Ireland's Open Data Impact Assessment Survey

Fields marked with * are mandatory.

You are invited to participate in a research project to understand and measure the impact of Ireland's open data.

BACKGROUND

The Department of Public Expenditure and Reform (DPER) has policy responsibility for Ireland's national Open Data initiative. Ireland's Open Data Strategy for 2017-2022 sets out the strategic objective, critical success factors and a plan for the implementation of Open Data policy in Ireland. Increased emphasis is now being put on measuring the impact of open data. Outputs from this project will be used to inform the implementation and continued development of Open Data policy in Ireland and as input to OECD and EC surveys and reports.

Your responses to this survey will help us evaluate the socio-economic impact of Ireland's open data at both micro and macro level.

The survey is brief and will only take about 15 minutes to complete.

VOUNTARY PARTICIPATION & CONFIDENTIALITY

Your participation in the survey is voluntary however, we would be very grateful for your participation and your contribution to advancing open data in the country. Individual responses to this survey will only be used by the Open Data UnitlGovernment ReformIDPER and will be kept securely. No responses will be attributed to individuals in the analysis of the survey and the identity of respondents will be protected. No personally identifiable information will be associated with your responses to any reports of these data. If at any stage, you wish to end your participation and/or remove your information from this study you can do so by contacting the researcher working on this project at any time.

SHARING AGGREGATE RESULTS

To contribute to a shared learning around open data, aggregate statistics from this survey may be released online during the project and/or when the project is completed. No personally identifying information will be included in this release. The analysis and commentary from this study will be shared on completion under an open license.

CONTACT

If you have questions at any time about the project or the procedures, you may contact the lead researcher of this project, Dr. Fatemeh Ahmadi Zeleti (fatemeh.ahmadizeleti@per.gov.ie)

Thank you very much for your time and cooperation.

I accept your Terms

| Onen Data Impact |
| Open Data Impact |

There are many different types of data that government and public sector organizations can release as open data.

| s an individual who is involved in open data activities, do you know what Open Data Impact means? | |
|---|---|
| I know what it means | |
| I do not know what it means | |
| I am not sure what I know is correct | |
| | |
| o you know the meaning or have a formal definition of 'Open Data Impact' in your organization? | |
| I know what it means but, in our organisation, we do not have a formal definition yet | |
| We have a formal definition set in our organization | |
| I do NOT know what it means and, in our organization, we do not have a formal definition set yet | |
| | |
| you know the definition yourself or have a formal definition in your organization, could you please define 'Open | l |
| ata Impact' in the box below? | |
| | |
| | |
| | |
| | |
| o you think the impact of open data could be assessed/measured? | |
| Yes, the impact of open data can be assessed/measured | |
| No, it is not possible to measure the impact of open data | |
| Not sure | |
| Not sure | |
