Foreword

The Statistical requirements compendium is a well-established reference document for the *acquis* in statistics. The Compendium summarises the key reference information for European statistical production.

Eurostat, the statistical office of the European Union, updates the Compendium every year to take into account new legislation and other developments relevant for European statistics. One of the important developments in 2011 was the adoption by the European Commission of a Communication (COM(2011) 211 final) to reinforce the quality of European statistics and designing a framework for moving from correction to prevention. The Communication 'Towards robust quality management for European Statistics' proposes among other things to reinforce the governance of the European Statistical System, to further standardise public accounts, to review regularly the quality of data supplied by government bodies to National Statistical Institutes and to assess the risk of revisions at an earlier stage. This is the latest step to improve the quality of European statistics, an objective which is of crucial importance in strengthening economic governance for the euro area and the EU as a whole.

The structure of the 2011 edition of the Compendium generally follows the annual Statistical Work Programme of the Commission for 2011 which was adopted on the basis of the multiannual Community Statistical Programme 2008 to 2012. The presentation of the statistical themes and modules are made from the perspective of a statistical provider in a country. It means that in general only those modules are included for which there are legal or methodological bases that influence the way statistics are produced in countries being part of the European Statistical System or for which there are obligations to provide data to Eurostat. The Compendium provides a short description for each statistical theme and module as well as for each module: legal acts with other documents relevant for compilation of statistics, including methodological information, and data requirements.

This publication was produced by unit D-1: Statistical cooperation with European and Mediterranean countries, with the assistance of Mr. Ahmet Fazlic, in close cooperation with all subject matter units of Eurostat. The help and support of the subject matter units was indispensable for the compilation of this publication.

Introduction

The Statistical requirements compendium is a reference tool for producers of official statistics. The presentations of the statistical themes and modules in the Compendium are made from the perspective of a statistics provider in a country. Only those modules are included where there are legal or methodological bases that influence the way statistics are produced in countries implementing the European Statistical System or where there are obligations to provide data to Eurostat.

The presentation is organised according to domains (from 1 to 6 and 8) divided into themes and modules. The structure generally follows the Statistical Work Programme of the Commission for 2011. Each theme and module, that is relevant for European official statistics providers, is presented as follows:

Theme N.NN XXXX

(Number and title of the theme)

Description

This section describes the content of the theme.

Module N.NN.NN XXXX

(Number and title of the module, for each module coming under a given theme)

1. Module description

This section describes the content of the module.

2. Legal Basis

This section includes the legal acts, formal agreements and other basic reference documents relevant for the statistical work coming under a given module.

Legal acts:

This sub-section contains all legislation published in the Official Journal that is relevant for the production of the statistics. These are Directives, Regulations, Decisions, Resolutions or Recommendations approved by the European Council and Parliament or by the European Commission.

Agreements:

This sub-section contains all kinds of agreements, i.e. agreements with Member States reached within Eurostat Working Groups, Gentlemen's agreements etc.

Other basis:

This sub-section contains all other documents that are considered as relevant for the production of the statistics in the particular area. The sub-section also includes legislation under preparation such as Draft Council Regulations or Proposals for a Regulation / Directive. It can also be Communications from the Commission to the European Parliament and Council, EU Action plans, Programs, Strategies and Memoranda. This sub-section may also include other

relevant documents such as documents and minutes of Eurostat Working Groups, Manuals, Reference Guides, Handbooks or Web pages.

3. Data requirements

This section lists all datasets that are to be provided from National Statistical Institutes to Eurostat via eDAMIS, the Eurostat single entry point for data. Registered users can access eDAMIS at <https://webgate.ec.europa.eu/edamis>

Each data set description includes the code and the name of the data set. 'Timeliness' usually means the number of days between the end of the reference period and the deadline for the transmission of the data to Eurostat. 'Periodicity' expresses the length of the period for which the data is collected (e.g. 2 – every two years, A – annually, B – biannually, S – semiannually, Q – quarterly, M – monthly).

4. Methodology

This section presents documents or links to interest groups that are useful for the production of the statistics for the particular module. Documents can be minutes of Working Groups, White Papers, statistical methodological manuals, etc. In general, this section contains material that is mainly for information whereas material presented under 'other basis' in the section 2. 'Legal Basis' implies a degree of obligation. However, there is not always a clear borderline so that e.g. methodological manuals may be found in either this section or in section 2.

5. International Cooperation

This section lists international organisations that in cooperation with Eurostat produce statistics for the particular module.

Theme 1.01 Population

Description

The important demographic challenges facing the European Union as well as the development of a common immigration policy (cf. European Pact on Immigration and Asylum as well as the Stockholm Programme adopted by the European Council in December 2009) have resulted in an unprecedented demand for high quality demographic and migration statistics to support policy-making, i.e.:

- Population and housing censuses
- Demographic statistics, including statistics on population stocks and vital events
- Population projections
- Migration statistics, including statistics on stocks of migrant populations, migration flows, acquisition of citizenship, asylum, enforcement of immigration legislation, residence permits and the social and economic situation of migrants

Quality improvements and quality assurance will be an important focus for work on both demographic and migration statistics.

In 2011, the population and housing censuses will be carried out in the Member States. Eurostat will accompany this effort and encourage the georeferencing of the resulting census data. The Census hub project is an example of a more interactive production chain based on a "data at the source" solution in line with the Communication on the production method of EU statistics.

Migration statistics as a cross-cutting phenomenon will benefit from a cost-effective mainstreaming approach. The core social variables relating for the identification of migrants will play an important role in enhancing the possibilities of linking and integrating data from different sources.

Module 1.01.01 Demography, census and projections

Responsible unit: **F-1: Population**
 Contact person: Giampaolo LANZIERI, Tel: +352 4301 35336

1. Module Description

The objective of this module is the development and production of high quality and policy-relevant annual demographic statistics at national and regional level with a view to monitoring the demographic challenges faced by the European Union. This includes the production of independent and high quality population projections on fixed dates (currently every three years). Additionally, this module covers the preparation and realisation of the Community Programmes for population and housing censuses every 10 years.

2. Legal Basis

(1) OJ L 324, 9.12.2010, p. 1–12

Agreements:

The annual demographic questionnaires are collected on voluntary basis, on agreement with the Member States, Candidate Countries and EFTA countries within Eurostat Working Groups on Demography and on written consultations on the structure of the questionnaires.

Eurostat cooperates with United Nations Statistics Division (UNSD) for the main demographic data collection – 'Eurostat-UNSD Joint Demographic Data Collection'. 'Eurostat- UNSD Joint Demographic Data Collection' and 'Rapid Demographic Data Collection' data are carried out by Eurostat also on behalf of the Council of Europe.

Comments: Eurostat carries out four demographic data collections per year: 'Rapid Demographic Data Collection' (deadline 15 May), concerning the main demographic data aggregated at country level; 'Eurostat-UNSD Joint Demographic Data Collection' (deadline 15 September), collection of detailed demographic statistics; 'Nowcast Demographic Data Collection' (deadline 15 November), gathering the latest available monthly data series for the purpose of a timely estimate of the total population per country at the beginning of the following year and 'Regional Demographic Data Collection' (deadline 15 December) for those countries which have agreed with the EC a regional breakdown (NUTS 2006/EU-27, Statistical regions for the EFTA countries and the Candidate countries 2008).

Periodicity: annual. Participant countries: 50 countries and territories: EU Member States (27 countries and Metropolitan France), EFTA countries (4), candidate countries (4), Albania, Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Georgia, Moldova, Monaco, Kosovo under UNSCR 1244/99, Russia, San Marino, Serbia and Ukraine.

Official data providers: National Statistical Institutes.

Module 1.01.02 Migration and asylum

Responsible unit: **F-1: Population**
 Contact person: David THOROGOOD, Tel: +352 4301 35487

1. Module Description

The objective of this module is the development and production of high quality and policy-relevant statistics on migration and international protection in the light of an increased policy focus on the socio-economic impacts of migration, the development of a common immigration policy and the Common European Asylum System. Regulation 862/2007 defines a range of annual statistics on migration flows and migrant stocks, acquisition of citizenship, residence permits and measures against illegal entry and stay; annual, quarterly and monthly statistics on asylum. With regard to quality monitoring and improvement, there is a focus on the statistics required for the allocation of Community funds under the 'Solidarity and Management of Migration Flows' programme. A conceptual framework and work programme for migration statistics mainstreaming and the development of migration statistics was adopted by the ESS Committee in 2010. A key aim of this is to meet growing policy needs for better statistical information on the socio-economic situation of migrants.

2. Legal Basis

Legal acts:

Regulation (EC) No 862/2007 of the European Parliament and of the Council of 11 July 2007 on Community statistics on migration and international protection and repealing Council Regulation (EEC) No 311/76 on the compilation of statistics on foreign workers, OJ L 199 of 31.07.2007, p. 23

Commission Regulation (EU) No 216/2010 of 15 March 2010 implementing Regulation (EC) No 862/2007 of the European Parliament and of the Council on Community statistics on migration and international protection, as regards the definitions of categories of the reasons for the residence permits, OJ L 66 of 16.3.2010, p. 1

Commission Regulation (EU) No 351/2010 of 23 April 2010 implementing Regulation (EC) No 862/2007 of the European Parliament and of the Council on Community statistics on migration and international protection as regards the definitions of the categories of the groups of country of birth, groups of country of previous usual residence, groups of country of next usual residence and groups of citizenship. (1) OJ L 104, 24.4.2010, p. 37-39

Comments:

Collection of statistics on international migration, usually resident population and acquisition of citizenship (Article 3 of the Regulation) – immigrants, emigrants and persons having their usual residence in the Member State disaggregated by age and sex, and by citizenship or by country of birth or by country of previous or by country next residence.

Time of obligation: continuous starting from reference year 2008.

Periodicity: annually.

Publication: statistics are published on the free dissemination database in Eurostat website.

Participant countries: EU Member States, Iceland, Liechtenstein, Norway and Switzerland. Candidate countries and other countries in UNECE area will participate on voluntary base under Gentlemen's Agreement within the framework of Joint UNSD, UNECE, Eurostat and ILO Questionnaire on International Migration.

Official data providers: National Statistical Institutes.

Use of the statistics: support the policy development in the area of immigration and residence of citizens of non-member countries, and in the area of employment and social policy; compiling

population projections and monitoring of major changes in migration and formation of foreign populations; demographic and social reports of the Commission; research in the field of migration and demography;

Collection of asylum statistics (Article 4 of the Regulation) - asylum applications, decisions on asylum applications, applications of unaccompanied minors, returns of rejected applicants, grants of temporary protection.

Time of obligation: continuous.

Periodicity: asylum applications - monthly, first instance decisions on asylum applications - quarterly, applications of unaccompanied minors and resettled persons, final decision on asylum applications - annually, temporary protection - collected in the case of mass influx.

Publication: statistics are published on the free dissemination database in Eurostat website; a Data in Focus is published on a quarterly basis.

Participant countries: EU Member States, Iceland, Liechtenstein, Norway and Switzerland.

Official data providers: Ministries of Home Affairs and Justice and related agencies.

Use of the statistics: asylum statistics are used by DG HOME for the allocation of money to Member States from the European Refugee Fund (Council Decision 2000/596/EC available on: <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32000D0596:EN:HTML>). Dublin II statistics (Article 4.4) are used by DG HOME and presented during Dublin II Contact Committee meetings. Council Regulation 343/2003 (available on:

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32003R0343:EN:HTML>), known as the Dublin II legislation, clarifies which Member State is responsible for assessing an application for asylum; the legislation makes provision for an asylum applicant to be transferred to another Member State if it can be shown that they should have instead sought asylum there.

Collection of statistics on topics related to illegal migration (Article 5 and 7 of the Regulation)-third country nationals refused entry, third country nationals apprehended illegally present, third country nationals subject to an obligation to leave, third country nationals who have actually left having been ordered to leave.

Time of obligation: continuous starting from reference year 2008.

Periodicity: annually.

Publication: statistics are published on the free dissemination database in Eurostat website.

Participant countries: EU Member States, Iceland, Liechtenstein, Norway, Switzerland.

Official data providers: Ministries of Justice and Home Affairs. Police Authorities.

Use of the statistics: support the policy development in this area, and monitoring of major changes in migration pressure and illegal immigration; EIL statistics are used by DG HOME for the allocation of money to Member States from the External Border Fund (Council Decision 2007/574/EC available on:

4. Methodology

Statistical definitions based on EU legislation on immigration and asylum matters, and on the United Nations–Recommendations on Statistics of International Migration, Revision 1 (<http://unstats.un.org/unsd/pubs/gesgrid.asp?ID=116>), the United Nations Recommendations for the Censuses of Population and Housing in the ECE Region (Conference of European Statisticians Recommendations for the 2010 Censuses of Population and Housing: <http://www.unece.org/stats/documents/ece/ces/ge.41/2006/zip.1.e.pdf>) are implemented through Regulation 862/2007.

