Sustainable development has been at the heart of European policy for a long time, firmly anchored in the European Treaties. The 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs), adopted by the UN General Assembly in 2015, gives a new impetus to global efforts to achieve sustainable development. The EU is committed to playing an active role to maximise progress towards the SDGs, as outlined in its Communication (COM (2016) 739) ‘Next steps for a sustainable European future’(1). Regular monitoring of progress towards the SDGs in an EU context is essential for this purpose.

EU SDG indicator set

This regular monitoring is based on the EU SDG indicator set, developed in cooperation with a large number of partners and stakeholders. The indicator set comprises 100 indicators and is structured along the 17 SDGs. 42 multi-purpose indicators are used to monitor more than one goal.

Monitoring progress towards the SDGs in an EU context

This brochure presents a statistical overview of the most recent trends of the EU SDG indicators over a five-year period (‘short-term’); the specific years depend on data availability for the individual indicators.

It shows EU progress towards the SDGs for the individual indicators and also presents the average progress for each of the 17 SDGs, based on the mean score of the selected indicators for the respective goal, including the multi-purpose indicators. Studies and reports which consider current status rather than progress, different indicators or different time spans may come to different conclusions.

How has the EU progressed towards the SDGs?

On average, over the respective last five-years of available data - based on the mean scores of the selected indicators - the EU has made progress towards almost all goals. Progress in some goals has been faster than in others, and within goals, movement away from the sustainable development objectives also occurred in specific areas. A more detailed description of individual indicator trends can be found in the 17 thematic chapters of this brochure.

Over this five-year period progress appears to have been strongest towards SDG 3 ‘good health and well-being’, followed by SDG 4 ‘quality education’ and SDG 7 ‘affordable and clean energy’.

The EU also made progress towards SDG 11 ‘sustainable cities and communities’, SDG 12 ‘responsible consumption and production’, SDG 5 ‘gender equality’, SDG 8 ‘decent work and economic growth’, SDG 17 ‘partnership for the goals’, and SDG 1 ‘no poverty’, and, to a minor extent, SDG 15 ‘life on land’ and SDG 2 ‘zero hunger’. SDG 9 ‘industry, innovation and infrastructure’ is characterised by an equal number of positive and negative developments of the indicators.

Making progress towards a given goal on average does not necessarily mean that the status of that goal is satisfactory for the EU. For example, in the case of SDG 15, which focuses on terrestrial ecosystems, the selected indicators partly show good progress, but this should not lead to the conclusion that ecosystems or biodiversity in the EU are in good health.

Based on the selected indicators, the EU appears to have moved away from the sustainable development objectives for SDG 10 ‘reduced inequalities’ over the past five years. This is due to the continued rise of income inequalities within EU Member States, a development that is not specific for the past five years but that has already been visible since 2005.

In the case of the four remaining goals – SDG 6 ‘clean water and sanitation’, SDG 13 ‘climate action’, SDG 14 ‘life below water’ and SDG 16 ‘peace, justice and strong institutions’ – trends cannot be calculated due to insufficient data over the past five years.
**EU indicator trends**

The following thematic chapters present short-term indicator trends for each of the 17 SDGs. These trends are assessed following specific quantitative rules. For indicators for which quantitative EU targets exist, the brochure looks at progress towards those targets. This applies to 17 out of the 100 indicators, mainly in the areas of climate, energy consumption, education, poverty and employment. Indicators with an associated quantitative EU target are marked with the following symbol.

Target values for each indicator are listed in Annex 1. All other indicators are analysed according to the direction and speed of change.

The assessment of indicator trends is presented visually in the form of arrows. The direction of the arrows show whether an indicator has moved towards or away from the sustainable development objectives. Depending on the presence or absence of a quantitative EU target, two cases are distinguished:

- **With quantitative EU target**
  - Significant progress towards the EU target
  - Moderate progress towards the EU target
  - Insufficient progress towards the EU target
  - Movement away from the EU target

- **Without quantitative EU target**
  - Significant progress towards SD objectives
  - Moderate progress towards SD objectives
  - Moderate movement away from SD objectives
  - Significant movement away from SD objectives

Assessment of trend not possible (e.g. time series too short)

Eurostat’s publication ‘Sustainable development in the European Union - 2018 monitoring report on progress towards the SDGs in an EU context’ describes the methodology applied and provides a detailed analysis of progress for the individual indicators.

