Foreword	3
Acknowledgements	5
Abbreviations and acronyms	17
Executive summary	19
What is the <i>Oslo Manual</i> ?.....	19
Why a manual for measuring innovation?	19
What is innovation?	20
Why and how was the manual revised?.....	21
What are the main novelties of this edition?.....	21
How are the guidelines intended to be used?.....	23
Where to find additional relevant resources?.....	23
Part I. Introduction to the measurement of innovation	25
Chapter 1. Introduction to innovation statistics and the <i>Oslo Manual</i>	27
1.1. Objectives and background of the <i>Oslo Manual</i>	28
1.1.1. The origins of the Oslo Manual.....	28
1.1.2. Main objectives of the fourth edition	29
1.1.3. Scope and approach of the fourth edition.....	30
1.1.4. The Oslo Manual and other statistical standards	31
1.2. Structure and contents of the <i>Oslo Manual 2018</i>	32
1.2.1. Introduction to the measurement of innovation (Part I)	32
1.2.2. Framework and guidelines for measuring business innovation (Part II).....	32
1.2.3. Methods for collecting, analysing and reporting statistics on business innovation (Part III).....	36
1.2.4. Cross-cutting issues covered within this manual.....	37
1.2.5. Digitalisation and innovation	37
1.2.6. Globalisation and innovation.....	39
1.3. Implementing the guidance in this manual	39
1.3.1. Nature of the guidance in this manual.....	39
1.3.2. Transition and implementation.....	40
References.....	41
Chapter 2. Concepts for measuring innovation	43
2.1. Introduction.....	44
2.2. The concept of innovation	45
2.2.1. Conceptual foundations.....	45
2.2.2. Knowledge	46
2.2.3. Novelty with respect to potential uses.....	46

2.2.4. Implementation and actual use	47
2.2.5. Value creation	47
2.3. User needs and relevance of statistical evidence on innovation	48
2.3.1. Research academics.....	48
2.3.2. Business managers	49
2.3.3. Innovation and other public policy makers	49
2.4. Elements of an innovation measurement framework.....	50
2.4.1. Scope of innovation measurement: SNA sectors and jurisdictions.....	50
2.4.2. Innovation phenomena for measurement	53
2.5. General strategies for measuring innovation	56
2.5.1. Subject- versus object-based approaches	56
2.5.2. Qualitative and quantitative data.....	57
2.5.3. Sources of innovation data	57
2.5.4. Responsibility for primary source data collection.....	58
2.5.5. Summary of the measurement approach in this manual.....	59
2.6. Measuring innovation beyond the Business sector.....	60
2.6.1. Innovation in the General government sector	60
2.6.2. Innovation and non-profit institutions.....	61
2.6.3. Innovation, households and individuals	61
References.....	62
Part II. Framework and guidelines for measuring business innovation	65
Chapter 3. Concepts and definitions for measuring business innovation	67
3.1. Introduction.....	68
3.2. Innovation in the Business enterprise sector.....	68
3.2.1. Definition of innovation activities and innovation.....	68
3.2.2. Division of innovation effort and responsibilities	70
3.3. Taxonomies of innovation	70
3.3.1. Innovation types by object: Product and business process innovations	70
3.3.2. Types of innovation according to novelty and impacts	77
3.4. Changes that are not innovations	78
3.5. Innovation and business profiling.....	80
3.5.1. Innovative and innovation-active firms.....	80
3.6. Use of innovation definitions in data collection	81
3.6.1. Use of the term “innovation” in surveys	81
3.6.2. Innovation profiles	82
3.6.3. Priorities for data collection about innovations.....	82
References.....	83
Chapter 4. Measuring business innovation activities	85
4.1. Introduction and main features of innovation activities.....	86
4.2. Types of activities of relevance to innovation	87
4.2.1. Research and experimental development activities.....	87
4.2.2. Engineering, design and other creative work activities.....	87
4.2.3. Marketing and brand equity activities.....	88
4.2.4. Intellectual property related activities	89
4.2.5. Employee training activities.....	89
4.2.6. Software development and database activities	89
4.2.7. Activities related to the acquisition or lease of tangible assets	90
4.2.8. Innovation management	91

