CURRENT MARKET RENTS

FROM SURVEYS THROUGH ESTATE AGENCIES

TABLE OF CONTENTS

	Pages
Introduction.....	2-3
2014 current market rents	4-5
Comparison of average rent levels for flats	6-7
Trend of rents 2014/2013	8
Typical dwelling sizes	9
Neighbourhoods covered	10-12

**This booklet is distributed among estate agents
that participate in our work.**

We would like to thank them for their kind collaboration.

INTRODUCTION

The rent data presented in this booklet is part of a wider work programme, the objective of which is to compare the relative cost of living of international civil servants, in any place of employment, with that of Brussels, the reference city. The results of this work, carried out by the International Service for Remunerations and Pensions (ISRP) at the OECD and Eurostat, with the assistance of the National Statistical Offices, are used to adjust the salaries of staff in the European Union institutions, the Co-ordinated Organisations¹ and other International Organisations.

The method aims to compare the price of a basket of goods and services purchased by the average international official, in each of the places of employment, with the price of the same basket in Brussels.

Because of the importance of housing costs in the overall expenditure of a household, specific rent surveys are carried out annually through estate agencies. Rent prices are collected around mid-year for precise types of accommodation in pre-selected neighbourhoods. The information obtained, and that derived from similar surveys in earlier years, is used to determine the difference in rental levels for the same type of property between Brussels and each of the other places where the survey is carried out.

ACCOMMODATION

Real estate agents are asked to provide the monthly rent for various types of accommodation, excluding charges and utilities, for an unfurnished property. The quality of the accommodation should be good to very good, but not luxurious.

TYPES OF DWELLINGS SURVEYED:

Five different types of dwellings are surveyed:

- 3-bedroom flats
- 2-bedroom flats
- 1-bedroom flats
- Non-detached houses
- Detached houses

¹ NATO, OECD, European Space Agency, Council of Europe, European Centre for Medium-range Weather Forecasts, European Organisation for the Exploitation of Meteorological Satellites

GENERAL CHARACTERISTICS:

Location:	Residential area of good quality
Year of construction or major modernisation:	Within the last 10 years
Situation:	Middle floor
Outlook:	In good, well-lit position
Finish:	Floors, walls, sanitary fittings, doors, etc. of good quality
Living area:	Total internal habitable area; excluding garage and terraces

DETAILS ON THE LOCATION

Special attention is given to the location, which is a most important determinant for rents. Since the aim of the entire exercise is to compare "like with like", the neighbourhoods surveyed may not necessarily be in those areas where expatriates actually live, but comparable with those actually occupied by officials in Brussels.

These neighbourhoods are described as residential areas of good quality, favoured by expatriates and professional people such as international civil servants, university staff, doctors, managers, etc., who pay their rent themselves (i.e. not paid by their employers).

DETAILS ON THE SURFACE AREA

Within each of the types, there are different sizes for total living space, depending on the housing commonly found in different towns. Rental prices for dwellings surveyed in each town are compared with the rent of dwellings (having the same characteristics and the same surface area) found in Brussels, where a larger sample of housing sizes is considered.

DETAILED DATA

In the following pages, various tables are provided showing the latest rent results, with comparison between the rent costs of flats in different countries, the trend of rents over the last two years, the typical dwelling surface sizes, and the list of neighbourhoods surveyed in each town.

2014 CURRENT MARKET RENTS

Average rent per month given in the local currency