Member States remain free to make use of any appropriate data sources according to availability and national practice, but must apply the statistical definitions in Regulation 862/2007.

The above mentioned United Nations Recommendations are also implemented for data collections on migration statistics under Gentlemen's agreement.

Theme 1.02 Labour market

Description

High-quality labour market statistics will be provided in the context of the Europe 2020 strategy and the Employment Guidelines. Infra-annual and structural headline indicators will inform policy makers, media and the public.

Fields of activities covered by the theme:

- Labour Force Survey (LFS)
- Earnings and labour costs, in particular Structure of Earnings Survey and Labour Cost Survey
- Principal European Economic Indicators for the labour market: monthly unemployment, labour cost index, job vacancies
- Labour Market Policy statistics (LMP)
- Time Use Survey (TUS)

Module 1.02.01 Employment and unemployment

Responsible unit: **F-2: Labour market**
 Contact person: Ingo KUHNERT, Tel: +352 4301 35234

1. Module Description

The module covers the EU Labour Force Survey (LFS), job vacancy statistics and statistics on industrial disputes (strikes).

The LFS, for which Regulation 577/98 is the basic legal act, provides quarterly and annual information on a wide range of labour market characteristics and socio-demographic variables of individuals and households. Based on quarterly/annual micro-datasets detailed tables, aggregate information, targeted indicators and time series are produced, analysed and disseminated. Tailor-made extractions using the micro-datasets are made and provided to users. Anonymised microdata is available for researchers under specific conditions. Annual-ad hoc modules are implemented and their results published. Based on the LFS monthly unemployment rates are estimated and released as headline indicators. Conceptual work and quality-related projects are undertaken across the entire domain.

Quarterly job vacancy statistics are collected under Regulation 453/2008 and implementing Regulations 1062/2008 and 19/2009. Data is requested from the first quarter of 2009. The Job Vacancy Rate is analysed and widely disseminated by Eurostat, other Commission services and the European Central Bank. Annual job vacancy statistics are collected under gentlemen's agreement with Member States or calculated as an average of the quarterly figures.

Data on strikes are published annually on the basis of a voluntary data collection in the framework of a Memorandum of Understanding with the International Labour Organisation (ILO).

Module 1.02.02 Earnings and labour costs

Responsible unit: **F-2: Labour market**
 Contact person: Simone CASALI, Tel: +352 4301 35572

1. Module Description

The module includes multiannual, annual and short term statistics on earnings and labour costs and indicators on labour taxation. Structural statistics consist of the four-yearly Labour Cost Surveys and the Structure of Earnings Surveys, which both are based on legal acts. Annual statistics on labour costs, gross and net earnings, minimum wages and tax variables are provided by Member States under gentlemen's agreements. At the centre of the (monetary) short term statistics is the Labour Cost Index (LCI). The LCI-related work covers the production of quarterly releases, detailed quality assurance and, every two years, the preparation of a Report on implementation to the Council and the European Parliament.

Addendum to the 2006 LMP methodology (March 2009), available at

http://epp.eurostat.ec.europa.eu/portal/page/portal/labour_market/labour_market_policy

5. International Cooperation

Since 2005, the data collection has been coordinated with the OECD (i.e. starting with reference year 2004). Eurostat collects LMP data for EU Member States and Norway and shares the results with OECD; OECD collects data for OECD countries which are not EU countries according to the Eurostat methodology. There are some deviations in the coverage of category 1 – Labour market services.

Module 1.02.04 Time use and reconciliation of work and family life

Responsible unit: **F-2: Labour market**
Contact person: Luis DEL BARRIO, Tel: +352 4301 35065

1. Module Description

The aim of the Time Use Survey (TUS) is to provide detailed information on how individuals spend their time. It allows shedding light on unpaid work, activities outside the work place and issues related to reconciliation of work and family life. The module covers the development and drafting of methodological guidelines for countries that conduct a TUS (about every 10 years on a voluntary basis) and general guidance as well as analysis and support to publications. The module also covers the evaluation and the dissemination of the 2010 LFS ad hoc module on reconciliation between work and family life (this ad hoc module is attached to the EU Labour Force Survey).

2. Legal Basis

Legal acts:

Commission Regulation (EC) No 365/2008 of 23 April 2008 adopting the programme of ad hoc modules, covering the years 2010, 2011 and 2012, for the labour force sample survey provided for by Council Regulation (EC) No 577/98, OJ L 112, 24.4.2008, p. 22

Commission Regulation (EC) No 20/2009 of 13 January 2009 adopting the specifications of the 2010 ad hoc module on reconciliation between work and family life provided for by Council Regulation (EC) No 577/98, OJ L 9, 14.1.2009, p. 7

Agreements:

Time Use Surveys, Gentlemen's agreement.

Member States, EFTA countries and candidate countries have continuously discussed and commented on draft proposals for the Time Use Survey methodology. All countries carrying out Time Use Surveys seem to be interested in adapting their surveys to the Guidelines released in September 2000 in order to get internationally comparable data. These guidelines were revised and a new version was published in January 2009.

Reference: CIRCA site: Time Use Surveys Group.

3. Data Requirements

Countries participating in the 2010 ad hoc module sent the data file according to the specifications detailed in annex to the Commission Regulation (EC) No 20/2009 of 13 January 2009 adopting the specifications of the 2010 ad hoc module on reconciliation between work and family life.

Theme 1.03 Education and lifelong learning

Description

Official statistics on education and lifelong learning are vital in order to monitor progress towards the achievement of policy goals at national and EU levels. Statistics developed under this theme are crucial for the monitoring and benchmark exercise of the Europe 2020 strategy, the "Education and Training 2020" policy (including new indicators related to employability and students mobility), and the renewed integrated guidelines, social agenda and sustainable development framework.

Fields of activities covered by the theme:

- Production of statistical information on education and lifelong learning via specific data sources on education and training systems, vocational training in enterprises and adult learning
- Production of statistical information on education and lifelong learning via other ESS sources which are not specific to education covering areas like outcome of education, human capital, education and social inclusion of transition from school to work
- Dissemination of indicators for the monitoring of EU policies and benchmarking exercises like structural indicators, "Education and Training 2010", "Education and Training 2020", the European Employment Strategy and integrated guidelines, benchmarking the European Research Area, the social agenda and sustainable development
- Cooperation within the Commission established with DG EAC, DG EMPL, DG RTD and JRC (CRELL – Centre for Research on Education and Lifelong Learning)
- Cooperation with other international organisations (UNESCO Institute for Statistics, OECD, ILO), with specialised EU agencies – European Training Foundation (ETF), CEDEFOP, CRELL (JRC) – as well as with the Eurydice information network established by DG EAC (DG EACEA)

Module 1.03.01 Education statistics

Responsible unit: **F-4: Education, science and culture**
 Contact person: Lene MEJER, Tel: +352 4301 35423

1. Module Description

The objective of this domain is to provide comparable data, statistics and indicators on education for the EU-27, the candidate countries, EEA countries, Switzerland, Albania, USA, Japan as well as other countries available.

The main data source is the set of joint UOE (UNESCO Institute of Statistics, OECD and Eurostat) tables on education systems including some Eurostat-specific tables. The statistics refer to public and private, full-time and part-time education in school and university systems as defined in the UOE manuals.

The international standard classification of education (ISCED), 1997 version, is used for defining education levels and fields. The statistics cover enrolments, entrants, graduates, personnel, language learning and expenditure. Regional data are also available. Data are produced annually and covered by the Regulation (EC) No 452/2008 of the European Parliament and of the Council of 23 April 2008 concerning the production and development of statistics on education and lifelong learning (domain 1). A Commission Regulation published beginning of 2011 defines the tables to be transmitted in relation to the joint UOE data collection instruments specified in section 4 below.

Module 1.03.02 Vocational training and lifelong learning statistics

Responsible unit: **F-4: Education, science and culture**
 Contact person: Sylvain JOUHETTE, Tel: +352 4301 34290

1. Module Description

This module covers vocational training and outcomes of education statistics.

The EU Labour Force Survey (EU-LFS) provides results on the levels of participation in lifelong learning activities (age group 15+). The production of education variables in the EU-LFS is covered by the Regulation (EC) No 1372/2007 of the European Parliament and of the Council of 23 October 2007 amending Council Regulation (EC) No 577/98 on the organisation of a labour force sample survey in the Community.

The Adult Education Survey (AES) provides data on the structure of participation of adults in lifelong learning activities (age group 25-64 years old). It covers in particular the patterns of participation in formal and non-formal education and training, reasons for participation, obstacles to participation, costs of participation as well as types and intensity of participation. The 2005-2008 Adult Education Survey was a pilot exercise at EU level. The results are available for most EU countries (EU27 except Ireland and Luxembourg) as well as Croatia, Turkey and Norway. The next survey is covered by the Regulation (EC) No 452/2008 of the European Parliament and of the Council of 23 April 2008 concerning the production and development of statistics on education and lifelong learning (domain 2). Commission Regulation (EU) No 823/2010 of 17 September 2010 defines the observation period and the deadline for the transmission of the results and provides information on the description of the variables as well as on the sampling, precision and quality requirements.

The objective of the continuing vocational training survey (CVTS) is to provide comparable statistical results on training and non-training enterprises, the supply of and the demand for vocational skills, the need for CVT and the forms, content and volume of CVT, the use of enterprises' own training resources and of external providers, cost of CVT courses as well as initial vocational training from 2005 (e.g. apprenticeships). The survey covers enterprises with 10 and more employees in Sections C to K and O of the statistical classification of economic activities in the European Community (NACE Rev. 1, sections B to N, R and S in NACE Rev 2). Three rounds of surveys have been carried out with reference years 1993, 1999 and 2005. The production of CVTS data is covered by the Regulation (EC) No 1552/2005 of the European Parliament and of the Council on statistics relating to vocational training in enterprises. Commission Regulation (EU) No 822/2010 of 17 September 2010 amends Regulation (EC) No 1552/2005 as regards the list of variables as well as the precision requirements (NACE Rev 2 and additional requirements for the representativeness of the results in large countries).

Educational outcomes (educational attainment) is provided by household surveys carried out in Member States, notably by the EU Labour Force Survey but also by the EU Statistics on Income and Living Conditions (EU-SILC). The objective is to provide comparable statistical results on the educational attainment of populations combined with other socio-economic variables. Ad hoc modules are attached to the EU-LFS on a yearly basis since 1999. Three modules concern education matters: Transition from school to working life (2000), Lifelong learning (2003) and Entry of young people into the labour market (2009).

Theme 1.04 Culture

Description

Official statistics on culture are requested within the development of the "European agenda for the culture" endorsed by the Council on 16 November 2007. Eurostat involvement is limited and mainly concerns the set up and monitoring of an ESSnet running from September 2009 to September 2011.

Fields of activities covered by the theme:

- Statistics on the cultural/creative sector
- Statistics on expenditure on culture
- Statistics on cultural participation and the social impact of culture

Module 1.04.01 Culture statistics

Responsible unit: **F-4: Education, science and culture**
 Contact person: Marta BECK-DOMZALSKA, Tel: +352 4301 33123

1. Module Description

The objective of culture statistics is to provide harmonised data on culture and creativity, in the context of its contribution to employment, growth and intercultural dialogue in Europe. With the renewed concern for statistics on culture at the Council level in the context of the Lisbon strategy (Council Resolution from 16.11.2007), the work in this domain was re-launched in Eurostat in mi-2008. In September 2009 the ESSnet-culture has started its activities. Its work is based on better use of existing data sources (assessing the comparability of these statistics) and can provide proposals for new/better data collections in the fields of cultural industries, cultural expenditure and cultural participation. Methodological work on updating the framework for cultural statistics has to take into account the new 2009 UNESCO framework for cultural statistics.

2. Legal Basis

Legal acts:

Agreements:

Eurostat LEG-culture Agreement

During 1999 the Eurostat Leadership Group (LEG) on cultural statistics came to a successful end. Main outcomes were:

- common core of cultural domains, unanimously considered as such, was identified and adopted
- national and international classifications were analysed in detail and specific proposals were developed with respect to the use of NACE and ISCO
- identification and selection of key variables were carried out, together with the development of a set of indicators relating to cultural employment, financing and participation

Working Group Agreement on cultural statistics of 31/03/2000

As a follow-up of the LEG, the Working Group (WG) on Cultural Statistics consisting of representatives of all EU Member States was set up within Eurostat. The WG has supported and monitored developments in cultural statistics and encouraged Member States to get involved in the production of comparable data at European level. Task Forces on cultural employment, cultural participation and expenditure and finance were created and prepared their reports in 2004.

During the meeting of the WG in June 2008, a proposal to launch the ESSnet-culture was approved. The ESSnet-culture, based on the multi-beneficiary grant awarded for two years, has begun its work in September 2009. The ESSnet-culture is composed of four thematic Task Forces: framework for cultural statistics, cultural industries, expenditure on culture and cultural participation. The results of the ESSnet work will be presented in Autumn 2011.

