

External Trade by Enterprise Characteristics

Results of the Standardisation Exercise 2006

How to obtain EU publications

Our priced publications are available from EU Bookshop (<http://bookshop.europa.eu>), where you can place an order with the sales agent of your choice.

The Publications Office has a worldwide network of sales agents. You can obtain their contact details by sending a fax to (352) 29 29-42758.

*Europe Direct is a service to help you find answers
to your questions about the European Union*

Freephone number (*):

00 800 6 7 8 9 10 11

(*) Certain mobile telephone operators do not allow access
to 00 800 numbers or these calls may be billed.

More information on the European Union is available on the Internet (<http://europa.eu>).

Luxembourg: Office for Official Publications of the European Communities, 2007

ISBN 978-92-79-04753-4

ISSN 1977-0375

Catalogue number: KS-RA-07-019-EN-N

Theme: External Trade

Collection: Methodologies and working papers

Eurostat is the Statistical Office of the European Communities. Its mission is to provide the European Union with high-quality statistical information. For that purpose, it gathers and analyses figures from the national statistical offices across Europe and provides comparable and harmonised data for the European Union to use in the definition, implementation and analysis of Community policies. Its statistical products and services are also of great value to Europe's business community, professional organisations, academics, librarians, NGOs, the media and citizens.

Eurostat's publications programme consists of several collections:

- **News releases** provide recent information on the Euro-Indicators and on social, economic, regional, agricultural or environmental topics.
- **Statistical books** are larger A4 publications with statistical data and analysis.
- **Pocketbooks** are free of charge publications aiming to give users a set of basic figures on a specific topic.
- **Statistics in focus** provides updated summaries of the main results of surveys, studies and statistical analysis.
- **Data in focus** present the most recent statistics with methodological notes.
- **Methodologies and working papers** are technical publications for statistical experts working in a particular field.

Eurostat publications can be ordered via the EU Bookshop at <http://bookshop.europa.eu>.

All publications are also downloadable free of charge in PDF format from the Eurostat website <http://ec.europa.eu/eurostat>. Furthermore, Eurostat's databases are freely available there, as are tables with the most frequently used and demanded short- and long-term indicators.

Eurostat has set up with the members of the 'European statistical system' (ESS) a network of user support centres which exist in nearly all Member States as well as in some EFTA countries. Their mission is to provide help and guidance to Internet users of European statistical data. Contact details for this support network can be found on Eurostat Internet site.

1. Introduction

International trade statistics are among the most consulted statistics by public and private users. Throughout their long history, their basic character has remained unchanged. Their purpose is to answer questions like “which products countries are importing from or exporting to other countries?” From this perspective it is obvious that the key dimensions in trade statistics are thus partner country and product. This can be seen also in the methodology of trade statistics: international concepts and classifications to define these data elements are largely harmonised.

However, it has been more difficult to reply a question “what kind of businesses are behind these trade flows?” Trade statistics do not present by nature any explicit information on the characteristics of traders. On the other hand, vast amount of data on the structure and evolution of businesses is available in the frame of business statistics, but their variables, concepts and classifications differ from those applied in trade statistics.

From the analytical viewpoint, trade statistics by enterprise characteristics offer many attractive features. They link trade statistics closer to business statistics and allow to answer questions like “what is the contribution of different economic sectors to trade or the share of total trade that small- and medium-sized enterprises account for?” Users of trade statistics would benefit from new information on the profiles of traders while statistics on businesses could be complemented with import and export data.

Coherent compilation of trade statistics by enterprise characteristics requires micro level data linkage. This can be done by establishing a linkage between trade registers and business registers. When key enterprise characteristics from the business registers – most notably activity sector and number of employees – are combined with typical trade variables such as product code and partner country, a more complete and diversified overview on the structure of trade can be made available.

This report presents main findings of the third “Standardisation exercise”, a pilot study co-ordinated by Eurostat. The first two studies were launched in 2002 and 2005¹. The main objective of the study was to obtain information on profiles of European traders by using harmonised methodology, classifications and breakdowns. In this third study some changes to methodology were introduced. Breakdowns were harmonised and indicators on trade concentration and geographical allocation were revised. Thanks to these revisions, it is now possible to achieve more consistency between indicators and better comparability between participating countries.

¹ These reports can be downloaded from Eurostat website: 1st report and 2nd report

2. Methodological notes

2.1. Methodological notes - indicators

Standardisation exercise consists of six indicators. All indicators are calculated for total trade and for three main activity sections: Industry (NACE sections C to E, divisions 10-41), Trade (NACE section G, divisions 50-52) and Others (NACE divisions 01-05, 45, 55-99)². The indicators and their further breakdowns are described below:

Indicator 1: Trade by activity sectors (tables 1.1 - 1.4)

Trade by activity sectors shows the involvement of true economic sectors: how many enterprises were trading and the value they accounted for. The activities are available at 2-digit level of NACE. A breakdown into two size-classes (under 250 and over 250 employees) is also presented.

