Wind of change in Eurostat's dissemination

Dear Reader,

Eurostat has decided to change its dissemination policy quite considerably, since it will start free dissemination in the fourth quarter of this year. The implications of the new policy are vast for Eurostat. It is not difficult to imagine a tenfold increase in the number of people accessing our data within a short period of time. This has been the experience in those EU Member States which have already changed policy and we expect that this new situation will certainly be a big challenge for Eurostat.

The first steps for free access to our publications and data have already been taken. **All Eurostat publications are downloadable free of charge in PDF format from our website.**

Furthermore, some 1 000 tables of the most frequently used and demanded short- and long-term indicators are freely available on our website.

Eurostat is currently working on the preparation of its databases for the potential large free dissemination demand in order to improve the user-friendliness, the documentation and the response times.

There is also the important task of spotting potential limits to free dissemination. Legal regulations in different Member States lead to reservations on publishing data at more detailed levels. The limits of free dissemination have to be further explored and concepts developed to deal with the exceptions that will need to be made.

Another important part of free dissemination is the organisation of user support in the different countries. However, the type of assistance must be limited to advice on where to find the requested data or the methodological background information which the user needs. The Data Shops, as we know them today, will disappear. We are sure that private service providers will produce value added services for those users who need them.

We will keep you informed about this evolution in the next issue of *Statistical references*.

Gunter Schäfer
Head of the Information
and Dissemination Unit (A5)

*Our mission is to provide
the European Union with
a high-quality statistical
information service.*

EUROPEAN COMMISSION

Ten new Member States in the statistical focus

Since 1 May 2004, the most extensive enlargement in the history of the European Union has become a fact of life. In recent years, the new member countries have made particular efforts to adopt the *acquis communautaire* so as to be well prepared for EU membership. These efforts also concern the national statistical systems. The new countries are very much aware that high-quality statistics are crucial for every EU policy. In addition, they are ready to take up the challenge of being active participants in the European statistical system and are able to contribute to its further development.

In the preparation period, a joint effort of statisticians of the 'old' Member States, who contributed their expertise, colleagues from the new member countries, who were willing to share information on their daily work, and Eurostat staff led to major progress. Good use of the assistance provided was made and today high-quality and comparable statistics are available.

The compilation and harmonisation of data and the preparation of publications require constant commitment from and cooperation between a large number

of contributors. Eurostat's production units have made great efforts to increase further the data collection in their respective fields, particularly from the new member countries. Since enlargement took place, Eurostat's policy has been to publish EU-25 aggregates and the relevant data for all 25 Member States. If possible, aggregated data for EU-15 will also be given for a certain period.

Data on new Member States are now integrated into Eurostat's main

publications together with the statistics of the other Member States.

Hereafter there are a series of products and database domains, which already give a good picture of the situation of the economic and social life in the new Member States, and comparisons with the 'old' Member States, with aggregates for EU-15 as well as for EU-25.

Some specific publications on the former or current candidate countries which were published leading up to enlargement are also listed in order to present a full overview and an opportunity for comparison. ■

RELATED PRODUCTS

★ Eurostatistics – Data for short-term economic analysis – Annual subscription 2004

Format: Paper, PDF
Language version: EN only
Subscription code: VHI000
ISSN: 1725-8111
Price of paper edition: EUR 180

Eurostatistics – Data for short-term economic analysis is designed to monitor the evolution of the economic activity in the European Union, euro zone and the 25 Member States. It intends to give a synthetic picture of the macroeconomic situation in the recent past. It contains monthly and quarterly macroeconomic data presented following an economic classification of the indicators such as output, demand, prices, labour market, external transactions, and monetary and financial markets.

★ EC economic data pocketbook – Quarterly publication – Annual subscription 2004

Format: Paper, PDF
Language version: EN only
Subscription code: VBO000
ISSN: 1026-0846
Price of paper edition: EUR 40

The *EC economic data pocketbook* is a handy collection of economic data from different domains, covering European aggregates, all EU Member States and the EU's main economic partners. The publication focuses on the structural aspects of the EU economy; consequently, most of the data given are annual and are complemented by selected monthly and quarterly indicators.

★ Intra- and extra-EU trade – Monthly data – Combined Nomenclature

Format: CD-ROM/DVD
Language versions: Trilingual, DE/EN/FR
Subscription code: 'OCDR00
Catalogue number: KS-CK-04-000-3A-Z
ISSN: 1017-6594
Price of CD-ROM subscription:
EUR 4 020
Comprises: 11 CD-ROMs/DVDs and two
supplements on CD-ROM/DVD
Single issue price: EUR 700

This CD-ROM is published monthly. It contains statistics on the trade of Member States, classifications of countries and products, methodological notes, notes on the state of data availability and the user manual. It now includes data of the new Member States and the database Prodcom (previously the Europroms CD-ROM). As from issue No 8/2004, it will be available only on DVD.

The new EU of 25 compared with EU-15

With the accession of 10 new Member States – the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia – the European Union recently faced the greatest enlargement in its history. What will be the impact of the 10 new countries on the new EU compared with EU-15? How will EU-25 compare with the United States?

For this event, Eurostat, the statistical office of the European Communities, recently published a compilation of economic and social indicators drawing a portrait of the European Union of 25 members.

