

Stable link template

Stable link template is used to create stable links to data sets (main table or data base).

The required syntax is the following:

```
{{Stable link|title=title|code=product code|language=language|mode=view mode}}
```

Examples: `{{Stable link|title=Municipal waste|code=tsien120|language=en|mode=view}}` will give [Municipal waste \(tsien120\)](#) Parameters **language** and **mode** are optional and are set to **en** and **view** by default (i.e. if you provide no value, language=en and mode=view)

Example: `{{Stable link|title=Municipal waste|code=tsien120}}` will give [Municipal waste \(tsien120\)](#) Syntax
