1. Introduction

This supplementary report should be read in conjunction with the 2020 Annual Eurostat Remuneration Report¹.

It is prepared in accordance with the decision of the Working Group on Article 64 and Article 65 of the Staff Regulations at the March 2015 meeting in Luxembourg to increase transparency by publishing information relating to correction coefficients and the Joint Belgium-Luxembourg index at a greater level of detail, and implements the decision at the March 2017 meeting in Luxembourg to make this information available on the Eurostat Dedicated Section as soon as possible after preparation of the Annual Eurostat Remuneration Report.

Figures are presented according to an approved level of detail as follows:

- **Table 1**: List of 35 "analytical categories" – see **Appendix 1** ;
- **Table 2**: Purchasing power parities for Intra-EU staff² (€1 = ???), together with the percentage movement by comparison to the previous year, and corresponding consumption expenditure weights (‰) - see **Appendix 2** ;
- **Table 3**: Purchasing power parities for pensioners (€1 = ???), together with the percentage movement by comparison to the previous year, and corresponding consumption expenditure weights (‰) - see **Appendix 3** ;
- **Table 4**: Joint Belgium-Luxembourg index³ for the twelve month period, together with expenditure weights (‰) - see **Appendix 4** .

Note: In accordance with the Staff Regulations currently in force, purchasing power in Luxembourg is officially assumed to be equal to that in Brussels. However, in response to user requests, Appendix 1 and Appendix 2 include corresponding hypothetical data for Luxembourg.

Purchasing power parities for Extra-EU staff are not presented below level of global parity, so no tables are included in this supplementary report.

Following ‘Brexit’ with effect from February 2020, the United Kingdom is now treated as an Extra-EU country for staff correction coefficient purposes, so does not feature in Table 2. By contrast, production and publication of correction coefficient continues for existing UK pensioners, thus the UK is included in Table 3.

2. Conclusion

Delegates are invited to take note of the information presented in this document.

¹ Ares(2020)6334499 dated 4 November 2020

² Note: An updated weighting structure was introduced for Brussels. The average impact of replacing the previous weights on global bilateral parities between duty stations and Brussels was +0.4% with standard deviation 0.6%.

³ Note: An updated weighting structure was introduced for Brussels. The impact on the global index of replacing the previous weights was 0.0%.