★ Statistical yearbook on candidate countries – Data 1997–2001

Format: Paper, PDF
Language version: EN only
Catalogue number:
KS-AG-03-001-EN-C
ISBN: 92-894-5523-3
Price of paper edition:
EUR 30
Size/pages: PDF file,
3 000 KB; 194 pages

This extensive yearbook on candidate countries should serve as a working tool for all those who are interested in the enlargement process. Covering the years 1997 to 2001, the yearbook contains detailed tables on demography, education, research and development, social conditions and the labour force, national accounts and finance, agriculture, energy, industry and construction, retail and tourism, transport, and telecommunications and the information society, as well as external trade and the environment. The yearbook contains most of the structural indicators that were adopted by the European Council to monitor the Lisbon competitiveness strategy. These indicators were integrated into the respective thematic chapters of the yearbook and are highlighted by a specific logo.

★ Enlarging the EU statistical network

Format: Paper, PDF
Language version: EN only
Catalogue number:
KS-57-03-596-EN-C
ISBN: 92-894-6948-X
Price of paper edition:
EUR 30
Size/pages: PDF file, 3 000
KB; 132 pages
Paper edition can be
ordered free of charge from:
marina.somers@cec.eu.int

The publication contains information on the national statistical systems of the 13 candidate countries (CCs) covering the legal setting and administrative capacity of official statistics, principal providers of statistical data, organisation of national statistical institutes (NSIs) including the staff and financial resources, major statistical activities and outputs as well as the methodologies applied. It is a reference source on how statistics are produced in the CCs and what kind of information is available. It was prepared within the framework of the multi-beneficiary Phare programme on statistical cooperation with an objective to promote information on official statistics of the CCs in the context of the approaching enlargement.

★ SMEs in Europe – Candidate countries

Format: Paper, PDF
Language version: EN only
Catalogue number:
KS-CJ-04-001-EN-C
ISBN: 92-894-4965-9
Price of paper edition:
EUR 14,50
Size/pages: PDF file,
791 KB; 103 pages

SMEs in Europe – Candidate countries is designed to present a comprehensive set of data allowing the reader to compare the structure and performance of activities across the whole of the EU and the candidate countries. The publication presents data based on harmonised methodology for the candidate countries and an EU-15 aggregate. Information is taken from a diverse range of Eurostat databases, in particular drawing on structural business statistics (SBS), the continuing vocational training survey (CVTS) and the labour costs survey (LCS). The data are generally broken down according to standard SME definitions (in terms of employment size classes for enterprises) and according to the main economic activities of enterprises (in accordance with the NACE classification). In most cases, the information relates to the latest available period, which is normally the reference year 2001.

DATABASES

European and national short-term indicators –

Euroind: With most of the old EU Member States participating in economic and monetary union since 1999, infra-annual economic statistics for the euro zone and the European Union as a whole have gained and will continue to gain ever more operational importance for collective and private decision-making. The momentum of the EU economies and most notably the euro-zone economy has to be assessed continuously.

The Euro-Indicators section (www.europa.eu.int/comm/euroindicators) is exclusively dedicated to infra-annual economic statistics such as consumer prices, national accounts, balance of payments, external trade, industry, energy, commerce and services, and the labour market, as well as a selection of monetary and financial indicators of the European Central Bank and business and consumer survey results from the European Commission's Economic and Financial Affairs DG.

The pages are updated daily and offer free of charge key aggregate indicators for the EU and the euro zone. The database contains an unrivalled volume of mostly harmonised and, above all, uniformly structured and documented national and European series. Data can be extracted online with the help of a user-friendly browser and customised extractions can be obtained on request. The alert function helps everybody to keep track of what is going on statistically.

Regional statistics – REGIO: REGIO is the database domain relating to the main aspects of economic life in the European Union at regional level. Created in 1975, REGIO is subdivided into 12 statistical domains: demography, migration, economic accounts, unemployment, labour force sample survey, transport and energy statistics, agriculture, education, health, tourism, structural business statistics, and statistics concerning science and technology (including research and development). The regions are classified in line with a specific system called NUTS (nomenclature of territorial units for statistics).

New publications and databases

This part of *Statistical references* provides you with information about the most recent publications from the Eurostat catalogue.

For each theme, we add to the publications catalogue all related issues in the *Statistics in focus* series and the database domains concerned, which give further information on the subjects treated.

Please keep in mind that nearly all Eurostat publications are available in electronic format (PDF) and can be obtained via our internet site. Hard copies can be purchased from the "Publications Office's sales network".

For more detailed information concerning the purchase of Eurostat products, please see page 15.

All prices indicated are exclusive of VAT and postage & packaging.

	Comments	These pictograms will help you to identify the specific content as well as the language version(s) available of each Eurostat publication described in this issue of <i>Statistical references</i> .

ECONOMY AND FINANCE

DATABASES

Credit © European Community, 2004

International trade in services, foreign direct investment, balance of payments — BOP: This domain covers direct investment statistics (flows, income and positions) with geographical and economic activity breakdown, international trade in services with detailed geographical breakdown, foreign affiliate trade statistics, balance of payments of the EU institutions, and quarterly balance of payments. Focusing on EU figures, the BOP domain reports data for EU Member States, candidate countries, Japan, Iceland (direct investment and quarterly balance of payments), Norway, Switzerland (direct investment only) and the United States.

Prices and purchasing power parities — Price: Price comprises, for each country, four collections: harmonised indices of consumer prices (annual and monthly data), national consumer price indices (annual and monthly data), cost of living comparison in the European Union — Brussels = 100 (annual data), and purchasing power parities for private consumption (comparison by country, annual data).

