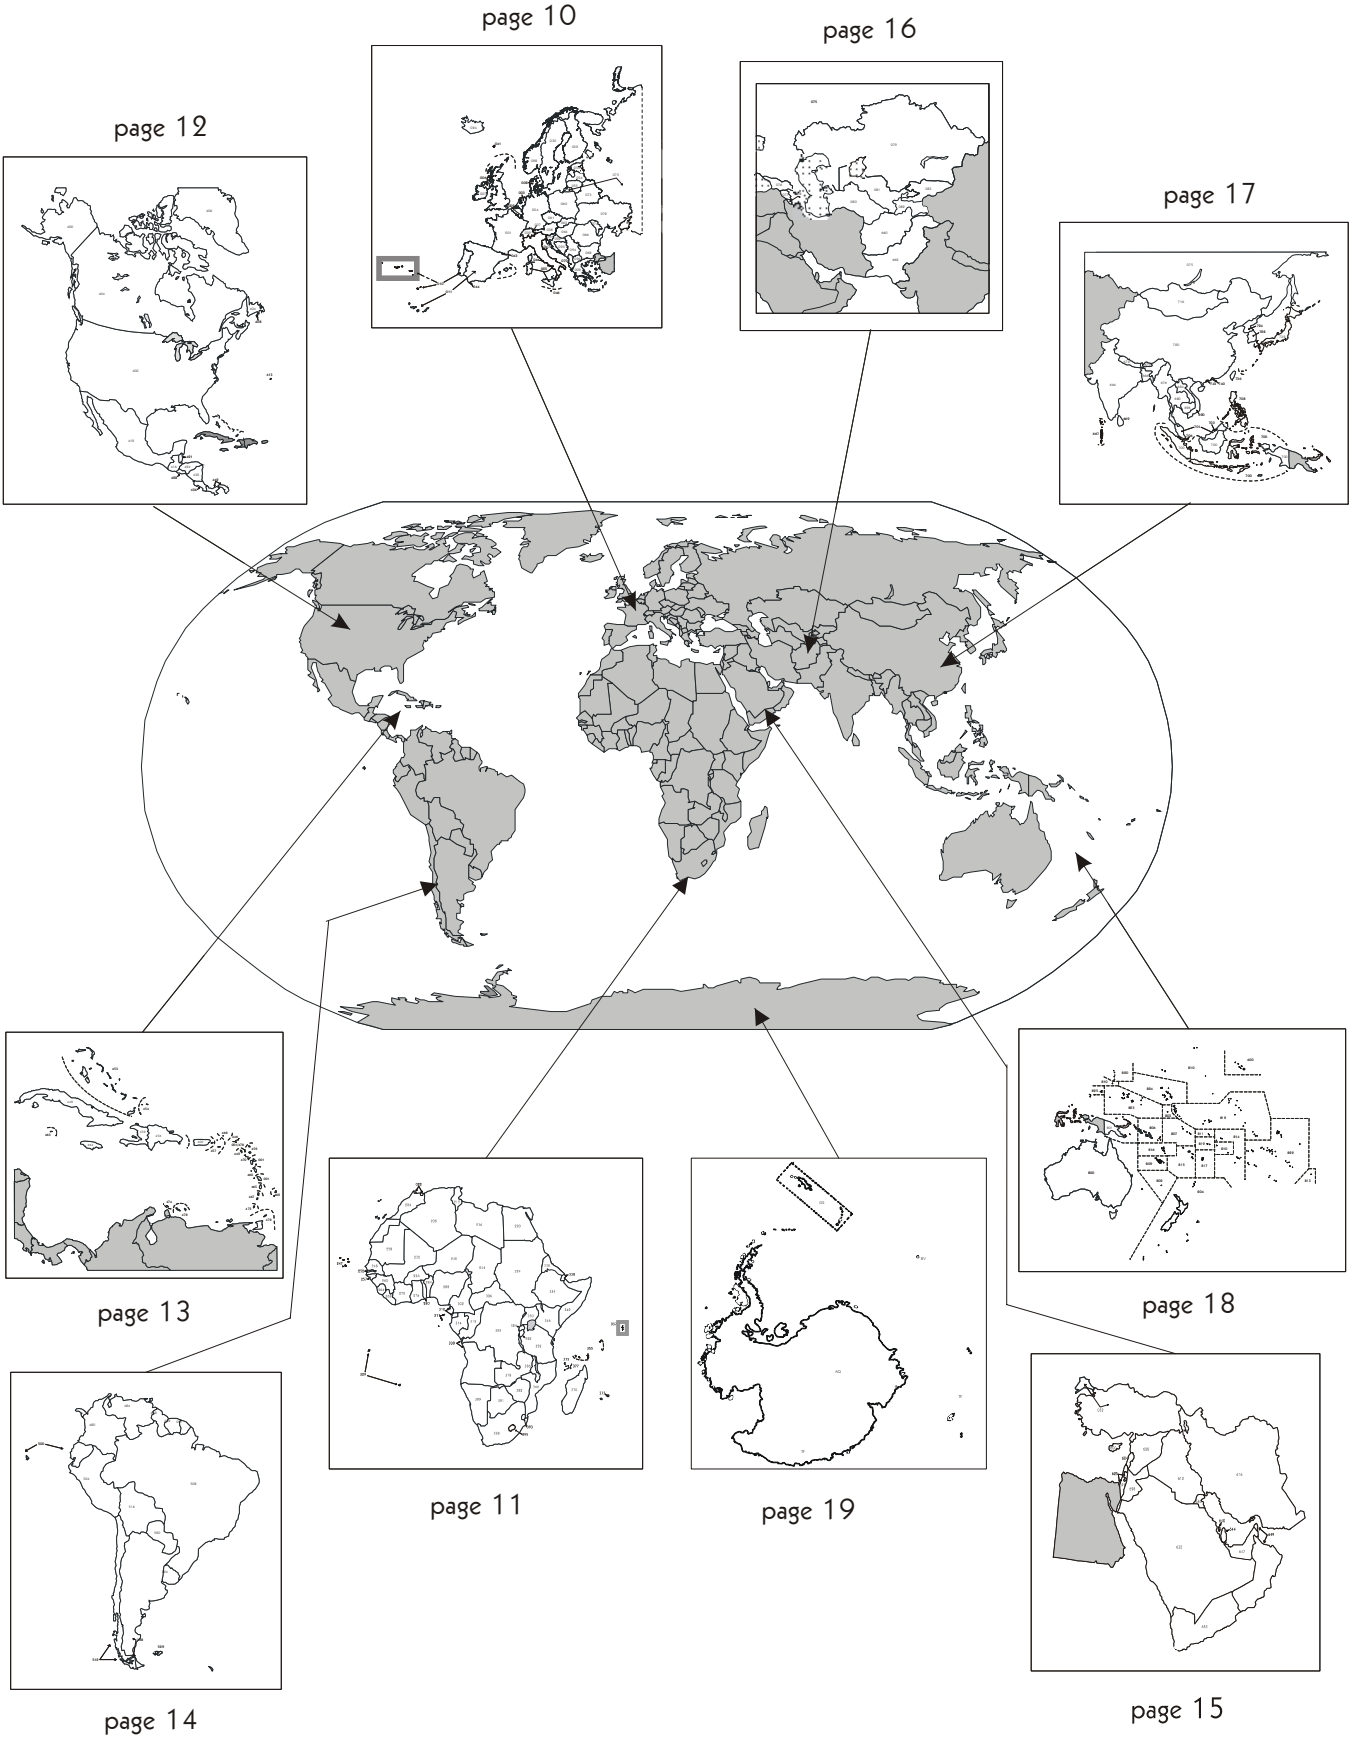

If necessary the geonomenclature is subject to annual revision in order to incorporate the adjustments needed for statistical purposes and to take into account any geopolitical change that may have occurred. Commission Regulation (EC) No 750/2005 of 18.5.2005, which lays down the geonomenclature **applicable as from 1.06.2005**, was published in OJ L 126 of 19.5.2005.

The purpose of this publication is to provide users with all the supplementary information on the GEONOM 2005 that is essential to understand its content and to illustrate the changes in country codes in order to facilitate analysis of the results of the statistics on the European Union's external trade.