---

**The 2018 EU SDG communication package**

The brochure is part of an EU SDG communication package which comprises a number of products:

- **The 2018 EU SDG monitoring report** provides a detailed description of EU progress towards the 17 SDGs in an EU context.
- **SDGs & me** presents the SDGs in a visual and personalised way, based on a selection of indicators across all 17 SDGs.
- **Looking for the full overview of all Eurostat SDG products and direct access to all Eurostat SDG publications, indicators, key findings, data and much more?** Eurostat SDG dedicated section (http://ec.europa.eu/eurostat/web/sdi/overview).
**SDG 1** calls for an end to poverty in all its manifestations, including extreme poverty, over the next 15 years. It envisions shared prosperity, basic standard of living and social protection benefits for people everywhere, including the poorest and most vulnerable. In order to empower people to raise themselves out of poverty, SDG 1 seeks to ensure equal rights and access to economic and natural resources as well as technology, property and basic and financial services. It also calls for supporting communities affected by conflict and climate-related disasters and emphasises policy commitment and mobilisation of resources as essential levers for accelerating poverty eradication.

The EU focuses on monitoring progress in alleviating multidimensional poverty and in ensuring that the basic needs of EU citizens are met.

**Indicators measuring EU progress towards SDG 1, assessment of short-term trends**

SDG 2 seeks to end hunger and malnutrition, and ensure access to safe, nutritious and sufficient food. Sustainable and resilient food production systems are a key factor in achieving this SDG. Implementing sustainable agricultural practices can help ensure future food security in a scenario of increasing demand and changing climate. Realising these sustainable development objectives is largely dependent on increased investment in rural infrastructure and agricultural research and development. Even with favourable increases in agricultural production, however, food security and improved nutrition will be elusive for many if price and information distortions in world agricultural markets persist. Policy makers have a role to play in promoting sustainable production systems and ensuring proper functioning of food commodity markets and access to market information.

The EU focuses on monitoring progress in fighting against malnutrition, fostering sustainable agricultural production and reducing the adverse impacts of agricultural production.

Indicators measuring EU progress towards SDG 2, assessment of short-term trends

SDG 3 aims to ensure health and well-being for all at all ages by improving reproductive, maternal and child health; ending the epidemics of major communicable diseases; reducing non-communicable and mental diseases. SDG 3 also calls for reducing behavioural (drugs and alcohol abuse, tobacco) as well as environmental health risk factors (traffic accidents, chemicals and air, water and soil pollution and contamination). Main prerequisite for meeting these objectives are universal health coverage; access to sexual and reproductive health-care services and to safe, affordable and effective medicines and vaccines for all. Other crucial steps for addressing persistent and emerging health issues that SDG 3 emphases are support for research and development of vaccines and medicines, increased health financing and health workforces in developing countries and strengthened capacity for early warning and management of health risks.

The EU focuses on monitoring progress in enabling EU citizens to live healthy lives, by monitoring health determinants, causes of death and access to health care.

Indicators measuring EU progress towards SDG 3, assessment of short-term trends

</tbody>
</table>

\(1\) 2012 data refer to EU-27. It should be noted that although the average concentrations of fine particulate matter have decreased during the past five years, the overall adverse health impacts of urban population exposure to air pollution by particulate matter PM 2.5 remain significant. The annual mean for fine particulate matter continues to be above the World Health Organization’s recommended level.

Source: Eurostat (Online data codes: sdg_03_10, sdg_03_20, sdg_02_10, sdg_03_30, sdg_11_50, sdg_11_20, sdg_03_40, sdg_03_41, sdg_08_60, sdg_11_40 and sdg_03_60).
SDG 4 seeks to ensure access to equitable and quality education through all stages of life. Apart from formal qualifications, SDG 4 also aims to increase the number of youth and adults having relevant skills for employment, decent jobs and entrepreneurship. Furthermore, SDG 4 envisions the elimination of gender and income disparities in access to education. The achievement of universal literacy and numeracy and the acquisition of knowledge and skills to promote sustainable development are also considered crucial for empowering people to live independent, healthy and sustainable lives. To accelerate progress with all these objectives, SDG 4 calls for building and upgrading educational facilities, expanding the number of higher education scholarships available to developing countries and increasing the supply of qualified teachers.

The EU focuses on monitoring progress in basic education, tertiary education and adult education.

