- Local Agency
- National Agency
- International Agency

* Please specify your type of organisation:

* Is your organisation a non-for-profit one?

- Yes
- No

* Number of staff:

* Main application field(s) of organisation:

- Agriculture and forest management
- Climate and climate change mitigation
- Construction and urban management
- Emergency and security management
- Energy transition
- Environment and biodiversity
- Health and well-being
- Marine management
- Science, media and education
- Tourism and leisure
- Transport/Logistics and infrastructure management

* Main area(s) of expertise: Copernicus Services

- Atmosphere
- Climate Change
- Emergency
- Land
- Marine
- Security
- No specific expertise

* Main area(s) of expertise: Methods and Technologies

- Geovisualisation
- Spatial analysis
- Image processing & analysis
- Data integration & assimilation
- Big (Earth) data
- Geo-AI
- Other

* If other expertise, please specify:

Other interest/expertise:

- Entrepreneurship
- Technology transfer
- Other

* Describe your organization, its mission and objectives:

* Describe your motivation for being involved in the Copernicus Academy network. What are you expecting from your membership, what are your aims?

* Describe how you plan to develop your role as member of the Copernicus Academy.

How are you intending to develop education/outreach/network activities during your first year of your membership (e.g. include Copernicus-related material and modules in existing courses, strengthen the synergies and cooperation between members by sharing knowledge, build a knowledge culture and a strategic think-tank, support innovative products/applications to get to the market...)? How would you contribute to the increase of Copernicus awareness at the national, regional and local level?

Any ideas on the target group that you will address?

* Do you have any academic activity and/or training experience?

If yes, please explain what is currently done and has been done in the past with respect to knowledge transfer

* How would you support bridging the gap between skills and data use and enable Copernicus data uptake in new sectors (e.g.: dedicated university curricula for geology, forestry management)?

* How would you contribute to foster the uptake of the existing open and free space data and information products?

* Describe your experience with promoting the use of Earth Observation data and/or information. Please focus on any successes you have had.

* Are you an applicant from a non-Copernicus Participating country?

- Yes
 No

Please upload a letter of recommendation from a national authority (PDF):