Further methodological development is foreseen within the framework of the ESSnet-culture. The results of this work will be presented in autumn 2011.

Some methodological notes on different domains of cultural statistics are included in the 'Pocketbook on cultural statistics' (Eurostat 2011) and can be found on: http://epp.eurostat.ec.europa.eu/portal/page/portal/product_details/publication?p_product_code=KS-32-10-374

Cooperation in this field concerns methodological aspects. Contacts are established with the UIS (UNESCO Institute for Statistics), OECD, Council of Europe, UNCTAD, WIPO.

Theme 1.05 Health and safety

Description

Health is an important priority for Europeans, who expect to be protected against illness and disease – at home, in the workplace and when travelling. Statistics are developed in the context of the EU's 'Together for health: a strategic approach for the EU 2008-2013' and of the health and long-term care strand of the Open Method of Coordination (OMC) on Social Protection and Social Inclusion set up by the Lisbon European Council of March 2000. Concerning Health and Safety at Work, the policy framework is provided by the Commission Communication (COM (2007) 62 final) on "Improving quality and production at work: Community strategy 2007-2012 on health and safety at work" provides the policy framework.

Priorities in 2011 will include (i) preparatory work for the implementing Commission regulation on health care and for the second round of EHIS (European Health Interview Survey) and (ii) finalisation and adoption of the Commission regulation on the LFS 2013 module on accidents and work-related health problems.

Fields of activities covered by the theme:

- Public Health including Health care (expenditure (covers health care financing) and non-expenditure (covers health care organisation – facilities, staff, equipment and use of services)), Causes of Death, Health Interview Surveys (European Health Interview Surveys - EHIS, Statistics on Income and Living Conditions - SILC), Morbidity and Disability
- Health and safety at work, including European Statistics on Accidents at Work (ESAW) and European Occupational Diseases Statistics (EODS)

1. Module Description

The objective of this module is to provide harmonised and comparable data sets in the field of public health that are covering major elements related to health, namely health status, including morbidity and disability, health determinants, access to health care and mode of provision, financial, human and technical resources within the healthcare sector, the allocation of these resources between healthcare activities, and the causes of death. Data are used for different sets of indicators, such as the Healthy Life Years Indicator, European Community Health Indicators (ECHI) and the Open Method of Coordination on social inclusion and social protection (OMC).

Further improvement of the methodology and quality is ongoing or planned via the development of measures implementing the new framework regulation on Community statistics on public health and health and safety at work.

Agreements:

Member States Agreement of 01/01/1993, European Statistics on Accidents at Work (ESAW).
 Comments: data on accidents at work: case by case data on cases of recognised accidents at work reported during the reference year

Periodicity: annual

Date of adoption: ESAW Phase 1 1993; ESAW Phase 2 1996; ESAW Phase 3 16/10/2000;

The implementing regulation 349/2011 replaces the gentlemen's agreement and foresees the delivery of all agreed data in 2 phases (2013 and an extension in 2015 for all NACE sectors and the set of variables on causes and circumstances).

Participant countries: ESAW: EU27 + NO + CH

Official data providers: Social Security or Insurance Federation Institutions and/or Labour Ministries and/or NSI

Member States Agreement of 01/01/1995, European Occupational Diseases Statistics (EODS)

Comments: Data on occupational diseases: case by case data on cases of recognised occupational diseases during the reference year, from 2001 onwards 12 variables on the victim, his/her enterprise, the medical diagnosis, the exposure and the severity

Periodicity: annual

Date of adoption: EODS Pilot project: 1995, EODS Phase 1 14/09/2000

The EODS collection was temporarily halted in 2009-2011. A methodological and dissemination policy review is planned for 2011-2012.

Participant countries: EU Member States (except Germany)

Official data providers: Social Security or Insurance Federation Institutions and/or Labour Ministries and/or NSI

Theme 1.06 Distribution of incomes and living conditions

Description

EU-SILC is the European survey on income and living conditions. It has a multipurpose nature including:

- the inclusive growth pillar of the proposed Europe 2020 strategy, in particular with indicators linked to poverty and material deprivation,
- the improved measurement of dimensions of the quality of life.

EU-SILC is a central survey to consider for progressing towards better integration of data sources, to address cross-cutting issues, for instance through data linking and data matching.

The household budget survey, HBS, covers the consumption side of the households' statistics.

The main activities are:

- Annual collection of microdata on income and living conditions (EU-SILC), including annual *ad hoc* modules
- Dissemination of indicators and statistical tables on poverty and social exclusion
- Fostering analysis and developing publications on poverty and social exclusion
- Collection of microdata on household budget surveys (HBS) every five years

Module 1.06.01 Household budget surveys (HBS)

Responsible unit: **F-3: Living conditions and social protection**
Contact person: Peter Paul BORG, Tel: +352 4301 37848

1. Module Description

The objective of this module is to provide harmonised data on consumption expenditure at EU level. The data are based on national Household Budget Surveys, which are sample surveys covering 270,000 households. Data are collected on the basis of a gentlemen's agreement approximately every five years. Data are available in Eurobase. The most recent information is relating to the 2005 wave. The next data collection will have 2010 as the reference year and the aggregated data are due to be published by 2013.

Module 1.06.02 Income, social inclusion and living conditions

Responsible unit: **F-3: Living conditions and social protection**
 Contact person: Pascal WOLFF, Tel: +352 4301 33660

1. Module Description

The objective of this module is to produce harmonised data on income, social inclusion and living conditions at EU level. The data are the main source for the compilation of comparable indicators on social cohesion used for policy monitoring at EU level in the context of the Europe 2020 strategy.

The data is based on EU-SILC, an annual survey covering more than 200,000 households and collecting cross-sectional and longitudinal data on income, level of education, labour market, family situation and other living conditions. SILC was launched in 2003 by a group of voluntary countries and then gradually extended. As from 2007 onwards the EU-SILC data collection has taken place in 31 countries (EU Member States, Iceland, Norway, Switzerland and Turkey). It is based on Regulation No. 1177/2003 of the Council and European Parliament and on implementing Commission regulations. An additional Commission regulation on an annual ad-hoc module is developed each year.

Aggregated tables and indicators are available on the Eurostat website (http://epp.eurostat.ec.europa.eu/portal/page/portal/income_social_inclusion_living_conditions/data/database). In addition, anonymised micro-data are also released to the research community (http://epp.eurostat.ec.europa.eu/portal/page/portal/microdata/eu_silc).

Theme 1.07 Social protection

Description

The European System of Integrated Social Protection Statistics (ESSPROS) provides a coherent comparison between European countries of social benefits to households and their financing. It is also relevant to the inclusive growth pillar of the proposed Commission Strategy Europe 2020.

Fields of activities covered by the theme:

- Data on social protection expenditure and receipts by social protection schemes (quantitative data - core system)
- Metadata on social protection benefits by scheme (qualitative data - core system)
- Data on pension beneficiaries (module)
- Data on net social benefits (module)

Module 1.07.01 Social protection (ESSPROS)

Responsible unit: **F-3: Living conditions and social protection**
 Contact person: Teresa BENTO, Tel: +352 4301 32056

1. Module Description

The objective of this module is to produce data on social protection expenditure, receipts and social benefits classified by functions: sickness/health care, disability, old age, survivors, family/children, unemployment, housing and social exclusion, others.

Data are available on New Cronos. Data from the module on the number of pensions beneficiaries are also annually collected. A data collection on net expenditures, based on a Gentlemen's agreement, is launched in 2011.

2. Legal Basis

Legal acts:

Agreements:

A Gentlemen's agreement about the transition period for net social benefits was agreed by the ESSPROS WG of June 2010. On the basis of this agreement, data on net social benefits should be collected for years 2007, 2008 and 2009 on a voluntary basis. The collection of data referring to years 2007 and 2008 is launched in 2011.

Theme 1.09 Food safety

Description

Eurostat involvement is limited and mainly concerns the collection and dissemination of data on 'control and monitoring activities' in order to meet data needs for the Commission Report to the European Parliament and to the Council in accordance with Article 44 of Regulation of the European Parliament and the Council No. 882/2004 on official controls performed to ensure the verification of compliance with feed and food law, animal health and animal welfare rules.

Fields of activities covered by the theme:

- Control and monitoring of food safety data
- Data on food consumption
- Food domain of the Eurostat website

Module 1.09.01 Food safety statistics: cross-cutting issues

Responsible unit: **F-5: Health and food safety; Crime**
 Contact person: Ana Maria MARTINEZ PALOU, Tel: +352 4301 35730

1. Module Description

On the basis of article 153 of the Treaties and the EC Regulation 178/2002 (the 'Food Law'), the Commission has put in place a series of rules, norms and guidelines on food safety. The statistical work on this field consists of defining a set of relevant indicators on food safety, putting in place a data base with existing data i.e. on results of food control and monitoring activities, and on products with distinctive marks as well as establishing a methodology for the collection of comparable data i.e. on food consumption. The data base 'Food: From farm to fork' will be further developed and the potential impact of changes in related classifications (NACE, CPA, PRODCOM, CN) will be addressed.

2. Legal Basis

Legal acts:

Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002, laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety, OJ L 31, 1.2.2002

Other basis:

Eurostat Working Group on Food safety statistics and related Task Forces: Work developments are discussed at the regular meetings of the Working group (at least once a year).

At regular intervals the Standing Committee for Agricultural Statistics (SCAS) is informed on work carried out on food safety statistics and its development;

General information (description): The scope of the project covers the whole food chain (from farm to fork). Several priority areas were identified at the first meeting of the working group (April 2003). These are: products with distinctive marks (organic products, PDO/PGI/TSG products, and GM-based products), statistics on control and monitoring activities, food consumption statistics. A reflection group set up in June 2005 identified future development areas like the 'impact of food safety in human health'. Development of statistical work on these areas is made with the help of relevant Task forces and Technical Groups;

Publication: in TF and/or WG documents in CIRCA Interest Group Food safety statistics, available on <http://circa.europa.eu/Public/irc/dsis/foodsafetystats/library>, domain FOOD containing main indicators of the food production-consumption chain, pocketbook Food: From farm to fork statistics, available on http://epp.eurostat.ec.europa.eu/cache/ITY_OFFPUB/KS-30-08-339/EN/KS-30-08-339-EN.PDF, several Statistics in Focus, etc. All available on Eurostat website <http://epp.eurostat.ec.europa.eu/portal/page/portal/statistics/themes> under Agriculture and fisheries;

Module 1.09.03 Food consumption statistics

Responsible unit: **F-5: Health and food safety; Crime**
Contact person: Ana Maria MARTINEZ PALOU, Tel: +352 4301 35730

1. Module Description

Food consumption statistics will serve two main purposes: to use it in the context of risk assessments for 'food safety' and to monitor policies, actions and programmes on 'health and nutrition'. The overall aim is to develop a methodology for statistical data on food consumption in order to assist in the evaluation, monitoring and orientation of health and food safety policies of the EU.

A first list of indicators for priority substances and priority foods and nutrients has been established. The Household Budget Survey has been identified as a possible source for calculating food consumption indicators related to health and nutrition. Following a first transmission of data on food quantities collected by Member States from their national 2005 Household Budget Surveys, Eurostat is using these data to calculate a set of indicators to monitor health and nutrition policy.

Agreements:

Data on organic production and farming: transmitted directly to Eurostat

Comments: Data on PDO/PGI/TSG products: voluntary data collection agreed at the meeting held 3-4 December 2004

3. Data Requirements

a) The data on 'Organic production and farming' are available for the following variables and are provided via eDAMIS:

FOOD_OFOPER_A: Number of Organic Operators
Number of registered organic operators (producers, processors and importers) at the end of the reference year and new during the year)
Timeliness: 1 July year n+1 Periodicity: A

FOOD_OFAREA_A: Organic Area and Production
Organic crop area (fully converted and under conversion) and organic crop production
Timeliness: 1 July year n+1 Periodicity: A

FOOD_OFLIVES_A: Organic Livestock
Organic livestock
Timeliness: 1 July year n+1 Periodicity: A

Production of organic products from animal origin
Timeliness: 1 July year n+1 Periodicity: A

FOOD_OFNACE_A: Number of Organic Operators - classified by NACE
Number of organic processors and production value by economic activity
Timeliness: 1 July year n+1 Periodicity: A

b) The following data on 'PDO/PGI products' are collected by Eurostat:

- Number of certified products
- Number of producers
- Volume and value of the sold production

4. Methodology

The methodology is still being further developed: a harmonised questionnaire has been elaborated for the data provision of organic farming and is being tested by Member States.

Theme 1.10 Crime and criminal justice

Description

The need to provide information on the development of crime in the EU arises from the Hague programme adopted by the European Council in 2004 and Commission Communication COM/2006/437, 'Developing a comprehensive and coherent EU strategy to measure crime and criminal justice: an EU action plan 2006-2010'.

Priorities in 2011 will include (i) the development of a security survey to be implemented in 2013, and (ii), development of methodologies for providing required indicators following the work of the DG HOME Expert Group on data needs.

