

Glossary:Level crossing accidents

Statistics Explained

Any accident at **level crossings** involving at least one railway vehicle and one or more crossing vehicles, other users of the road such as pedestrians or other objects temporarily present at or near the track.

- Level crossing: Any level intersection between a road and a railway, as authorized by the infrastructure manager and open to public or private road users. Passages between platforms within stations are excluded.
- Road: For the purpose of Rail Accidents Statistics, any public or private road, street or highway, including footpaths and bicycle lane.
