# Introduction

This document is an appendix to the Eurostat 2023 report on the annual adjustment of remuneration and pensions<sup>(1)</sup>. While the principal results concerning changes in the cost of living in Belgium and Luxembourg, and the correction coefficients for Intra-EU staff and pensioners, are presented in the main report and appendices 1b and 1c of that report, the purpose of this supplementary report is to present more detailed statistical information at the level of authorised analytical categories<sup>(2)</sup>. This is done to balance user requests for maximum transparency, whilst complying with applicable production constraints.

This appendix is produced and made available on the Eurostat Dedicated Section as soon as possible after completion of the Eurostat Annual Remuneration Report.

Figures are presented according to an approved level of detail as follows:

- **Table 1**: List of 35 "analytical categories" – see **Appendix 1** ;
- **Table 2**: Joint Belgium-Luxembourg index for the twelve month period, together with expenditure weights (‰) - see **Appendix 2** ;
- **Table 3**: Purchasing power parities for Intra-EU staff (€1 = ???), together with the percentage movement by comparison to the previous year, and corresponding consumption expenditure weights (‰) - see **Appendix 3** ;
- **Table 4**: Purchasing power parities for pensioners (€1 = ???), together with the percentage movement by comparison to the previous year, and corresponding consumption expenditure weights (‰) - see **Appendix 4** .

---

<sup>(1)</sup> Ares(2023)7336768 'Eurostat report on the 2023 annual update of remuneration and pensions of EU officials' (main text, together with annex 1).

<sup>(2)</sup> **Regulation 1445/2007** of the European Parliament and of the Council of 11 December 2007 establishes common rules for the provision of basic information on purchasing power parities and for their calculation and dissemination. It sets out minimum rules on publication of information at aggregated level.

- Specific rules agreed with participating Member States regarding dissemination of more detailed price information derived from the European Comparison Programme are set out in Chapter 13 of the Eurostat-OECD methodological manual on purchasing power parities (2012 edition).

Regulation 2494/1995 of the European Council on 23 October 1995 concerning Harmonised Indices of Consumer Prices laid down minimum methodological standards, basic definitions, the scope of the indices, the timetable and frequency for their production and publication. It has now been replaced by **Regulation 2016/792** of the European Parliament and of the Council of 11 May 2016 on harmonised indices of consumer prices and the house price index.

- Rules regarding dissemination of detailed price indices are summarised in Chapter 11 of the Eurostat methodological manual on harmonised indices of consumer prices (2018 edition).

Note: In accordance with the EU Staff Regulations currently in force, the purchasing power parity for staff in Luxembourg City is officially set equal to the value for Brussels, and the purchasing power parity for pensioners in Luxembourg is officially set equal to the value for Belgium. However, in response to requests from other users, Appendix 1 and Appendix 2 of this analytical category report include corresponding hypothetical data for Luxembourg City<sup>(3)</sup> and for Luxembourg<sup>(4)</sup>.

Purchasing power parities for Extra-EU staff are not presented below the level of global parity<sup>(5)</sup>.

With the exception of the information about staff numbers which is obtained from internal Commission services, and the information about consumption expenditure patterns which is compiled by Eurostat from direct surveys of active staff and direct surveys of pensioners, and a direct survey of fee-paying international schools and information compiled about schools and universities within the Eurydice program, all calculations and figures presented in this report are based on data supplied and validated by the responsible authorities in the Member States.

In the tables, indices are shown rounded to 1 decimal place; parities are shown rounded to 3 decimal places (Euro zone) or 4 significant figures; exchange rates are shown with the same format; correction coefficients are shown rounded to 1 decimal place; percentage movements are shown rounded to 1 decimal place.

Important note: the United Kingdom left the European Union with effect from 1 February 2020 and is now a 'third country'. The transition agreement introduced by the withdrawal agreement expired with effect from 31 December 2020. For staff, the United Kingdom is now treated as an Extra-EU country and the production and publication of official correction coefficients for UK staff according to Intra-EU methodology has now ceased<sup>(6)</sup>. Exceptionally, production and publication of correction coefficients for existing UK pensioners continues.

More information about methodology can be found in the detailed procedural manuals for the Joint Belgium-Luxembourg Index<sup>(7)</sup> and the calculation of Intra-EU correction coefficients<sup>(8)</sup>.

- 
- <sup>(3)</sup> The calculation of hypothetical CC for active staff in Luxembourg City is done using identical methodology and data sources to those used to establish staff CC for other Intra-EU duty stations. In the absence of data, standard imputation rules are applied. A specific family budget survey amongst EU staff in Luxembourg has not been organised, thus survey data for partner organisations or average pool consumption weights are used (average pool weights are also used in other places when there are insufficient survey replies due to population size or response rate to establish a robust statistic). The results are shared by Eurostat with partner organisations and are applied to adjust salaries of their staff, notably the European Free Trade Association ('EFTA') since 2018 and the NATO Support and Procurement Agency ('NSPA') since 2021.
- <sup>(4)</sup> The calculation of hypothetical CC for pensioners in Luxembourg is done using identical methodology and data sources to those used to establish pensioner CC for other Member States, including the results of a family budget survey amongst pensioners in Luxembourg.
- <sup>(5)</sup> Extra-EU PPP are established using information from third parties, shared under a trilateral Memorandum of Understanding signed in 2009 between Eurostat, the United Nations International Civil Service Commission and the International Service for Remunerations and Pensions of the Coordinated Organisations. The detailed national consumer price indices for Extra-EU locations are not harmonised.
- <sup>(6)</sup> A supplementary report is prepared by Eurostat for the European Organisation for the Safety of Air Navigation ('EuroControl') and other partner organisations which includes PPP and CC calculated according to Intra-EU methodology for selected Extra-EU locations, including the United Kingdom.
- <sup>(7)</sup> Doc.A6465/14/58rev2 "Methodology for the calculation of the Joint Index" (version March 2020)
- <sup>(8)</sup> Doc.A6465/14/59rev5 "Methodology for the calculation of Intra-EU correction coefficients" (version February 2022)

18	Rents
19	Electricity, gas and other fuels
20	FURNISHINGS, HOUSEHOLD EQUIPMENT AND ROUTINE MAINTENANCE OF THE HOUSE
21	Furniture and furnishings
22	Major household appliances whether electric or not and small electric household appliances
23	HEALTH
24	TRANSPORT
25	Personal transport equipment
26	Transport services
27	COMMUNICATIONS
28	RECREATION AND CULTURE
29	Audio-visual, photographic and information processing equipment
30	EDUCATION
31	HOTELS, CAFES AND RESTAURANTS
32	MISCELLANEOUS GOODS AND SERVICES
33	TOTAL
34	Total excluding rents
35	EXCHANGE RATE

Note: These analytical categories reflect the framework legislation and implementation methodology decisions regarding level of dissemination detail taken by the Expert Working Group on Article 64 & 65 of the Staff Regulations, the Expert Working Group on Purchasing Power Parities (European Comparison Programme) and the Expert Working Group on Price Statistics (Harmonised Index of Consumer Prices). They are consistent with the international standard Classification of Individual Consumption by Purpose (COICOP).
