

## TABLE OF CONTENTS

### SESSION 3: CHALLENGES AND USE OF POPULATION PROJECTIONS

INE-Spain strategy on population estimates and projections: facing the challenge of the statistical measure of population.....	15
<i>Miguel Ángel Martínez Vidal, Sixto Muriel de la Riva – National Statistics Institute of Spain</i>	
Making use of long-term demographic projections in multilateral policy coordination in the European Union.....	33
<i>Giuseppe Carone, Per Eckefeldt – European Commission, Directorate General for Economic and Financial Affairs of the European Commission (DG ECFIN)</i>	
Essay on ageing and health projections in Portugal.....	51
<i>Filipa Castro Henriques, Teresa Ferreira Rodrigues – Universidade Nova de Lisboa, Portugal</i>	
Current status and future challenges of the national population projection in South Korea concerning super-low fertility patterns: a case study through international comparison.....	69
<i>Kwang-Hee Jun – Chungnam National University, Republic of Korea</i>	
<i>Seulki Choi – Seoul National University, Republic of Korea</i>	

### SESSION 4: CONSTRUCTING ASSUMPTIONS FOR MORTALITY: DATA, METHODS AND ANALYSIS

Cohort and period mortality in Sweden in a very long perspective and projection strategies.....	87
<i>Hans Lundström – Statistics Sweden</i>	
Towards advanced methods for computing life tables.....	95
<i>Sixto Muriel de la Riva, Margarita Cantalapiedra Malaguilla, Federico López Carrión National Statistics Institute of Spain</i>	
Estimating life expectancy in small population areas .....	113
<i>Jorge Miguel Bravo – Universidade de Évora, Portugal</i>	
<i>Joana Malta – Statistics Portugal</i>	

### SESSION 5: CONSTRUCTING ASSUMPTIONS FOR FERTILITY: DATA, METHODS AND ANALYSIS

Trend reversal in childlessness in Sweden.....	129
<i>Lotta Persson – Statistics Sweden</i>	
Is fertility converging across the Member States of the European Union?.....	137
<i>Giampaolo Lanzieri – European Commission, Eurostat</i>	

Explanations for regional fertility reversal after 2005 in Japan: demographic, socio-economic and cultural factors.....	155
---	-----

*Miho Iwasawa, Ryuichi Kaneko*

*National Institute of Population and Social Security Research, Tokyo, Japan*

## **SESSION 6: FORECASTING DEMOGRAPHIC COMPONENTS: FERTILITY**

A probabilistic version of the United Nations World Population Prospects: methodological improvements by using Bayesian fertility and mortality projections.....	171
--	-----

*Gerhard K. Heilig, Thomas Buettner, Nan Li, Patrick Gerland, Francois Pelletier*

*United Nations Population Division*

*Leontine Alkema - National University of Singapore*

*Jennifer Chunn, Hana Ševčíková, Adrian Raftery - University of Washington, USA*

Applying a fertility projection system to period effect analysis: an examination of the recent fertility upturn in Japan.....	185
---	-----

*Ryuichi Kaneko – National Institute of Population and Social Security Research, Tokyo, Japan*

Forecasting the number of births in Portugal .....	203
--	-----

*António Caleiro – Universidade de Évora, Portugal*

## **SESSION 7: FORECASTING DEMOGRAPHIC COMPONENTS: MORTALITY**

Application of age-transformation approaches to mortality projection for Japan .....	217
--	-----

*Futoshi Ishii – National Institute of Population and Social Security Research, Tokyo, Japan*

Lee-Carter mortality projection with "Limit Life Table" .....	231
---	-----

*Jorge Miguel Bravo – University of Évora, Portugal*

Mortality projections in Portugal .....	241
---	-----

*Edviges Coelho, Maria da Graça Magalhães – Statistics Portugal*

*Jorge Miguel Bravo – University of Évora, Portugal*

## **SESSION 8: CONSTRUCTING ASSUMPTIONS FOR MIGRATIONS: DATA, METHODS AND ANALYSIS**

International migration data as input for population projections.....	255
---	-----

*Anne Herm, Michel Poulain – Estonian Interuniversity Population Research Centre and Université Catholique de Louvain, Belgium*

Prospective immigration to Israel through 2030: methodological issues and challenges.....	269
---	-----

