Foreword	3
Contents	5
1. Aim and history of the HICP	15
1.1 Introduction	16
1.2 Aim of the HICP	16
1.3 The history of the HICP	16
1.4 The harmonisation process	18
1.5 Procedures	20
2. HICP concepts	21
2.1 Introduction	22
2.2 General concepts	22
2.2.1 The measurement target	22
2.2.2 Comparability	23
2.3 Scope and coverage	23
2.3.1 Household final monetary consumption expenditure	23
2.3.2 The domestic concept	27
2.3.3 Product coverage	27
2.3.4 Product coverage: special cases	29
2.4 Index type (see Chapter 8)	29
2.5 Price concept (see Chapter 5)	30
2.6 Weights (see Chapter 3)	30
2.7 Sampling and representativity (see Chapter 4)	31
2.8 Frequency	31
2.9 Methodological changes and revisions (see Chapter 10)	31
3. Weights in the HICP	33
3.1 Introduction	34
3.2 Legal framework, definitions and terminology	34
3.2.1 Legal framework	34
3.2.2 Definitions and terminology	36
3.2.3 HICP weights: What the weights Regulation requires	36
3.3 The structure, data sources and reference period for HICP weights	37
3.3.1 Weighting structure: Two levels of weights	37
3.3.2 Weights by geographical breakdown	39
3.3.3 Weights for outlet types	39
3.3.4 Weights within the elementary aggregate	39

3.3.5	Data sources for the weights	40
3.3.6	Combining data sources for estimating weights	42
3.3.7	The weight reference period	42
3.4	Derivation of weights	42
3.4.1	Treatment of expenditure for categories that fall below the 0.1 % threshold	42
3.4.2	Second-hand goods: the case of vehicles (cars)	43
3.4.3	Newly significant goods and services	45
3.4.4	Calculating the change in the sampling weights within an elementary aggregate	46
3.5	Price-updating	47
3.6	The treatment of volatile expenditure groups, errors in weights and adjusting weights to reflect the scope of the HICP	48
3.6.1	Calculating the weight of highly volatile expenditure	48
3.6.2	Errors in weights	48
3.6.3	Example of calculation of a household budget survey weight adjustment to account for the expenditure coverage of the HICP	49
4.	Sampling	51
4.1	Introduction	52
4.2	Legal framework, definitions and terminology	52
4.2.1	Legal framework	52
4.2.2	Definitions and terminology	53
4.3	Sampling, resampling and replacements	55
4.3.1	Representativity and comparability	55
4.3.2	Resampling and replacements	55
4.3.3	Different sampling dimensions and their interrelations	56
4.4	Sampling stages	57
4.4.1	Sampling of products	57
4.4.2	Sampling of locations	60
4.4.3	Sampling of outlets	61
4.4.4	Sampling of product offers in outlets	63
4.4.5	Product and outlet sample; central price collections	63
4.4.6	Sampling of points in time	65
	Annex 4.1: Variance estimation and optimal allocation	65
	Annex 4.2: An example from Germany	68
5.	Price collection	69
5.1	Introduction	70
5.2	Basic legal requirements	71
5.3	Principles	72
5.3.1	Principle 1: The fixed basket	73
5.3.2	Principle 2: The definition of a price	75
5.3.3	Principle 3: Discounts (price reductions)	76

5.3.4	Principle 4: The timing of price collection and of entering purchase prices into the HICP	79
5.3.5	Principle 5: Frequency and period of price collection periods: volatile prices	79
5.4	Product descriptions and product specifications	80
5.5	Price collection methods	81
5.5.1	Local and central price collection	81
5.5.2	Internet price collection	82
5.6	Missing prices	84
5.7	Closing outlets: outlet substitution and closing-down sales	85
5.8	Practical price collection procedures	86
5.8.1	Local price collection	86
5.8.2	Central price collection	86
5.9	Detecting pricing errors	87
5.9.1	Checking and editing data in the field	87
5.9.2	Data checking and editing at head office	88
5.9.3	Rejection of price observations	88
	Annex 5: An overview of price collection	90
6.	Replacements and quality adjustments	91
6.1	Introduction	92
6.2	Legal requirements, definitions, concepts and supporting material	93
6.3	Principles	95
6.3.1	Principle 1: Replacements should maintain representativity	96
6.3.2	Principle 2: Replacements should be made timely	96
6.3.3	Principle 3: Replacements of product offers should be selected so that they represent changes in product characteristics that occur in the market	96
6.3.4	Principle 4: The consumer perspective is primary	98
6.3.5	Principle 5: Fashion variation, in the sense of variations in prevailing style, is not a quality change	99
6.3.6	Principle 6: Quality change from all relevant causes should be recognised	100
6.3.7	Principle 7: Conventions and specified recommendations apply for quality adjustment in specific product areas	100
6.4	Techniques in quality adjustment	101
6.4.1	General remarks	101
6.4.2	Criteria for quality adjustment methods	102
6.4.3	Quality control	102
6.4.4	Explicit and implicit quality adjustment methods	103
6.4.5	Metadata for users	104
6.5	Overview and definitions of quality adjustment methods	105
6.5.1	Definitions of methods	105
6.5.2	Applicability of methods	106
6.6	The form of quality adjustment in elementary aggregate indices	107