4.3. Collecting qualitative data on the incidence of innovation activities	91
4.3.1. Internal and externally sourced activities	91
4.3.2. Qualitative data on specific activities related to innovation	92
4.4. Collecting expenditure data on innovation activities	93
4.4.1. Conceptual issues in measuring innovation expenditures	93
4.4.2. Expenditures for specific innovation activities	94
4.4.3. Expenditures by accounting categories for innovation-active firms	97
4.4.4. Sources of funds for innovation activities	98
4.5. Other data on innovation activities	99
4.5.1. Collecting data on human resources for innovation activities	99
4.5.2. Data on innovation projects	99
4.5.3. Follow-on activities	100
4.5.4. Planned innovation activities and expenditures	100
4.6. Summary of recommendations	101
References	102
Chapter 5. Measuring business capabilities for innovation	103
5.1. Introduction	104
5.2. General resources of the firm	104
5.2.1. Firm size	105
5.2.2. Business assets	105
5.2.3. Age	105
5.2.4. Financing and ownership	106
5.3. Management capabilities	106
5.3.1. Business strategy	106
5.3.2. Organisational and managerial capabilities	108
5.3.3. Characteristics of the business owner and top management	109
5.3.4. Innovation management capabilities	110
5.3.5. Intellectual property management and appropriation	113
5.4. Workforce skills and human resource management	115
5.4.1. Workforce qualifications, occupational structure and competences	115
5.4.2. Human resource management	117
5.5. Technological capabilities	117
5.5.1. Technical expertise	118
5.5.2. Design capabilities	119
5.5.3. Capabilities related to digital technologies and data analytics	121
5.6. Summary of recommendations	123
References	124
Chapter 6. Business innovation and knowledge flows	127
6.1. Introduction	128
6.2. Knowledge flows and innovation: Key concepts and definitions	129
6.2.1. Diffusion of innovation	129
6.2.2. Knowledge flows	129
6.2.3. Open innovation	132
6.3. Collecting data on knowledge flows and their relationship to innovation	134
6.3.1. General issues	134
6.3.2. Data on knowledge flows from innovation activities	135
6.3.3. Sources of ideas or information for innovation	139
6.3.4. Interactions with higher education and public research institutions	140

6.3.5. IP rights and knowledge flows	141
6.3.6. Barriers and undesirable consequences of knowledge flows	141
6.4. Summary of recommendations	142
References.....	143
Chapter 7. Measuring external factors influencing innovation in firms	145
7.1. Introduction.....	146
7.2. Main elements of the external environment for business innovation	146
7.3. Location of business activities	148
7.4. Markets and the environment for business innovation	149
7.4.1. Markets for the firm's products.....	149
7.4.2. Competition and collaboration in markets	151
7.4.3. The market for inputs	153
7.4.4. Intermediaries and digital platforms.....	155
7.5. The public policy environment for business innovation.....	156
7.5.1. Regulations.....	156
7.5.2. Government support programmes	156
7.5.3. Innovation and public infrastructure	158
7.5.4. Macroeconomic policy environment.....	159
7.6. The social and natural environment for innovation	159
7.6.1. The social context for innovation.....	159
7.6.2. The natural environment	159
7.7. External factors as drivers and obstacles to business innovation.....	160
7.7.1. External factors as drivers of innovation.....	160
7.7.2. External factors as barriers or obstacles to innovation.....	160
7.8. Summary of recommendations	161
References.....	162
Chapter 8. Objectives and outcomes of business innovation.....	163
8.1. Introduction.....	164
8.2. Qualitative measures of business innovation objectives and outcomes	164
8.2.1. Types of innovation objectives and outcomes.....	164
8.2.2. Innovation objectives and outcomes in relation to business strategies	166
8.3. Quantitative measures of innovation outcomes	168
8.3.1. Quantitative measures for product innovation	168
8.3.2. Quantitative outcome data for business process innovations	170
8.4. Issues for measurement.....	172
8.5. Summary of recommendations	172
References.....	173
Part III. Methods for collecting, analysing and reporting statistics on business innovation.....	175
Chapter 9. Methods for collecting data on business innovation.....	177
9.1. Introduction.....	178
9.2. Population and other basic characteristics for a survey	179
9.2.1. Target population	179
9.2.2. Statistical units and reporting units	180
9.2.3. Data linkage.....	184
9.2.4. Frequency of data collection	185
9.2.5. Observation and reference periods	185
9.3. Question and questionnaire design	186