Indicators measuring EU progress towards SDG 4, assessment of short-term trends

Source: Eurostat (Online data codes: sdg_04_10, sdg_04_30, sdg_04_40, sdg_08_20, sdg_04_20, sdg_04_50, and sdg_04_60)
SDG 5 aims at achieving gender equality by ending all forms of discrimination, violence, and any harmful practices against women and girls in the public and private spheres. It also recognises the importance of universal access to sexual and reproductive health and reproductive rights for combating gender inequality. SDG 5 calls for equal rights, recognition and value of unpaid care and domestic work, and access to economic and natural resources, technology, basic and financial services, and property for women. It also calls for their full and effective participation and equal opportunities for leadership at all levels of political and economic decision-making. The adoption of sound policies and legislation to promote gender equality are seen as essential for eliminating gender discrimination and fostering women’s empowerment in all societal spheres, as is the enhanced use of enabling technologies.

The EU focuses on monitoring progress in abating gender-based violence and in fostering gender equality in education, employment and leadership positions.

**SDG 6** calls for ensuring universal access to safe and affordable drinking water, sanitation and hygiene, and ending open defecation. It also aims at improving water quality and water-use efficiency and encouraging sustainable abstraction and supply of freshwater. Protecting and restoring water-related ecosystems such as forests, mountains, wetlands and rivers is essential for mitigating water scarcity, as is the implementation of integrated water resources management. More international cooperation is also needed to support developing countries in water- and sanitation-related activities and programmes and to help local communities improve water and sanitation management.

The EU focuses on monitoring progress in sanitation efforts, in improving water quality and in increasing water use efficiency.

### Indicators measuring EU progress towards SDG 6, assessment of short-term trends

**Sanitation**
- Lack of sanitary facilities in 2016: 1.9% of population, -0.5 pp since 2011
- Population connected to wastewater treatment in 2015: >80% in 18 reporting Member States

**Water Quality**
- Biochemical oxygen demand in rivers in 2014: 1.9 mg O₂ per litre, -9.3% since 2009
- Nitrates in groundwater in 2012: 19.1 mg NO₃ per litre, -6.4% since 2007
- Phosphate in rivers in 2014: 0.068 mg PO₄ per litre, +1.5% since 2009
- Bathing water quality in 2017: 82.1% of inland water bathing sites with excellent water quality, +13.7 pp since 2012

**Water Use Efficiency**
- Water exploitation index in 2015: sustainable level in 16 of 20 reporting Member States
- Increasing water pressure in 7 EU Member States

---

(¹) Indicators assessed against a quantitative policy target. See Annex 1 for target values.

(²) Data refer to the member countries of the European Environment Agency.

Source: Eurostat (Online data codes: sdg_06_10, sdg_06_20, sdg_06_30, sdg_06_40, sdg_06_50, sdg_14_40 and sdg_06_60)
SDG 7 calls for ensuring universal access to modern energy services, improving energy efficiency and increasing the share of renewable energy. To accelerate the transition to an affordable, reliable, and sustainable energy system, countries need to facilitate access to clean energy research, promote investment in energy infrastructure and clean energy technology. Enhanced international cooperation is also necessary for expanding infrastructure and upgrading technology for energy services in developing countries.

The EU focuses on monitoring progress in reducing its energy consumption, in securing sustainable energy supply and in improving access to affordable energy.

Indicators measuring EU progress towards SDG 7, assessment of short-term trends

Energy Consumption in 2016

- Primary energy consumption: 1543 Mtoe (-3.3% since 2011)
- Final energy consumption: 1108 Mtoe (-0.1% since 2011)
- Energy consumption in households per capita: 557 in kgoe (-1.4% since 2011)
- Energy productivity: EUR 8.4 per kgoe (+9.1% since 2011)
- Emissions from energy consumption: -4.5 index points since 2011

Energy Supply in 2016

- Share of renewable energy: 17% of gross final energy consumption (+3.8 pp since 2011)
- Energy dependence: 53.6% of imports in total energy consumption (-0.4 pp since 2011)

Access to Affordable Energy

- Inability to keep home warm: 8.2% of population in 2017 (-2.0 pp since 2012)

Source: Eurostat (Online data codes: sdg_07_10, sdg_07_11, sdg_07_20, sdg_07_30, sdg_13_20, sdg_07_40, sdg_07_50 and sdg_07_60)

(1) Indicators assessed against a quantitative policy target. See Annex 1 for target values.
SDG 8 recognises the importance of sustained economic growth and high levels of economic productivity for the creation of well-paid quality jobs and the achievement of global prosperity. SDG 8 calls for providing opportunities for full and productive employment and decent work for all while eradicating forced labour, human trafficking and child labour and promoting labour rights and safe and secure working environments. SDG 8 draws particular attention to creating opportunities for the youth who are not in education, employment and training in order to prevent future erosion of skills and job discouragement. SDG 8 also foresees enhanced international cooperation to support growth and decent employment in developing countries through increased Aid for Trade, development-oriented policies and a global strategy for youth employment.

