

Currencies within and outside the [European Union \(EU\)](#) are each assigned a three-letter **currency code** , always written in capital letters; the first two letters are the [country code](#) or its equivalent (EU, for instance). Currency codes are often used as abbreviations in statistical analyses, tables, graphs or maps.

Below are some currency codes of EU Member States (19 of which form the [euro area](#) and use the [euro](#) as their common currency), [European Free Trade Association \(EFTA\)](#) Member States, [candidate countries](#) , other European countries and, finally, other countries.

European Union (EU)

European Free Trade Association (EFTA)

EU candidate countries (*also including Iceland, see EFTA, above*)

Western Balkan countries

Other European countries

Non-European countries