Fields of activities covered by the theme:

- Statistics on police-recorded crime, number of police officers in the Member States and prison population
- Statistics on money-laundering and other new crime types
- Statistics on victimisation/security

Module 1.10.01 Administrative data on crime and criminal justice

Responsible unit: **F-5: Health and food safety; Crime**
Contact person: Geoffrey THOMAS, Tel: +352 4301 34198

1. Module Description

Data are collected annually based on administrative sources in the field of crime and criminal justice. Currently they cover police-recorded crime, police numbers and prison populations. Further actions include quality improvement, extension of the data collection and implementation of a joint data collection with the United Nations Office for Drugs and Crime (UNODC).

2. Legal Basis

Legal acts:

3. Data Requirements

CRIME_NEWSTAT_A: Crime Statistics Dataset Timeliness: 367 Periodicity: A

4. Methodology

A classification of crime types for statistical purposes is being developed by an international task force comprising UNODC and UNECE, in which Eurostat is an active collaborator.

5. International Cooperation

Close collaboration on methodology and data collection in the framework of the project on the European Sourcebook of Crime and Criminal Justice Statistics and with UNODC, HEUNI and EMCDDA.

Module 1.10.02 EU victimisation survey module

Responsible unit: **F-5: Health and food safety; Crime**
Contact person: Geoffrey THOMAS, Tel: +352 4301 34198

1. Module Description

A European Safety Survey (SASU) covering personal security issues and crime victimisation among private households is scheduled for implementation in 2013, following the development work and piloting carried out in the context of the EU Action Plan 2006-2010 to measure crime and criminal justice.

2. Legal Basis

Legal acts:

A draft Council and European Parliament Regulation is in preparation and should be passed in 2012.

Agreements:

The development of SASU has been conducted in collaboration with the Working Group on Crime Statistics and the Task Force on Victimisation. Results of the pilot exercises have been provided by the Member States to Eurostat.

Other basis:

The policy background is defined in a Communication from the Commission to the European Parliament, the Council and the European Economic and Social Committee - Developing a comprehensive and coherent EU strategy to measure crime and criminal justice: an EU Action Plan 2006-2010 (COM/2006/0437 final) available on:

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:52006DC0437:EN:NOT>

3. Data Requirements

Microdata will be sent to Eurostat by the Member States by 31 July 2014.

4. Methodology

A manual on victimisation surveys, developed by an international task force and edited by UNODC, UNECE and Eurostat, was published in 2010. It is available at

Theme 1.11 Discrimination

Description

Equality statistics are based on the EU Treaty (new Article 19) and on the Commission's non discrimination package 2008, which includes a proposal for a new Directive COM(2008) 426 on implementing the principle of equal treatment between persons irrespective of religion or belief, disability, age or sexual orientation.

Priorities in 2011 will include (i) discussing the introduction of country of birth of parents in main social surveys (LFS, SILC) in coordination with migration statistics, as a proxy measurement to the classification on ethnic origin and (ii) supporting DG EMPL in preparatory work for the implementation of a social survey on experienced discrimination.

Fields of activities covered by the theme:

- Outcome difference indicators on equality
- Classification on ethnic origin/streamlined approach with migration statistics
- Survey/question on experienced discrimination

Module 1.11.01 Discrimination statistics

Responsible unit: **F-5: Health and food safety; Crime**
Contact person: Geoffrey THOMAS, Tel: +352 4301 34198

1. Module Description

The Treaty on the Functioning of the European Union (Article 19) authorises the Council to combat discrimination based on any of the following six grounds: sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation. The purpose of this module is to present a statistical framework for assessing the possible extent to which each of these types of discrimination may exist.

2. Legal Basis

Legal acts:

Theme 1.12 Other work in the field of demographic and social statistics

Description

Fields of activities covered by the theme

- Gender-related statistics
- Reconciliation of work and family life
- Strategy for modernisation of social statistics, including a possible (MEETS-like) programme
- Youth statistics

Module 1.12.02 Gender statistics

Responsible unit: **F-2: Labour market**
 Contact person: Sabine GAGEL, Tel +352 4301 36734
 Didier DUPRÉ, Tel: +352 4301 35034
 Simone CASALI (Gender Pay Gap), Tel: +352 4301 35572

1. Module Description

Gender is a key dimension of all statistics on individuals. The module covers the work done on gender mainstreaming in statistics as well as the promotion of the gender perspective in statistics. This includes data production, analysis and publication. Specific indicators like the gender pay gap are developed and regularly produced.

2. Legal Basis

Agreements:

The current methodology for the gender pay gap, based on the structure of earnings survey, was adopted at the 18-19 September 2006 meeting of the Directors of Social Statistics: http://circa.europa.eu/Public/irc/dsis/ssd/library?l=/dss_meetings/meeting_2006_18-19&vm=detailed&sb=Title. At the Labour Market Statistics Working Group on 15-16 June 2009, it was agreed on providing further breakdowns (NACE Rev. 2 sections, economic control (public/private) and age classes).

Other basis:

The promotion of a gender perspective in statistics as well as the development of comparable data at EU level on gender-relevant matters and statistics broken down by sex are based on the Strategy for Equality between Women and Men 2010-2015 (DG JUST, <http://ec.europa.eu/social/main.jsp?langId=en&catId=418>) and its key actions by policy area (SEC(2010) 1079/2).

An overview of the breakdown by gender of all the European Statistical System / Eurostat data collections has been carried out in 2008.

3. Data Requirements

Module 2.01.01 European system of accounts

Responsible unit: **C-1: National accounts methodology; Statistics for own resources**

Contact person: Christian RAVETS, Tel: +352 4301 34826

1. Module Description

The objective of this module is to pursue the revision of the European System of Accounts (ESA95 – Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 400/2009), while continuing to participate actively in the discussions on the research agenda of the international System of National Accounts (SNA 2008). The ESA revision work will ensure that the new ESA will continue to be the appropriate methodological reference for the production of high quality national accounts data required for major EU policies (e.g. own resources, excessive deficit procedure, structural funds, etc.) and for economic analysis. The work covers the elaboration of common standards, definitions, classifications and accounting rules intended to be used for compiling accounts and tables on a comparable basis as well as a programme for transmitting, for Community purposes and on precise dates, these accounts and tables.

As outcome of this work, the Commission has adopted a proposal for a draft new ESA Regulation (ESA 2010) on 20 December 2010 comprising a legal text, a methodology and a transmission programme). The draft Regulation is now discussed at the Council and European Parliament levels.

Implementation Task Forces will further precise how to take into account important methodological improvements such as the capitalisation of Research and Development expenditures, the new treatment of goods for processing, and the prices and volumes measures.

Module 2.01.03 Annual sector accounts

Responsible unit: **C-5: Government and sector accounts; Financial indicators**
Contact person: Peter GAL, Tel: +352 4301 36120

1. Module Description

Annual sector accounts are collected on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 715/2010. They provide a complete view of the non-financial transactions of each economic sector, mainly households, government, corporations and the rest of the world and interrelations between them. Annual sector accounts are presented according to the European System of Accounts (ESA) sequence, from production account to net lending/borrowing. They are used for structural analysis and as a benchmark for quarterly sector accounts.

Module 2.01.04 Supply, use and input-output tables

Responsible unit: **C-2: National accounts - production**
 Contact person: Isabelle Rémond-Tiedrez, Tel: +352 4301 36905

1. Module Description

The objective is to collect, validate and publish supply, use and symmetric input-output tables on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 400/2009. The input-output system includes detailed information for products and industries on production activities, supply and demand of goods and services, intermediate consumption, primary inputs and foreign trade. Data is reported annually for both current prices and prices of the previous year. The compilation and publication of aggregated EU and euro area tables at current prices is now available for the years 2000 to 2006.

Module 2.01.06 Regional accounts

Responsible unit: **C-2: National accounts - production**
Contact person: **Andreas KRUEGER, Tel: +352 4301 36397**

1. Module Description

Regional accounts are collected on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 400/2009. Regional accounts provide information by industry on production activities, and on the primary and disposable income of private households.

Data are reported annually in current prices only and, depending on the indicator, at NUTS levels 2 or 3. In this context Eurostat is responsible for producing the official data set of regional GDP for all EU Member States to be used in the structural fund allocation. Regional Accounts data are mainly used for structural analysis.

2. Legal Basis

Module 2.02.01 Quarterly national accounts

Responsible unit: **C-2: National accounts - production**
 Contact person: Jukka JALAVA, Tel: +352 4301 38435

1. Module Description

Quarterly national accounts, encompassing main aggregates and labour input are collected, validated and published on the basis of Council Regulation (EC) No 2223/96 as last amended by Regulation (EC) No 400/2009. Quarterly national accounts play a fundamental role for economic analysis, definition of economic and monetary policies.

Quarterly national accounts provide a coherent overall picture of the economy on a quarterly basis. Main users are the European Commission, the European Central Bank, national governments, financial markets, analysts, media and general public.

Module 2.02.02 Quarterly sector accounts

Responsible unit: **C-5: Government and sector accounts; Financial indicators**
Contact person: Hervé RENNIE, Tel: +352 4301 37026

1. Module Description

Quarterly sector accounts are collected on the basis of Regulation (EC) No 1161/2005. They provide a simplified but complete picture of the non-financial transactions of the economic sectors. This quarterly information is particularly useful to analyse the short term behaviour of households and non-financial corporations. In particular, the quarterly sector accounts of the euro area are used by European Central Bank for monetary policy purposes.

Theme 2.05 Monitoring own resources

Description

Fields of activities covered by the theme:

- Annual national accounts data of Gross National Income (GNI) and Gross National Product (GNP)
- Verification of the GNI/GNP data transmitted each year by Member States
- Verification of Member States' inventories of statistical sources and methods used to calculate GNI/GNP
- Verification, in cooperation with DG Budget, of the figures and calculations included in Member States' VAT statements

Module 2.05.01 Monitoring own resources GNI

Responsible unit: **C-1: National accounts methodology, Statistics for own resources**

Contact person: Gerald WEBER, Tel: +352 4301 37444

1. Module Description

The objective of this module is to analyze the comparability; reliability and exhaustiveness of Member States' Gross National Income (GNI) data used for EU own resources purposes, as provided for in Council Regulation 1287/2003. This mainly implies that the national accounts data used for budgetary purposes will be examined and further improved according to the provisions of this Regulation, based on the inventories of their statistical sources and methods for compiling GNI and processing tables transmitted by the Member States. Eurostat also carries out direct verification of the national accounts data in the Member States.

Module 2.05.02 Monitoring own resources value added tax (VAT)

Responsible unit: **C-1: National accounts methodology, Statistics for own resources**

Contact person: Andreas DOLLT, Tel: +352 4301 33286

1. Module Description

For the VAT-based 'third' own resource, Member States' VAT receipts are adjusted using detailed national accounts data to correct for the fact that countries do not all apply the harmonized EU VAT rules, having different rates and coverage of products. Member States provide every year a detailed VAT declaration including the calculation of several adjustment factors based on national accounts. In conjunction with DG Budget and DG Taxud, Eurostat makes a detailed verification of the figures and the calculations.

Responsible unit: **G-6: Price statistics; Purchasing Power Parities**
 Contact person: Paul KONIJN, Tel: +352 4301 33438

1. Module Description

The objective of this module is to produce, in accordance with Regulation 1445/2007, the Purchasing Power Parities (PPPs) that are used in particular for the allocation of structural funds by the Commission. For that purpose, it is necessary to carry out consumer goods price surveys and capital goods price surveys as well as surveys of expenditure weights and of data on non-market services and dwelling services. Eurostat aims at further improving the data handling and production processes of PPPs and to further develop the methodology. At the same time, the documentation (in particular the PPP Manual and Member States' Inventories of sources and methods) are continuously updated.

Module 2.08.05 Balance of payments of the Community institutions

Responsible unit: **C-2: National accounts - production**
Contact person: Daniela COMINI, Tel: +352 4301 33633

1. Module Description

Raison d'être: BOP of the Community Institutions is necessary to compile the EU BOP aggregate, as they are considered as an additional Member State, and also for compiling EU Quarterly Sector Accounts. The information is also provided by Eurostat to the EU MSs that are using it for compiling their own Balance of Payments and National Accounts datasets.

Scope: Monthly, annual and quarterly production of Balance of Payments (BOP) and International Investment Position (IIP) of the European Union Institutions; Dissemination of the data in Eurostat's database and provision of the data to the IMF.

Theme 3.01 Annual business statistics

Description

Fields of activities covered by the theme:

- Industrial production statistics (Prodcom)
- Structural Business Statistics (SBS)
- Statistics on Foreign Affiliates (FATS)
- Modernisation of European Enterprise and Trade Statistics (MEETS)

Module 3.01.01 Production of structural business statistics

Responsible unit: **G-2: Structural business statistics**
 Contact person: Petra SNEIJERS, Tel: +352 4301 35024

1. Module Description

The objective is to collect, process and publish data on the structure of the European Business in accordance with Regulation 295/2008 on Structural Business Statistics (SBS) as well as with the FATS Regulation 716/2007 regarding inward FATS and with the Steel Statistics Regulation No 48/2004. SBS contains detailed data covering all business activities, broken down to the 4-digit level of the NACE activity classification, by size classes and by regions (2-digit NUTS). A large number of variables are provided. A more limited set of SBS variables is reported for the foreign affiliates in each Member States.

