

Table of contents ⁽¹⁾

Section 0 – Revisions: benefits and costs

Item 0.1: Introduction

Item 0.1.1: Definition of revisions

Item 0.1.2: Possible causes for revisions

Item 0.1.3: Possible effects of revisions

Item 0.1.4: Revision policy and revision analysis

Item 0.2: Scope of the Guidelines

Item 0.3: Purpose of the Guidelines

Item 0.4: Advantages, cautions, costs and risks of an ESS revision policy

Item 0.4.1: Advantages

Item 0.4.2: Cautions

Item 0.4.3: Costs and risks

Section 1 – General aspects

Item 1.1: A revision policy for the ESS Members

Item 1.2: Domain specific revision policy for the ESS Members

Item 1.3: Consistency across domains and countries of domain specific revision policy

Item 1.4: Stability over time of revision policies

Item 1.5: Dissemination of general and specific revision policy

Section 2 – Routine revisions

Item 2.0: Definitions

Item 2.1: Implementation of a release/revision calendar

Item 2.2: Concurrent versus current revision policy

Item 2.3: Length of routine revisions

Item 2.4: Depth of routine revisions

Item 2.5: Coordination of releases and revisions across countries

Item 2.6: Coordination of releases and revisions across sectors

Item 2.7: Annual and infra-annual benchmarking revisions

Section 3 – Major revisions

Item 3.0: Definitions

Item 3.1: Major revisions in the release/revisions calendar

Item 3.2: Back calculation and major revisions

Item 3.3: Synchronisation of major revisions across countries and domains

Item 3.4: Documentation and the impact of major revisions

Section 4 – Non-scheduled revisions

Item 4.0: Definitions

Item 4.1: Timing of correction of erroneous data

(¹) The following convention applies at the numbering of sections and items: the zero is used only for sections or items containing definitions.

Item 4.2: Use of a standard template to communicate errors corrections

Section 5 – Tracking vintages

Item 5.0: Definition and role of vintages database

Item 5.1: Identification of data vintages to be tracked

Item 5.2: Construction and maintenance of a vintage database

Section 6 – Revision analysis

Item 6.1: Revision analysis for data producers

Item 6.2: Revision analysis for data users

Item 6.3: Use of alternative views on vintages in data revision analysis

Item 6.4: Standard templates for revision analysis

Item 6.5: Metadata template for revision analysis and policies
