

# 2020 CURRENT MARKET RENTS ESTIMATES

EXCEPTIONALLY OBTAINED BY UPDATING THE VALUES FROM THE  
2019 SURVEYS WITH ESTATE AGENCIES USING INDICES FROM  
NATIONAL SOURCES

## TABLE OF CONTENTS

	Pages
Introduction .....	2-4
2020 current market rents estimates .....	5-6
Comparison of estimated average rent levels for flats .....	7
Trend of rents 2020/2019.....	8
Surface of dwellings.....	9
Neighbourhoods covered .....	10-13

**This booklet is distributed to real estate agents  
that participate in our work.  
We are grateful for their kind collaboration.**

## INTRODUCTION

The rent data presented in this booklet are part of a wider work programme, the objective of which is to compare the relative cost of living of international civil servants, in any place of employment, with that of Brussels, the reference city. The results of this work, carried out by the International Service for Remunerations and Pensions (ISRP) at the OECD and Eurostat, with the assistance of National Statistical Offices, are used to adjust the salaries of staff in the European Union institutions, the Co-ordinated Organisations<sup>1</sup> and other International Organisations.

The relative cost of living comparison method aims to compare the price of a basket of goods and services purchased by an international official in each duty station, with the price of the same basket of goods and services in Brussels.

Because of the importance of housing costs in the overall expenditure of a household, specific rent surveys are carried out annually in cooperation with relevant real estate agencies. Rent prices are usually collected around mid-year for precise types of accommodation in pre-selected neighbourhoods. The information obtained, and that derived from similar surveys in earlier years, is used to determine the difference in rental prices for the same type of property, between Brussels and each of the other locations where the survey is carried out.

**Due to the exceptional context of the Covid-19 pandemic worldwide in 2020, the surveys could not be conducted in all duty stations with the traditional method of in-person interviews with real estate agencies, and within the usual timeframe required.** As a contingency measure, Eurostat and the ISRP, in coordination with the National Statistical Institutes, made use of rent indices from national consumer price sources to estimate 2020 rent values. Surveys with real estate agents were still conducted in parallel either following the traditional way (in-person interviews) or with an alternative method (such as phone or email interviews) where it was possible, although under an exceptionally different timeline spanning until late autumn. As the few results received by the time of preparation of this booklet were not used in the 2020 annual calculations and still need to be assessed by the Working Group of statistical experts on Articles 64 & 65 of EU Staff regulations, at their next meeting in March 2021, they are not included in this edition.

**The 2020 prices published in this booklet are based on 2019 market rent survey data updated by applying the evolution of rent indices** from June 2019 to June 2020 published by National Statistical Institutes.

## ACCOMMODATION

During the surveys, real estate agents are asked to provide the monthly rent for various types of accommodation, excluding charges and utilities, for an unfurnished property. The quality of the accommodation should be good to very good, but not luxurious.

### TYPES OF DWELLINGS SURVEYED:

Five different types of dwellings are surveyed:

- 3-bedroom flats
- 2-bedroom flats
- 1-bedroom flats
- Non-detached houses
- Detached houses

### GENERAL CHARACTERISTICS:

<b>Location:</b>	Residential area of good quality
<b>Year of construction or major modernisation:</b>	Within the last 10 years
<b>Situation:</b>	Middle floor
<b>Outlook:</b>	In good, well-lit position
<b>Finish:</b>	Floors, walls, sanitary fittings, doors, etc. of good quality
<b>Living area:</b>	Total internal habitable area; excluding garage and terraces

### DETAILS ON THE NEIGHBOURHOODS

Special attention is given to the neighbourhood, which is a most important determinant for rent level. Since the aim of the entire exercise is to compare "like with like", the neighbourhoods surveyed may not necessarily be in those areas where expatriates actually live, but comparable with those actually occupied by officials in Brussels.

These neighbourhoods are described as residential areas of good quality, favoured by expatriates and professional people such as international civil servants, university staff, doctors, managers, etc., who pay their rent themselves (i.e. not paid by their employers).

## **DETAILS ON THE SURFACE AREA**

Within each of the types of accommodation, there are different sizes for total living space, depending on the housing commonly found in each of the different cities. Rental prices for dwellings surveyed in each city are compared with the rent of dwellings (having the same characteristics and the same surface area) found in Brussels, where a larger sample of housing sizes is considered.

## **DETAILED DATA**

In the following pages, various tables are provided showing the latest rent results, the comparison between the rent costs of flats in different countries, the trend of rents over the last two years, the typical dwelling surface sizes, and the list of neighbourhoods surveyed in each city.

## 2020 CURRENT MARKET RENTS ESTIMATES

Average rent per month given in the local currency of each country