The EU focuses on monitoring progress in fostering sustainable economic growth, in increasing the employment and in providing decent work opportunities.

Indicators measuring EU progress towards SDG 8, assessment of short-term trends

(1) Indicators assessed against a quantitative policy target. See Annex 1 for target values.
SDG 9 calls for building resilient and sustainable infrastructure, which supports sustainable development and human well-being. SDG 9 promotes inclusive and sustainable industrialisation as a core driver for ending poverty and improving standards of living of all people. While it seeks to boost industry’s share of employment and GDP, SDG 9 calls for pursuing industrialisation, which is environmentally sound. SDG 9 also recognises the importance of technological progress and innovation for finding lasting solutions to social, economic and environmental challenges such as provision of new jobs and promotion of resource and energy efficiency. It calls for fostering innovation by enhancing scientific research and technology development, and by upgrading technological capabilities of industrial actors. In order to foster innovation and entrepreneurship, SDG 9 also seeks to increase access to financial services for small-scale enterprises and to bridge the digital divide by increasing access to information and communication technologies. Achieving all of these SDGs requires enhanced international cooperation and support for infrastructure as well as research, innovation and development of technology in developing countries.

The EU focuses on monitoring progress in strengthening R&D and innovation and in fostering sustainable transport.

Indicators measuring EU progress towards SDG 9, assessment of short-term trends

(1) Indicators assessed against a quantitative policy target. See Annex 1 for target values.

R&D AND INNOVATION

- **R&D expenditure in 2016**: 2.03% of GDP (+0.06 pp since 2011)
- **R&D personnel in 2016**: 1.2% of active population (+0.1 pp since 2011)
- **Employment in high-tech manufacturing and knowledge intensive services in 2017**: 45.8% of total employment (+0.9 pp since 2012)
- **Patent applications in 2017**: 54,649 (-3.7% since 2012)

SUSTAINABLE TRANSPORT

- **CO2 emissions from new passenger cars in 2017**: 118.5 g of CO2 per km (-10.3% since 2012 (1))
- **Collective passenger transport in 2016**: 17.1% of total inland passenger-km (+0.3 pp since 2011)
- **Rail and waterways freight transport in 2016**: 23.6% of total inland freight tonne-km (+1.4 pp since 2011)

(1) 2012 data refer to EU-27.

Source: Eurostat (Online data sources: sdg_09_10, sdg_09_30, sdg_09_20, sdg_09_40, sdg_12_30, sdg_09_50 and sdg_09_60)
SDG 10 calls for increasing the income of the bottom 40% of the population and reducing inequalities based on income, sex, age, disability, race, class, ethnicity, religion and opportunity by adopting relevant policies and legislation. It also aims to improve the regulation and monitoring of financial markets and institutions. SDG 10 addresses between-country inequalities by encouraging development assistance and foreign direct investment to the regions with the greatest need, promoting the implementation of the principle of special and differentiated trade treatment for developing countries and the representation of developing countries in decision-making in global economic and financial institutions. SDG 10 seeks to promote social inclusion globally through the facilitation of safe, orderly and regular migration and the reduction of transaction costs of migrant remittances.

The EU focuses on monitoring the progress in reducing inequalities between and within countries and in promoting safe migration and social inclusion.

Indicators measuring EU progress towards SDG 10, assessment of short-term trends

With EU target

Without EU target

(1) Indicators assessed against a quantitative policy target. See Annex 1 for target values.
SDG 11 aims to renew and plan cities and other human settlements in a way that they offer opportunities for all, with access to basic services, energy, housing, transportation, green public spaces and others, while improving resource use and reducing environmental impacts. With sound, risk-informed and smart planning and management, SDG 11 envisions cities as environmentally resilient human settlements, which drive sustainable development, stimulate innovation and foster community cohesion and personal safety. SDG 11 calls for safeguarding the world’s cultural and natural heritage and supporting positive economic, social and environmental links between urban, peri-urban and rural areas. It also stands for enhanced international cooperation and support to least developed countries for building sustainable and resilient buildings.

