

2022 CURRENT MARKET RENTS

OBTAINED THROUGH SURVEYS WITH ESTATE AGENCIES,
COVERING A SPECIFIC HOUSING SEGMENT

TABLE OF CONTENTS

	Pages
Introduction	2-3
2022 current market rents.....	4-5
Comparison of average rent levels for flats.....	6
Trend of rents 2022/2021.....	7
Typical surface of dwellings	8
Neighbourhoods covered	9-12

**This booklet is distributed to real estate agents
that participate in our work.**

We are grateful to all of them for their valuable collaboration.

INTRODUCTION

The rent data presented in this booklet are part of a wider work programme, the objective of which is to compare the relative cost of living of international civil servants, in any place of employment, with that of Brussels, the reference city. The results of this work, carried out by the International Service for Remunerations and Pensions (ISRP) at the OECD and Eurostat, with the assistance of National Statistical Offices, are used to adjust the salaries of staff in the European Union institutions, the Co-ordinated Organisations¹ and other International Organisations.

The relative cost of living comparison method aims to compare the price of a basket of goods and services purchased by an international official in each duty station, with the price of the same basket of goods and services in Brussels.

Because of the importance of housing costs in the overall expenditure of a household, specific rent surveys are carried out annually in cooperation with relevant real estate agencies. Rent prices are usually collected around mid-year for specific types of accommodation in pre-selected neighbourhoods. The information obtained, and that derived from similar surveys in previous years, is used to determine the difference in rental prices for the same type of property, between Brussels and each of the other locations where the survey is carried out.

ACCOMMODATION

During the surveys, real estate agents are asked to provide the monthly rent figures observed for various types of accommodation, excluding charges and utilities, for an unfurnished property. The quality of the accommodation should be good to very good, but not luxurious.

TYPES OF DWELLINGS SURVEYED:

Five different types of dwellings are surveyed:

- 3-bedroom flats
- 2-bedroom flats
- 1-bedroom flats
- Non-detached houses
- Detached houses

¹ The Co-ordinated Organisations are: the North Atlantic Treaty Organisation (NATO), the Organisation for Economic Co-operation and Development (OECD), the European Space Agency (ESA), the Council of Europe (CoE), the European Centre for Medium-range Weather Forecasts (ECMWF), and the European Organisation for the Exploitation of Meteorological Satellites (EUMETSAT).

GENERAL CHARACTERISTICS OF THE DWELLINGS:

Location:	Residential area of good quality
Year of construction or major modernisation:	Within the last 10 years
Situation:	Middle floor
Outlook:	In good, well-lit position
Finish:	Floors, walls, sanitary fittings, doors, etc. of good quality
Living area:	Total internal habitable area; excluding garage and terraces

DETAILS ON THE NEIGHBOURHOODS

Special attention is given to the neighbourhood, which is one of the most important determinants of the rent level. Since the aim of the entire exercise is to compare "like with like", the neighbourhoods surveyed may not necessarily be in those areas where expatriates actually live, but comparable with those actually occupied by officials in Brussels.

These neighbourhoods are described as residential areas of good quality, favoured by expatriates and professional people such as international civil servants, university staff, doctors, managers, and similar professionals, who pay their rent by themselves (i.e. not paid by their employers).

DETAILS ON THE SURFACE AREA

Within each of the types of accommodation, there are different sizes for total living space, depending on the housing commonly found in each of the different cities. Rental prices for dwellings surveyed in each city are compared with the rent of dwellings (having the same characteristics and the same surface area) found in Brussels, where a larger sample of housing sizes is considered.

DETAILED DATA

The next section offers a series of statistical tables and charts showing the following information in relation to the latest rent survey results:

- Average monthly rent by type of dwelling in the surveyed locations
- Comparison of rent costs of flats in different countries
- Trends of rents over the last two years
- Typical dwelling surface sizes by location
- List of neighbourhoods surveyed in each city

2022 CURRENT MARKET RENTS

Average rent per month given in the local currency of each country
