

Table of contents

1. Introduction	5
2. Conceptual and analytical frameworks	7
2.1 Conceptual framework	6
2.2 Analytical framework	7
3. Quality and comparability of the data	9
3.1 Missing values	9
3.2 Compliance with Eurostat guidelines and proposals for definition changes	9
3.3 Distribution of answer categories at country level	11
3.4. Evolution of MD items between 2013 and 2014, cross-sectional data	11
3.5. Evolution of MD items between 2013 and 2014, longitudinal data	17
4. Suitability	21
5. Validity	28
6. Reliability - Classical Test Theory	29
6.1 Cronbach's Alpha	29
6.2 Other measures of reliability	32
7. Reliability: Item Response Theory	35
8. Reliability: Hierarchical Omega Analysis	39
9. Additivity	43
10. Final list of the items	44
11. Measurement Invariance (MI) Analysis	45
11.1 Introduction	45
11.2 Methods and strategy for analysing MI	46
11.3 Multiple group factor analysis. Full set of countries	46
11.4 Multiple-group analysis. Same data-collection mode. CAPI Countries. 2014	50
12. General conclusions	51
References	52
ANNEX 1	56
List of items abbreviations	56
Countries' official abbreviations	56
ANNEX 2	57
Path diagrams of the models 2 to 4 tested in the Omega analysis, 2014	57
ANNEX 3	60
Non-invariant parameters (Between parenthesis). Alignment method, 2014	60
ANNEX 4	61
Relationship between adjusted and unadjusted mean deprivation scores, 2014	61
