

# Contents

<b>Foreword</b> .....	iii
<b>Preface</b> .....	v
<b>Acknowledgements</b> .....	vii
<b>List of abbreviations and acronyms</b> .....	xix
<b>Chapter I</b>	
<b>Introduction</b> .....	1
1.1 What is the System of Environmental-Economic Accounting 2012— Experimental Ecosystem Accounting (SEEA Experimental Ecosystem Accounting)? .....	1
1.2 Policy relevance of ecosystem accounting .....	6
1.3 Objectives and challenges in ecosystem accounting .....	7
1.4 The key disciplines in ecosystem accounting .....	9
1.5 The role of national statistical offices .....	12
1.6 Structure of SEEA Experimental Ecosystem Accounting .....	13
<b>Chapter II</b>	
<b>Principles of ecosystem accounting</b> .....	15
2.1 An overview of ecosystems and biodiversity .....	15
2.2 Key conceptual relationships in ecosystem accounting .....	17
2.2.1 Ecosystem services .....	18
2.2.2 Central concepts in measuring ecosystem assets .....	22
2.3 Units for ecosystem accounting .....	24
2.3.1 Introduction .....	24
2.3.2 Basic spatial units .....	25
2.3.3 Land-cover/ecosystem functional units .....	26
2.3.4 Ecosystem accounting units .....	28
2.3.5 Spatial units in relation to ecosystem services .....	29
2.3.6 Relationship to economic units .....	30
2.3.7 Issues in the delineation of spatial units .....	30
2.4 Ecosystem accounting tables .....	31
2.4.1 Tables for ecosystem services .....	31
2.4.2 Tables for ecosystem assets .....	32

2.5	General measurement issues in ecosystem accounting . . . . .	34
2.5.1	The integration of information across different spatial scales . . . . .	34
2.5.2	The scaling of data . . . . .	36
2.5.3	Gross and net recording . . . . .	36
2.5.4	Length of the accounting period . . . . .	37
2.5.5	Data quality and scientific accreditation . . . . .	37
2.6	Relationship of SEEA Experimental Ecosystem Accounting to the SEEA Central Framework . . . . .	38
 <b>Chapter III</b>		
<b>Accounting for ecosystem services in physical terms . . . . .</b>		<b>41</b>
3.1	Introduction . . . . .	41
3.2	Measurement boundaries and characteristics of ecosystem services . . . . .	41
3.2.1	Types of ecosystem services . . . . .	41
3.2.2	Relationship between the generation and use of ecosystem services . . .	43
3.2.3	Measurement boundaries for ecosystem services . . . . .	43
3.2.4	Model for the measurement of ecosystem services . . . . .	47
3.2.5	Other measurement issues . . . . .	48
3.3	Classification of ecosystem services . . . . .	49
3.4	Accounts in physical terms for ecosystem services . . . . .	53
3.4.1	Introduction . . . . .	53
3.4.2	Measurement units for ecosystem services . . . . .	53
3.4.3	Possible tables for ecosystem services . . . . .	54
3.4.4	Approaches to aggregation of ecosystem services . . . . .	56
3.5	Measuring ecosystem services . . . . .	57
Annex A3		
	Models for the measurement of selected ecosystem services . . . . .	62
 <b>Chapter IV</b>		
<b>Accounting for ecosystem assets in physical terms . . . . .</b>		<b>71</b>
4.1	Introduction . . . . .	71
4.2	General approaches to assessing ecosystem assets . . . . .	72
4.2.1	Assessing ecosystem condition and extent . . . . .	72
4.2.2	Assessing expected ecosystem service flows . . . . .	74
4.2.3	Assessing changes in ecosystem assets . . . . .	75
4.2.4	Links to standard asset accounting . . . . .	77
4.3	Compiling ecosystem asset accounts . . . . .	78
4.3.1	Introduction . . . . .	78
4.3.2	Accounting tables for ecosystem assets . . . . .	79
4.3.3	Aggregation in ecosystem asset accounting . . . . .	85
4.4	Accounting for carbon . . . . .	87
4.4.1	Introduction . . . . .	87
4.4.2	Carbon stock account . . . . .	88
4.5	Accounting for biodiversity . . . . .	90
4.5.1	Introduction . . . . .	90
4.5.2	Measurement of biodiversity . . . . .	92
4.5.3	Structuring information on species and groups of species . . . . .	93
4.5.4	Species richness and species abundance accounts . . . . .	94

Annex A4.1	
Additional detail concerning accounting for carbon . . . . .	96
Annex A4.2	
Additional detail concerning accounting for biodiversity . . . . .	100