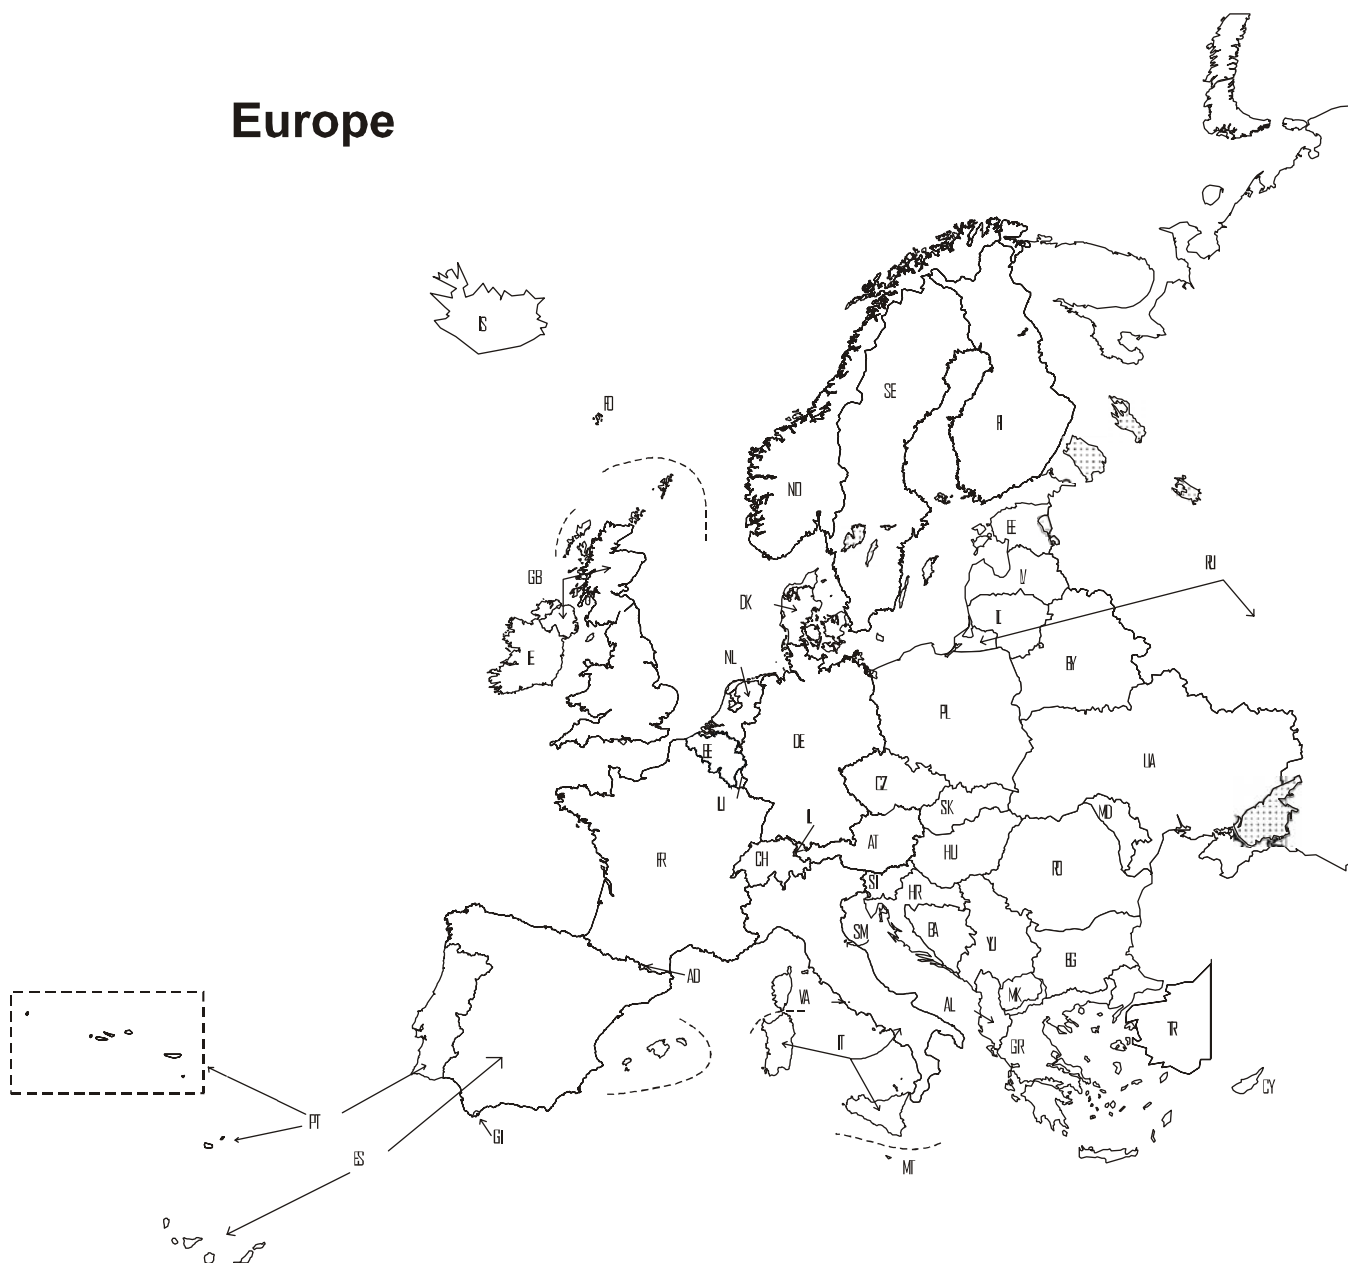

With a view to improving the next edition and providing a better response to users' needs, any correction or comment are welcome.
