

The EIC GHG Programme Survey

Fields marked with * are mandatory.

EIC Greenhouse Gas programme: Help the European Innovation Council support you with new green business opportunities.

Introductory Information

Welcome to the EIC Greenhouse Gas-programme, EIC GHG for short.

With this new programme we will offer you, as EIC-beneficiary, the opportunity to participate in co-creation events to develop optimised, cost-effective products/services to reduce GHG emissions. Strategic partners, such as corporates, industrial associations, regions in carbon transition and others will be involved as your possible counterparts. On the other hand we will also offer you the support services, expertise and guidance you need to significantly reduce the greenhouse gas (GHG) emissions of your company.

As a first step in this program, we need to know more about you.

This survey is for companies that are looking to engage in co-creating activities to develop products and services reducing Greenhouse Gas emissions and create new business opportunities, all while reducing environmental footprint (all sectors welcome).

This survey aims to:

- help us better define services and business opportunities for you under the EIC GHG programme ;
- help you reduce your GHG emission by understanding your company's GHG reduction profile ;

- identify your potential solutions to reduce GHG emissions and participate in co-creation activities for optimised cost-effective products / services.

Identification

*** Organisation Name:**

*** Organisation Type:**

- SME
- RTD / University
- Large Enterprise
- Other

If other, please specify:

*** Funding Program:**

- EIC Accelerator
- Fast Track to Innovation (FTI)
- Future and Emerging Technologies (FET)
- Other

If other, please specify:

*** Grant Agreement n.o:**

For quick check:

- EIC Accelerator – <https://sme.easme-web.eu/>
- FTI – <https://fti.easme-web.eu/>
- FET – <https://fetopen.easme-web.eu/>

*** Company Website:**

What is your organisation activity?

* Main activity sector:

If applicable, secondary or other activities:

* What are your clients' markets ?

* Very briefly, what are your main products/services?

* Do you think that your products/services as they are now are still viable in a net zero emissions Europe?

Yes

No

Contact Point

* First Name:

* Last Name:

* Direct Phone:

* Email

* Position:

*** Are you registered in the EIC Community?**

- Yes
- No

You can register here - <https://community-smei.easme-web.eu/>

Co-creating the future European solutions for GHG reduction

*** Is your company developing solutions that may potentially contribute to GHG emissions reduction in other organisations?**

- Yes
- No

*** Can you briefly explain your solution (i.e. Unique Selling Points)?**

*** Does your solution contribute towards increasing** (you may select more than one):

- Resources efficiency
- Processes efficiency
- Prevent pollution
- Avoid the use of toxic materials
- Products durability
- The use of renewables
- Recycling opportunities
- Close cycles (i. e. circular economy opportunities)

For resources efficiency, please specify which type of resource(s) (you may select more than one):

- Water
- Raw Materials
- Energy

For close cycles, please specify:

*** What client sectors does your solution target?**

*** What are the priority partners that you would see as most interesting to involve in co-creation processes for your solution developments (you may select more than one)?**

- Other tech-savvy SMEs
- Corporates
- Industrial Associations
- Regions in carbon transition
- Other

Please specify:

Reducing your company/organisation own GHG emissions

*** Are you strongly dependent on fossil fuels?**

- Yes
- No

*** Are your direct operations energy intensive?**

- Yes
- No

Please elaborate:

*** Are there energy intensive steps required in your value chain?**

- Yes
- No

Please elaborate:

*** Are you transforming or producing goods in your premises?**

- Yes
- No

*** Have you previously performed a carbon footprint assessment?**

- Yes
- No

What is the scope of your emission?

- Scope 1
- Scope 2
- Scope 3

*** Have you identified any actions that could help reduce and/or offset GHG emissions?**

- Yes
- No

Please elaborate:

Have you implemented any of them?

- Yes
- No

If yes, which one?

Please elaborate:

*** Do your products consume energy while used by your customers?**

- Yes
- No

*** Have investors/shareholders/rating agency asked you to provide insights regarding GHG emissions?**

- Yes
- No

Please elaborate:

*** Have you been approached by other stakeholders with requests to provide insights regarding GHG emissions?**

- Customers
- Employees
- Not applicable

*** Have you already identified actions that your competitors have taken to reduce their GHG emissions?**

- Yes
- No

Please elaborate

*** Have you identified any sector-specific actions that could help address climate action (e.g. sectorial guidelines and/or tools to calculate GHG emissions, working groups to create specific labels)?**

- Yes
- No

Please elaborate:

Thank you very much for your collaboration.

Looking forward to your participation in the EIC GHG services.
