

# ALI Inventory 2015

Methodological inventory/questionnaire on the  
compiling of Agricultural Labour Input (ALI)

## Questionnaire identification

Country	Poland
Institution	Central Statistical Office.
Author	Agata Cendrowska
Date	2016

## PART A - DATA COLLECTION

---

### A.1 DATA SOURCES

Please indicate below the name and the principal objective of the data sources (direct or indirect) used to compile ALI, indicating for each of them (except for EU surveys) the frequency, the reference period, the enquiry date and the representativeness.

#### A.1.1 PRIMARY SOURCE

##### A.1.1.1 Survey unit

**Farm Structure Survey**

##### A.1.1.2 Scope or coverage

The survey included all agricultural holdings of legal persons and organizational entities without legal personality and private farms selected for agricultural sample survey.

##### A.1.1.3 Frequency of the survey

Every 3 years

##### A.1.1.4 Reference period of the observation

1.06. – 29.07.2016

##### A.1.1.5 Reference period of the results

1.06.2016

##### A.1.1.6 Enquiry date

-

##### A.1.1.7 Representativeness (share of agricultural industry covered by sample)

180 thousand private farms (10% sample), 4500 agricultural holdings of legal persons and organizational entities without legal personality.

#### A.1.2 SECONDARY SOURCE

##### A.1.2.1 Survey unit

**Agricultural Census**

*A.1.2.2 Scope or coverage*

As the full survey on agricultural holdings of natural persons with the area of agricultural land comprising at least 1 ha or smaller than 1 ha but meeting the thresholds; and farms of legal persons and organizational entities without legal personality.  
As a sample survey on agricultural holdings of natural persons with the area of less than 1 ha of agricultural land, not meeting the thresholds.

*A.1.2.3 Frequency of the survey*

Every 10 years

*A.1.2.4 Reference period of the observation*

01.09.- 31.10.2010

*A.1.2.5 Reference period of the results*

30.06.2010

*A.1.2.6 Enquiry date*

-

*A.1.2.7 Representativeness (share of agricultural industry covered by sample)*

The sample on agricultural holdings of natural persons with the area less than 1 ha of agricultural land not meeting the thresholds comprised approx. 150 thousand.

**A.1.3 TERTIARY SOURCE**

*A.1.3.1 Survey unit*

---

## PART B - AWU DEFINITION, FULL-TIME AND PART-TIME WORKING

---

### B.1 ANNUAL WORKING UNIT (AWU) DEFINITION

*B.1.1.1 Annual working days*

**265**

*B.1.1.2 Daily working hours*

**8**

*B.1.1.3 Annual working hours (B1.1.1 \* B1.1.2)*

**2120**

*B.1.1.4 Public holidays (number of days)*

13 days according to the law (4 of which are on a Sunday in 2016.)

*B.1.1.5 Total annual holidays (including public holidays)*

113 total annual holidays in 2016 (52 Saturdays, 52 Sundays, 9 holiday days other than Sunday).

### B.2 FULL-TIME AND PART-TIME WORKING

*B.2.1.1 Is the number of hours worked in a full-time job the same for the self-employed and employees in the agricultural industry? If not, please explain.*

In Poland, it is 2120 hours of work per a year (around 2000 hours for employees in the whole economy, according to the Polish Labour law, but all Saturdays, Sundays and holidays (like Christmas) are counted as non-working days ).

*B.2.1.2 Is the number of hours worked in a full-time job the same for agriculture and other branches of the economy? If not, please explain.*

See explanation in B2.1.1

*B.2.1.3 Do you use the FSS to estimate the volume of part-time work in agriculture? If not, please explain how the estimation is made*

yes

---

## PART C - CLASSIFICATION OF LABOUR INPUT AND COHERENCE WITH EAA

---

*C.1.1.1 Is there a distinction of the volume of work by salaried/non-salaried labour directly available from the data source(s)?*

There are separately surveyed and calculated: the labour input of unpaid workers (contributing family workers and mutual assistance between agricultural holdings), the labour input of paid workers (employees, temporary employees, contracted workers, as well as other workers on agricultural holdings of legal persons and organizational entities without legal personality). Recommendations and explanatory notes are included in the instruction and the questionnaire regarding the particular categories of labour force.

*C.1.1.2 If yes, indicate the data source(s).*

Farm Structure Survey and Agricultural Census

*C.1.1.3 If not, please indicate the source(s) of data and the estimation method(s). (In particular, please indicate in which way the breakdown of the family labour into salaried and non-salaried is made.)*

[Click here to enter text.](#)

*C.1.1.4 How do you treat the labour input in the case of mutual assistance between agricultural holdings without remuneration in cash? (salaried with remuneration in kind, or unsalaried).*

Labour input in case of mutual assistance between agricultural holdings without remuneration in cash is classified as unpaid labour force.

*C.1.1.5 How do you ensure the coherence between "compensation of employees" (EAA) and salaried labour input? Please explain briefly.*

Data on salaried agricultural labour input (in AWU) are used for calculations of compensation of employees, as it is presented in EAA Inventory in point E1.1.6.

---

## PART D - ANNUAL VOLUME OF WORK ESTIMATION

---

Please indicate below how you estimate the annual volume of work.

*D.1.1.1 Is FSS the only data source that you use? If yes, how do you estimate annual data from this single source? Please explain*

Due to lack of the data source for the periods between the FSS surveys it was assumed that over a 3 year-period the transmitted values had stayed at the same level.

*D.1.1.2 Is FSS used in combination with another survey (or other surveys)? If yes, please indicate the data source(s) and the estimation method.*

In the previous years, the attempts were made to estimate the yearly AWU data based on:

- 1) the quarterly results of Labour Force Survey,
- 2) the extrapolation of trends regarding the FSS results from the previous years.

However, no positive results were obtained.  
The update of the data in every three years according to the survey on the structure of agricultural holdings was resumed.

*D.1.1.3 Please explain if you replied NO to both of the above questions.*

Click here to enter text.

---

## PART E - DIFFERENCES IN COVERAGE BETWEEN THE FSS AND THE ALI DATA

---

*E.1.1.1 How do you estimate ALI for the holdings that are excluded from the FSS because of their size? Please indicate the data source(s) and the estimation method.*

Apart from the agricultural census, there is no other survey that includes agricultural holdings excluded from the FSS due to the production volumes. Due to the introduction of the agricultural holding size thresholds, the labour input for the years 2010, 2011, and 2012 was corrected.
