

# Tutorial:Layout rules for tables, graphs and maps, using the Excel add-in

Statistics Explained

*Tutorial updated in July 2023.*

This page describes the layout rules for Eurostat tables and graphs produced with the **Eurostat Excel add-in**, as well as the layout rules for maps. These rules apply to all tables, graphs and maps disseminated through Statistics Explained and some publications in word format as for example Statistical Working Papers and Manuals and Guidelines.

## Eurostat Excel add-in 4.0 / 4.1

The updated version of the Excel add-in for creating Eurostat charts and tables is now available in the EC Store. It exists in 2 versions: one for the colleagues who are using the NET/1 computers (V 4.0) and one for the colleagues who have already migrated to the Welcome platform (V 4.1). **New features include:**

- New Eurostat colour palettes
- Accessibility improvements

For full details of the new features, please see the [Cybernews article](#) from 12 July 2023.
