# Introduction

The Nomenclature of Territorial Units for Statistics (NUTS) was drawn up by Eurostat more than 30 years ago in order to provide a single uniform breakdown of territorial units for the production of regional statistics for the European Union. The NUTS classification has been used in EU legislation since 1988,<sup>(1)</sup> but it was only in 2003, after three years of preparation, that a European Parliament and Council Regulation on NUTS was adopted.<sup>(2)</sup>

A particularly important goal of the Regulation is to minimise the impact of changes in the national administrative structures on the availability of comparable regional statistics. Consequently, time-related, statistical and other legal constraints apply to amendments to the NUTS classification.

The second three-yearly review under the NUTS Regulation was carried out in 2010 and will come into effect on 1 January 2012. The Regulation amending NUTS for the EU-27 has been published in the Official Journal.<sup>(3)</sup>

The purpose of this document is to present the new NUTS classification in the form of lists and maps. It replaces the previous Eurostat publication issued in January 2008, and includes administrative changes which have taken place since then.

Previous changes to the NUTS regions, starting from 1981, are described in different Eurostat publications.<sup>(4)</sup> Correspondence tables between NUTS versions since 1999 are available on the internet.<sup>(5)</sup>

The maps in this document are simply intended to enable the reader to locate the regions; the regional boundaries shown are also purely indicative. The scale used may differ depending on the country. The countries are in the official order, which is alphabetical, based on the spelling in the national language.

Since several regions within Europe have the same name, a distinction has been made by adding to each of these the abbreviation for the country concerned.

Some NUTS regions appear at several levels (example: Luxembourg appears as the country and at levels 1, 2 and 3). In such cases, codes end in zero for a region with identical territory at the next lower level. The labels need not be identical at the different levels even if the regions concerned cover identical territory.

Depending on the variable concerned, regional statistical data at one or more of the three NUTS levels is available in publications and databases. Many variables and time series for regional data in different domains are available on the internet — in the EuroBase database.

<sup>(1)</sup> Council Regulation (EEC) No 2052/88 on the tasks of the Structural Funds: OJ L 185, 15.7.1988.

<sup>(2)</sup> OJ L 154, 21.6.2003. The consolidated version of the Regulation is set out in Annex 1 below.

<sup>(3)</sup> OJ L 13, 18.1.2011. The text of the Regulation is set out in Annex 2 below.

## Basic principles

The NUTS nomenclature was created and developed according to the following principles:

### a) NUTS favours institutional breakdowns.

Different criteria may be used in subdividing national territory into regions. These are normally divided into normative and analytical criteria:

- **normative regions** are the expression of political will; their limits are fixed according to the tasks allocated to the territorial communities, according to the sizes of population necessary to carry out these tasks efficiently and economically, and according to historical, cultural and other factors;
- **analytical (or functional) regions** are defined according to analytical requirements; they group together zones using geographical criteria (e.g. altitude or type of soil) or using socio-economic criteria (e.g. homogeneity, complementarities, or polarity of regional economies).

For practical reasons to do with data availability and the implementation of regional policies, NUTS is based primarily on the **institutional divisions** currently in force in the Member States (normative criteria).

### b) NUTS favours regional units of a general character.

Territorial units, specific to certain fields of activity (mining regions, rail traffic regions, farming regions, labour-market regions, etc.) may sometimes be used in certain Member States. However, NUTS excludes specific territorial units and local units in favour of regional units of a general nature.

### c) NUTS is a three-level hierarchical classification.

Since this is a hierarchical classification, NUTS subdivides each Member State into a number of NUTS 1 regions, each of which is in turn subdivided into a number of NUTS 2 regions and so on.

At regional level (without taking municipalities into account), the administrative structure of the Member States generally comprises two main regional levels (*Länder* and *Kreise* in Germany, *régions* and *départements* in France, *comunidades autónomas* and *provincias* in Spain, *regioni* and *provincie* in Italy, etc.).

The grouping together of comparable units at each NUTS level involves establishing, for each Member State, another regional level in addition to the two main levels referred to above. This additional level corresponds to a less important or even non-existent administrative structure, and its

classification level varies within the 3 levels of NUTS, depending entirely on the Member State: NUTS 1 for France, Italy, Poland, Romania, and Spain, NUTS 2 for Germany, NUTS 3 for Belgium, etc.

