Foreword	3
Acknowledgments	4
Introduction	8
Context of this handbook	8
Aim and structure of this handbook	8
1. The role of indicators and assessment	11
1.1 Policy context	12
1.2 The need to provide a summary or a comprehensive assessment	13
1.3 Contribution of indicator-based assessment to policy evaluation	14
1.4 Role of official statistics	14
2. Methodology of indicator-based assessment	15
2.1 Terminology	16
2.1.1 Terms terminology	16
2.1.2 Charts terminology	18
2.2 Method classification	18
2.2.1 Category 1: target value and target year available	20
2.2.1.1 Target path	20
2.2.1.1.1 Linear target path	21
2.2.1.1.2 Non-linear target path	22
2.2.1.2 Statistical projection: Extrapolation	23
2.2.1.3 Methods comparison	24
2.2.2 Category 2: target value available, no target year defined	27
2.2.2.1 Methods comparison	28
2.2.3 Category 3: no target value defined, rate of change available	29
2.2.4 Category 4: no target value defined, direction available (trend assessment)	30
2.2.4.1 Calculation of the observed evolution with initial and final values	31
2.2.4.1.1 Use of an Average Annual Growth Rate	31
2.2.4.1.2 Use of a percentage of change	33
2.2.4.2 Calculation of the observed evolution with all values	34
2.2.4.3 Methods comparison	35
2.3 Synthesis	37
2.3.1 Assessment method considerations	37
2.3.1.1 The methods are not mutually exclusive	37
2.3.1.2 Indicators not evolving in a clear manner	37
2.3.1.3 Use of averages	37
2.3.1.4 Historical path of the indicator	37
2.3.1.5 Use of scenarios	37
2.3.2 Linear/non-linear description of the observed and desired evolution	37
2.3.2.1 Category 1 methods (target value and target year available)	38
2.3.2.2 Category 4 methods (trend assessment)	39

2.3.3	Significance and relevance of the observed evolution	40
2.3.3.1	Category 1 methods (target value and target year available)	41
2.3.3.2	Category 4 methods (trend assessment)	41
2.3.3.2.1	Rate or amount of change as a threshold	41
2.3.3.2.2	Use of significance tests	42
2.3.4	Which method should be used?	42
3.	Communication of indicator-based assessment	43
3.1	Context	44
3.2	Communication forms and target audiences	44
3.3	Communication of the process and results of indicator-based assessment	45
3.3.1	Communication at the level of individual indicators	45
3.3.1.1	Communication of category 1 methods (target value and target year available)	45
3.3.1.2	Communication of category 2 methods (target value available, no target year defined)	47
3.3.1.3	Communication of category 4 methods (trend assessment)	48
3.3.1.4	Summary and discussion	50
3.3.2	Communication at the level of groups of indicators (dashboards)	52
3.3.3	Communication at an aggregated level (aggregated dashboards)	52
3.3.3.1	Simple, non-interactive aggregated dashboards	54
3.3.3.2	Interactive aggregated dashboards for sustainable development	54
3.4	On the use of symbols	59
4.	Conclusions and Outlook	61
4.1	Interactions	62
4.1.1	Frameworks and models of interactions are needed	62
4.1.2	Common classifications of data is a prerequisite	63
4.2	Improving the communication of indicator-based assessment	63
4.3	Role of indicator-based assessment in the post Rio+20 agenda	63
4.4	Role of indicator-based assessment outside the field of sustainable development	64
	Bibliography	65
	Annexes	67
