

Identification of disrupted supply and value chains

Fields marked with * are mandatory.

To help repair the economic and social damage brought by the coronavirus pandemic, kick-start European recovery, and protect and create jobs, the European Commission is proposing a major recovery plan for Europe which was announced on 27 May 2020 in the Communication COM(2020) 456: **Europe's moment: Repair and Prepare for the Next Generation**. It states very clearly that the supply chains and production lines have been disrupted and the trade in goods and services have been interrupted. The crisis has broken up parts of our productive tissue and has affected crucial supply chains. This disruption of production and decline in demand in one Member State will have a significant impact in others. The EU should reduce its dependency on external suppliers and increase its resilience to global supply issues.

The cluster community needs to react promptly to strengthen our supply chains and addressing the issues that were exposed during the crises. Therefore, the **European Clusters Alliance**, under a contract with the **European Commission** and reacting quickly after the publication of the Communication **is identifying these disruptions**.

We ask you to share your knowledge on disrupted supply/value chains in or across industrial ecosystem(s) to find solutions which will strengthen our open strategic autonomy unlocking investments for greener, more digital and resilient Next Generation EU.

Your entity

* Entity name

Our entity is a:

- * Micro enterprise (<10 employees)
- Small enterprise (<50 employees)
- Medium-sized enterprise (<250 employees)
- Large company
- Cluster organisation
- Business network organisation (e.g. sectoral association)
- RTO/science park/incubator/accelerator/living lab and similar
- University
- Public agency
- Association
- Public authority
- Other

We are a:

- Profit organisation
- Non-profit organisation

* Country

- | | | | |

City / region

Disruptions of supply/value chains

* Where is the disruption in the supply/value chain? Do you know why is there a disruption?

What is the impact of the disruption?

e.g. estimation of income loss, number of customers affected

What is the scope of the territorial impact of the disruption?

- EU
- National
- Regional
- Local

Which stage of the supply/value chain is affected?

- Administrative, finance infrastructure (e.g. legal, accounting, financial management)
- Human resource management (e.g. personnel, recruitment, training)
- Research and development (e.g. product and process design, production engineering, testing, validation, IP rights)
- Procurement (e.g. supplier management, funding, specification, standardization, certification)
- Inbound logistics (e.g. raw materials, intermediate inputs, storage)
- Operations (e.g. manufacturing, processing, maintenance)
- Outbound logistics (e.g. dispatch, delivery, invoicing)
- Marketing & Sales (e.g. customer management, order taking, promotion)
- Services (e.g. post-sale services, upgrades)

When did you first know about the disruption?

Is the disruption short-term/temporary or long-term/permanent?

- short-term
- long-term

Possible solutions

Would you suggest possible solutions?

e.g. substitutes, local suppliers

Does fixing the disruption require public intervention?

- Yes
- No

If yes, public intervention should be:

- Regulatory (e.g. change in legislation)
- Technological (e.g. intensifying research)
- Financial (e.g. financing infrastructure)
- Social (e.g. subsidies)

Your ecosystem(s)

Please situate yourself within these industrial ecosystems

	We don't participate at all in this ecosystem	Our activities have a few connections to this ecosystem	About half of our activities cover this ecosystem	Most of our activities cover this ecosystem	This ecosystem is the main focus of our activities
