CONTENTS

Key note lectures

Towards long term population decline: Views at a critical juncture of world population history 15
David S. Reher – Universidad Complutense de Madrid

Long-term population projections in Europe: How they influence policies and accelerate reforms 25
Henri Bogaert – FPB – Economic analyses and forecast - Belgium

Session 1: Fertility

Projections of age-specific fertility rates through an agent-based model of social interaction 49
Belinda Aparicio Diaz, Thomas Fent, Alexia Prskawetz – Vienna Institute of Demography, Austrian Academy of Sciences
Laura Bernardi – Max Planck Institute for Demography, Rostock

Trends in Partnership Behaviours in Japan from the Cohort Perspective..... 65
Miho Iwasawa, Ryuichi Kaneko – Joint Eurostat/UNECE Work Session on Demographic Projections
Organized in cooperation with the National Institute of Statistics of Romania (INSSE)

Age profiles estimation for family and fertility events based on micro data: the MAPLE (Method for Age Profile Longitudinal Estimation) 77
Roberto Impicciatore – University of Milan & "Carlo F. Dondena" Centre for Research on Social Dynamics
Francesco C. Billari - Bocconi University & "Carlo F. Dondena" Centre for Research on Social Dynamics

Session 2: Mortality

An approach to improve the consistency of mortality projections obtained by the Lee-Carter method 101
Dalkhat Ediev – Vienna Institute of Demography of Austrian Academy of Sciences

Mortality and Longevity Projections for the Oldest-Old in Portugal 117
Edviges Coelho, Maria Graça Magalhães – Statistics Portugal – Department of Demographic and Social Statistics
Jorge Miguel Bravo – University of Évora - Department of Economics and CEFAGE-UE / CIEF

Mortality rates in population projections: a stochastic approach to inference..... 133
Gustaf Strandell, Therese Karlsson – Statistics Sweden

Life expectancy adjustments in the Norwegian pension reform..... 147
Helge Brunborg, Dennis Fredriksen, Nils Martin Stølen, Inger Texmon – Statistics Norway

Session 3: Population projections

A New Technique for Stochastic Population Projections 161
Salvatore Bertino, – Dipartimento di Statistica, Probabilità e Statistiche Applicate
"Sapienza" Università di Roma
Eugenio Sonnino – Dipartimento di Scienze Demografiche
"Sapienza" Università di Roma

Population Prospects of the Lowest Fertility with the Longest Life: The New Official Population Projections for Japan and their Life Course Approaches 177
Ryuichi Kaneko – National Institute of Population and Social Security Research

Replicating the official population projection for Sweden using a time series approach..... 195
Gustaf Strandell – Statistics Sweden

Population forecast and the impact on the long term growth potential 205
Dr. Ion Ghizdeanu – National Commission for Economic Forecasting

A tool for projecting age patterns based on a standard age schedule and assumptions on relative risks using linear splines: TOPALS 211
Joop de Beer, Nicole van der Gaag, Frans Willekens – Netherlands Interdisciplinary Demographic Institute, The Hague, The Netherlands

Population Forecasting via Microsimulation: The Software Design of the MicMac-Project 237
Jutta Gampe, Sabine Zinn – Max Planck Institute for Demographic Research Rostock, Germany
Frans Willekens, Nicole van den Gaag – Netherlands Interdisciplinary Demographic Institute, The Hague, The Netherlands

Session 4: Household projections

On future household structure 245
Juha Alho, Nico Keilman

Towards a dynamic household projection model for the Netherlands 271
Coen van Duin – Paper for Joint Eurostat/UNECE Work Session on Demographic Projections: 10 – 12 October 2007, Bucharest, Romania

Probabilistic household projections based on an extension of headship rates method with application to the case of Russia 285
Sergei Scherbov, Dalkhat Ediev – Vienna Institute of Demography of Austrian Academy of Sciences

Session 5: Specific Projection Issues

Bayesian Model Selection in Forecasting International Migration: Simple Time Series Models and Their Extensions 309
Jakub Bijak – Central European Forum for Migration and Population Research

Conception of spatial Units Appropriate for Regional Population Forecasts 319
Branislav Bleha

Labour Force Projection at Territorial Level in Romania 327
Marcela Postelnicu – National Institute for Statistics of Romania

Projecting ethno-cultural diversity of the Canadian population using a microsimulation approach 339
Alain Bélanger – Institut national de la recherche scientifique, Université du Québec (Montréal, Canada)
Éric Caron Malenfant, Laurent Martel, René Gélinas – Statistics Canada (Ottawa, Canada)

New Times, Old Beliefs: Investigating the Future of Religions in Austria and Switzerland 355
Anne Goujon – Vienna Institute of Demography, Austrian Academy of Sciences, Vienna, Austria and International Institute for Applied Systems Analysis, Laxenburg, Austria
Vegard Skirbekk – International Institute for Applied Systems Analysis, Laxenburg, Austria
Katrin Fliegenschnee – Vienna Institute of Demography, Austrian Academy of Sciences, Wohllebengasse
