Eurostat Report
on the Intermediate Update of weightings (correction coefficients) applicable to the remuneration of officials, temporary staff and contract staff of the European Union serving in Extra-EU Delegations

In accordance with Article 64, Annex X and Annex XI of the Staff Regulations applicable to officials and other servants of the European Union

Reference period:
The six months between 1 August 2017 and 1 January 2018 inclusive

EXECUTIVE SUMMARY

In accordance with the Articles 64, Annex X and Annex XI of the Staff Regulations applicable to officials and other servants of the European Union, this report presents the information required for the intermediate update of the weightings (correction coefficients) applicable to the remuneration of EU officials, temporary staff and contract staff of the European Union serving in Extra-EU Delegations which is payable in local currency.

This is the ninth Intermediate Report covering Extra-EU locations which is prepared under the EU Staff Regulations as amended by Regulation 1023/2013.

The previous Annual Update, establishing values applicable with effect from July 2017, was published in the Official Journal on 14th December 2017.

The previous Intermediate Report covered the six months between February 2017 and July 2017 inclusive.

This intermediate report covers the six months period between August 2017 and January 2018 inclusive and, inter alia, it includes:

1) ccMMAAAA (MM=month, AAAA=year; for example CC082017). These six tables show the economic parity, exchange rate and weighting (correction coefficient) established for each location for the month in question.

In accordance with Article 13 of Annex X to the Staff Regulations, an intermediate update to the weightings (correction coefficients) should be made whenever the variation in the economic parity has exceeded 5% since the previously established value (July 2017 or subsequently). Tables are included showing the locations for which this is the case:

3) chgMMAAAA (MM=month, AAAA=year; for example CHG082017)

The report covers 144 Extra-EU duty stations. No value is presented for 11 locations (Afghanistan, Bosnia and Herzegovina (Banja Luka), Indonesia (Banda Aceh), Iran, Iraq, Libya, Somalia, South-Sudan, Syria, Venezuela, and Yemen) mainly due to security constraints affecting the statistical reliability of the information, or due to uncertainty regarding the volatility of the reported inflation.

At January 2018 there were twenty two duty stations with CCs greater than 100. During the six months between August 2017 and January 2018 inclusive, CC for 1 country (West Bank – Gaza Strip) has increased above 100 and CC for 5 countries (Japan, Jordan, New Zealand, Sierra Leone and United States (New-York)) have decreased below 100.

The CC is defined as the economic parity divided by the exchange rate. CCs operate as a percentage adjustment to salaries. As salaries are first expressed in Euros, then converted to local currency using exchange rates, before being multiplied by CCs, it is clear that the exchange rate effect cancels out. If a CC changes solely due to a change in the exchange rate (ie. there is no change in the economic parity) then

local purchasing power will not be impacted.

All figures and calculations contained in this report are based on data (place-to-place price surveys and time-to-time price indices) supplied under the 2009 Memorandum of Understanding signed with the United Nations International Civil Service Commission (UN ICSC) and the International Service for Remuneration and Pensions of the Coordinated Organisations (ISRP)¹, complemented with information compiled directly by Eurostat.

No results of new UN P2P price surveys were introduced between August 2017 and January 2018. For information 23 duty stations, as presented in the previous Result Package, February / July 2017, were updated between February and July 2017.

Updated ISRP PPPs at July 2017 were used for the following 7 duty stations: Canada, Mexico, United States (Washington), Japan, South Korea, Australia and New Zealand.

Updated ECP PPPs at July 2017 were used for the following 5 duty stations: Iceland; Norway; Switzerland (Bern, Geneva); Turkey.

Pending the availability of detailed consumer price indices, updated ECP PPPs at January were not used this time for the following 6 Balkan duty stations: Albania; Bosnia and Herzegovina (Sarajevo & Banja Luka); Former Yugoslav Republic of Macedonia; Montenegro; Serbia.

No new expenditure weights were introduced. The regional weights approved at the March Working Group meeting will be integrated in the next six-monthly report.

The detailed methodology for the calculation of Extra-EU correction coefficients is set out in a procedural manual, the latest version of which (doc.A6465/14/60rev3) was adopted by the Article 64 Working Group in April 2017, and is available for download from the Eurostat free data website:

APPENDICES

- “CC082017” Economic parity, exchange rate, weighting (correction coefficient) for August 2017
- “CC092017” Economic parity, exchange rate, weighting (correction coefficient) for September 2017
- “CC102017” Economic parity, exchange rate, weighting (correction coefficient) for October 2017
- “CC112017” Economic parity, exchange rate, weighting (correction coefficient) for November 2017
- “CC122017” Economic parity, exchange rate, weighting (correction coefficient) for December 2017
- “CC012018” Economic parity, exchange rate, weighting (correction coefficient) for January 2018
-
- “CHG082017” Variation in economic parity exceeds 5%, comparing August 2017 and previous value (July 2017).
- “CHG092017” Variation in economic parity exceeds 5%, comparing September 2017 and previous value (July 2017 or subsequent).
- “CHG102017” Variation in economic parity exceeds 5%, comparing October 2017 and previous value (July 2017 or subsequent).
- “CHG112017” Variation in economic parity exceeds 5%, comparing November 2017 and previous value (July 2017 or subsequent).
- “CHG122017” Variation in economic parity exceeds 5%, comparing December 2017 and previous value (July 2017 or subsequent).
- “CHG012018” Variation in economic parity exceeds 5%, comparing January 2018 and previous value (July 2017 or subsequent).
-
- “PMO 5 per cent Rule period July 2017 or subsequent to January 2018”
Summary table showing the time series of PPP and CC values for which 5% rule generates a change; duty stations with CC>100 are highlighted in bold.