The NUTS Regulation lays down the following minimum and maximum thresholds for the population size of the NUTS regions. The thresholds apply for the **average** population size in the case of administrative regional levels.

Level	Minimum	Maximum
NUTS 1	3 million	7 million
NUTS 2	800 000	3 million
NUTS 3	150 000	800 000

At a more detailed level, there are districts and municipalities. These are called 'Local Administrative Units' (LAUs) and are not subject to the NUTS Regulation. More information is available on the internet.<sup>(6)</sup>

## Amending NUTS

The NUTS Regulation lays down rules for future amendments of the regional breakdown used by the European Union. A second revision of the NUTS classification was scheduled for 2010, four years after the 2006 version.

The Commission proposes changes to the NUTS classification, at three-yearly intervals at most, on the basis of initial notifications to Eurostat by the national statistical institutes in the Member States. Changes in national administrative regions lead virtually automatically to a change in the NUTS classification; for non-administrative regions, however, the NUTS Regulation stipulates that changes must entail a reduction of the standard deviation in the size (measured in population) of the regions.

The changes to the NUTS classification, specified in the 2011 Decision by the European Parliament and the Council, will enter into force on 1 January 2012. All agreed changes are reflected in this publication.

## Purpose of NUTS

NUTS serves as a reference:

### a) for the collection, development and harmonisation of the European Union's regional statistics.

During the 1970s, NUTS gradually replaced the specific divisions used in the various statistical domains (agricultural regions, transport regions, etc.), and it was on the basis of NUTS that regional economic accounts were developed and the regional sections of EU surveys were defined.

<sup>(6)</sup> [http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts\\_nomenclature/local\\_administrative\\_units](http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/local_administrative_units).

### b) for socio-economic analyses of the regions.

At the same time as establishing a correlation between regions in terms of size, NUTS also provides several analytical levels. The 1961 Brussels Conference on Regional Economies, organised by the Commission, found that NUTS 2 (basic regions) was the framework generally used by Member States to apply their regional policies and is therefore the appropriate level for analysing regional/national problems. On the other hand, NUTS 1 (major socio-economic regions grouping together basic regions) should be used for analysing regional problems within the EU, such as 'the effect of the customs union and economic integration on areas at the next level down from national areas'. NUTS 3, which broadly comprises regions which are too small for complex economic analyses, may be used for specific analysis or to pinpoint where regional measures need to be taken.

### c) for the framing of EU regional policies.

For the purpose of appraising eligibility for aid from the Structural Funds, regions whose development is lagging behind (regions covered by the Convergence Objective) have been classified at the NUTS 2 level. The areas eligible under the other priority Objectives have mainly been classified at the NUTS 3 level.

The regular report on the social, economic and territorial situation and development of the regions of the EU, which the Commission is required to produce every three years under Article 31 of Council Regulation (EC) No 1083/2006 concerning the European Regional Development Fund, has so far been drafted mainly for the NUTS 2 level.

## Regional classification beyond the EU

The NUTS nomenclature is defined only for the 27 Member States of the European Union. For the other countries that make up the European Economic Area (EEA), and for Switzerland, regions have also been coded in a way which resembles NUTS. For the five **candidate countries**, Eurostat has drafted a nomenclature of statistical regions intended to produce a hierarchy similar to that of NUTS.<sup>(7)</sup> On accession to the EU, the breakdown into statistical regions in force in a given country, agreed bilaterally, becomes part of NUTS and subject to the provisions of the NUTS Regulation.

## Main characteristics

The current NUTS nomenclature applicable from 1 January 2012 subdivides the economic territory of the European Union<sup>(8)</sup> into 97 regions at NUTS 1 level, 270

<sup>(7)</sup> [http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts\\_nomenclature/statistical\\_regions\\_outside\\_eu](http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/statistical_regions_outside_eu).

<sup>(8)</sup> Reference for the definition of the economic territory of the EU: Council Regulation No 2223/1996 on ESA 1995 (European System of Accounts) Annex A: points 2.05 and 13.07, OJ L 310, 30.11.1996.

regions at NUTS 2 level and 1 294 regions at NUTS 3 level. Below those, two levels of Local Administrative Units (LAUs) have been defined. The upper LAU level (LAU level 1, formerly NUTS level 4) is defined only for the following countries: Bulgaria, the Czech Republic, Denmark, Germany, Estonia, Ireland, Greece, France, Cyprus, Lithuania, Luxembourg, Hungary, Malta, Poland, Portugal, Slovenia, Slovakia, Finland and the United Kingdom. The lower LAU level (formerly NUTS level 5) consists of around 120 000 municipalities or equivalent units in the 27 EU Member States (as of 2010).