POPULATION AND SOCIAL CONDITIONS

★ Health statistics — Key data on health 2002 — Data 1970–2001

Format: Paper, PDF
Language version:
 DE, EN, FR
Catalogue number:
 KS-08-02-002-EN-C
ISBN: 92-894-3730-8
Price of paper edition:
 EUR 45
Size/pages: PDF file,
 4 730 KB; 456 pages

This second edition of *Key data on health* responds to the growing demand of EU health policy for a comprehensive, consistent and internationally comparable set of health data and indicators, highlighted in the new programme of Community action in the field of public health (2003–08); strong feature of this report is the fact that Eurostat brings together information on a wide range of health topics from the most relevant data sources available around the world: NewCronos of Eurostat, Ecosante from the Organisation for Economic Cooperation and Development (OECD), 'Health for all' from the World Health Organisation (WHO), the Food and Agriculture Organisation (FAO), the International Agency for Cancer, Euro HIV, specific epidemiological studies, etc. Information on the health status of the population and the main diseases as well as the statistical description of healthcare systems are at the core of this publication; however, *Key data on health* also addresses the issues of lifestyles (nutrition, smoking, drinking, physical activity, drug use), mortality (infant, causes of death) and health risks associated with the environment, work, leisure and traffic. *Key data on health* covers the 15 EU Member States, as well as Iceland, Liechtenstein, Norway and Switzerland.

★ **Living conditions in Europe – Statistical pocketbook**

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-53-03-831-EN-C
ISBN: 92-894-5885-2
Price of paper edition: EUR 10
Size/pages: PDF file, 525 KB; 109 pages

The aim of the 2003 edition of the statistical pocketbook *Living conditions in Europe* is to provide a comprehensive picture of the current living conditions in the 15 old Member States of the European Union as well as in the four EFTA countries where information is available. Data are drawn from a wide range of harmonised sources available in Eurostat, such as the European labour force survey (LFS) and the European Community household panel (ECHP). Different areas of the social field are described by a selection of indicators which are presented in tables and charts and accompanied by a short commentary.

★ **European social statistics – Social protection – Expenditure and receipts**

includes a CD-ROM !

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-DC-04-001-EN-C
ISBN: 92-894-7052-6
Price of paper edition: EUR 45
including CD-ROM
Size/pages: PDF file, 2 730 KB; 135 pages
without the data included on the CD-ROM

This publication presents the expenditure and the receipts on social protection for the period 1992–2001. The data on expenditure and receipts of social protection schemes contained in this publication are drawn up according to the Esspros manual 1996. Esspros (European system of integrated social protection statistics) is a harmonised system providing a means of analysing and comparing social protection financial flows.

★ **European social statistics – Labour market policy – Expenditure and participants – Data 2002**

Format: PDF only
Language version: EN only
Catalogue number: KS-DO-04-001-EN-N
ISBN: 92-894-0547-3
Size/pages: PDF file, 1.42 MB; 138 pages

This publication is the result of data collected by Eurostat as part of the 'Labour market policy' database project undertaken in collaboration with the Employment DG, all EU Member States and Norway.

It is based on a collection of information from administrative sources, relating to public expenditure and to participants, covering both stocks and flows. It also includes much qualitative information concerning labour market measures, which may be useful for analysis purposes.

★ **How Europeans spend their time – Everyday life of women and men – Data 1998–2002**

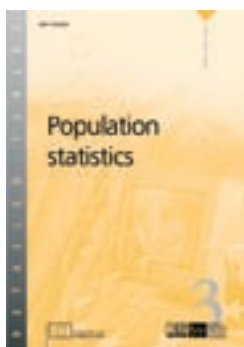

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-58-04-998-EN-C
ISBN: 92-894-7235-9
Price of paper edition: EUR 10
Size/pages: PDF file, approximately 400 KB; 140 pages

This pocketbook is the first compendium of European statistics on how Europeans spend their time. It aims to shed light on how women and men organise their everyday life in 10 European countries. In particular, it provides information on the possibilities of reconciling professional and family life – statistics about the division between women and men of gainful and domestic work.

The statistical sources for this publication are the national time use surveys that have been conducted in several European countries. Ten European countries, Belgium, Estonia, Finland, France, Germany, Hungary, Norway, Slovenia, Sweden and the United Kingdom, have been included in this presentation.

★ Population statistics – Data 1960–2003

Format: Paper, PDF
Language version: DE, EN, FR
Catalogue number: KS-BP-04-001-EN-C
ISBN: 92-894-7437-8
ISSN: 1725-8670
Price of paper edition: EUR 33
Size/pages: PDF file, 3 MB; 188 pages

This publication provides a comprehensive statistical portrait of the European population, including information on the EU and the world, fertility, mortality, nuptiality, and migration as well as the composition and structure of the population.

The data focus mainly on the EU-25 Member States and, to a lesser extent, the European Economic Area, Bulgaria and Romania as well as some western Balkan countries. To provide a high-level international comparison, countries such as Japan and the United States are also considered, where possible.

A regional analysis across the EU countries is also provided.

DATABASES

Demography – DEMO: The DEMO domain gives detailed figures on population, fertility, mortality, nuptiality, and divorce, and covers the main demographic indicators. It also provides some information on population, labour force and household projections.

Labour force survey – LFS: This is a household survey which provides data on population (persons living in private households), the working population and the non-national population. The main emphasis is on employment, unemployment and inactivity. The information available on these topics includes patterns of work, working time, occupations, economic activities, length of unemployment and methods of job search. The tables are broken down by age and sex.

INDUSTRY, TRADE AND SERVICES

★ European business – Facts and figures – Data 1998–2002 – with CD-ROM

Format: Paper and PDF files
Language version: EN only
Paper edition including CD-ROM: 421 pages
ISBN 92-894-5433-4
ISSN 1681-2050
KS-BW-04-001-EN-C
EUR 50

includes a CD-ROM!