Module 3.01.02 Development of structural business statistics

Responsible unit: **G-2: Structural business statistics**
 Contact person: Manfred SCHMIEMANN, Tel: +352 4301 33353

1. Module Description

The objective of the SBS development programme is to keep the content of SBS (Regulation 295/2008) and inward FATS statistics (Regulation 716/2007) up-to-date. For SBS the focus is on three main areas: pilot actions on market activities not yet covered by the regulation, further data on business demography and the flexible module of the SBS recast to respond to new user needs, input to the EU 2020 headline indicator on innovation union, and identification of parts of SBS that have become less important.

2. Legal Basis

Legal acts:

Regulation (EC) No 716/2007 of the European Parliament and of the Council of 20 June 2007, on Community statistics on the structure and activity of foreign affiliates, OJ L 171, 29.6.2007, p. 17

Theme 3.02 Short-term business statistics

Description

Fields of activities covered by the theme:

- Production of short-term business statistics (STS) for industry, construction, retail trade and other services
- Consolidation and improvement of quality

Module 3.02.01 Short-term business statistics

Responsible unit: **G-3: Short-term statistics**
 Contact person: Simo PASI, Tel: +352 4301 32035

1. Module Description

Short-term business statistics comprise monthly and quarterly economic indicators, such as the index of industrial production, output prices, construction production, retail trade turnover, etc. for the Member States, the EU and the euro area. The indicators cover nine out of twenty-two Principal European Economic Indicators and almost half of Eurostat's regular news releases. These data are closely followed by economic analysts in the Commission and the European Central Bank, as well as in national governments and in the private sector and financial markets.

The constant requirement is to make high quality data available rapidly while at the same time limiting the statistical reporting burden on enterprises.

Historically, such short-term statistics are mainly related to manufacturing and construction; in recent years, the main challenge has been to develop and consolidate the short-term data on service activities.

Short-term statistics use NACE Rev. 2 as the unique classification of economic activities since 2009.

2. Legal Basis

Legal acts:

Theme 3.03 Energy

Description

Fields of activities covered by the theme:

- Collection/Dissemination of short-term and structural information on energy systems and electricity and gas prices ; preparation of energy balance sheets
- Evaluation of various Commission energy policies (Renewable Energy Sources, Energy Dependency, Energy Efficiency, Combined Heat and Power)
- Contribution to the monitoring of security of supply (oil stockholding obligation)
- Contribution to the monitoring of Carbon Dioxide emission inventories
- Contribution to the development of the Energy Statistics System in the EU and Candidate Countries

Module 3.03.01 Structural statistics of energy

Responsible unit: **E-5: Energy**
 Contact person: Antigone GIKAS, Tel: +352 4301 34374

1. Module Description

The objective of this module is to collect, process and publish annual statistics in accordance with the Energy Statistics Regulation (Commission Regulation (EU) No 844/2010 of 20 September 2010 amending Regulation (EC) No 1099/2008 of the European Parliament and of the Council on energy statistics, as regards the establishment of a set of annual nuclear statistics and the adaptation of the methodological references according to NACE Rev. 2). Collected statistics cover essentially the production, transformation and consumption of numerous energy commodities; details on external trade of energy commodities and characteristics of the energy industry are also included. The annual Energy Balance Sheets of the MS and the EU is the key output of this data collection. This module provides valuable information on the structure of the energy systems across the EU; it allows monitoring of major EU and national energy policies and targets (energy dependency, penetration of renewable energy sources, energy efficiency) while it contributes significantly in assessing the carbon dioxide annual emission inventories

2. Legal Basis

Module 3.03.02 Short-term statistics of energy

Responsible unit: **E-5: Energy**
 Contact person: Antigone GIKAS, Tel: +352 4301 34374

1. Module Description

The objective of this module is to collect, process and publish monthly statistics in accordance with the Energy Statistics Regulation (Commission Regulation (EU) No 844/2010 of 20 September 2010 amending Regulation (EC) No 1099/2008 of the European Parliament and of the Council on energy statistics, as regards the establishment of a set of annual nuclear statistics and the adaptation of the methodological references according to NACE Rev. 2). Collected statistics cover essentially the supply and transformation of numerous energy commodities; details on external trade are also included. This module provides valuable information on the energy markets and their short-term evolution. Information on gas and oil strategic stocks is also covered, in response to security of supply considerations.

Module 3.03.03 Energy prices

Responsible unit: **E-5: Energy**
 Contact person: Antigone GIKAS, Tel: +352 4301 34374

1. Module Description

The objective of this module is to collect, process and publish the prices of selected energy commodities. Electricity and gas prices for industrial (Directive 2008/92/EC of the European Parliament and of the Council) and domestic (gentlemen's agreement) consumers are published twice per year; prices for selected petroleum products (Council Decision 1999/280/EC and Commission Decision 1999/566/EC) are published on a monthly basis.

2. Legal Basis

Legal acts:

Council Directive No 90/377/EEC of 29 June 1990, Community procedure to improve the transparency of gas and electricity prices charged to industrial end-users, OJ L 185, 17.7.1990

Commission Decision No 2007/394/EC of 7 June 2007 amending Council Directive 90/377/EEC with regard to the methodology to be applied for the collection of gas and electricity prices charged to industrial end-users, OJ L 148, 9.6.2007

Directive 2008/92/EC of the European Parliament and of the Council of 22 October 2008 concerning a Community procedure to improve the transparency of gas and electricity prices charged to industrial end-users, OJ L 298, 7.11.2008, p. 9

Industrial users:

Gas prices are to be collected and compiled according to the methodology described in Annex I of Directive 2008/92/EC of the European Parliament and of the Council of October 2008 concerning a Community procedure to improve the transparency of gas and electricity prices charged to industrial end-users (recast) (Text with EEA relevance), OJ L 298, 7.11.2008, p. 12 - 14.

Electricity prices to be collected and compiled according to the methodology described in Annex II of Directive 2008/92/EC of the European Parliament and of the Council of October 2008 concerning a Community procedure to improve the transparency of gas and electricity prices charged to industrial end-users (recast) (Text with EEA relevance), OJ L 298, 7.11.2008, p. 15 - 17.

Domestic users:

Gas and electricity prices data collection is based on a voluntary agreement and complements the data collection of gas and electricity prices for industrial end-users; Data to be collected and compiled according to the methodology described in Eurostat information note of 21 June 2007 addressed to Member States and titled 'Data collection methodology of gas and electricity prices for household users'.

Theme 3.04 Transport

Description

Fields of activities covered by the theme:

- Commercial transport of goods and passengers in all modes where this activity is significant: road freight, rail (goods and passengers), inland waterways (goods), sea (goods and passengers), air (passengers, freight and mail), and pipelines (specific goods)
- Measurement of traffic, in particular for road vehicles
- Infrastructures and means of transport (vehicles) at national and regional level
- Enterprises and employment in the transport sector at national level
- Accidents, fatalities, injured people and release of dangerous goods in the transport sector
- Intermodal transport, congestion, logistics performance
- Impact on the environment, in particular on climate change
- Transport indicators (modal split; structural, sustainable development, globalisation, environment)

 Contact person: Hans STRELOW, Tel: +352 4301 34580
 Anastassia VAKALOPOULOU, Tel: +352 4301 36984

1. Module Description

The aim is to provide information for every mode of transport in each of the main categories: infrastructure, transport equipment, transport enterprises, economic performance and employment, traffic and transport measurement (including modal split data) and energy and environment. The full implementation of the Community 'acquis' in new Member States and candidate countries is a key objective. A further range of statistics is provided from a voluntary data collection based on the Common Questionnaire, carried out jointly with UNECE and the ITF. This Common Questionnaire and other processes are supported by another joint project, the Eurostat/ITF/UNECE Glossary for Transport Statistics. Other statistics, such as regional transport indicators, are collected through additional voluntary questionnaires. All data are made available in the dissemination database and in other publications.

2. Legal Basis

Agreements:

UNECE Agreement, Common questionnaire coordinated with UNECE and ITF.

Comments: Common Questionnaire coordinated with UNECE and ITF

Yearly, data on rail, road, inland waterways and oil pipeline transport, questionnaire collected yearly

Time of obligation:

Periodicity: annual

Date of adoption: around 1990

Publication: many horizontal publications like the Panorama of Transport as well as the Eurostat dissemination database

Participant countries: all UNECE and ITF member countries in addition to EU and EFTA

Official data providers: CNA (Competent National Authorities) like statistical offices or transport ministries

The terminology can be found in the 'Glossary for Transport Statistics'. This glossary is translated to all current EU Member States languages as well as Russian. The fourth edition of the glossary is available on:

Module 3.04.02 Passenger mobility and road traffic data

Responsible unit: **E-6: Transport**
Contact person: Monika WRZESINSKA, Tel. +352 4301 32976

1. Module Description

The objectives of this module are to provide statistics on passenger mobility and road traffic. For the former, an inventory of the existing non-harmonised national surveys has been established and is regularly updated. For the latter, a voluntary regular data collection on Vehicle-Km performed on the national territories is in development.

2. Legal Basis

Agreements:

The voluntary collection of road traffic is a joint project between Eurostat, UNECE and ITF.

Other basis:

A harmonised EU survey in long-distance mobility (Dateline project) was carried out in 2001-2002, within the 5th R&D Framework Programme. See at: <http://www.ncl.ac.uk/dateline/>

Eurostat has a project aimed to collect and update a non-harmonised database with the latest available information and results from the national travel surveys. This also includes a methodological analysis of the results of such surveys and the dissemination of the main results on passenger mobility on Circa, in Statistics in Focus and/or in Statistics Explained.

The official data providers are the CNA (Competent National Authorities) like statistical offices or transport ministries.

In 2008, Eurostat has launched a voluntary exercise for the collection of Vehicle-Kilometre (V-Km) data on road traffic under a common methodological framework. This collection continues for the moment on voluntary basis and should allow for building a common framework to produce road V-Km every year, particularly for car transport, based essentially on existing sources and evolving in the future towards a regular and harmonised data collection system.

3. Data Requirements

Initially, four tables have been designed for the provision of V-Km data with different breakdowns: by type of vehicle, by type of road, by type and age of vehicle and by gender and age of driver.

In 2010, based on the outcome of 2008 data collection and the difficulties encountered by the reporting countries to provide some of the breakdowns, a Task Force composed of representatives of several Member States decided to modify the data requirements and to drop the table related to gender and age of the driver. In return, more detailed breakdowns on type of fuel have been introduced to reflect the new statistical need of monitoring the impact of transport on environment.

This data collection is made on annual basis via the Common Questionnaire on Transport Statistics (see Module 3.04.01).

1. Module Description

The objective of this module is to provide harmonised statistics on the transport of goods by road. Data are collected under Council Regulation 1172/98, which specifies a wide range of variables and provides for the transmission to Eurostat of individual survey data records for vehicles, journeys and goods transport operations. It also covers all cabotage operations. Eurostat validates and processes these data in order to generate the tables required by users, including the participating countries which receive from Eurostat the contributions of foreign hauliers on their national territory.

1. Module Description

Sea transport: The objective is to provide harmonised statistics on the transport of goods and passengers by sea, under Directive 2009/42. This includes adapting the legal basis, taking into account the evolution of users' needs, enhancing methodological concepts and their harmonised implementation at national level, and collaborating with the Member States and the relevant international and industrial organisations. Attention is also paid to port infrastructure, fleets, enterprises, employment and accidents, as well as the use of EDI for data transmission.

Inland waterways transport: The objective is to provide harmonised statistics on the transport of goods by inland waterways, under European Parliament and Council Regulation 1365/2006.

2. Legal Basis

Module 3.04.08 Transport safety statistics

Responsible unit: **E-6: Transport**
Contact person: Hans STRELOW, Tel: +352 4301 34580

1. Module Description

The objective of this module is to provide statistics on transport safety in general. It covers inter alia the work done for the Community database on road accidents (CARE). This is a joint DG TREN-Eurostat project, based on Council Decision 93/704. In addition, Eurostat collects rail accident data from the Regulation on rail transport statistics. Eurostat envisages producing multi-modal safety statistics based on the data collection work done by TREN (in road) and its different safety agencies.

2. Legal Basis

Legal acts:

Council Decision No 93/704/EC of 30 November 1993, on the creation of a community database on road accidents, OJ L 329, 30.12.1993

Theme 3.05 Tourism

Description

Tourism is an important economic activity in the EU and statistics on tourism rank amongst the highest in terms of users consulting Eurostat's website. Under the Lisbon treaty, the EU has acquired new competences in the area of tourism policy. Priorities in 2011 will include (i) realisation of the second phase of a Communication on the production method of EU statistics - engaging generic project on automated data collection, and (ii) adoption of implementing measures for the forthcoming Regulation concerning European statistics on tourism.

