Abstract	3
1 Introduction	5
2 General quality issues	7
2.1 Online Job Advertisements, Vacancies and Capacity Utilization	7
2.2 Using online job advertisements for economic research	10
3 Methods	14
3.1 Basic settings	14
3.2 Unit-level methods	15
3.2.1 Modelling misclassification	15
3.2.2 Non-ignorable selection.....	16
3.2.3 Single source capture-recapture	17
3.2.4 Multiple source capture-recapture	19
3.3 Domain-level methods	22
3.3.1 Measurement error models.....	22
3.3.2 Modelling of under-reporting	23
3.4 Summary	26
4 Comparing OJA data with job vacancy statistics	27
4.1 Aligning job advertisements data to Job Vacancies Statistics	27
4.2 Relation between online job offers and job vacancies	32
4.2.1 Descriptive statistics.....	32
4.2.2 Cross-sectional regressions	37
4.2.3 Panel data regressions.....	39
5 Results	45
5.1 Methods and their assumptions	45
5.2 Naïve trimming	47
5.3 Zero-one truncated capture-recapture results	49
5.3.1 Estimation procedure.....	49
5.3.2 Application.....	50
5.3.3 Countries with under 200k advertisements.....	51
5.3.4 Countries over 200k advertisements	53
5.4 Conclusions	55
6 Findings and recommendations	56
6.1 Main findings	56
6.1.1 Correlation between OJA and JVS	56
6.1.2 Population size estimation	56
6.2 Main limitations	57
6.3 Recommendations	58
6.3.1 For the OJA dataset	58
6.3.2 Data sources.....	58
6.3.3 Audit sample	58
6.3.4 Additional scraping.....	59
6.4 Conclusion	60
7 References	61