Indicator 2: Trade by size-classes (tables 2.1 - 2.4)

Trade by size-classes describes the contribution of different sized enterprises to total trade. Enterprises have been allocated to four size-classes (0-9, 10-49, 50-249 and 250+) according to their number of employees. This allows to analyze the impact of trade on employment and to estimate the importance of small-and medium-sized enterprises.

Indicator 3: Concentration of trade (tables 3.1 - 3.4)

Concentration of trade is measured by calculating top 5, 10, 20, etc. enterprises' share of trade.

Indicator 4: Trade by partner countries (tables 4.1 - 4.2)

Trade by partner countries shows how many enterprises were trading with certain partner countries or zones and the value they accounted for.

Indicator 5: Trade by number of partner countries (tables 5.1 - 5.2)

Trade by number of partner countries measures the geographical diversification of external markets.

Indicator 6: Trade by products (tables 6.1 - 6.4)

Trade by products (CPA at 2-digit level) allocates the trade of each commodity to the economic activity of the trading enterprise. This shows which sector was involved in trading of each product. NACE section C-E has been split in two groups: manufacturing industry and other industries. Manufacturing industry is defined here as the industry which typically produces goods classified under given product class. For instance, for CPA product division 27 (basic metals), the manufacturing industry refers to NACE division 27 (manufacture of basic metals).

For each indicator except for table 6, the results are reported in terms of number of enterprises (tables designated as "a") and in terms of trade value (tables designated as "b"). Intra-EU (arrivals and dispatches) and extra-EU (imports and exports) trade flows are reported separately³.

² For details on activity, see chapter 2.2.4.

³ Number of enterprises in intra-and extra-EU trade are not comparable to each other. See chapter 2.2.2 for details.

2.2. Methodological notes - data

2.2.1 Data availability

The following countries have been involved in this project: Belgium, Czech Republic, Denmark, Germany, Estonia, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Austria, Poland, Slovenia, Slovakia, Finland, Sweden, Norway and Iceland⁴.

2.2.2 Trade data

The reference year is 2003.

Data on intra-EU and extra-EU trade are treated separately, due to different data collection systems and thresholds⁵. Extra-EU trade statistics are collected on the basis of the statistical part of the single administrative document (SAD) provided by the Customs authorities.

Intra-EU trade statistics are collected on the basis of the Intrastat declarations provided by the trade operators not exempted from the statistical obligation. Intra-EU trade data does not include data of enterprises whose annual value of trade remains below exemption threshold. These enterprises are mostly small and medium-sized ones. Therefore results for intra- and extra-EU trade, in particular in terms of number of enterprises, are not fully comparable to each other and should be interpreted with caution.

Because the data refers to year before the recent EU enlargement, intra-EU trade covers the trade between EU15 Member States. The trade flows of EU15 Member States (BE, DK, DE, FR, IT, LU, AT, FI, SE) with 10 new Member States and with third countries are treated as extra-EU trade⁶. Total trade of these countries, in terms of value, can be compiled by adding intra- and extra-EU trade. Total figures in terms of number of enterprises cannot be calculated by adding intra- and extra-EU trade as the target populations are not mutually exclusive (i.e. the same enterprise can be a trader in both intra- and extra-EU trade).

The data of new Member States (CZ, EE, LV, LT, HU, PL, SI, SK) and Efta Countries (NO and IS) with all trading partners are reported under extra-EU trade. These figures correspond to total trade of those countries.

2.2.3 Trade concept

Trade data is compiled according to the EU harmonised concept (special trade), including processing.

2.2.4 Economic activity

The classification of activities is NACE Rev. 1.1, which is designed to categorise data related to statistical units. In the frame of external trade statistics, the NACE Rev. 1.1 classification refers to the economic activity of the trade operators⁷.

2.2.5 Classification of products

CPA (classification of products by activity) distinguishes each type of goods and services in such a way that it is normally produced by only one activity as defined in NACE Rev. 1.1. The link between the CPA and NACE Rev. 1.1 can be seen in the coding. At all levels of the CPA, the coding of the first 4 digits is identical with that used in NACE Rev. 1.1⁸.

External trade statistics by CPA can be derived by using the correspondence table between the product classification used in external trade statistics, the Combined Nomenclature, and the CPA.

⁴ See chapter 2.2.10 for details on data availability for each country.

⁵ More information on the methodology of external trade statistics is available on Eurostat website

⁶ See chapter 2.2.10 for special treatment of Cyprus data.