The aim of the NUTS classification is to ensure that comparable regions appear at the same NUTS level. As population size has been defined in the Regulation as a key indicator for comparability, each level inevitably contains regions that differ greatly in terms of area, economic weight or administrative powers. This heterogeneity across the EU often simply reflects the situation at Member State level.

In terms of area, the largest regions are situated in Sweden and in Finland:

- Manner-Suomi (Finland), 336 837 km<sup>2</sup>, and Norra Sverige (Sweden), 312 052 km<sup>2</sup>, at NUTS level 1;
- Pohjois- ja Itä-Suomi (Finland), 226 775 km<sup>2</sup>, and Övre Norrland (Sweden), 165 295 km<sup>2</sup>, at NUTS level 2;
- Norrbottens län (Sweden), 165 296 km<sup>2</sup>, and Lappi (Finland), 98 984 km<sup>2</sup>, at NUTS level 3.

There are also marked differences between regions in terms of population mainly due to the special criteria applying for administrative regions (2010 data):

- at NUTS level 1, Nordrhein-Westfalen in Germany and Nord-Ovest in Italy have the most inhabitants (approx. 18 million and 15 million, respectively), while Åland in Finland is the least populated region (approx. 27 700 inhabitants);
- at NUTS level 2, Île de France (France) and Lombardia (Italy) have 11 million and 9 million inhabitants respectively, while 14 regions (most of them peripheral regions or islands) have fewer than 300 000: Åland (Finland), Burgenland (AT) (Austria), Ciudad Autónoma de Ceuta, Ciudad Autónoma de Melilla, La Rioja (Spain), Corse, Guyane (France), Dytiki Makedonia, Ionia Nisia, Voreio Aigaio (Greece), Prov. Luxembourg (BE) (Belgium), Região Autónoma da Madeira, Região Autónoma dos Açores (Portugal) and Valle d'Aosta/Vallée d'Aoste (Italy);
- at NUTS level 3, Attiki (Greece), Barcelona, Madrid (Spain), Berlin (Germany), Milano, Napoli and Roma (Italy) all have more than three million inhabitants, whereas a number of regions in Germany, Spain, Belgium, Austria, the United Kingdom, Greece, and the island of Gozo in Malta have populations of under 50 000.

Tables 2 and 3 show the largest, smallest and average areas and populations at the three NUTS levels, for each Member State and for the European Union as a whole.

## Changes compared with 2006

Most territorial changes are at NUTS level 3, affecting five countries. The most important changes at NUTS level 2 occur in two countries, while only one country has changes at NUTS level 1.

In addition, a limited number of region names are being changed or corrected at all NUTS levels, in the interest of harmonisation of the NUTS classification and according to the provisions of the Interinstitutional style guide, in the following countries: Belgium, Ireland, Greece, Spain, Italy, Luxembourg, Austria, Portugal and Slovakia.

For Latvia, Annex III of the Regulation has been amended due to the administrative territorial reform at municipality level in 2009.

All changes in the European regional classification will enter into force on 1 January 2012. For technical reasons, Eurostat will switch to the new version of NUTS (NUTS 2010/EU-27) in the dissemination database in late autumn 2011.

The changes to the NUTS 2006 version are as follows:

### Germany

#### NUTS level 2

Two non-administrative regions, **Brandenburg-Nordost** and **Brandenburg-Südwest**, have been merged to form **Brandenburg**. The administrative reform in the *Land Sachsen* at NUTS level 3 has resulted in a border shift between two NUTS level 2 regions, **Chemnitz** and **Leipzig**.

#### NUTS level 3

Due to an administrative reform in the *Land Sachsen*, 26 regions have been reorganised to form 10 new regions. Numerous code changes have been necessary at NUTS level 3 because of the boundary shift at NUTS level 2. In addition, there has been an administrative merger of the town **Aachen** and the neighbouring **Aachen, Kreis**.

### Italy

#### NUTS levels 1 and 2

The border shift between two NUTS level 3 regions, **Rimini** and **Pesaro e Urbino**, has affected the NUTS level 1 border between **Nord-Est** and **Centro (I)**, and the NUTS level 2 border between **Emilia-Romagna** and **Marche**.