Fields of activities covered by the theme:

- Collection and dissemination of statistics on domestic and outbound tourism demand of the EU residents (tourism propensity and tourism behaviour; typically through household /visitor survey in social statistics); legal basis: Council Directive 95/57/EC (adoption of a Regulation revising and updating the Directive is expected in 2011)
- Collection and dissemination of statistics on tourism supply (accommodation statistics; typically through enterprise surveys in business statistics) based on Council Directive 95/57/EC
- Statistics on employment in the tourism accommodation sector (based on data from the European Labour Force Survey)
- Tourism Satellite Accounts (TSAs): projects to enhance the methodological developments and implementation in the Member States
- Indicators on sustainable and competitive tourism, using existing official statistics

Module 3.05.01 Tourism statistics

Responsible unit: **F-6: Information society; Tourism**
 Contact person: Christophe DEMUNTER, Tel: +352 4301 36565

1. Module Description

The objective is to compile and publish harmonised and high-quality statistical information on tourism in Europe.

Since 1995, the legal basis for tourism statistics is Council Directive 95/57/EC. The legal basis is under revision (with a Regulation expected to enter into force in 2011, with 2012 as first reference year).

The current system of tourism statistics consists of two main elements. On the one hand the supply side statistics, giving information on capacity and occupancy of tourist accommodation establishments. On the other hand the demand side, giving information on tourism participation and tourism trips made by residents of the European Union. While the first is closer to the concept of business statistics, the latter has more affinity with social statistics. Both components together depict the state of affairs of tourism in Europe as well as tourism by Europeans.

2. Legal Basis

Legal acts:

Council Directive No 95/57/EC of 23 November 1995, on collection of statistical information in the field of tourism, OJ L 291, 6.12.1995

- Livestock, meat and eggs statistics
- Milk and dairy product statistics
- Supply balance sheets
- Vineyard statistics
- Fruit tree statistics

Module 4.01.01 Crop products statistics

Responsible unit: **E-2: Agriculture and fisheries**
 Contact person: Fausto CARDOSO, Tel: +352 4301 35017

1. Module Description

The objective is to collect, process and disseminate regional, national and EU data on crop production and land use. Crop products statistics cover the production data for cereals, other field crops, fruits and vegetables and the supply balance sheets for a large number of crop products.

They also include two specialised surveys, one on vineyards with a basic survey every ten years and an annual intermediate survey as well a fruit trees plantation survey every five years. Except for the specialised surveys mentioned, data is reported annually for all products. The revision of existing community legislation and gentlemen agreements will simplify and consolidate the scope of crop statistics (i.e. fruit, vegetables and early estimates will be included in the legislation, needs of the specialised surveys on vineyard and orchard will be reconsidered). Special attention is devoted to the collection, validation and dissemination of the data, to analysis of the used methods and to the update of the metadata information.

2. Legal Basis

Legal acts:

A - Cereals and main crops:

Council Regulation (EEC) No 837/90 of 26 March 1990, concerning statistical information to be supplied by the Member States on cereals production, OJ L 88, 3.4.1990

Council Regulation (EEC) No 959/93 of 5 April 1993, concerning statistical information to be supplied by Member States on crop products other than cereals, OJ L 98, 24.4.1993

Commission Regulation (EC) No 2197/95/EC of 18 September 1995, amending the annexes to Council Regulations (EEC) No 837/90 concerning statistics to be supplied by the Member States on cereal production and (EEC) No 959/93 concerning statistical information to be supplied by Member States on crop products other than cereals, OJ L 221, 19.9.1995

Commission Regulation (EC) No 296/2003 of 17 February 2003, amending Council Regulation (EEC) No 959/93 concerning statistical information to be supplied by Member States on crop products other than cereals, OJ L 43, 18.2.2003

Regulation (EC) No 543/2009 of the European Parliament and of the Council of 18 June 2009 concerning crop statistics and repealing Council Regulations (EEC) No 837/90 and (EEC) No 959/93, OJ L 167, 29.6.2009, p. 1

(Comment: Commission Regulation (EC) No 2197/95/EC and Commission Regulation (EC) No 296/2003 still remain valid for the Member States that have requested derogation: the Czech Republic till 2010 and Belgium, Bulgaria, Germany, Poland, Portugal and Sweden till 2011. For all other Member States, Regulation (EC) No 543/2009 replaces the two regulations mentioned above from 2010 onwards.)

Module 4.01.03 Milk and dairy products statistics

Responsible unit: **E-2: Agricultural and fisheries**
 Contact person: Garry MAHON, Tel: +352 4301 37310

1. Module Description

This module covers statistics at regional, national and EU level related to production of milk and milk products from cows, ewes, goats and buffalos. It concerns monthly and annual data on milk produced in agricultural holdings (farms) and collected by dairies including data on the protein content and supply balance sheets. Triennial statistics provide data on the structure of dairies. Most of the data is covered by Community legal acts. Current activities are: improving the data collection system, data validation, data analysis and dissemination as well as the elaboration and update of the metadata.

Theme 4.02 Agricultural structures

Description

Fields of activities covered by the theme

- Farm structure statistics play a key role in the design, implementation, monitoring and evaluation of the Common Agricultural Policy (CAP). This role is likely to increase over time with enlargement and CAP reform (shift from product to producer support - environmental compliance - rural development).
- The Farm Structure Survey (FSS) is covered by a basic Regulation (EC) N° 1166/2008 of the European Parliament and of the Council
- Farm Structure Surveys - censuses every ten years (i.e. 2009/2010) and at least two intermediate sample surveys in between (i.e. 2013 and 2016) - are the backbone of the agricultural statistical system.
- The Survey on Agricultural Production Methods (SAPM) launched in 2009/2010 is also based on the Regulation (EC) No 1166/2008.
- The concerned surveys serve the Common Agricultural Policy (CAP) through provision of micro-data (farm level) on the agricultural labour force, land use, livestock, equipment and non-agricultural activities and they are the statistical basis for collection of information on land use, livestock and agricultural income.
- The farm typology processed on the FSS is the key used in the farm accountancy data network.
- The Common Agricultural Policy has evolved significantly over the last years, but further changes are necessary in order to respond to new challenges, notably the rising concerns regarding food security, the sustainable management of natural resources, mitigation of and adaptation to climate change, increasing volatility of agricultural prices, the diversity and further development of farm structures and production systems and the strengthening of territorial and social cohesion. By responding to these challenges, the CAP will contribute to the Europa 2020 Strategy in terms of smart, sustainable and inclusive growth. A solid statistical base is essential for policy design and impact assessment of reform proposals, the implementation of the policy and its monitoring and evaluation.

1. Module Description

Collection and validation of Farm Structure Survey statistics. These data play a key role in the design, implementation, monitoring and evaluation of the Common Agricultural Policy (CAP). The EU farm structure surveys (FSS) - censuses every ten years (1990, 2000; 2010 etc.) and intermediate sample surveys in between - are the backbone of the agricultural statistical system. The next sample surveys will be conducted in 2013 and 2016. They provide micro-data on agricultural labour force, land use, livestock, and equipment and they are the statistical basis for sample surveys on land use, livestock and agricultural income; the EU farm typology (linked to farm structure survey and farm accountancy data network) has to be revised in accordance with CAP reform.

Theme 4.03 Land use and land cover

Description

Fields of activities covered by the theme:

- This theme comprises the Land Use and Land Cover Area Frame Statistical Survey (LUCAS), which regards the whole EU territory
- Surveys (most recent 2008/2009) are launched to obtain harmonised data not only on Land Use and Land Cover changes, but also on environmental features and landscape evolution.
- Setting up Land Use and Land Cover Area frame Surveys (LUCAS)
- Setting up an integrated ESS data network for Land Cover and Land Use
- Collecting comparable and harmonised statistical information on Land Cover and Land UseThe cost of launching LUCAS survey in 2012 is estimated at € 10.9 million, 4 million of which come from Eurostat's appropriations. Implementation of the action is critically dependent on the availability of subdelegated appropriations for an amount € 6.9 million, DG ENTR and DG CLIMA.

Module 4.03.01 Land use and land cover statistics

Responsible unit: **E-1: Farms, agro-environment and rural development**
Contact person: Alessandra PALMIERI, Tel: +352 4301 31776

1. Module Description

Collecting and harmonising European data on land cover/use by three main approaches: by setting up area frame surveys (LUCAS) in the Member States, by assessing and collecting available data in Member States, taking into account the need for harmonisation of these data and by co-operating with EEA and other EU and international bodies. The work consists mainly of preparing the next LUCAS survey in 2012, analysing and disseminating the LUCAS 2009 data and co-ordination of cooperation with the Member States on land cover/use, data availability and harmonisation.

The LUCAS survey in 2012 consists of an area frame sampling survey collecting harmonised in situ data on land cover/use and agro-environmental parameter, covering all Member States.

2. Legal Basis

None

3. Data Requirements

The LUCAS survey is designed and carried out by Eurostat who collects directly the data; Member States are not involved for the moment.

Agricultural Land Use statistics are collected through the Crop Statistics regulation:
Timeliness: 0 Periodicity: A

An integrated system of Land cover and land use statistics is under preparation, with data collection expected to start in 2013.

Theme 4.04 Agricultural accounts and prices

Description

Fields of activities covered by the theme:

- Economic Accounts for Agriculture (EAA) – also covers agricultural labour input (ALI)
- Unit Value Statistics (UV) and Regional EAA
- Agricultural Price Statistics - covers annual and quarterly agricultural price indices data (API) and absolute prices data
- Agricultural land prices and rents

Module 4.04.01 Agricultural accounts and prices

Responsible unit: **E-2: Agriculture and fisheries**
 Contact person: Iulia POP, Tel: +352 4301 34443

1. Module Description

Economic Accounts for Agriculture (EAA) and agricultural price statistics (APS) play a key role in the design, implementation and monitoring of the common agricultural policy (CAP) as well as in the evaluation of the impact of the CAP on the economic and financial situation of the agricultural community. The national EAA data are covered by legal acts while regional EAA and APS data are collected through gentlemen's agreements. EAA, Agricultural labour input (ALI) and Unit values data are collected and disseminated annually; price indices are reported quarterly and annually; absolute prices annually; agricultural land prices and rents annually. Collection, validation and dissemination of agricultural accounts and prices will continue and be further modernised. Particular attention is given to the implementation of a target methodology for land prices and rents.

Theme 4.05 Forestry statistics

Description

Fields of activities covered by the theme

- Collection of annual data on the production of and trade in wood and wood products for the EU and EFTA countries with the Joint FAO/ECE (Economic Commission for Europe)/Eurostat/ITTO (International Tropical Timber Organisation) Forest Sector Questionnaire (JFSQ)
- Collection of economic data for forestry and logging using the Integrated Environmental and Economic Accounting for Forests (IEEAF) approach

Module 4.05.01 Forestry statistics

Responsible unit: **E-3: Environmental statistics and accounts**
 Contact person: Marilise WOLF-CROWTHER, Tel: +352 4301 32872

1. Module Description

The Joint Forest Sector Questionnaire (JFSQ) provides yearly data for the EU-27 and EFTA countries on production and trade in wood and wood products by means of a single worldwide questionnaire jointly managed with UNECE, FAO and ITTO. Economic accounts for forestry and logging are collected by means of a second questionnaire – as part of Integrated Environmental and Economic Accounting for Forests (IEEAF).

IWG Agreement of 1990 on Forestry statistics.

The purpose of the Inter-Secretariat Working Group agreement is to optimise the use of scarce resources by maximising co-operation between organisations and thereby minimise duplication of work. The IWG is a purely informal body and has no decision-taking powers or authority. Its members are answerable to their own authorities and statutory bodies, who must take decisions in the normal way.

At its first meeting the IWG adopted two basic objectives:

- no piece of information should be requested twice from the same country by different international organisations
- there should be the same value for the same transaction in all the international data sets

This approach is in accordance with the wider arrangements for coordination of statistical activities between OECD, EUROSTAT and the Conference of European Statisticians (UN/CES).

Theme 4.06 Fisheries statistics

Description

Fields of activities covered by the theme:

- Catch statistics
- Landings statistics
- Aquaculture statistics

Module 4.06.01 Fisheries statistics

Responsible unit: **E-2: Agriculture and fisheries**
 Contact person: Franco ZAMPOGNA, Tel: +352 4301 37268

1. Module Description

The work programme in fisheries statistics concentrates on adaptations necessary to meet the data requirements of the recent revisions of the common fisheries policy (CFP). The existing legislation covers annual data for catch, landings and aquaculture statistics. The updated legislation on landings and aquaculture statistics will be implemented. The further integration of the various aspects of the CFP could extend the range of data required, placing greater emphasis on data which have until recently received relatively little attention. The implementation of a new data management environment will ensure the modernisation of the current fisheries data collection, transmission and dissemination system.