6.7	Explanations and examples for explicit quality adjustment methods	109
6.7.1	Direct price comparison	109
6.7.2	Package size adjustment	110
6.7.3	Option pricing	111
6.7.4	Supported judgmental quality adjustment	113
6.7.5	Hedonic regression for hedonic re-pricing	114
6.7.6	Hedonic regression methods in general	118
6.7.7	Combined methods of quality adjustment (a mainly explicit method)	119
6.8	Explanations and examples of implicit quality adjustment methods	120
6.8.1	Bridged overlap	120
6.8.2	Monthly chaining and replenishment	123
6.8.3	Backcasting (base price imputation)	124
6.8.4	Link-to-show-no-price-change (a C method)	124
7.	The treatment of special cases	127
7.1	Seasonal products	128
7.1.2	Legal framework, definitions and terminology	129
7.1.3	The definition of in-season and out-of-season periods	131
7.1.4	Scope of seasonal products	132
7.1.5	Compilation techniques for seasonal products	132
7.1.5.1	General approaches to computing price indices for seasonal products	132
7.1.5.2	Strict annual weights index method: basic approach	133
7.1.5.3	Strict annual weights index method: counter-seasonal and all-seasonal estimation	134
7.1.5.4	Class-confined seasonal weights index: methods for estimating weights	135
7.1.5.5	Example of method for determining monthly weights in a class-confined seasonal weights index	136
7.1.5.6	Price-updating of weights	137
7.1.6	Data sources used for estimation in a class-confined seasonal weights index	138
7.1.7	The interpretation of monthly and annual inflation rates	138
7.2	Cross-border internet purchases	139
7.2.1	Introduction	139
7.2.2	HICP Recommendation on the treatment of cross-border internet purchases	140
7.2.3	Definitions and terminology	140
7.2.4	Explanatory text	141
7.2.4.1	Country of purchase of goods (Recommendation 1)	142
7.2.4.2	Services of a tangible nature booked online (Recommendation 2)	142
7.2.4.3	Digital services (Recommendation 3)	143
7.2.4.4	Extra costs (Recommendation 4)	144
7.2.4.5	Other distance purchases (Recommendation 5)	145
7.2.5	Weights and sampling	145
7.3	Service charges proportional to transaction values	146
7.3.1	Introduction	146
7.3.2	Legal framework	147
7.3.3	Definitions	147

7.3.4	Methodological guidance	147
Annex 7.3: Modelling charges proportional to transaction values		150
7.4	Tariffs	151
7.4.1	Introduction	151
7.4.2	Legal framework	152
7.4.3	Definitions	153
7.4.4	Methods of treating tariff prices in the HICP	153
7.4.4.1	General procedure	153
7.4.4.2	Types of tariff	154
7.4.4.3	Price measurement methods	155
7.4.4.4	Classification issues	158
7.4.4.5	Data sources for weights	158
7.4.4.6	Quality adjustment	158
7.4.4.7	New service providers and new products	159
7.4.4.8	Examples of changes in the specification of tariffs	159
7.5	Zero prices	160
7.5.1	Introduction	160
7.5.2	Legal framework	161
7.5.3	Typology of cases	161
7.5.4	Methods for treating products previously provided free	162
7.5.5	Prices falling to zero	163
7.6	Bundles	164
7.6.1	Introduction	164
7.6.2	Legal framework and HICP Recommendations	164
7.6.3	Definitions	165
7.6.4	Examples of pure and mixed bundles	165
7.6.5	Methods for treating bundles in the HICP	166
7.6.6	Changes in bundle composition	167
8.	Index calculation	169
8.1	Introduction	170
8.2	Higher-level indices	170
8.2.1	Legal obligations	170
8.2.2	The HICP concept	171
8.2.3	Deriving the weights	172
8.2.4	Consistency in aggregation	173
8.2.5	Higher-level compilation	173
8.3	Indices for elementary aggregates	173
8.3.1	Legal obligations	173
8.3.2	Index theory and practice	174
8.3.3	Compilation issues	176
8.4	Annual chain-linking	177