### NUTS level 3

Administrative changes have created three regions by splitting **Monza e della Brianza**, **Fermo** and **Barletta-Andria-Trani**. There has been a border shift between two further regions, **Rimini** and **Pesaro e Urbino**.

*Netherlands*

### NUTS level 3

Due to administrative changes, the number of municipalities (LAU level 2) has decreased from 458 to 431. In three cases within the NUTS level 2 region **Zuid-Holland**, the merging of municipalities has affected NUTS level 3 borders.

*Finland*

### NUTS level 2

The region around the capital, **Etelä-Suomi**, has been divided into two parts in order to differentiate the metropolitan area from the rest of the region. In addition, two rather sparsely populated regions in North-East Finland have merged to form **Pohjois- ja Itä-Suomi**, improving the comparability between NUTS level 2 regions at European level.

### NUTS level 3

An administrative merger has taken place of two regions, **Uusimaa** and **Itä-Uusimaa**. In addition, numerous code changes have been necessary because of the territorial changes at NUTS level 2.

*United Kingdom*

### NUTS level 2

The border shift between two NUTS level 3 regions, **Halton and Warrington** and **East Merseyside**, has affected the NUTS level 2 border between **Cheshire** and **Merseyside**.

### NUTS level 3

Due to administrative changes (local government reorganisation) and for other reasons, the UK has proposed splitting six regions and implementing a boundary shift between **Halton and Warrington** and **East Merseyside**.

## ANNEX 1

**REGULATION (EC) No 1059/2003 OF THE  
EUROPEAN PARLIAMENT AND OF THE COUNCIL  
of 26 May 2003**

**on the establishment of a common classification  
of territorial units for statistics (NUTS)<sup>(1)</sup>**

THE EUROPEAN PARLIAMENT AND THE COUNCIL  
OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European  
Community, and in particular Article 285 thereof,

Having regard to the proposal from the Commission<sup>(2)</sup>,

Having regard to the opinion of the European Economic  
and Social Committee<sup>(3)</sup>,

Having regard to the opinion of the Committee of the  
Regions<sup>(4)</sup>,

Acting in accordance with the procedure laid down in  
Article 251 of the Treaty<sup>(5)</sup>,

Whereas:

- (1) Users of statistics express an increasing need for harmonisation in order to have comparable data across the European Union. In order to function, the internal market requires statistical standards applicable to the collection, transmission and publication of national and Community statistics so that all operators in the single market can be provided with comparable statistical data. In this context, classifications are an important tool for the collection, compilation and dissemination of comparable statistics.
- (2) Regional statistics are a cornerstone of the European Statistical System. They are used for a wide range of purposes. For many years European regional statistics have been collected, compiled and disseminated on the basis of a common regional classification, called 'Nomenclature of territorial units for statistics' (hereinafter referred to as NUTS). It is now appropriate to fix this regional classification in a legal framework and to institute clear rules for future amendments of this classification. The NUTS classification should not preclude the existence of other subdivisions and classifications.

<sup>(1)</sup> Consolidated version as of 7.2.2011

<sup>(2)</sup> OJ C 180 E, 26.6.2001, p. 108.

<sup>(3)</sup> OJ C 260, 17.9.2001, p. 57.

<sup>(4)</sup> OJ C 107, 3.5.2002, p. 54.

<sup>(5)</sup> Opinion of the European Parliament of 24 October 2001 (OJ C 112 E, 9.5.2002, p. 146), Council Common Position of 9 December 2002 (OJ C 32 E, 11.2.2003, p. 26) and Decision of the European Parliament of 8 April 2003 (not yet published in the Official Journal)