⁷ See Annex 2 for the list of activities.

⁸ See Annex 3 for the list of products.

2.2.6 Number of employees

The number of employees is defined as those persons who work for an employer and who have a contract of employment and receive compensation in the form of wages, salaries, fees, gratuities, piecework pay or remuneration in kind. The annual average should be considered, and not employment on a particular date. The number of employees must be measured in head counts and not in full-time equivalents.

2.2.7 Geographical breakdown

The Geonomenclature 2003 is used as a reference for all geographical breakdowns⁹.

2.2.8 Confidentiality

The disclosure of confidential data has been done by aggregating two or more cells into one cell. In some cases additional disclosure has been done by hiding cells where the number of traders was less than three. In addition, secondary confidentiality has been applied.

2.2.9 Data presentation

There may be inconsistencies in certain indicators. For instance, the sum of components may differ from the total or there may be differences between tables. These are caused by rounding or inclusion/exclusion of unknown activities or size-classes in the aggregate.

2.2.10 Country notes

Belgium: Indicators 3 and 5 are not available. Only trade value is available for indicators 1 and 2. No data for NACE sectors A, B and L.¹⁰

Czech Republic: No data for NACE sectors A, B and L.

Denmark: Intra-EU indicators include adjustment for non-response that is allocated to unknown activity sector and size-class.

Germany: All indicators are available only for intra-EU trade.

France: Data are calculated according to the national concept, i.e. arrivals and imports are compiled according to the country of origin. Therefore the trade value and the number of enterprises trading with intra-EU trading partners are underestimated in tables 4.1a and 4.1b. Also, the figures presented in tables 5.1a and 5.1b are not comparable with the respective figures of other Member States.

Italy: No data for NACE sectors A, B and L.

Cyprus: Reference year is 2004. Due to the change of data collection system in the middle of the reference year, part of the data allocated to intra-EU trade is collected via customs declarations. Therefore the number of enterprises active in intra-EU trade is overestimated.

No data for NACE sectors A, B and L.

Poland: No data for NACE sectors A, B and L.

Slovenia: No data for NACE sectors A, B and L.

Iceland: Indicators 3, 4, 5 and 6 are not available.

⁹ See Annex 1 for the list of codes and contents of aggregated zones.

¹⁰ Belgium data are affected by indirect trade, i.e. trade declared in Belgium by fiscal representatives which are representing foreign companies.

2.3. Methodological notes – registers

2.3.1 Business Registers

EEC Council Regulation No 2186/93 on business registers for statistical purposes requires Member States to set up business registers of all enterprises carrying out economic activities contributing to the gross domestic product as well as their dependent local units and the legal units responsible for those enterprises. Business registers contain essential identification information, such as name and address, and stratification information, such as number of employees and main economic activity of businesses. All statistical units should be recorded, with the exception of NACE Rev. 1.1 sectors A (01 agriculture and hunting, 02 forestry), B (05 fishing) and L (75 public administration and defence; compulsory social security), whose inclusion is optional.

2.3.2 Trade Registers

EC Regulation No 638/2004, the Basic Regulation for the statistics between Member States, together with various Implementing Regulations, requires Member States to set up a register of intra-Community trade operators. The unit of reference, i.e. trade operator, is generally the legal unit, although the regulations do not define it explicitly. The register of extra-Community trade operators is not mandatory according to the Basic Regulation for the statistics on the European Union's trade with non-member countries (Council Regulation No 1172/95). However, many Member States have established a special register of extra-Community traders. The reference unit for extra-Community traders is likewise the legal unit.

2.3.3 Linking trade and business registers

The regulation concerning business registers defines the link between the business registers and the intra- and extra-Community trade operators. The business registers regulation includes a requirement for specific variables to be kept at legal unit level referring to “intra-Community operators” and to “other associated files, including customs files” (variables 1k and 1j, respectively). Thus the possible link between registers can be obtained through a common unit of reference: the legal unit. The same regulation also defines the link between the legal unit and the enterprise.

2.3.4 Statistical unit

The statistical unit is the enterprise. The Council Regulation (EEC) No 696/93 – statistical units for the observation and analysis of the production system in the Community – defines it as “the smallest combination of legal units that is an organisational unit producing goods or services, which benefits from a certain degree of autonomy in decision-making, especially for the allocation of its current resources. An enterprise carries out one or more activities at one or more locations. An enterprise may be a sole legal unit”.

2.3.5 Matching rates

The matching rate indicates how big share of trade operators recorded in trade registers can be successfully linked with enterprises in business register. Matching may be impaired by various reasons. The most common ones are differences in coverage of registers or missing common identifier.