9.3.1. Question design	187
9.3.2. Questionnaire design	188
9.3.3. Short-form questionnaires	189
9.3.4. Combining innovation and other business surveys	189
9.3.5. Questionnaire testing	191
9.4. Sampling	191
9.4.1. The survey frame	191
9.4.2. Census versus sample	192
9.4.3. Longitudinal panel data and cross-sectional surveys	194
9.5. Data collection methods	194
9.5.1. Postal surveys	194
9.5.2. Online surveys	195
9.5.3. Telephone and face-to-face interviews	196
9.5.4. Combined survey methods	196
9.6. Survey protocol	196
9.6.1. Respondent identification	197
9.6.2. Support for respondents	197
9.6.3. Mandatory and voluntary surveys	197
9.6.4. Non-response	197
9.6.5. Conducting non-response surveys	198
9.7. Post-survey data processing	199
9.7.1. Error checks	199
9.7.2. Imputation of missing data	200
9.7.3. Calculating weights	201
9.8. Publication and dissemination of results	201
9.8.1. Metadata and quality reports	202
9.8.2. Data access	202
References	202
Chapter 10. The object method for innovation measurement.....	205
10.1. Introduction	206
10.2. Including an “object module” in an innovation survey	206
10.2.1. Identifying a focal innovation within surveys	207
10.2.2. Non-innovative firms	208
10.3. Questions on a focal innovation	209
10.3.1. Characteristics of the focal, most important innovation	209
10.3.2. Innovation activities contributing to the focal innovation	209
10.3.3. Business capabilities contributing to the focal innovation	210
10.3.4. Knowledge flows contributing to and generated by the focal innovation	210
10.3.5. External factors influencing the focal innovation	210
10.3.6. Objectives and outcomes of the focal innovation	211
10.4. Summary of recommendations	211
References	212
Chapter 11. Use of innovation data for statistical indicators and analysis	213
11.1. Introduction	214
11.2. Data and indicators on business innovation	214
11.2.1. What are innovation indicators and what are they for?	214
11.2.2. Desirable properties of innovation indicators	215
11.2.3. Recommendations and resources for innovation indicators	216

11.3. Methodologies for constructing business innovation indicators.....	217
11.3.1. Aggregation of statistical indicators.....	217
11.3.2. Indicator development and presentation for international comparisons.....	219
11.3.3. Firm-level innovation rankings	221
11.4. A blueprint for indicators on business innovation	222
11.4.1. Choice of innovation indicators	222
11.4.2. Breakdown categories, scaling, and typologies.....	227
11.4.3. Choice of statistical data for innovation indicators	228
11.5. Using data on innovation to analyse innovation performance, policies and their impacts	229
11.5.1. Modelling dependencies and associations.....	230
11.5.2. Inference of causal effects in innovation analysis.....	230
11.5.3. Analysing the impact of public innovation policies	233
11.5.4. Co-ordinated analysis of innovation microdata across countries	236
11.6. Conclusions.....	237
References.....	237
Glossary of terms.....	241