- (3) Accordingly, all Member States' statistics transmitted to the Commission, which are broken down by territorial units, should use the NUTS classification, where applicable.
- (4) In its analysis and dissemination, the Commission should use the NUTS classification for all statistics classified by territorial units, where applicable.
- (5) Different levels are needed for regional statistics depending on the purpose of these statistics at national and European level. It is appropriate to have at least three hierarchical levels of detail in the European regional NUTS classification. Member States could have further levels of NUTS details, where they consider it necessary.
- (6) Information on the current territorial composition of NUTS level 3 regions is necessary for the proper administration of the NUTS classification and should therefore be transmitted regularly to the Commission.
- (7) Objective criteria for the definition of regions are necessary in order to ensure impartiality when regional statistics are compiled and used.
- (8) Users of regional statistics need stability of the nomenclature over time. The NUTS classification should hence not be amended too frequently. This Regulation will ensure a greater stability of rules over time.
- (9) Comparability of regional statistics requires that the regions be of a comparable size in terms of population. In order to achieve this goal, amendments of the NUTS classification should render the regional structure more homogeneous in terms of population size.
- (10) The actual political, administrative and institutional situation must also be respected. Non-administrative units must reflect economic, social, historical, cultural, geographical or environmental circumstances.
- (11) Reference should be made to the definition of the 'population' on which the classification is based.
- (12) The NUTS classification is restricted to the economic territory of the Member States and does not provide complete coverage of the territory to which the Treaty establishing the European Community applies. Its use for Community purposes will therefore need to be assessed on a case-by-case basis. The economic territory of each country, as defined in Commission Decision 91/450/EEC<sup>(6)</sup>, also includes extraregio territory, made up of parts of the economic territory that cannot be attached to a certain region (air-space, territorial waters and the continental shelf, territorial enclaves, in particular embassies, consulates and

<sup>(6)</sup> OJ L 240, 29.8.1991, p. 36.

- military bases, and deposits of oil, natural gas, etc. in international waters, outside the continental shelf, worked by resident units). The NUTS classification must also provide the possibility of statistics for this extraregio territory.
- (13) Amendments to the NUTS classification will require close consultations with the Member States.
- (14) Since the objective of the proposed action, namely the harmonisation of regional statistics, cannot be sufficiently achieved by the Member States and can therefore be better achieved at Community level, the Community may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (15) The NUTS classification laid down in this Regulation should replace the 'Nomenclature of territorial units for statistics (NUTS)' established to date by the Statistical Office of the European Communities in cooperation with the national statistical institutes. As a consequence, all references in Community acts to the 'Nomenclature of territorial units for statistics (NUTS)' should now be understood as referring to the NUTS classification laid down in this Regulation.
- (16) Council Regulation (EC) No 322/97 of 17 February 1997 on Community Statistics<sup>(7)</sup> constitutes the reference framework for the provisions of this Regulation.
- (17) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission<sup>(8)</sup>.
- (18) The Statistical Programme Committee established by Council Decision 89/382/EEC, Euratom<sup>(9)</sup> has been consulted in accordance with Article 3 thereof,

HAVE ADOPTED THIS REGULATION:

## Article 1

### *Subject matter*

- (1) The purpose of this Regulation is to establish a common statistical classification of territorial units, hereinafter referred to as 'NUTS', in order to enable the collection, compilation and dissemination of harmonised regional statistics in the Community.

<sup>(7)</sup> OJ L 52, 22.2.1997, p. 1.

<sup>(8)</sup> OJ L 184, 17.7.1999, p. 23.

<sup>(9)</sup> OJ L 181, 28.6.1989, p. 47.

- (2) The NUTS classification laid down in Annex I shall replace the 'Nomenclature of territorial units for statistics (NUTS)' established by the Statistical Office of the European Communities in cooperation with the national statistical institutes of the Member States.

## Article 2

### *Structure*

- (1) The NUTS classification subdivides the economic territory of the Member States, as defined in Decision 91/450/EEC, into territorial units. It ascribes to each territorial unit a specific code and name.
- (2) The NUTS classification is hierarchical. It subdivides each Member State into NUTS level 1 territorial units, each of which is subdivided into NUTS level 2 territorial units, these in turn each being subdivided into NUTS level 3 territorial units.
- (3) However, a particular territorial unit may be classified at several NUTS levels.
- (4) At the same NUTS level, two different territorial units in the same Member State may not be identified by the same name. If two territorial units in different Member States have the same name, the country identifier is added to the territorial units' names.
- (5) In each Member State, there can be further hierarchical levels of detail, decided by the Member State, whereby NUTS level 3 is subdivided. Within two years from the entry into force of this Regulation, the Commission, after consulting the Member States, shall submit a communication to the European Parliament and the Council on the appropriateness of establishing rules on a Europe-wide basis for more detailed levels in the NUTS classification.