European Business provides a standard set of information for industrial and service activities within the European Union (25 Member States). The 2004 edition includes data for the 10 new Member States, which (subject to data availability) have been fully integrated into the publication, with the inclusion of EU-25 totals wherever these were possible. The data provided in European Business traces the major developments of output, employment and external trade. The commentaries concentrate largely on the 3-digit level of the NACE Rev. 1 classification of economic activities. The chapters in European Business are structured largely on the basis of their NACE code, starting with energy and the extractive industries and finishing with business services, the information society and media. The accompanying CD-ROM contains the commentaries, tables and figures of the paper publication, as well as a database which contains many additional series (for example, longer time-series or breakdowns by Member State). Within the database component the underlying statistics can be easily accessed using Eurostat's dedicated database browser, EVA (Eurostat Visual Application). Data can be extracted and exported for manipulation in database or spreadsheet applications. The CD-ROM also provides a large amount of background information on the underlying legislation, sources and classifications that have been used, as well as a glossary of terms.

PDF version in 6 parts

- **Part 5: Trade and tourism, 1,7 Mb**
- **Part 6: Business services, 2,3 Mb**

★ Quarterly panorama of European business statistics

Format: Paper, PDF
Language versions: Paper: EN only; PDF: DE, EN FR
Catalogue number: KS-DL-04-000-EN-C
ISSN: 1725-485X
Price of paper edition: EUR 30
Size/pages: PDF file, 2.2 MB; approximately 133 pages
Subscription code: VPA000

The *Quarterly Panorama of European business statistics* is a tool to follow the evolution of the short-term trends of the European economy as a whole as well as from the perspective of a broad range of individual industrial, construction, trade and other service sectors. The split into sectors follows roughly the 2-digit level of detail of the NACE classification. A commentary on the EU and Eurozone economy and each sector is accompanied by graphs and tables for a range of economic indicators. The picture is completed by a comparison of the economy with the United States and Japan. A special feature treats a particularly relevant and actual topic in depth.

★ Cinema, TV and radio in the EU – Statistics on audiovisual services – Data 1980–2002

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-BT-03-001-EN-C
ISBN: 92-894-5709-0
Price of paper edition: EUR 17.50
Size/pages: PDF file, 1 MB; 164 pages

This publication *Cinema, TV and radio in the EU – Data 1980–2002* is the new renamed edition of the publication *Statistics on audiovisual services* and is, as before, based on the data collected via the AUVIS questionnaire from EU Member States, candidate countries and EFTA countries (the results of the 2002 enquiry have been taken into consideration). The aim of this publication is to provide a statistical overview of the audiovisual sector based on the statistical work carried out at Eurostat.

★ Employment in the market economy in the European Union – An analysis based on the structural business statistics – Data 2000–2001

Format: PDF only
Language version: EN only
Catalogue number: KS-59-04-944-EN-N
ISBN: 92-894-7495-5
Size/pages: PDF file, 3.5 MB; 74 pages

The purpose of the publication is to increase knowledge and understanding of employment and business-related issues across the European Union. The publication presents a fairly complete and coherent picture of, for example, the scale of business output and employment in different parts of the Union. It also indicates the division of employment and output between different economic activities, the relative importance of different sized enterprises, their productivity and costs of production and the amount of investment undertaken.

★ Information society statistics – Pocketbook – Data 1997–2002

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-56-03-093-EN-C
ISBN: 92-894-6429-1
Price of paper edition: EUR 10
Size/pages: PDF file, 1.83 MB; 106 pages

This is the third edition of the statistical pocketbook on the information society. It aims to provide a statistical overview of key data on the information society in the European Union and in other European countries. The publication presents aggregated figures of the extent to which information and communication technologies (ICTs) have impacted on the business sector and individuals. It now also includes data on candidate countries.

★ Tourism statistics – Yearbook – Data 1990, 1995, 1998–2002

Format: CD-ROM
Language version: Trilingual, DE/EN/FR
Catalogue number: KS-DS-03-001-3A-Z
ISBN: 92-894-6621-9
Price of CD-ROM: EUR 120

This CD-ROM contains data based on EU Member States' statistics in the field of tourism. These data have been collected by the national authorities under Council Directive 95/57/EC on the collection of statistical information in the field of tourism. They comprise mainly the following parts: capacity of collective accommodation, occupancy in collective accommodation establishments and tourism demand – domestic and outbound tourism. Data go up to 2002.

★ **Iron and steel – Yearly statistics – Concluding edition – Data 1993–2002**

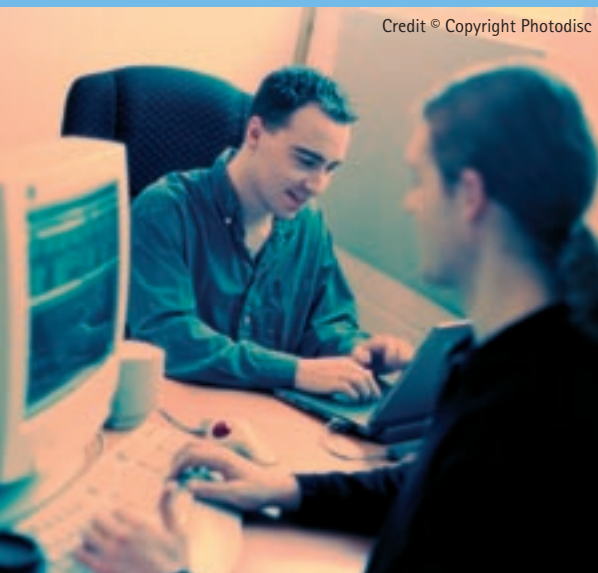

Format: Paper, PDF
Language version:
Trilingual, DE/EN/FR
Catalogue number:
KS-BL-03-001-3A-C
ISBN: 92-894-5265-X
Price of paper edition:
EUR 17.50
Size/pages: PDF file,
1 MB; 73 pages

Iron and steel – Yearly statistics provides a statistical overview of developments in the European Union's iron and steel industry in recent years. This publication contains detailed tables presenting annual statistics on the structure and economic situation of this industry at EU level and in each of the Member States. It collates the latest available data on such topics as production of iron ore, pig iron, finished steel products, etc., the size of enterprises and plants, employment, indirect foreign trade and others.

