

# Table of contents

<b>1.</b>	<b>Methodology for the collection of statistics on pesticide use within agriculture and horticulture .....</b>	<b>7</b>
1.1	Types of pesticide statistics .....	7
1.2	Role of usage statistics.....	7
1.3	Methods of data collection.....	10
1.4	Defining the crops to be sampled.....	14
1.5	Frequency of surveys .....	17
1.6	Essential Data requirements.....	18
1.7	Additional information.....	21
1.8	Sample design .....	25
1.9	Establishing a regional breakdown .....	27
1.10	Establishing farm size groups .....	27
1.11	Establishing the sample.....	28
1.12	Producing national estimates .....	28
1.13	Defining the survey period.....	29
1.14	Training the staff.....	30
1.15	Carrying out the surveys .....	31
1.16	Data storage and processing.....	32
1.17	Production of results .....	33
<b>2.</b>	<b>A case study:</b>	
	<b>Pesticide use in the new Member States and candidate countries.....</b>	<b>45</b>
2.1	Key findings .....	45
2.2	A common approach to data collection.....	46
2.3	Survey results .....	48
2.4	Variations in the plant protection patterns .....	49
2.5	Main conclusions .....	50
<b>3.</b>	<b>Indicators on pesticide use and risk .....</b>	<b>53</b>
	<b>Annexes .....</b>	<b>55</b>
1.	Definitions and classification.....	55
2.	Methodological notes.....	64