*Sofia Phren, Nitzan Peri – Central Bureau of Statistics, Israel*

## **SESSION 9: FORECASTING DEMOGRAPHIC COMPONENTS: MIGRATION**

Dealing with uncertainty in international migration predictions: from probabilistic forecasting to decision analysis.....	281
---	-----

*Jakub Bijak – University of Southampton, United Kingdom*

Model to forecast the re-immigration of Swedish-born persons.....	289
<i>Christian Skarman, Stina Andersson, Anders Ljungberg – Statistics Sweden</i>	
The role of social networks in the projection of international migration flows: an Agent-Based approach.....	305
<i>Carla Anjos – University of Aveiro, Portugal</i>	
<i>Pedro Campos - Statistics Portugal and University of Porto, Portugal</i>	
Forecasting migration flows to and from Norway using an econometric model.....	321
<i>Helge Brunborg, Ådne Cappelen - Statistics Norway</i>	

## **SESSIONS 10: SMALL POPULATION AND SUB-NATIONAL POPULATION PROJECTIONS**

How to deal with sub-national forecasts in spatially very heterogeneous countries? Towards using some spatial theories and models.....	347
<i>Branislav Bleha – Comenius University, Bratislava, Slovakia</i>	
<i>Boris Vaňo – Demographic Research Centre, Institute of Informatics and Statistics, Slovakia</i>	
The problematic of population projections in small island states: the case of Cape Verde.....	359
<i>Pedro Moreno de Brito – Universidade Nova de Lisboa, Portugal</i>	
<i>Teresa Rodrigues – Institute of Statistics and Information Management Systems, Portugal</i>	
Using national data to obtain small area estimators for population projections on sub-national level .....	377
<i>Michael Franzén, Therese Karlsson - Statistics Sweden</i>	
Austrian Regional Population Projections below NUTS-3.....	389
<i>Alexander Hanika – Statistics Austria</i>	
Sub-national and foreign-born population projections: the case of Andalusia.....	407
<i>Juan Antonio Hernández, Silvia Bermúdez, Joaquín Planelles – Instituto de Estadística de Andalucía, Spain</i>	

## **SESSION 11: BEYOND POPULATION PROJECTIONS BY AGE AND SEX**

Projections of religiosity for Spain.....	421
<i>Marcin Stonawski, Vegard Skirbekk, Samir KC, Anne Goujon – International Institute for Applied Systems Analysis, Austria</i>	
New projections of the ethnocultural composition of the Canadian population using the Demosim microsimulation model .....	439
<i>Éric Caron Malenfant, Laurent Martel, André Lebel – Statistics Canada</i>	
Tertiary education enrolment trends and projections in Latvia.....	453
<i>Zane Cunska - University of Latvia</i>	
Projecting race and Hispanic origin in the U.S. population projections and an examination of the impact of net international migration.....	469
<i>David G. Waddington, Victoria A. Velkoff – U.S. Census Bureau</i>	

## SESSION 12: STOCHASTIC TECHNIQUES FOR DEMOGRAPHIC PROJECTIONS

Combining deterministic and stochastic population projections.....	485
<i>Salvatore Bertino, Eugenio Sonnino - University of Rome "La Sapienza", Italy</i>	
<i>Giampaolo Lanzieri – European Commission, Eurostat</i>	
A mate-matching algorithm for continuous-time microsimulation models.....	491
<i>Sabine Zinn – Max Planck Institute for Demographic Research Rostock, Germany</i>	
Bayesian population forecasts for England and Wales.....	511
<i>Guy Abel, Jakub Bijak, Jonathan Forster, James Raymer, Peter W. F. Smith</i>	
<i>University of Southampton, United Kingdom</i>	
Practical population forecasting by microsimulation: application of the MicMac software.....	525
<i>Ekaterina Ogurtsova, Jutta Gampe, Sabine Zinn – Max Planck Institute for Demographic Research Rostock, Germany</i>	

## SESSION 13: STOCHASTIC NATIONAL DEMOGRAPHIC PROJECTIONS

Immigration, ethnocultural diversity and the future composition of the Canadian labour force .....	543
<i>Alain Bélanger – Institut National de la Recherche Scientifique, Canada</i>	
<i>Nicolas Bastien – Centre Urbanisation Culture Société, Canada</i>	
Developing stochastic population forecasts for the United Kingdom: Progress Report and plans for future work.....	557
<i>Emma Wright, Steve Rowan – Office for National Statistics, United Kingdom</i>