The ECSC (European Coal and Steel Community) Treaty expired in July 2002, and steel statistics under the ECSC Treaty came to an end at 31 December 2002. Therefore, this is the final issue of *Iron and steel – Yearly statistics*.

STATISTICS IN FOCUS

DATABASES

Structural business statistics (industry, construction, trade and services) – SBS : This is now the only reference domain for business structural data. It contains all business structural data regarding industry, construction, trade and services (other than financial services) from 1995 onwards on the legal basis of Council Regulation (EC, Euratom) No 58/97 as well as some long time series (NACE Rev. 1, Sections G to K, from 1990, NACE Rev. 1, Sections C to F, from 1985). It includes statistics broken down by size class and regional statistics. Data on accession countries are generally available from 1998 onwards (for a number of accession countries, data are also available for earlier reference years).

The domain also contains detailed data on business services and a breakdown of annual business statistics by nationality of ownership.

European business trends – Monthly and quarterly short-term statistics (industry, construction, retail trade, and repair and other services) – EBT : The EBT domain contains information for the analysis of the short-term evolution of supply and demand, production factors and prices in all market activities in industry, construction, retail trade, and repair and other services.

AGRICULTURE AND FISHERIES

★ **Agriculture – Statistical yearbook – Data 1993–2002**

Format: Paper including CD-ROM, PDF
Language version:
Trilingual, DE/EN/FR
Catalogue number:
KS-AQ-04-001-3A-C
ISBN: 92-894-7109-3
Price of paper edition including CD-ROM:
EUR 40
Size/pages: PDF file (without content of CD-ROM), approximately 3 MB; 210 pages

The yearbook presents a synthetic view of the main figures from Eurostat's special publications on agriculture, forestry and fisheries. The AgrIS database on CD-ROM covers the prices, quantities and values of agricultural output.

★ Fisheries – Yearbook 2003 – Data 1993–2002

includes a CD-ROM !

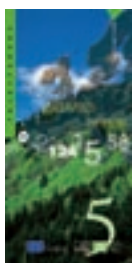

Format: Paper including CD-ROM, PDF
Language version: Trilingual, DE/EN/FR
Catalogue number: KS-AX-03-001-3A-C
ISBN: 92-894-6338-4
Price of paper edition including CD-ROM: EUR 40
Size/pages: PDF file (without content of CD-ROM), approximately 591 KB; 67 pages

This publication contains fishery statistics for the Member States of the European Union and the candidate countries as well as for other important countries in this economic sector. This volume is divided into sections on catches by fishing region, catches of principal species, the fishing fleet and foreign trade in fishery products.

The accompanying CD-ROM is a copy of the NewCronos domain FISH and contains data for the period 1950–2002.

★ Forestry statistics – Pocketbook – Data 1990–2002

Format: Paper, PDF
Language version: EN only
Catalogue number: KS-59-04-306-EN-C
ISBN: 92-894-4735-4
Price of paper edition: EUR 10
Size/pages: PDF file, 3 MB; 75 pages

The aim of the pocketbook is to present updated information on the forest sector in the EU, EFTA and candidate countries. It may be considered to be a compendium of the most relevant Eurostat data sets concerning the forest sector. It is divided into two main parts. The first gives a general description of forest resources, forest ownership, forest condition, employment in the forest sector, the contribution of this sector to national GDP formation and the share of energy produced using woody material. The second part is devoted to the production and trade of wood and wood products and is based on data from the joint forest sector questionnaire, which is the result of cooperation between Eurostat, the United Nations Economic Commission for Europe (UNECE), the Food and Agriculture Organisation (FAO) and the International Tropical Timber Organisation (ITTO). This section of the pocketbook also contains supply balance sheets concerning the production of and trade in wood, wood-based panels, paper and paperboard.

Tables and figures based on Eurostat data refer mainly to the Eurostat database NewCronos.

DATABASES

- Agricultural products – ZPA1:** The data concern agricultural production:
- the means of production: land use, livestock (number and structure); annual data;
 - crop production (area, yield, production); annual data;
 - animal production (production and trade); monthly and annual data;
 - summary data (balance sheets); annual data.

EXTERNAL TRADE

★ External and intra-European Union trade – Statistical yearbook 2003 – Data 1958–2002

Format: Paper, PDF
Language version:
 DE, EN FR
Catalogue number:
 KS-CV-03-001-EN-C
ISBN: 92-894-4302-2
Price of paper edition:
 EUR 29.50
Size/pages: PDF file,
 2 MB; 249 pages

The yearbook on external and intra-European Union trade sets out to provide data on long-term trends in the trade of the European Union and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners, on the one hand, and between the Member States, on the other. In view of the enlargement of the European Union and taking into account the importance of trade by the members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the Union, a description of trade of the candidate countries (now new Member States) and EFTA has been added to that usually given.

DATABASES

Macroeconomic series for EU and Euro-zone (gross data, seasonally adjusted and adjusted data by working days, indices) – SATIE:

The SATIE domain is intended to satisfy the needs of the users of cyclical macroeconomic data with reference to foreign and intra-Community trade of goods. It contains monthly data which go back to January 1989 and includes estimates carried out by Eurostat for the most recent months.