The EU focuses on monitoring progress in enriching the quality of life in cities and communities, in fostering sustainable transport and in alleviating adverse environmental impacts.

**Indicators measuring EU progress towards SDG 11, assessment of short-term trends**

**QUALITY OF LIFE IN CITIES AND COMMUNITIES**

- **Concentration of particulate matter in 2015**
  - Smaller than 2.5 μm
  - 14.5 μg/m³
  - -19.9% since 2010

- **Overcrowding rate in 2016**
  - 16.6% of population
  - -0.4 pp since 2011

- **Disturbance by noise in 2016**
  - 17.9% of population
  - -1.8 pp since 2011

- **Poor dwelling conditions in 2016**
  - 15.4% of population
  - -0.2 pp since 2011

- **Reported occurrence of crime in 2016**
  - 13% of population
  - -1.1 pp since 2011

**SUSTAINABLE TRANSPORT**

- **Access to public transport in 2012**
  - 20.4% of population with (very) difficult access

- **People killed in road accidents in 2016**
  - 5 per 100,000 persons
  - -18% since 2011

- **Collective passenger transport in 2016**
  - 17.1% of total inland passenger-km
  - +0.3 pp since 2011

**ADVERSE ENVIRONMENTAL IMPACTS**

- **Recycling of municipal waste in 2016**
  - 45.3% of total waste generated
  - +6.1 pp since 2011

- **Artificial land cover in 2015**
  - 367 m² per capita
  - +2.9% since 2012

- **Population connected to wastewater treatment in 2015**
  - >80% in 18 reporting Member States

(*) Indicators assessed against a quantitative policy target. See Annex 1 for target values.
**SDG 12** calls for action on all fronts: adoption of sustainable practices and sustainability reporting by businesses; promotion of sustainable procurement practices and rationalisation of inefficient fossil-fuel subsidies by policy-makers; environmentally-aware lifestyles of consumers; development of new technologies and production and consumption methods by researchers and scientists and others. SDG 12 envisions sustainable consumption and production, which uses resources efficiently, reduces global food and other waste, disposes safely toxic waste and pollutants. It also highlights the importance of strengthening scientific and technological capacity in developing countries to move to sustainable patterns of consumption and production and developing tools to monitor sustainable development impacts for sustainable tourism.

The EU focuses on monitoring progress in decoupling environmental impacts from economic growth, in decreasing energy consumption and in tackling waste generation and management.

**Indicators measuring EU progress towards SDG 12, assessment of short-term trends**

- **With EU target**
  - **Primary energy consumption** 1543 Mtoe, -3.3% since 2011
  - **Final energy consumption** 1108 Mtoe, -0.1% since 2011
  - **Share of renewable energy** 17% of gross final energy consumption, +3.8 pp since 2011

- **Without EU target**
  - **Resource productivity in 2017** EUR 2 per kg DMC, +7.2% since 2012
  - **Energy productivity in 2016** EUR 8.4 per kgoe, +9.1% since 2011
  - **Consumption of toxic chemicals in 2016** 122 million tonnes toxic to the environment, -4.8% since 2011
  - **Generation of waste** 1717 kg per capita, -0.06% since 2010
  - **Recycling rate** 55% of total waste treated, +2 pp since 2010

(*) 2012 data refer to EU-27.
Source: Eurostat (Online data sources: sdg_12_10, sdg_12_20, sdg_07_30, sdg_12_30, sdg_07_10, sdg_07_11, sdg_07_40, sdg_12_41, sdg_12_50 and sdg_12_60)
**SDG 13** seeks to implement the commitment to the United Nations Framework Convention on Climate Change and further operationalising the Green Climate Fund. It aims to strengthen countries’ resilience and adaptive capacity to climate-related hazards and natural disasters by integrating climate change mitigation and adaptation measures into national strategies, policies and planning. This also requires improved education, awareness-raising and capacity on climate change mitigation and adaptation, as envisioned by SDG 13. As the poorest and most vulnerable people are affected the most by climate change impacts, SDG 13 calls specifically for raising capacity for climate-change related planning and management in least developed countries.