## Article 3

### *Classification criteria*

- (1) Existing administrative units within the Member States shall constitute the first criterion used for the definition of territorial units.
- (2) To this end, 'administrative unit' shall mean a geographical area with an administrative authority that has the power to take administrative or policy decisions for that area within the legal and institutional framework of the Member State.
- (3) In order to establish the relevant NUTS level in which a given class of administrative units in a Member State is to be classified, the average size of this class of administrative units in the Member State shall lie within the following population thresholds:

Level	Minimum	Maximum
NUTS 1	3 million	7 million
NUTS 2	800 000	3 million
NUTS 3	150 000	800 000

If the population of a whole Member State is below the minimum threshold for a given NUTS level, the whole Member State shall be one NUTS territorial unit for this level.

- (3) For the purpose of this Regulation, the population of a territorial unit shall consist of those persons who have their usual place of residence in this area.
- (4) The existing administrative units used for the NUTS classification are laid down in Annex II. Measures designed to amend non-essential elements of this Regulation and adapting Annex II shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 7(2).
- (5) If for a given level of NUTS no administrative units of a suitable scale exist in a Member State, in accordance with the criteria referred to in paragraph 2, this NUTS level shall be constituted by aggregating an appropriate number of existing smaller contiguous administrative units. This aggregation shall take into consideration such relevant criteria as geographical, socio-economic, historical, cultural or environmental circumstances.

The resulting aggregated units shall hereinafter be referred to as 'non-administrative units'. The size of the non-administrative units in a Member State for a given NUTS level shall lie within the population thresholds referred to in paragraph 2.

Some non-administrative units may, however, deviate from those thresholds because of particular geographical, socio-economic, historical, cultural or environmental circumstances, especially in the islands and the outermost regions. Those measures, designed to amend non-essential elements of this Regulation by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 7(2).

## Article 4

### *Components of NUTS*

- (1) Within six months after the entry into force of this Regulation, the Commission shall publish the components of each NUTS level 3 territorial unit in terms of the smaller administrative units as laid down in Annex III, as transmitted to it by the Member States.
- (2) Measures designed to amend non-essential elements of this Regulation and adapting Annex III shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 7(2).

Within the first six months of each year, Member States shall transmit to the Commission all changes of the components for the previous year that may affect the NUTS level 3 boundaries and in so doing shall respect the electronic data format requested by the Commission.

## Article 5

### *Amendments to NUTS*

- (1) The Member States shall inform the Commission of:
    - (a) all changes that have occurred in administrative units, in so far as they may affect the NUTS classification, as laid down in Annex I, or the contents of Annexes II and III;
    - (b) all other changes at the national level that may affect the NUTS classification, in accordance with the classification criteria laid down in Article 3.
  - (2) Changes to NUTS level 3 boundaries due to changes of smaller administrative units as laid down in Annex III:
    - (a) shall not be considered as amendments of NUTS if they involve a population transfer equal to or less than one percent of the NUTS 3 territorial units concerned;
    - (b) shall be considered as amendments of NUTS, in accordance with paragraph 3 of this Article, if they involve a population transfer of more than one percent of the NUTS 3 territorial units concerned.
  - (3) Amendments to the NUTS for the non-administrative units in a Member State, as referred to in Article 3(5), may be made if, at the NUTS level in question, the amendment reduces the standard deviation of the size in terms of population of all EU territorial units.
  - (4) Amendments to the NUTS classification shall be adopted in the second half of the calendar year, not more frequently than every three years, on the basis of the criteria laid down in Article 3. Those measures, designed to amend non-essential elements of this Regulation, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 7(2). Nevertheless, in the case of a substantial reorganisation of the relevant administrative structure of a Member State, the amendments to the NUTS classification may be adopted at intervals of less than three years.
- The Commission implementing measures referred to in the first subparagraph shall enter into force, with regard to the transmission of the data to the Commission, on 1 January of the second year after their adoption.

- (5) When an amendment is made to the NUTS classification, the Member State concerned shall transmit to the Commission the time series for the new regional breakdown, to replace data already transmitted. The list of the time series and their length shall be specified by the Commission, taking into account the feasibility of providing them. Those measures, designed to amend non-essential elements of this Regulation by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 7(2). The time series are to be supplied within two years of the amendment of the NUTS classification.

## **Article 6**

### *Management*

The Commission shall take the necessary measures to ensure the consistent management of the NUTS classification. In particular, such measures may include:

- (a) drafting and updating of explanatory notes on NUTS;
- (b) examination of problems arising from the implementation of NUTS in the Member States' classifications of territorial units.