The domain presents simultaneously: gross values and foreign trade indices as well as the corresponding seasonally adjusted data, by stressing the temporal consistency between these data. For example, the relation $\text{volume index} \times \text{unit value index} = \text{value index}$ is ensured for the seasonally adjusted raw data. Similarly, the seasonally adjusted data of the euro-zone area or EU are equal to the amount of the seasonally adjusted data of each Member State.

Macro series for candidate countries and EFTA countries (trade values and growth rates) – ET_EFCC:

The ET_EFCC domain contains external trade statistics from candidate countries (from 1999) and EFTA countries (from 1995). The domain contains, for each flow (import, export), monthly and yearly data and growth rates, with a product breakdown according to SITC one-digit classification, and a geographical split between trade with EU countries and trade with third countries.

The trade statistics from candidate countries and EFTA countries are produced by national administrations according to national concepts. Some concepts may differ from EU definitions, which are applied in EU trade statistics as published by Eurostat.

TRANSPORT

★ Everything on transport statistics – Data 1970–2001

Format: DVD
Language version:
 Trilingual, DE/EN/FR
Catalogue number:
 KS-53-03-944-3A-Z
ISBN: 92-894-6002-4
Price of DVD: EUR 700

This DVD is a repository of all public documents and data related to transport statistics in Europe and main partner countries. It contains about 20 million statistical data and more than 850 documents, mostly produced by Eurostat's Transport Unit. Some documents related to transport statistics are also issued by other Eurostat units (Environment, Business Statistics, Regional Data, etc.) or by other directorates-general of the European Commission such as the Energy and Transport DG. This work relies on the European statistical system which for transport statistics is mainly represented by the national statistical institutes and the Ministries of Transport of the European Union Member States plus Norway and Switzerland. This second edition gives access to many new data, publications and legal acts related to transport statistics, in particular in the fields of air, maritime and road transport. Much more information related to candidate or Mediterranean countries can also be found.

★ **Panorama of transport – Statistical overview of transport in the European Union – Data 1970–2001**

Format: Paper, PDF
Language version: EN
Catalogue number: KS-DA-04-001-EN-C
ISBN: 92-894-4993-4
Price of paper edition: EUR 25
Size/pages: PDF (in two parts), 4.29 MB, 2.67 MB; 139 pages

Panorama of transport sets out to describe, via annual statistics, the most important features of transport in the European Union. This publication describes transport not only in terms of the quantities of freight and passengers moved and the vehicles and infrastructure used, but also as part of the economy, the environment and health, as a factor in our quality of life. This fourth edition of the panorama puts special emphasis on the latest road freight transport statistics collected under the recent EU regulation; it also gives an initial overview of available data on the 10 acceding countries and the remaining candidate countries. Furthermore, certain chapters of this edition include information on the EFTA States.

DE version (format PDF only): Catalogue number: KS-DA-04-001-DE-N
FR version (format PDF only): Catalogue number: KS-DA-04-001-FR-N

★ **Transport by air – National and international intra- and extra-EU – Data 1993–2001**

Format: CD-ROM
Language version: Trilingual, DE/EN/FR
Catalogue number: KS-DG-03-001-3A-Z
ISBN: 92-894-6278-7
Price of CD-ROM: EUR 60

This CD-ROM presents air passengers and freight figures derived from a voluntary transmission to Eurostat of data by the Member States of the European Union as well as Norway and Switzerland. The periodicity of the data is, in most cases, annual. Nevertheless, some quarterly and even monthly data can also be found. Apart from these data, several documents of interest for aviation statistics, in Acrobat PDF format, are also available on the CD-ROM such as historical publications, legal acts, glossaries and the Energy and Transport DG's White Paper. It contains about 5 million statistical data and hundreds of documents or publications mainly available in three languages (German, English and French). It also contains some publications related to transport but issued by other Eurostat units (Environment, Business Statistics, Regional Data, etc.) and some publications issued by the European Commission, in particular by the Energy and Transport DG

Credit © Copyright Photodisc

★ **Transport by sea – National and international intra- and extra-EU – Data 1997–2001**

Format: CD-ROM
Language version: Trilingual, DE/EN/FR
Catalogue number: KS-CF-03-001-3A-Z
ISBN: 92-894-5313-3
Price of CD-ROM: EUR 500

This is the second edition of this publication which gives access to European data on maritime transport. The CD-ROM includes data on gross weight of goods, passenger movements, type of cargo, nationality of registration of vessel, number of vessels, and gross tonnage of vessels calling at ports. The above data are disseminated either at port to maritime coastal area (MCA) or port to country level. There are three levels of information: dynamic maps interface for each country separately, HTML files with methodological notes, graphs and tables, and access to the integrity of NewCronos maritime data (Eva - Eurostat Visual Application - and Eva light permitting the creation of specific tables).

This CD-ROM contains more than 14 million records of statistical data.

STATISTICS IN FOCUS

- **Impact of 11 September on air passenger transport**
Catalogue number: KS-NZ-04-005-EN-N
Format: PDF file; 272 Kb ; Issue date: 25.2.2004

DATABASES

Railway transport – Rail: This domain presents aggregated data from the common questionnaire (Eurostat/UNECE/ECMT) and detailed annual and monthly freight transport data from Council Directive 80/1177/EEC of 4 December 1980.

Road transport – Road: This domain contains aggregated data from the common questionnaire (Eurostat/UNECE/ECMT) and detailed annual and quarterly freight transport data from Council Directive 78/546/EEC of 12 June 1978, as amended by Council Directive 89/462/EEC of 18 July 1989. Since 1999, the data included in the roomegood tables are derived from micro data collected under Council Regulation (EC) No 1172/98.