## Chapter V

<b>Approaches to valuation for ecosystem services and ecosystem assets . . . . .</b>	<b>105</b>
5.1 Introduction . . . . .	105
5.2 Motivations for valuation in monetary terms . . . . .	105
5.3 Valuation concepts . . . . .	107
5.3.1 Ecosystem services and assets in relation to public and private goods . .	107
5.3.2 Welfare economic and exchange concepts of value . . . . .	108
5.3.3 Aligning valuation concepts with motivations for valuation . . . . .	111
5.3.4 Objects of valuation in ecosystem accounting . . . . .	111
5.4 Valuation principles in the SEEA and the System of National Accounts (SNA) . . . . .	112
5.4.1 Market prices . . . . .	112
5.4.2 Valuation of transactions . . . . .	112
5.4.3 SNA approaches to valuing non-monetary transactions . . . . .	113
5.4.4 Valuation of assets . . . . .	114
5.4.5 The decomposition of value into price, quantity and quality . . . . .	114
5.5 Valuation of ecosystem services . . . . .	115
5.5.1 General considerations for different types of ecosystem services . . . . .	115
5.5.2 Approaches to pricing ecosystem services . . . . .	118
5.6 Key measurement issues in valuation . . . . .	123
5.6.1 Measuring regulating services . . . . .	123
5.6.2 Aggregation . . . . .	124
5.6.3 Benefit transfer . . . . .	126
5.6.4 Uncertainty in valuation . . . . .	127

## Chapter VI

<b>Accounting for ecosystems in monetary terms . . . . .</b>	<b>129</b>
6.1 Introduction . . . . .	129
6.2 Combined presentations for ecosystem accounting . . . . .	130
6.2.1 Introduction . . . . .	130
6.2.2 Information on environmental activities . . . . .	131
6.2.3 Linking ecosystem assets and ecosystem services to economic activity .	131
6.2.4 Treatment of payments for ecosystem services . . . . .	132
6.3 Accounting for ecosystem assets in monetary terms . . . . .	133
6.3.1 Introduction . . . . .	133
6.3.2 The structure of ecosystem asset accounts . . . . .	134
6.3.3 Measuring ecosystem degradation in monetary terms . . . . .	135
6.4 Integration of ecosystem accounts and economic accounts in monetary terms . .	137
6.4.1 Introduction . . . . .	137
6.4.2 Balance sheets and wealth accounting . . . . .	138
6.4.3 Sequence of accounts . . . . .	141
6.4.4 Adjusted income aggregates . . . . .	142
Annex A6	
Possible models for a sequence of accounts for ecosystem accounting . . . . .	143

**Annex**

Research agenda for SEEA Experimental Ecosystem Accounting . . . . .	147
--	-----

<b>Glossary</b> . . . . .	151
---------------------------	-----

<b>References</b> . . . . .	161
-----------------------------	-----

**Tables**

2.1 Provisional land-cover/ecosystem functional unit classes . . . . .	27
2.2 Physical flows of ecosystem services for an EAU . . . . .	32
2.3 Measures of ecosystem condition and extent for an EAU at end of accounting period . . . . .	33
2.4 Expected ecosystem service flows at end of accounting period . . . . .	34
3.1 Three levels of the Common International Classification of Ecosystem Services (CICES) . . . . .	50
3.2 Beneficiaries and the classification of ecosystem services . . . . .	53
3.3 Physical flows of ecosystem services for an EAU . . . . .	54
3.4 Generation and use of ecosystem services for an EAU . . . . .	55
3.5 List of selected ecosystem services as described in annex A3 . . . . .	58
3.6 Criteria for the prioritization of ecosystem services for accounting purposes . . .	60
4.1 Physical account for land cover . . . . .	80
4.2 Physical asset account for water resources . . . . .	81
4.3 Measures of ecosystem condition and extent at end of accounting period for an EAU . . . . .	82
4.4 Changes in ecosystem condition for an LCEU . . . . .	83
4.5 Expected ecosystem service flows at end of accounting period for an EAU . . . . .	84
4.6 Carbon stock account . . . . .	89
4.7 Biodiversity account: species abundance by Kingdom for an EAU . . . . .	95
A4.2.1 Accounts for threatened species . . . . .	103
6.1 Stylized ecosystem asset account entries . . . . .	134
A6.1 Simplified sequence of accounts for ecosystem accounting . . . . .	144

**Figures**

2.1 Basic model of ecosystem stocks and flows . . . . .	18
2.2 Stylized model of flows related to ecosystem services . . . . .	19
2.3 Broad model of flows in ecosystem accounting . . . . .	21
2.4 Stylized depiction of relationships between BSUs, LCEUs and EAUs . . . . .	29
3.1 Provisioning of fodder for livestock . . . . .	47
A3.1 Crop production . . . . .	62
A3.2 Provisioning of fodder for livestock . . . . .	63
A3.3 Provisioning of wood as a natural biological resource . . . . .	64
A3.4 Sequestering of carbon . . . . .	66
A3.5 Air filtration . . . . .	67
A3.6 Flood protection . . . . .	68
A3.7 Tourism and recreation services . . . . .	69
4.1 The main components of the carbon cycle . . . . .	88

4.2	Change in ecosystem extent, original species abundance and risk of extinction . . . . .	93
A4.2.1	Possible aggregation of a national nature index for mean species abundance . . . . .	101
5.1	Consumer and producer surplus . . . . .	109
