

# TABLE OF CONTENT

1. Introduction .....	9
2. Statistical matching .....	11
2.1 Overview of statistical matching .....	11
2.2 Reconciliation of the data sources.....	11
2.2.1 Household.....	12
2.2.2 Household reference person .....	12
2.2.3 Population .....	12
2.2.4 Reference Period .....	12
2.3 Harmonization of variables.....	12
2.4 Choosing the matching variables .....	13
2.4.1 Coherence of distributions.....	13
2.4.2 Explanatory power of the variables.....	19
2.5 Matching methods.....	19
3. Results of statistical matching .....	21
3.1 Comparison of mean expenditure by expenditure deciles – EU-SILC imputed versus HBS observed .....	21
3.2 Comparison of joint distributions of matching variables with expenditure deciles .....	22
3.3 Comparison of expenditure by matching variables - EU-SILC imputed versus HBS observed.....	23
3.3.1 Comparison of expenditure by matching variables – observed versus imputed HBS.....	25
3.4 Comparison of expenditure by variables not used in statistical matching.....	26
4. Conditional independence assumption .....	27

5. Income and expenditure poverty and material deprivation.....	29
5.1 Headline poverty indicators .....	29
5.2 Overlap of income and expenditure poverty and material deprivation.....	30
6. Conclusions and next steps .....	35
6.1 Recommendations for future data collection.....	35
7. References .....	37
8. Annexes.....	39
Annex 1: Complete list of common variables EU-SILC and HBS, 2005.....	39
Annex 2: Complete list of derived variables.....	48
Annex 3: Output for material deprivation logistic regression model, EU-SILC 2005 .....	51
Annex 4: Output for expenditure regression model, HBS 2005 .....	52