Inland waterways transport – Inlandww: This domain gives information on aggregated data from the common questionnaire (Eurostat/UNECE/ECMT) and detailed annual, quarterly and monthly freight transport data from Council Directive 80/1119/EEC of 17 November 1980.

Oil pipeline transport – Pipeline: This domain gives information on aggregated data from the common questionnaire (Eurostat/UNECE/ECMT) on oil pipelines following the definition set up in the Eurostat/UNECE/ECMT Glossary for transport statistics.

Maritime transport – Maritime: This domain presents quarterly and annual data based on Council Directive 95/64/EC of 8 December 1995. It contains information on seaborne transport of goods, passenger movements and vessels calling at ports.

Air transport – Aviation: This domain gives information on the total passengers and tonnage of freight transported (in tonnes) at the levels of airport pairs, airports, countries or regions of the world.

For industry, all variables are to be transmitted at the two-digit level of NACE Rev. 1. For construction, retail trade, and repair and other services, specific levels of detail are required. The first mandatory reference period is the beginning of 1998.

The exhaustive description of the short-term variables can be found in Council Regulation (EC) No 1165/98 of 19 May 1998.

Eurostat disseminates working days and seasonally adjusted series and estimates EU-15 and euro-zone aggregates.

ENVIRONMENT AND ENERGY

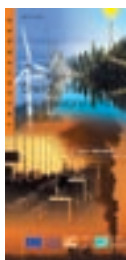

★ A selection of environmental pressure indicators for the EU and acceding countries

Format: PDF only
Language version: EN only
Catalogue number:
KS-59-04-249-EN-N
ISBN: 92-894-7234-0
Size/pages: PDF file,
900 KB; 82 pages

In 1990 and 2001, Eurostat published a set of environmental pressure indicators for the EU, addressing the most important anthropogenic pressures on the environment in 8–10 major policy fields. In 2003, in order to cover the acceding countries, Eurostat updated and extended the indicators in four of these policy fields, namely air pollution, climate change, resource depletion, and waste, for which data are readily available at Eurostat and the European Environment Agency.

★ Energy, transport and environment indicators – Pocketbook

Format: Paper, PDF
Language version: EN only
Catalogue number:
KS-DK-04-001-EN-C
ISBN: 92-894-7529-3
Price of paper edition:
EUR 13
Size/pages: PDF file,
approximately 900 KB;
169 pages

The multi-thematic pocketbook *Energy, transport and environment indicators* comprises a broad set of data collected by Eurostat and the European Environment Agency. The objective of this publication is to provide an overview of the most relevant indicators on energy, transport and the environment, with particular focus on sustainable development. It presents data for the EU-25 Member States as well as for the three candidate countries and EFTA countries.

DATABASES

Environment statistics – Milieu: The data in the Milieu domain focus on the impact of economic activities on the environment.

The following areas are covered:

- waste generation and treatment, including recycling;
- water resources, use and treatment;
- air pollution and climate change;
- land use.

Two additional data collections cover the impact of specific economic sectors. The part on agriculture includes data on pesticides, fertilisers and organic farming, while the part on transport covers various environmental aspects including transport efficiency and prices.

The chapter on environmental protection expenditure provides detailed data on private and public spending on the protection of the environment.

Energy – Sirene: This domain gives information on the development and status of energy supply and demand in the EU Member States and candidate countries. It contains structural data on the energy industry, prices on the main energy sources by type of consumer (industrial or domestic), external trade of energy commodities, and internal energy flows. The internal flows cover production, transformation and consumption of energy products: fossil fuels (coal, oil and gas), nuclear energy, electricity, and renewable energy sources.

SCIENCE AND TECHNOLOGY

 ★ **Statistics on science and technology**

Format: CD-ROM
Language version:
 Trilingual, DE/EN/FR
Catalogue number:
 KS-CG-03-001-3A-Z
ISBN: 92-894-6216-7
Price of CD-ROM:
 EUR 140

The CD-ROM *Statistics on science and technology* contains the most up-to-date data at Eurostat in the fields of government budget appropriations or outlays for R & D (GBAORD), R & D expenditure and personnel, human resources in science and technology (HRST) and employment in high technology (EHT). Data are available for the Member States of the EU, Iceland, Norway and other countries, such as Japan and the United States, at national level. HRST and EHT data are also available for the candidate countries. The time series covered ranges from 1980 to 2002, with differences depending on the indicator. These data are compiled from official national sources and from the Community labour force survey (CLFS) and, in general, they use internationally agreed concepts and definitions as recommended in the 'Frascati family' of manuals ('Frascati manual', 'Patent manual' and 'Canberra manual') and Eurostat's 'Regional manual'.

 ★ **Innovation in Europe – Results for the EU, Iceland and Norway – Data 1998–2001**

Format: Paper, PDF
Language version: EN only
Catalogue number:
 KS-59-04-257-EN-C
ISBN: 92-894-7262-6
Price of paper edition:
 EUR 30
Size/pages: PDF file,
 2.5 MB; 295 pages

This publication presents the results of the third Community innovation survey. The main topics covered are a general description of the innovation performance in Europe, innovation across enterprise size classes, innovation in the various economic sectors, and employment and market characteristics of innovators.

