Introduction	4
What are PEEIs	4
PEEI in focus: reports and other methodological documentation	4
Purpose of this report on CIRCA	4
Part A: Data collection	5
1. Collection method and population coverage	5
1.1 Sources of the basic data	5
1.2 Nationally defined population	6
1.3 Coverage rate compared to full coverage	8
2. Selection of units	10
2.1 Basic method of selection	10
2.2 Stratification criteria used and sample rates	11
2.3 Sample size and coverage	12
2.4 Frequency of updating of the sample	14
3. Definition of turnover	15
Part B: Non response	16
4. Non-response rates	16
4.1 Snapshot of non-response	16
4.2 Development of response rates during one data collection exercise	18
4.3 Development of response rates over the course of a year	19
5. Treating non- response	20
5.1 Reducing non-response: present practice and plans	20
5.2. Treatment of non-response: imputation and reweighting	21
5.3. Measurement of non-response errors/bias	23
Part C: Data processing	24
6. Data editing	24
7. Deflation	26
8. Index calculation/use of weights	27
8.1 Weights used and frequency of updating	27
8.2 Type of index	28
9. Benchmarking	29
10. Time series decomposition	30
10.1 Order of adjustment: choice of input series	30
10.2 Software used	31
10.3 Methods for WDA	32
10.4 Methods for SA	34
10.5 Aggregation approach	35
10.6 Revision of models	36
10.7 Base year of indices	37
Part D: Error measurement	38
11 Non-sampling errors	38
12 Sample errors	39
13 Comparison among sources	40
14 Bias	41
15 Dissemination of information about errors	42
Annex	43
1. Definitions	43
Turnover	43
Enterprise	44
Local unit	44
KAU	44
2. Index compilation	45
Decomposition	45
Working-day adjustment	45
Seasonal adjustment	45
3. Classifications	45
NACE	45
CPA	46