8.4.1	December as the linking month	177
8.4.2	Loss of consistency in aggregation	178
8.4.3	Aggregation of chain-linked sub-indices	178
8.4.4	Re-referencing	179
8.5	Rates of change	180
8.5.1	Monthly rate	180
8.5.2	Annual rate	180
8.5.3	Contributions to the annual rate	182
8.5.4	Annual average rate	183
	Annex 8: Numerical example	184
9.	HICP-constant tax rates and HICP-administered prices	187
9.1	Introduction	188
9.2	HICP at constant tax rates	188
9.2.1	Legal obligations, definitions and concepts	188
9.2.2	Idea, use and interpretation	189
9.2.3	Taxes in scope	192
9.2.4	Calculation and index formulas	193
9.2.5	Examples of different types of tax	196
9.2.6	Geographical coverage, special aggregates	200
9.3	HICP-administered prices	200
9.3.1	Legal obligations, definitions and concepts	200
9.3.2	Definitions — fully and mainly administered prices	201
9.3.3	Supplementary explanations and conventions ()	202
9.3.4	Geographical coverage, special aggregates	203
9.3.5	Index calculation	203
10.	Revisions and handling of methodological changes	205
10.1	Introduction	206
10.2	Legal provisions	206
10.3	Definitions	207
10.4	Treatment of revisions	207
10.4.1	Reasons for revisions	207
10.4.2	Revisions for which Eurostat's approval is not required	208
10.4.3	Revisions for which Eurostat's approval is required	209
10.4.4	Weights revisions	210
10.5	Practical issues	211
10.5.1	How to make revisions	211
10.5.2	Impact calculations in the event of methodological changes (Articles 6 and 7)	211
10.5.3	Timing of revisions (Articles 2, 4, 5 and 9)	212
10.5.4	Measures to be taken to avoid further mistakes	212
10.5.5	Procedure for publishing a revision	213

11. Data requirements and processes at Eurostat	215
11.1 Introduction	216
11.2 Legal obligations	216
11.3 Input data for the HICP	217
11.3.1 Transmission of indices	219
11.3.2 Transmission of ECOICOP category weights	219
11.3.3 Country weights	219
11.3.4 Administered prices (HICP-AP)	220
11.3.5 Transmission deadlines and publication calendar	220
11.3.6 Data validation	221
11.4 Index calculation at Eurostat	221
11.4.1 European aggregates	223
11.4.2 Special aggregates	223
11.4.3 HICP flash estimate	224
11.4.4 ECOICOP category weights	225
11.4.5 Calculation of country weights	225
11.4.6 Derived statistics	226
11.5 Publication of HICP data and metadata	227
11.5.1 Dissemination database	227
11.5.2 HICP news releases	229
11.5.3 HICP metadata and other documents	229
Annex 11.1: Special aggregates definitions	230
Annex 11.2: Compositions of European aggregates	232
Annex 11.3: Country codes	233
12. The treatment of selected product groups	235
12.1 Health, education and social protection services	236
12.1.1 Introduction	236
12.1.2 Legal requirements of the HICP	237
12.1.3 Definitions and concepts	238
12.1.4 Classification and coverage	239
12.1.4.1 Classification	239
12.1.4.2 Coverage	241
12.1.5 Prices	242
12.1.5.1 Purchaser prices	242
12.1.5.2 Changes in rules, income-dependent prices and index-linked prices	243
12.1.5.3 Quality change	247
12.1.5.4 Zero to positive prices and tariffs	248
Annex 12.1.1: The case of healthcare reforms in the Netherlands	248
Annex 12.1.2: The effect of reimbursements relating to social protection on purchaser prices in the HICP — an example, Germany	250