Reporting country	Arrivals		Dispatches		Imports		Exports

Activity sectors

Activity	Label	Note
Total	All activities	Aggregate of all activities (01-99)
C-E	Industry	Aggregate of activities 10-41
G	Trade	Aggregate of activities 50-52
Others	Other activities	Aggregate of activities 01-05, 45, 55-99
01-05	Agriculture, forestry and fishing	Aggregate of activities 01 (agriculture), 02 (forestry), 05 (fishing)
10-14	Mining and quarrying	Aggregate of activities 10 (Mining of coal and lignite), 11 (Extraction of crude petroleum and natural gas), 12 (Mining of uranium and thorium ores), 13 (Mining of metal ores), 14 (Other mining and quarrying)
15-16	Manufacture of food products, beverages and tobacco	Aggregate of activities 15 (Manufacture of food products and beverages), 16 (Manufacture of tobacco products)
17	Manufacture of textiles	
18	Manufacture of wearing apparel	
19	Manufacture of leather and leather products	
20	Manufacture of wood and wood products	
21	Manufacture of pulp, paper and paper products	
22	Publishing, printing and reproduction of recorded media	
23	Manufacture of coke, refined petroleum products and nuclear fuel	
24	Manufacture of chemicals, chemical products and man-made fibres	
25	Manufacture of rubber and plastic products	
26	Manufacture of other non-metallic mineral products	
27	Manufacture of basic metals	
28	Manufacture of fabricated metal products	
29	Manufacture of machinery and equipment	
30	Manufacture of office machinery and computers	
31	Manufacture of electrical machinery and apparatus	
32	Manufacture of radio, television and communication equipment and apparatus	
33	Manufacture of medical, precision and optical instruments, watches and clocks	
34	Manufacture of motor vehicles, trailers and semi-trailers	
35	Manufacture of other transport equipment	
36-37	Manufacturing n.e.c.	Aggregate of activities 36 (Manufacture of furniture; manufacturing n.e.c.), 37 (Recycling)
40-41	Manufacture and supply of energy products	Aggregate of activities 40 (Electricity, gas, steam and hot water supply), 41 (Collection, purification and distribution of water)
45	Construction	
50	Sale, maintenance and repair of motor vehicles and motorcycles	
51	Wholesale trade and commission trade	
52	Retail trade	
60-64	Transport, storage and communication	Aggregate of activities 60 (Land transport), 61 (Water transport), 62 (Air transport), 63 (Supporting and auxiliary transport activities), 64 (Post and telecommunications)
65-67	Financial intermediation	Aggregate of activities 65 (Financial intermediation), 66 (Insurance and pension funding), 67 (Activities auxiliary to financial intermediation)

Activity	Label	Note
70-74	Real estate, renting and business activities	Aggregate of activities 70 (Real estate activities), 71 (Renting of machinery and equipment), 72 (Computer and related activities), 73 (Research and development), 74 (Other business activities)
Others	Other services	Aggregate of activities 55 (Hotels and restaurants), 75 (Public administration and defence), 80 (Education), 85 (Health and social work), 90 (Sewage and refuse disposal, sanitation and similar activities), 91 (Activities of membership organizations), 92 (Recreational, cultural and sporting activities), 93 (Other service activities)
Unknown	Unknown	Activity 99 (Unknown) or any other reported activity

Products

CPA	Label	Notes
01-05	Products of agriculture, hunting and forestry; fish and other fishing products	Aggregate of products 01 (Products of agriculture, hunting , 02 (Products of forestry, logging) and 05 (Fish and other fishing products)
10-14	Products from mining and quarrying	Aggregate of products 10 (Coal and lignite; peat), 11 (Crude petroleum and natural gas), 12 (Uranium and thorium ores) , 13 (Metal ores) and 14 (Other mining and quarrying products)
15-16	Food products, beverages and tobacco	Aggregate of products 15 (Food products and beverages) and 16 (Tobacco products)
17	Textiles	
18	Wearing apparel	
19	Leather and leather products	
20	Wood and products of wood	
21	Pulp, paper and paper products	
22	Printed matter and recorded media	
23	Coke, refined petroleum products and nuclear fuel	
24	Chemicals, chemical products	
25	Rubber and plastic products	
26	Other non metallic mineral products	
27	Basic metals	
28	Fabricated metal products	
29	Machinery and equipment	
30	Office machinery and computers	
31	Electrical machinery and apparatus	
32	Radio, television and communication equipment and apparatus	
33	Medical, precision and optical instruments; watches and clocks	
34	Motor vehicles, trailers and semi-trailers	
35	Other transport equipment	
36	Furniture; other manufactured goods	
40	Electrical energy, gas, steam and water	
Others	Other products	
Unknown	Unknown products