 ★ **Statistics on science and technology in Europe**

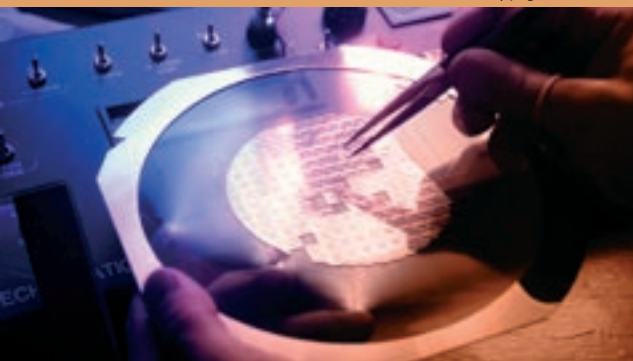

Format: Paper, PDF
Language versions:
 DE, EN, FR
Catalogue number:
 KS-57-03-104-EN-C
ISBN: 92-894-6823-8
Price of paper edition:
 EUR 35
Size/pages: Two PDF files:
 Part 1: 2.5 MB, Part 2: 3
 MB; 173 pages

This publication presents key data and indicators describing science and technology developments in Europe, and also compared with other areas of the world. It contains chapters on government appropriations or outlays for R & D (GBAORD), R & D expenditure and personnel, patents, high-tech trade, human resources in science and technology and on other indicators related to high-tech and knowledge-intensive sectors.

STATISTICS IN FOCUS

DATABASES

Research and Development — R&D indicators are often considered as a main driver for economic development, innovation and growth. This domain provides users with data concerning R&D expenditure and R&D personnel, broken down by the following institutional sectors: business enterprise, government, higher education, private non-profit and the total of all sectors. Data are compiled and broken down further using the guidelines laid out in the "Proposed standard practice for surveys of research and experimental development" – Frascati Manual, OECD, 2002.

Data are available for the EU Member States, Iceland, Norway, Candidate Countries, Japan and the US. Until 2003 data on R&D were collected under gentleman's agreement. From the reference year 2003 onwards, the data collection is based on the Commission Regulation on statistics on science and technology.

Survey on innovation in EU enterprises — Innovat: This domain covers statistics on the number of enterprises having introduced new or improved products or processes, turnover of new and improved products, innovation expenditure, objectives, and hampering factors for innovation in the business enterprise sector (all manufacturing industries and several service industries). The reference year is 1996.

Eurostat in brief

Eurostat is the statistical office of the European Communities, established in 1953.

Our mission is to gather figures from the different European statistical offices in order to provide comparable and harmonised data for the European Union to use in the definition, implementation and analysis of Community policies.

Our statistical products and services are also of great value to Europe's business community, academics, think tanks, librarians, non-governmental organisations (NGOs), the media and citizens.

Our core service is the provision of accurate, reliable and up-to-date statistical data at the European level.

We collect official data from national statistical offices and other organisations and harmonise them. We thus obtain readily comparable data for the European Union as a whole, as well as for the individual Member States and other EU partner countries.

We offer a comprehensive range of printed and electronic publications that, collectively, cover all areas of European statistics, and at every level of detail. Whatever your area of specialisation – and whether you need just statistics or in-depth coverage, with tables, graphs, maps and detailed analysis on your preferred theme – you are sure to find publications in our range that meet your specific requirements.

Providing access to the vast quantities of data we maintain is a natural spin-off from our core service. This comprises three distinct but related channels of dissemination:

■ Our website

Our website provides direct access to all publications in PDF format, press releases and key data. All these products can be downloaded free of charge at

<http://www.europa.eu.int/comm/eurostat/>.

Free access to databases will be available as from 1 October 2004.

■ Our publications

Our publications provide access to both general and specialised information on the entire scope of European statistics. **Hard copies** of Eurostat publications (paper, CD-ROM) can be obtained from the Office for Official Publications of the European Communities sales network against payment.

This Office operates an extensive network of sales offices throughout Europe and beyond, from which you can purchase all Eurostat publications. Online orders are possible via its website at

<http://online.eur-op.eu.int/>.

NB: All prices indicated are exclusive of VAT and shipping charges. For orders, the national VAT will be applied.

■ Our customised data-extraction service

The most precise channel, this service allows you to submit a request to our Data Shops (for addresses, see our website) for very specific statistics and quickly receive the available data that most accurately respond to your needs.

However, this service will no longer be available after 1 October 2004, when our new dissemination policy will be fully adopted.

Eurostat on the internet

<http://www.europa.eu.int/comm/eurostat>

What does the Eurostat website offer?

Our website is updated daily. Visit it today and get:

- direct access to the latest and most complete statistical information available on the European Union, the EU Member States, the euro zone, the EEA and other European partner countries;
- a wide range of free statistical information, including the latest economic, social and other key indicators, plus many more products you can view online or download at no cost, as well as regular press releases;
- alert me – customisable e-mail alerts that inform you immediately when new data or publications on your preferred topics become available;
- specialised access to short-term economic data;
- complete information on all Eurostat products and services.

Industrial production - Energy - Index (2000=100) - EA

Current and previous: The Producer Index is a business cycle indicator showing the output and activity of the industrial sector. It measures variations in the volume of output of value added in the manufacturing sector (ISIC Rev. 2 classification) of economic activities in the European Community, Eurozone, EEA, and other European partner countries.

Our website continues to evolve:

Eurostat has made it easy to access data and publications online and free of charge!

Free data

Some 1 000 tables on many of the European Union policy areas can easily be accessed via the Eurostat website: all free of charge!

The data cover all countries of the European Union, and, in most cases, the European Economic Area and other major countries such as Japan and the United States. The time series usually cover at least one decade.

The Eurostat free *and online* data are up to date at any time and easy to use!

Free publications

Eurostat's expert statisticians analyse their data to make them easier for users to understand. Everyone can now download all Eurostat publications free of charge in PDF format.

Go to Eurostat's website and benefit from our 'free access to publications'