12.2	Insurance services	251
12.2.1	Introduction	251
12.2.2	Legal requirements and definitions	251
12.2.3	Classification of insurance services	253
12.2.4	Insurance weights	254
12.2.5	Insurance prices	256
12.2.5.1	Gross premiums	256
12.2.5.2	Sampling of insurance policies	257
12.2.5.3	Quality adjustment of insurance prices	257
12.2.5.4	Bundled insurance products	259
12.2.6	Data sources for weights	260
12.3	Purchase of motor vehicles	260
12.3.1	Introduction	260
12.3.2	Legal requirements for the HICP	261
12.3.3	Definitions and concepts	261
12.3.4	Recommendations	262
12.3.5	Explanatory text, new cars	263
12.3.5.1	Stratification (Recommendation 1)	263
12.3.5.2	Target sample (Recommendation 2)	264
12.3.5.3	Price collection (Recommendation 3)	265
12.3.5.4	Product replacement (Recommendation 4)	265
12.3.5.5	Quality adjustment (Recommendation 5)	266
12.3.5.6	Annual resampling (Recommendation 6)	268
12.3.5.7	Leasing (Recommendation 7)	269
12.3.6	Explanatory text, second-hand cars	269
12.3.6.1	Stratification (Recommendation 1)	270
12.3.6.2	Target sample (Recommendation 2)	271
12.3.6.3	Price collection (Recommendation 3)	271
12.3.6.4	Product replacement (Recommendation 4)	272
12.3.6.5	Quality adjustment (Recommendation 5)	272
12.3.6.6	Annual resampling (Recommendation 6)	275
12.4	Actual rentals	275
12.4.1	Introduction	275
12.4.2	Recommendations	275
12.4.3	Definitions and concepts	276
12.4.4	Legal requirements for the HICP	277
12.4.5	Explanatory text	278
12.4.5.1	Stratification (Recommendation 1)	278
12.4.5.2	Consumption segments (Recommendation 2)	279
12.4.5.3	Sampling (Recommendation 3)	279
12.4.5.4	Replacements (Recommendation 4)	282
12.4.5.5	Quality adjustment (Recommendation 5)	282
12.4.5.6	Secondary residences (Recommendation 6)	284

12.5	Flights and package holidays	284
12.5.1	Introduction	284
12.5.2	Recommendations	285
12.5.3	Definitions	286
12.5.4	Explanatory text	286
12.5.4.1	Coverage (Recommendation 1)	286
12.5.4.2	Price collection (Recommendation 2)	288
12.5.4.3	Definition of prices (Recommendation 3)	293
12.5.5	Practical implementation	294
12.5.5.1	Data sources	294
12.5.5.2	Sampling	295
12.5.5.3	Quality adjustment	296
12.5.5.4	Seasonal availability of flights and package holidays	296
12.6	Telecommunication services	298
12.6.1	Introduction	298
12.6.2	Recommendations	298
12.6.3	Telecommunication services and the HICP legal framework	300
12.6.4	Definitions	300
12.6.5	Index compilation methods (Recommendation 5)	301
12.6.6	Explanatory text	307
12.6.6.1	Coverage (Recommendation 1)	307
12.6.6.2	Weights and data sources (Recommendation 2)	307
12.6.6.3	Sampling (Recommendation 3)	309
12.6.6.4	Replacing tariffs and resampling (Recommendation 4)	309
12.6.6.5	The treatment of bundles and classification issues (Recommendation 6)	311
12.6.6.6	The treatment of discounts (Recommendation 7)	312
12.6.6.7	Quality changes (Recommendation 8)	313
	Annex 12.6: Mobile telecommunications: the use of migration rates, an illustrative example	314
12.7	Clothing and footwear	317
12.7.1	Introduction	317
12.7.2	Legal requirements	317
12.7.3	Definitions	317
12.7.4	HICP standards for clothing and footwear	318
12.7.4.1	Article 1, Aim	318
12.7.4.2	Article 2, Definitions and Article 3 Classification [of quality adjustment] methods	318
12.7.4.3	Article 4, HICP standards for clothing and footwear	318
12.7.5	Seasonality in clothing and footwear	323
12.8	Financial services	324
12.8.1	Introduction	324
12.8.2	Legal requirements for the HICP	325
12.8.3	Principles	326
12.8.3.1	Principle 1: Country of recording of credit and debit card fees, etc.	326
12.8.3.2	Principle 2: Annual resampling	327

12.8.3.3 Principle 3: Weights	327
12.8.3.4 Principle 4: Exclusion of Financial Intermediation Services Indirectly Measured (FISIM) and interest and interest-like charges	327
12.8.4 Coverage of financial services	328
12.8.5 Prices of financial services — flat fees	328
12.8.6 Prices of financial services — charges proportional to the transaction value	329
12.8.7 Sampling	332
12.8.8 Data sources for weights	334
12.9 Electronic goods	336
12.9.1 Introduction	336
12.9.2 Legal requirements	336
12.9.3 Sampling	336
12.9.4 Newly significant goods	338
12.9.5 Recommended quality adjustment methods	339
12.9.5.1 The inter-relationship with replacement sampling	339
12.9.5.2 Quality adjustment methods — overview	339
12.9.5.3 Hedonic regression	340
12.9.5.4 Bridged overlap	342
12.9.5.5 Evaluation of quality adjustment methods	342
Annex 12.9: ECOICOP categories consisting of goods of a predominantly electronic character	343
Annex I: European classification of individual consumption according to purpose – ECOICOP	344
