

NO DATA WITHOUT HARMONISED METADATA

The wine allegory

Why describe data & harmonise metadata?

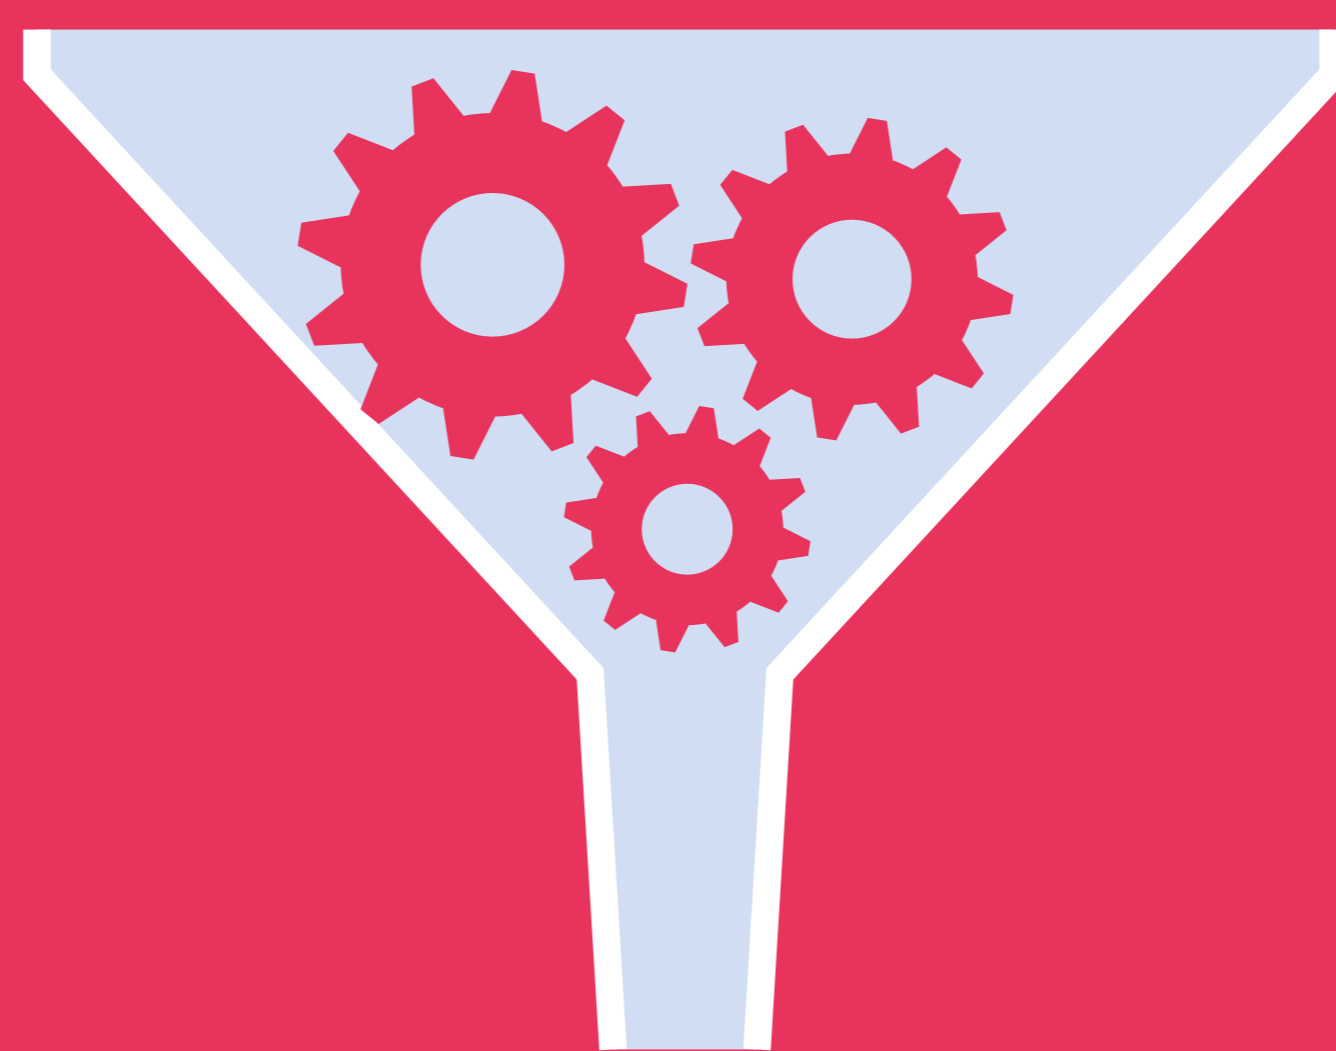

*What is in your glass?
Without context & description
you can't tell!*

It is the same with data!

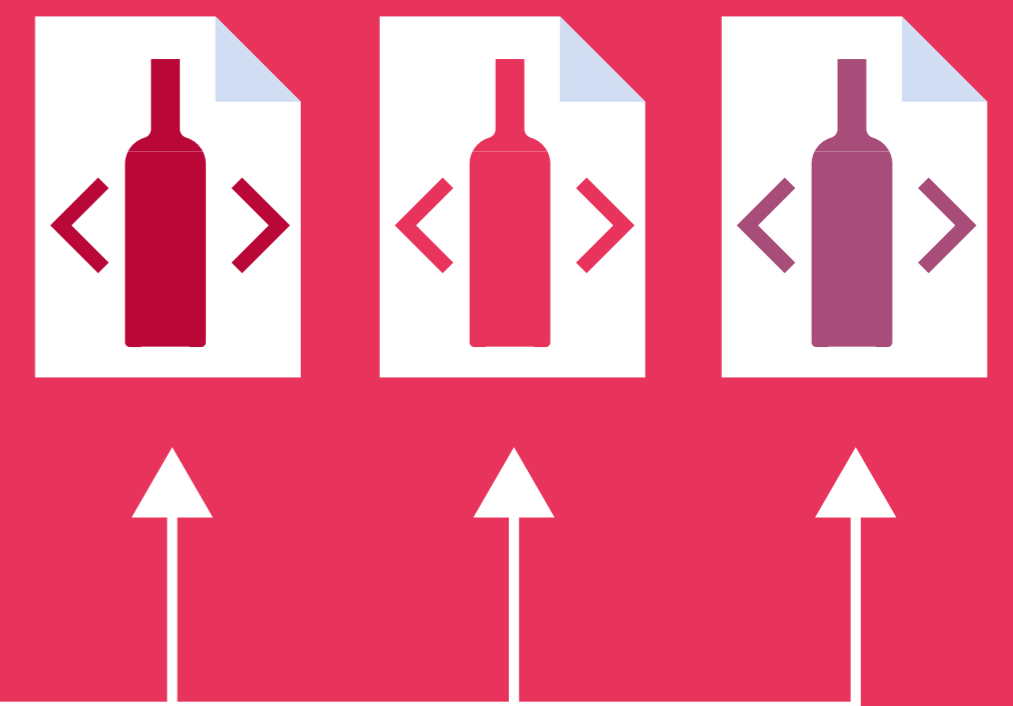

Reference metadata is collected in different formats following diverse standards ...

ESS Metadata Handler

*Thanks to the **ESS Metadata Handler**, metadata is harmonised, structured & standardised ...*

The result!

Harmonised metadata for reliable comparison

Cheers!