## **Article 7**

- (1) The Commission shall be assisted by the Statistical Programme Committee.
- (2) Where reference is made to this paragraph, Article 5a (1) to (4) and Article 7 of Decision No 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

## **Article 8**

### *Reporting*

Three years after the entry into force of this Regulation, the Commission shall submit a report on its implementation to the European Parliament and the Council.

## **Article 9**

### *Entry into force*

This Regulation shall enter into force on the 20th day following that of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 26 May 2003.

## ANNEX II

*Existing administrative units*

At NUTS level 1 for Belgium “Gewesten/Régions”, for Germany “Länder”, for Portugal “Continente”, “Região dos Acores” and “Região da Madeira”, and for United Kingdom “Scotland, Wales, Northern Ireland” and the “Government Office Regions of England”.

At NUTS level 2 for Belgium “Provincies/Provinces”, for Denmark “Regioner”, for Germany “Regierungsbezirke”, for Greece “periferies”, for Spain “comunidades y ciudades autónomas”, for France “régions”, for Italy “regioni”, for the Netherlands “provincies”, for Austria “Länder” and for Poland “Wojewodztwa”.

At NUTS level 3 for Belgium “arrondissementen/arrondissements”, for Bulgaria “Области (Oblasti)”, for the Czech Republic “Kraje”, for Germany “Kreise/kreisfreie Städte”, for Greece “nomoi”, for Spain “provincias, consejos insulares, cabildos”, for France “départements”, for Italy “provincie”, for Lithuania “Apskritis”, for Hungary “Megyék”, for Romania “Județe”, for the Slovak Republic “Kraje”, for Finland “maakunnat/landskap” and for Sweden “län”.

## ANNEX III

*Smaller administrative units*

For Belgium “Gemeenten/Communes”, for Bulgaria “Населени места (Naseleni mesta)”, for the Czech Republic “Obce”, for Denmark “Kommuner”, for Germany “Gemeinden”, for Estonia “Vald, Linn”, for Greece “Dimoi/Koinotites”, for Spain “Municipios”, for France “Communes”, for Ireland “counties or county boroughs”, for Italy “Comuni”, for Cyprus “Δήμοι/ κοινότητες (Dimoi/ koinotites)”, for Latvia “Republikas pilsētas, novadi”, for Lithuania “Seniūnija”, for Luxembourg “Communes”, for Hungary “Települések”, for Malta “Localities”, for the Netherlands “Gemeenten”, for Austria “Gemeinden”, for Poland “Gminy, miasta”, for Portugal “Freguesias”, for Romania “Municipii, Orașe, Comune”, for Slovenia “Občine”, for the Slovak Republic “Obce”, for Finland “Kunnat/Kommuner”, for Sweden “Kommuner” and for the United Kingdom “Wards”.

## ANNEX 2

**COMMISSION REGULATION (EU) No 31/2011  
of 17 January 2011**

**amending annexes to Regulation (EC)  
No 1059/2003 of the European Parliament  
and of the Council on the establishment  
of a common classification of territorial units  
for statistics (NUTS)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS)<sup>(10)</sup>, and in particular Article 5(4) thereof,

Whereas:

- (1) Regulation (EC) No 1059/2003 constitutes the legal framework for the regional classification in order to enable the collection, compilation and dissemination of harmonised regional statistics in the Union.
- (2) The Annexes to Regulation (EC) No 1059/2003 list the territorial units to be used for statistics.
- (3) In accordance with the provisions in Article 5(4) of Regulation (EC) No 1059/2003, amendments to the NUTS classification should be adopted in the second half of the calendar year not more frequently than every three years.
- (4) According to the information provided to the Commission, the administrative territorial division has changed in several Member States.
- (5) Regulation (EC) No 1059/2003 should therefore be amended accordingly.
- (6) The measures provided for in this Regulation are in accordance with the opinion of the European Statistical System Committee,

HAS ADOPTED THIS REGULATION:

### Article 1

The Annexes to Regulation (EC) No 1059/2003 are replaced by the text in the Annex to this Regulation.

### Article 2

This Regulation shall apply, with regard to the transmission of data to the Commission (Eurostat), from 1 January 2012.

### Article 3

This Regulation shall enter into force on the 20th day following its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 January 2011.
