

Table of contents

1. Introduction	9
2. Statistical matching	10
2.1 Overview of statistical matching	10
2.2 Reconciliation of the data sources	10
2.2.1 Household	11
2.2.2 Household reference person	11
2.2.3 Population and Sampling Frame	11
2.2.4 Reference Period	11
2.3 Harmonization of variables	12
2.4 Choosing the matching variables	12
2.4.1 Coherence of distributions	12
2.4.2 Explanatory power of the variables	14
2.5 Matching methods	15
3. Results of statistical matching	16
3.1 Comparison of mean expenditure: EU-SILC imputed versus HBS observed	16
3.2 Comparison of expenditure by matching variables - EU-SILC imputed versus HBS observed	18
3.3 Comparison of expenditure by matching variables – observed versus imputed HBS	19
3.4 Comparison of expenditure by variables not used in statistical matching	20
4. Conditional independence assumption	22
5. Conclusions	23
6. References	24