2. Legal Basis**Legal acts:**

4. Methodology

Member States provide methodological reports on the way they collect data. These reports are updated regularly and discussed yearly.

Eurostat is using the international standards, definitions and concepts to compile its statistics:

(Captures statistics) Handbook of Fishery Documents, FAO, Rome, 1994

(Landings) Working document FISH/168, Handbook of Fisheries Statistics, FAO, Rome, 1994

(Aquaculture statistics) Handbook of Fisheries Statistics, FAO, Rome, 1994

(Statistics on fishing fleet) Handbook of Fishery Statistics, FAO, Rome, 1994

These standards are on an ongoing process of revision in 2010.

Statistics on fishing fleet:

Eurostat updates its Fishing Fleet data using extracts from the DG MARE's Community Fishing Fleet Register (compiled from national submissions under EU legislation)

Data are received from Iceland and Norway by gentleman's agreement.

Theme 4.07 Agri-environmental statistics

Description

Fields of activities covered by the theme:

- Development and maintenance of a system of 28 agri-environmental indicators for monitoring the integration of environmental concerns into the Common Agricultural Policy, based on Commission Communication COM (2006)508
- Coordination of the work on these indicators carried out in other Directorates General (DG Agriculture and Rural Development, DG Environment , Joint Research Centre, European Environmental Agency) in accordance to a Memorandum of Understanding and with other international organisations
- Collection, processing and dissemination of the data needed for the indicators, from the other involved Commission services, Member States, other units and statistics in Eurostat and by other (non-governmental) organisations
- Setting up a long-term data collection system taking into account all data needs in the domain and the need to reduce the response burden
- Contributing to Eurostat publications including agri-environmental statistics
- Implementation of the Regulation (EC) No 1185/2009 of the European Parliament and of the Council of 25 November 2009 concerning statistics on pesticides

Module 4.07.01 Agri-environmental statistics

Responsible unit: **E-1: Farms, agro-environment and rural development**
Contact person: Johan SELENIUS, Tel: +352 4301 37322

1. Module Description

Exploiting of existing agricultural and environmental data to obtain environment related relevant information conform to the requirements of COM (2006) 508 final. Adapting existing statistical tools and surveys to better collect environmental information related to agriculture and, where no data exists, to elaborate new sources. Elaboration of agro-environmental statistics and indicators, e.g. agricultural fertilisers, Nutrient (N, P) balances, plant protection products, and landscape indicators.

Theme 4.08 Rural development and maritime policy statistics

Description

Fields of activities covered by the theme:

- Provision of statistics to support the European Rural Development Policy and the European Integrated Maritime Policy
- Discussions mainly with DG AGRI, DG MARE and DG REGIO about their data needs; follow-up and completion of action 6.5 of the Blue Paper Action Plan on integrated maritime policy (SEC(2007)1278) "Improving Socio - Economic Data for maritime sectors and maritime regions.
- Testing the use of data from harmonised European surveys (Labour Force Survey, Information and Communication Technologies Usage Survey)
- Cross-sectional data collection at NUTS level 3 for areas with differing levels of rurality and for coastal areas / the maritime sector if available. Analysing and publishing NUTS level 3 data as far as they are available
- Managing grants provided to Member States (collection of existing data)
- Building a framework for a rural/coastal inventory covering the most important services/infrastructures
- Analysing and publishing NUTS level 3 data

Module 4.08.01 Rural development statistics

Responsible unit: **E-4: Regional statistics and geographical information**
 Contact person: Isabelle COLLET, Tel: +352 4301 35281

1. Module Description

Provide the European Union with statistical information in the field of rural development. Development work covering the collection of appropriate statistics (social, demographic, economic, etc.) to evaluate the sustainable development of rural areas.

2. Legal Basis

Legal acts:

Council Regulation (EC) No 1698/2005 of 20 September 2005, on support for rural development by the European Agricultural Fund for Rural Development (EAFRD), OJ L 277, 21.10.2005

3. Data Requirements

The list of indicators/variables for Rural Development is divided in 3 parts the information is managed at NUTS level 3:

- Part 1 deal with demographic issues

Population change: migration, natural population change, age structure (by 5 years age group), life expectancy at birth

- Part 2 represents socio-economic issues

Forms of employment

Employment by main sectors

Capacity and occupancy of tourist accommodation

Weight of manufacturing in term of gross value added

Weight of tertiary sector in term of gross value added

Weight of agriculture in term of value added

Employment, Unemployment, Activity rate (in particular, employment in the food industry, long-term unemployment rate)

Human capital

Agriculture holdings: structure, productivity

- Part 3 deals mainly with the infrastructure of NUTS3 areas which will allow Eurostat to calculate accessibility of certain services

Transport network: availability of roads/railways, proximity to next motorway exit, proximity to next railway station

School: Proximity and supply with primary and secondary schools

Proximity to the next university

Hospital: Proximity and supply with hospitals

Health and care: nursing home, home for the elderly

4. Methodology

Those already existing in the existing data methodologies related to rural zones.

The new urban-rural typology will be applied.

Module 4.08.02 Maritime policy statistics

Responsible unit: **E.4: Regional statistics and geographical information**
 Contact person: Isabelle COLLET, Tel: +352 4301 35281

1. Module Description

In 2007, the Commission put forward the main elements of a new European integrated maritime policy, including its founding principles and main objectives, the required governance framework and appropriate tools for integrated policy-making (COM(2007) 575). One of the key actions defined in the proposal is the improvement of socio-economic data for maritime sectors and maritime regions. Good quality information is required to monitor and assess the EU maritime policy and its programmes, to provide contextual information for sustainable coastal and ocean development, and to understand the linkages between socio-economic activities and the environment. In consultation with other Commission services, Eurostat manages the development of a harmonised statistical database that brings together relevant regional and national statistics from different statistical domains.

2. Legal Basis

Other basis:

Communication from the Commission of 10 October 2007 to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions - An Integrated Maritime Policy for the European Union (COM(2007) 575 final) (also called the Blue Book)

Commission staff working document of 10 October 2007- Accompanying document to the Communication from the Commission of 10 October 2007 to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: An Integrated Maritime Policy for the European Union (COM(2007) 575 final) (Action Plan)

3. Data Requirements

At this stage, large parts of the data needed for the module are already collected by the Eurostat production units.

Socio economic data for maritime regions and sector are related to three main items:

- Coastal regions
- Sea basins (i.e. Baltic, Mediterranean...) and land basins (aggregation of coastal regions bordering sea basins)
- Maritime sectors

The coastal regions issue is the more advanced and the other issues are planned to be addressed later. An EU coastal region is a statistical region defined at NUTS 3 level, with a sea border or having more than half of its population within 50 km from the sea. According to this definition, 446 EU coastal regions have been selected. These regions belong to the 22 Member States with a coastline. Among these 446 coastal regions, 372 have a coastline and 73 meet the second criterion. Finally, the German region of Hamburg, which does not correspond to the definition criteria, has been added to the EU coastal regions list, taking into account its strong maritime influence.

The basic data used by the coastal regions approach are the data available on annual basis at NUTS 3 level and belonging to the following set of domains:

- Geographic data
 - NUTS 3 definition (code and area)
 - Maritime transport port (code and location)

- Population
 - Density
 - Population 1th January (total and by age group (0-14, 15-64, 65+))
 - Birth rate
 - Death rate
 - Active population aged 15 years and more
 - Unemployment related to the population aged 15 years and more (total and rate)
- Economy
 - Employment (ESA 95 branch account)
 - GDP
- Tourism
 - Capacity data (number of hotels, bedrooms, bed places)
- Maritime Transport
 - Passengers (total numbers, by direction and type)
 - Goods (total weight, by direction)
- Agriculture
 - Utilized agricultural area (UAA)
 - Arable land (area)
 - Live stock unit

4. Methodology

An Inter-service Action Group led by Eurostat monitors and discusses the development of the socio-economic statistics for maritime policy. The Group comprises representatives from six other Commission General Directorates: DG EMPL, DG ENTR, DG CLIMA, DG MARE, DG REGIO and DG MOVE.

Theme 5.01 Statistics for business cycle analysis

Description

Fields of activities covered by the theme:

- Improvement of the quality and the coverage of Principal European Economic Indicators (PEEIs, COM/2002/661) and enhancement of their visibility
- Development and implementation of sophisticated statistical and econometric techniques in order to increase timeliness, length, frequency and reliability of PEEIs
- Development and maintenance of a statistical framework for the assessment of the euro area and Member States cyclical situation
- Provide advanced methods for data readability and interpretability
- Preparation, implementation and follow up of guidelines for harmonising PEEI production processes and for the definition of best statistical practices
- Development of tools for the rationalising the use of statistical and econometric techniques

Module 5.01.01 Euroindicators/PEEs

Responsible unit: **D-5: Key indicators for European policies**
Contact person: Rosa RUGGERI CANNATA, Tel: +352 4301 34397

1. Module Description

The objective of this module is to coordinate all activities related to production, dissemination and analysis of PEEs. It aims at strengthening the visibility of PEEs and promoting their use for policy-making and business cycle analysis. This module will also deal with the management of the Euroindicators/PEEs web site and of the regular quality assessment and improvement of the Euro-IND database.

1. Module Description

The objective of the Eurotrend module is to develop and promote statistical and econometric techniques to improve the overall quality of PEEIs and to develop a sophisticated statistical framework for business cycle analysis. Such techniques will be applied to increase the timeliness of PEEIs (flash estimates), their length (back-calculation), and their availability at higher frequency (temporal disaggregation techniques). Moreover sophisticated de-trending techniques and methods for the construction of synthetic indicators are extensively used to derive an up-to-date and consistent picture of the cyclical situation. This module also deals with harmonisations of the production process of PEEIs by means of guidelines in key areas such as seasonal adjustment, revisions analysis and estimation.

Theme 5.02 Europe 2020 strategy and sustainable development

Description

Fields of activities covered by the theme:
Sustainable development indicators (SDI)

- Europe 2020 indicators
- Structural indicators (SI)
- Globalisation indicators (GI)
- Well-being indicators (WBI)
- Quality profiles (QP)

Module 5.02.01 Europe 2020 indicators: production and dissemination

Responsible unit: **D-5: Key indicators for European policies**
 Contact person: Iliyana SAVOVA, Tel: +352 4301 36 107

1. Module Description

The Europe 2020 Strategy is a new strategy for the EU to develop as a smarter, knowledge based, greener economy, delivering high levels of employment, productivity and social cohesion. It is being designed as the successor to the Lisbon Strategy.

The key areas of the strategy where action is needed are limited to five headline targets on EU level. This limited set of targets is being translated into national targets for each EU country, reflecting the specific situation of the country.

- Employment - 75 % of the population aged 20-64 should be employed
- R&D / innovation - 3 % of the EU's GDP (public and private combined) should be invested in R&D
- Climate change / energy:
 - Reduction of the greenhouse gas emissions by at least 20 % compared to 1990
 - Increase of the share of renewable energy sources in final energy consumption to 20%;
 - 20 % increase in energy efficiency.
- Education - the share of early school leavers should be under 10% at least 40 % of 30-34 years old should have completed third level education (or equivalent).
- Poverty / social exclusion - lifting at least 20 million people out of the risk of poverty or exclusion

The statistical data collected will help to measure the progress achieved in implementing the strategy for the EU to become a smart, sustainable and inclusive economy.

Member States draw up National Reform Programmes setting out in detail the actions they will take under the new strategy, with a particular emphasis on efforts to meet the national targets. The European Council will assess every year the overall progress achieved both at EU and at national level in implementing the strategy.

Europe 2020 Indicators: The Commission's documents as well as other relevant information are available at the following web site: http://ec.europa.eu/europe2020/index_en.htm

To monitor the progress towards Europe 2020 Strategy targets, Eurostat (Unit D5) maintains a set of 8 main indicators:

1. Employment rate by gender, age group 20-64
2. Gross domestic expenditure on R&D (GERD)
3. Greenhouse gas emissions, base year 1990
4. Share of renewables in gross final energy consumption
5. Energy intensity of the economy (proxy indicator for Energy savings, which is under development)
6. Early leavers from education and training by gender
7. Tertiary educational attainment by gender, age group 30-34
8. Population at risk of poverty or exclusion, a union of three sub-indicators:

- Persons living in households with very low work intensity
- Persons at risk of poverty after social transfers
- Severely materially deprived persons

Module 5.02.02 Sustainable development indicators: production and dissemination

Responsible unit: **D-5: Key indicators for European policies**
Contact person: Vincent TRONET, Tel: +352 4301 32906

1. Module Description

Sustainable development is an overarching objective of the European Union set out in the Treaty, governing all the Union's policies and activities. The Sustainable Development Strategy (SDS) deals in an integrated way with economic, environmental and social issues.

The objectives of this module are the provision of high quality indicators and statistical information necessary to monitor the implementation and support the communication on the EU sustainable development strategy. A SDS monitoring report is produced every 2 years and indicators are regularly updated on the Eurostat Website.