The EU focuses on monitoring progress in climate mitigation efforts, in reducing climate impacts and in supporting climate action.

**Indicators measuring EU progress towards SDG 11, assessment of short-term trends**

**CLIMATE IMPACTS**

- Near surface temperature deviation in 2017: Global: 0.99-1.12 °C deviation, compared to 1850 - 1899 average, European: 1.73-1.74 °C deviation, compared to 1850 - 1899 average
- Climate related economic losses in 2016: EUR 9.4 billion
- Ocean acidity in 2014: 8.07 pH value
- Ocean acidification is increasing

**SUPPORT TO CLIMATE ACTION**

- Climate related expenditure in 2016 (1): EUR 20.2 billion
- Covenant of Mayors for Climate and Energy signatories in 2018: 198 million persons

**SDG 14** aims to conserve oceans by achieving healthy and productive oceans and ensuring their sustainable use by implementing international law as reflected in UNCLOS. This includes the safeguarding of marine and coastal ecosystems, conserving at least 10% of coastal and marine areas as well as preventing and reducing marine pollution and the impacts of ocean acidification. The conservation and sustainable use of oceans, seas and marine resources also requires an end to overfishing, destructive and/or illegal fishing practices and the abolition of fisheries subsidies, which contribute to overcapacity and overfishing. SDG 14 seeks to increase economic benefits to small-island developing states and least developed countries from the sustainable use of marine resources and to provide access for small-scale artisanal fishers to marine resources and markets. It also highlights the importance of increasing scientific knowledge, research capacity and marine technology for improving ocean health.

The EU focuses on monitoring progress in advancing marine conservation, in fostering sustainable fisheries and in ensuring healthy oceans.

**SDG 15** seeks to protect, restore and promote the conservation and sustainable use of terrestrial, inland water and mountain ecosystems. This includes efforts and financial resources to sustainably manage forests and halt deforestation, combat desertification, restore degraded land and soil, halt biodiversity loss and protect threatened species. SDG 15 also calls for sharing the benefits from the utilisation of genetic resource and promoting access to such resources as well as reducing the impact of invasive alien species on land and water ecosystems. Integration of ecosystem and biodiversity values into planning processes and poverty reduction strategies and international cooperation for combating poaching and trafficking of protected species are also seen as a priority for protecting life on land.

The EU focuses on monitoring progress in improving the status of ecosystems, in decelerating land degradation and in preserving biodiversity.

SDG 16 intends peaceful and inclusive societies based on respect for human rights, protection of the most vulnerable, the rule of law and good governance at all levels. It also envisions transparent, effective and accountable institutions, which promote non-discriminatory laws and policies, combat corruption, bribery and organised crime and prevent violence, terrorism and crime. SDG 16 calls for responsive, inclusive, participatory and representative decision-making, with an enhanced role of developing countries in institutions of global governance.

The EU focuses on monitoring progress in ensuring peace and personal security, in promoting access to justice and in increasing trust in EU institutions.

Indicators measuring EU progress towards SDG 16, assessment of short-term trends

(**) Indicators assessed against a quantitative policy target. See Annex 1 for target values.
**SDG 17** calls for a universal, rules-based, open, non-discriminatory and equitable multilateral trading system under WTO and the implementation of duty-free and quota-free market access for all least developed countries. It also highlights the importance of global macroeconomic stability and support to developing countries in attaining long-term debt sustainability. Enhanced support to developing countries to increase the availability of quality statistical data and develop measures of progress on the SDGs is also seen essential for delivering on the sustainable development objectives.

The EU focuses on monitoring progress in strengthening global partnership and in improving the financial governance in the EU.

**Indicators measuring EU progress towards SDG 17, assessment of short-term trends**

---

**GLOBAL PARTNERSHIP**

- **Official development assistance in 2017 (1)**
  - 0.5% of gross national income (GNI)
  - +0.1 pp since 2012

- **Financing to developing countries in 2016**
  - EUR 145 billion
  - -5.9% since 2011

- **Imports from developing countries in 2017**
  - EUR 956.5 billion
  - +10.7% since 2012

---

**FINANCIAL GOVERNANCE IN THE EU**

- **General government gross debt in 2017**
  - 81.6% of GDP
  - -2.3 pp since 2012

- **Environmental and labour taxes in 2016**
  - 6.3% of total tax revenues
  - -0.1 pp since 2011
