

ALI Inventory 2015

Methodological inventory/questionnaire on the
compiling of Agricultural Labour Input (ALI)

Questionnaire identification

Country	Denmark
Institution	Statistics Denmark
Author	Sisse Schlægelberger
Date	Thursday, 15 March 2018

ALI Inventory 2015

PART A - DATA COLLECTION.....	2
A1 DATA SOURCES	2
PART B - AWU DEFINITION, FULL-TIME AND PART-TIME WORKING	5
B1 ANNUAL WORKING UNIT (AWU) DEFINITION.....	5
B2 FULL-TIME AND PART-TIME WORKING.....	5
PART C - CLASSIFICATION OF LABOUR INPUT AND COHERENCE WITH EAA.....	6
PART D - ANNUAL VOLUME OF WORK ESTIMATION.....	7
PART E - DIFFERENCES IN COVERAGE BETWEEN THE FSS AND THE ALI DATA ...	8

PART A - DATA COLLECTION

A1 DATA SOURCES

Please indicate below the name and the principal objective of the data sources (direct or indirect) used to compile ALI, indicating for each of them (except for EU surveys) the frequency, the reference period, the enquiry date and the representativeness.

A1.1 PRIMARY SOURCE

A1.1.1 Survey unit

FADN is the primary source to compile ALI in Denmark

A1.1.2 Scope or coverage

Covers all farms larger than 10 ha or a Standard Output of 15.000 Euros

A1.1.3 Frequency of the survey

Yearly

A1.1.4 Reference period of the observation

Calender year

A1.1.5 Reference period of the results

Calender year

A1.1.6 Enquiry date

After the period is finished

A1.1.7 Representativeness (share of agricultural industry covered by sample)

App 99 pct of the industry is covered. Corrections is made for farms below the threshold and for "agricultural contract operators".

A1.2 SECONDARY SOURCE

A1.2.1 Survey unit

A1.2.2 *Scope or coverage*

Click here to enter text.

A1.2.3 *Frequency of the survey*

Click here to enter text.

A1.2.4 *Reference period of the observation*

Click here to enter text.

A1.2.5 *Reference period of the results*

Click here to enter text.

A1.2.6 *Enquiry date*

Click here to enter text.

A1.2.7 *Representativeness (share of agricultural industry covered by sample)*

Click here to enter text.

A1.3 TERTIARY SOURCE

A1.3.1 *Survey unit*

Click here to enter text.

A1.3.2 *Scope or coverage*

Click here to enter text.

A1.3.3 *Frequency of the survey*

Click here to enter text.

A1.3.4 *Reference period of the observation*

Click here to enter text.

A1.3.5 *Reference period of the results*

Click here to enter text.

A1.3.6 *Enquiry date*

Click here to enter text.

A1.3.7 Representativeness (share of agricultural industry covered by sample)

Click here to enter text.

PART B - AWU DEFINITION, FULL-TIME AND PART-TIME WORKING

B1 ANNUAL WORKING UNIT (AWU) DEFINITION

B1.1.1 Annual working days

225

B1.1.2 Daily working hours

7,4

*B1.1.3 Annual working hours (B1.1.1 * B1.1.2)*

1665

B1.1.4 Public holidays (number of days)

10

B1.1.5 Total annual holidays (including public holidays)

35

B2 FULL-TIME AND PART-TIME WORKING

B2.1.1 Is the number of hours worked in a full-time job the same for the self-employed and employees in the agricultural industry? If not, please explain.

The data on actually worked hours from FADN is used on as well selfemployed and employees

B2.1.2 Is the number of hours worked in a full-time job the same for agriculture and other branches of the economy? If not, please explain.

Yes

B2.1.3 Do you use the FSS to estimate the volume of part-time work in agriculture? If not, please explain how the estimation is made

No, the information is available from the FADN survey

PART C - CLASSIFICATION OF LABOUR INPUT AND COHERENCE WITH EAA

C1.1.1 Is there a distinction of the volume of work by salaried/non-salaried labour directly available from the data source(s)?

Yes

C1.1.2 If yes, indicate the data source(s).

FADN

C1.1.3 If not, please indicate the source(s) of data and the estimation method(s). (In particular, please indicate in which way the breakdown of the family labour into salaried and non-salaried is made.)

Click here to enter text.

C1.1.4 How do you treat the labour input in the case of mutual assistance between agricultural holdings without remuneration in cash? (salaried with remuneration in kind, or unsalaried).

This is marginal and insignificant so it is not recorded.

C1.1.5 How do you ensure the coherence between "compensation of employees" (EAA) and salaried labour input? Please explain briefly.

The compensation and the salaried labour input is from the same source (FADN) and consistency is a part of data validation

PART D - ANNUAL VOLUME OF WORK ESTIMATION

Please indicate below how you estimate the annual volume of work.

D1.1.1 Is FSS the only data source that you use? If yes, how do you estimate annual data from this single source? Please explain

No

D1.1.2 Is FSS used in combination with another survey (or other surveys)? If yes, please indicate the data source(s) and the estimation method.

No

D1.1.3 Please explain if you replied NO to both of the above questions.

Denmark does not use FSS to estimate ALI, we use the FADN statistics

PART E - DIFFERENCES IN COVERAGE BETWEEN THE FSS AND THE ALI DATA

E1.1.1 How do you estimate ALI for the holdings that are excluded from the FSS because of their size? Please indicate the data source(s) and the estimation method.

It is from calculations on Standard Output estimated the farms below the FSS threshold represents one per cent of labour input.

The difference between the threshold of FADN data and the FSS survey is estimated to represent 3 per cent of the labour input.