2. Legal Basis

Other basis:

European Council document 10917/06 of 26 June 2006: Review of the EU Sustainable Development Strategy (EU SDS) - Renewed Strategy. European Council conclusions of June 2006 on renewed sustainable development strategy.

Theme 5.03 Environment statistics

Description

Fields of activities covered by the theme:

- Environmental Data Centre on Waste
- Statistics on waste, hazardous substances, water, biodiversity
- Regional environment statistics
- Streamlining and production of environmental indicators (Sustainable Development, Sustainable Development Indicators, Europe 2020, etc.)

Module 5.03.02 **Statistics on waste and hazardous substances – Data Centre 'Waste'**

Responsible unit: **E-3: Environmental statistics and accounts**
 Contact person: Karin BLUMENTHAL, Tel: +352 4301 32308

1. Module Description

Provision to the European Union and the wider global community of an information service in order to support the definition, implementation and monitoring of EU environmental policies in the area of waste. Provision and maintenance of a monitoring instrument to measure the effectiveness of the European policy on chemicals (REACH) by a set of risk based indicators.

3. Data Requirements

Reporting based on Regulation 2150/2002/EC

WASTE_GENER_A2: Waste Generation - By EWC-STAT codes and economic activities (NACE), amounts in 1000 tonnes per year. Timeliness: 540 Periodicity: A

WASTE_INCIN_A2: Waste Incineration - Total quantities of waste treated - NUTS 1 level - Incineration. Timeliness: 540 Periodicity: A

WASTE_RECOV_A2: Waste Recovery - Total quantities of waste treated - NUTS 1 level - Recovery (excluding energy recovery). Timeliness: 540 Periodicity: A

WASTE_REGIO_A2: Waste Facilities - Number and capacity of recovery and disposal operations per region. Timeliness: 540 Periodicity: A

WASTE_DISPO_A2: Waste Disposal - Total quantities of waste treated - NUTS 1 level - Disposal (other than incineration). Timeliness: 540 Periodicity: A

WASTE_QR_A2: Waste Quality Report Timeliness: 540 Periodicity: A

The amendment of the Annexes to the Regulation 2150/2002/EC, laid down in Commission Regulation (EU) No 849/2010, will result in a reduced data set to be delivered from 2012 onwards. The data sets WASTE_INCIN_A2, WASTE_RECOV_A2 and WASTE_DISPO_A2 will be combined into one data set named WASTE_TREATM_A2.

Reporting based on Agreement with Member States, candidate countries and EFTA

WASTE_MUNWAS_A: Municipal Waste Timeliness: 330 Periodicity: A

In the framework of the Environmental Data Centre on waste all waste related information requirements by DG Environment will be collected via this Data Centre in Eurostat. The collection of numerical and descriptive waste related information on behalf of DG Environment started in 2007 and will be gradually extended.

4. Methodology

Agreements:

Regional data on transport infrastructure (road, rail, inland waterways), stock of vehicles and traffic safety (road accidents); data are collected from Member States on a voluntary basis (gentlemen's agreement) by way of a web-questionnaire.

Data Requirements

No datasets are directly provided for the purpose of regional transport statistics. Regional transport statistics derives the data needed from the primary data collection for each mode of transport. For maritime and aviation, the data (provided at the level of seaports and airports) are aggregated at NUTS 2 level at Eurostat and disseminated under regional transport statistics. Regional data for rail transport (collected at NUTS 2 level every five years – 2005, 2010, etc.) are disseminated under railway transport statistics and mirrored under regional transport statistics. Road freight transport data are collected and aggregated (at NUTS 3 level) on the basis of sample surveys carried out by the reporting countries. The data are disseminated only under road transport statistics module.

Structure, codes, names and periodicity of all datasets for each mode of transport are described under Module 3.04 Transport.

Methodology

Data on passenger and freight transport by sea, air and rail at regional level are provided according to the definitions set up in the legal acts listed above. Glossary for transport statistics

(prepared by the Intersecretariat Working Group on transport statistics) is used for the voluntary data provisions.

International Cooperation

ITF, UNECE – basically for the purpose of voluntary data collection and the Glossary.

Theme 5.06 Science, technology and innovation

Description

Official statistics on STI are vital in order to measure and understand growth based on knowledge, as well as to monitor progress towards the achievement of policy goals at national and EU levels.

Statistics developed under this theme provide a basis for the monitoring and benchmark exercise for the Europe 2020 strategy, the development of the European Research Area (ERA) and the Innovation Union Initiative. Further topics are the re-engineering of research and innovation statistics and the possible integration of ICT statistics (see theme 5.07)

Fields of activities covered by the theme:

- Production, dissemination and development of the Community Innovation Survey 2006-2010 (and beyond)
- Production, dissemination and development of the Research and Development statistics 2008-2010
- Production and dissemination of the survey on Careers of Doctorate Holders (CDH) 2009 and decision on its follow-up
- Production, dissemination and development of the Patent statistics based on PATSTAT data source from European Patent Office
- Production and dissemination of the High Tech and Knowledge Intensive sectors statistics with their extensions
- Conduction of feasibility studies and pilot data collections in the Science, Technology and Innovation statistics area including the rationalisation of the related surveys where adequate and possible
- Developing new indicators for Commission strategy Europe 2020, European Research Area (ERA) and Innovation Union Initiative and managing and coordinating the related work

Theme 5.07 Information society

Description

Official statistics on ICT are vital in order to measure and understand the socioeconomic impacts of ICT adoption and use, as well as to monitor progress towards the achievement of policy goals at national and EU levels. Priorities in 2011 include (i) provision of indicators for the post Lisbon strategy Europe 2020 and the Digital Agenda 2011-2015, and (ii) implementing 2 Communication on the production method of EU statistics – engaging projects in the field of ICT statistics, namely 'exploring the potential of the internet as a data source' and 'linking micro-data from different sources to analyse ICT impacts on productivity'.

Fields of activities covered by the theme:

- Provision of indicators on the information society for the Digital Agenda 2011-15, and the post Lisbon Commission strategy Europe 2020
- Provision of statistics on the use of Information and Communication Technologies (ICTs) by enterprises
- Provision of statistics on the use of Information and Communication technologies by individuals and in households
- Provision of statistics on the ICT sector
- Provision of statistics on ICT expenditure and investment
- Provision of statistics on postal services or monitoring implementation of Directive 2006/6/4 on Postal Services
- Provision of statistics on telecommunication services

Module 5.07.01 **Statistics on information and communication technologies**

Responsible unit: **F-6: Information society; Tourism**
 Contact person: Albrecht WIRTHMANN, Tel: +352 4301 33728

1. Module Description

The aim is to inform EU policy makers and citizens about how individuals and enterprises use Information and Communication Technologies. This module provides timely and internationally comparable statistics and analyses that help understand the impact of ICTs on Europe's economy, society and environment. It covers a wide range of subjects (internet usage, e-commerce, security, trust, wireless connectivity, internet of things, etc.) and it is governed by the 808/2004 (EC) Regulation of the EP and Council and it is implemented by annual Commission Regulations. The background policy framework is the 2010 strategy – 'An European Information Society for growth and employment' and its corresponding 2010 benchmarking framework.

Theme 6.01 Quality, evaluation, statistical coordination and classifications

Description

Fields of activities covered by the theme

- Monitoring and promoting the implementation of the European Statistics Code of Practice (CoP).
- Coordination of quality aspects within the production of European statistics.
- Implementation of the quality assurance framework for statistical processes and outputs in Eurostat.
- Activities of the Sponsorship on Quality.

These activities for 2011, particularly the work conducted by the Sponsorship Quality, contribute to the revision and extension of the existing quality framework in the ESS to better fit the requirements laid down in Commission Communication on the production method of EU statistics.

In addition the evaluations included in the programme, provide instruments for better interact with users and partners:

- Evaluation of the European Statistical Programme.
- Implementation of rolling reviews and user and partner surveys in particular.

The following activities refer to statistical coordination and classifications.

- Update and maintenance of RAMON, the new version of Eurostat's metadata server, which makes available statistical classifications and the relevant correspondence tables, standard code lists, statistical concepts and definitions, legal acts pertaining to statistics and methodological manuals.
- Coordinate changes in legislation with a view to adopt accounting definitions if feasible.
- Follow-up of changes in accounting standards with a view to assess their impact on statistics.
- Development, updating and implementation of a harmonised set of central statistical classifications such as the European Classification of Economic Activities (NACE), the Statistical Classification of Products by Activities (CPA) and the International Standard Classification on Occupations (ISCO), the Combined Nomenclature (CN) of commodities and the Geonomenclature of countries for the European Statistical System.

These activities are oriented to enhance the interaction with users by providing them with updated concepts definitions and classification used in the statistics disseminated by Eurostat. In addition promoting the use of accounting data is in line with the requirements of Commission Communication on the production method of EU statistics and should contribute to a better use of the existing data leading to efficiency gains.

Module 6.01.03 Classifications for trade in goods statistics

Responsible unit: **G-4: International transactions**
 Contact person: Jussi ALA-KIHNIA, Tel: +352 4301 38180

1. Module Description

Two classifications are used in trade in goods statistics: the detailed (~9300 codes) product classification Combined Nomenclature (CN) and the country classification Geonomenclature (GEONOM). The CN is updated and published annually in accordance with Council Regulation (EEC) No 2658/87. Eurostat manages the statistical aspects of CN, aided by the Customs Code Committee, and publishes unofficial database versions of CN as well as self-explanatory texts, transposition tables etc. for statistical use. GEONOM is based on Regulation No 471/2009 and is revised when necessary, typically every few years.

2. Legal Basis

Legal acts:

Theme 6.11 Data security and statistical confidentiality

Description

Fields of activities covered by the theme:

- Ensuring the physical and logical protection of confidential data (statistical disclosure control – SDC)
- Harmonisation of principles and guidelines in SDC.
- Design infrastructure (IT and procedure) for releasing confidential data (tabular or micro data) to ESS partners and Research community.
- Coordination of sectoral initiatives in the domain of protection and release of confidential data for scientific purposes
- Methodological and tool development in the domain SDC
- Ensuring and promoting the correct and coherent application of rules and provisions for the release of confidential data for scientific purposes
- Methodological support in SDC
- Ensuring adequate governance of statistical confidentiality in the ESS

This work contributes to the improvement of the production method of EU statistics as laid down in the Commission Communication on the production method of EU statistics through:

- the design of cross-cutting infrastructure for the release of data for scientific purposes and for the protection of confidential data disseminated to user
- the improvement of vertical integration of processes defining Member States a framework for the standardisation and harmonisation of processes related to the SDC

Module 6.11.01 Data security and data protection

DATA SECURITY

Responsible person: Local Informatics Security Officer (LISO)
 Contact person: Pascal JACQUES, Tel: +352 4301 38034

1. Module Description

Statistical confidentiality is a fundamental principle of Community statistics enshrined in the Treaty (Article 285) and further developed in Council Regulations 1588/90 and 322/97. It entails a particular duty on the part of the Community statistical authority (Eurostat) to adopt and apply specific implementing measures, in conformity with the opinion of the Committee on Statistical Confidentiality, to safeguard the confidentiality of data transmitted by national authorities to Eurostat. A dedicated Manual described all the security procedures in force to transport and store securely the confidential data received from the Member States, to give access to authorised users for statistical purpose (Eurostat officials, contractors, researchers) and to ensure proper anonymisation before dissemination.

2. Legal Basis

Module 6.11.02 Coordination for statistical confidentiality

Responsible unit: **B-2: Methodology and research**
 Contact person: Aleksandra BUJNOWSKA , Tel: +352 4301 30307

1. Module Description

This module aims at assuring the coordination of statistical confidentiality activities in the European Statistical System (ESS). The main actions relate to the developments of various means of access to micro-data for scientific purposes and to the smooth processing of admissibility requests and requests for access to confidential data. Other actions are related to the development and harmonisation of methods for the statistical disclosure control (SDC) in micro- and tabular data and the development and maintenance of software for SDC. Coordination of confidentiality related activities at the ESS level is achieved through the ESS Committee. The adoption of Regulation (EC) No 223/2009 on European statistics justifies amending the implementing regulation on access to confidential data for scientific purposes.

Annex I — EU legislation on statistics in EUR-Lex

EUR-Lex provides direct free access to European Union law via the internet: <http://www.eur-lex.europa.eu>. The system makes it possible to consult the Official Journal of the European Union. It includes inter alia the treaties, legislation, case-law and legislative proposals. European statistical legislation can be consulted on the 'EU legislation on statistics' page: <http://eur-lex.europa.eu/en/legis/legis-statistiques.htm>

EU legislation on statistics is gathered, where available, in sub-chapters with the following common sub-chapter numbering:

XX.07 Statistics

where XX stands for the two digits of the chapter at entry level, e.g. 03 Agriculture.

Allocation of the statistical themes to the Eur-Lex classification headings is described in the following table:
