| Abstract | 3 |
| 1. Introduction | 7 |
| 1.1. Presentation of the report | 7 |
| 2. Background, motivation and objectives of the EG DNA | 9 |
| 2.1. Background | 9 |
| 2.2. Objectives | 11 |
| 2.3. Parallel international initiatives to reconcile macro and micro data for the household sector | 11 |
| 3. Methodology | 13 |
| 3.1. Introduction | 13 |
| 3.2. Data availability | 14 |
| 3.3. Adjustments to national accounts totals | 19 |
| 3.4. Conceptual links and comparison of micro-macro income and consumption items | 21 |
| 3.5. Gap allocation methods | 25 |
| 3.6. Sensitivity analysis | 28 |
| 3.7. Limitations | 29 |
| 3.8. Publication of manual for producing distributional results | 30 |
| 4. Experimental distributional results | 31 |
| 4.1. Experimental statistics | 31 |
| 4.2. Examples of analysis of distributional data | 32 |
| 4.2.1. Inequality in the distribution of disposable income | 32 |
| 4.2.2. Inequality in the distribution of primary and disposable income | 33 |
| 4.2.3. Inequality in consumption expenditure | 35 |
| 5. Quality assessment | 38 |
| 5.1. Relevance | 38 |
| 5.2. Accuracy | 39 |
| 5.3. Timeliness and punctuality | 39 |
| 5.4. Accessibility and clarity | 40 |
| 5.4. Comparability and coherence | 40 |
| 6. Conclusions and way forward | 41 |
| 6.1. Methodological challenges | 41 |
| 6.2. Lessons from the EG DNA national and centralised exercises | 42 |
